

participation in the train robbery of Chicago & Alton Railroad, claims to prove an alibi. If innocent, will serve out his unexpired term of imprisonment.

SETHAGE, N. Y., 17.—Forest fires are spreading rapidly in this city. Crops, stock and many buildings are burned. Twenty families in Crisp settlement have been destroyed since Thursday.

ELBERON, 19, 9.15 a.m.—The condition of the President this a.m. was unfavorable. Shortly after the issue of the evening bulletin a chill lasting fifteen minutes. The febrile rise following continued until midnight, during which the pulse ranged from 112 to 140. The sweating that followed was quite profuse; the cough which troubled him during the chill, him but little annoyance the remainder of the night. This a.m. the temperature was 98.8, the pulse 108 and feeble, the respiration 16. At 8.30 another chill came, on account of which the dressing was temporarily postponed. A bulletin was issued at 12.30 p.m.

ELBERON, 19, 10 a.m.—The President had a rigor of 100.

WASHINGTON, 19, 10 a.m.—Dr. Boynton says that the prevalence of the rigor of the President's pulse went up to 143 and was very feeble. At this time it has decreased to about 140. The patient is extremely weak and there is cause for great concern. Dr. Bliss is of the opinion that the President may die in one or two days should they continue to be present.

WASHINGTON, 19, 10 a.m.—The members of the cabinet excepting Mr. Lincoln came to Elberon at 10 o'clock and are now sitting on the piazza of Attorney General McVeagh's cottage.

WASHINGTON, 19.—At noon the following dispatch was received at the War Department from Attorney General McVeagh at Long Branch: Another chill occurred at 10 o'clock and outsiders look for it at any moment. The doctors to dispel this feeling but without success.

WASHINGTON, 19.—A few minutes later the Attorney General sent the following dispatch: A chill still continues. Pulse is 140 and he is growing weaker. Dr. Bliss has just gone to Frankfort Cottage to make the noon examination. The bulletin is awaited with intense anxiety. The members of the cabinet still remain at McVeagh's cottage.

WASHINGTON, 19.—The following official bulletin has just been issued: The chill from which the President was suffering at the time the evening bulletin was issued lasted about 15 minutes, and was followed by a febrile rise of temperature and sweating. He has slept much of the time, but his general condition is not materially changed since. Temperature 98.2, pulse 105, respiration 20.

WASHINGTON, 19.—The Secretary Lincoln is expected to arrive to-night or to-morrow.

NEW YORK, 19.—The Evening Post Dr. Boynton says the President is very low; his mind is wandering, and he says little or nothing. When asked if the coughing had an unfavorable effect upon the wound, the doctor said, "No, he has got used to that."

NEW YORK, 19.—The President spoke very frankly. He said the President was very low and had no signs of recovery. Chills were to be expected now at any time and their continuance must be fatal. He could not foretell the course of the disease.

NEW YORK, 19.—If it came, would probably be from exhaustion and would not be fatal. The temperature during the last chill was very threatening and they were of course doing what they could to modify the severity of the chill and suffering of the patient. Blood poisoning is evidently present to a pronounced degree. Dr. Bliss says he cannot really give encouragement. Being asked whether the final result is to be expected in hours or days he said it might be in a day or two. Dr. Bliss frequently said he might be taken in a chill, or at any time before he knew it.

NEW YORK, 19.—Boynton says "there" is no longer any hope.

NEW YORK, 19.—Boynton said, this morning, the President passed the most quiet night he had experienced since he was shot. The reason for this he fully accounted in the extreme weakness of the patient. He is fearfully weak and debilitated. The Dr. explained the occurrence of the chill. It appears the chill came on

while the morning dressing was in progress, and the dressing had to be stopped on account of this occurrence. The patient first complained of feeling cold, and almost immediately was attacked with a severe shaking. During the time the chill prevailed, Dr. Bliss says vomiting and severe retching occurred. The rigor was of about 20 minutes duration. After it passed off, the patient became comparatively comfortable and partook of some nourishment, and his pulse fell about three beats, to 140, while the chill was on, the pulse was 143 and very feeble.

MacVeagh on behalf of the cabinet has officially notified the manager of the Western Union Telegraph Co., to hold a special wire from Elberon for the exclusive use of the government at a moment's notice. A corps of couriers has been organized between the telegraph office at Elberon and the West End for press and private dispatches.

NEW YORK, 19.—Vice-President Arthur received the following from Attorney General MacVeagh: Elberon, 10 a.m.—Vice-President Chester A. Arthur, New York:

It is impossible to conceal from ourselves that the President is rapidly growing worse. The two chills occurring within 14 hours warn us to be prepared for any affliction with which God in his mercy may afflict us.

(Signed) MACVEAGH.

Dr. Agnew admits that the chills were caused by the extension of the lung trouble. This has not been acknowledged by any physicians except Boynton, before. The stoppage in expectionation was not a good sign, as it indicates that pent up pus is retained in the lungs. The pulse during the last chill was so weak and feeble it could not be counted beyond 146, but it went higher than that. The President is not improving. He may last a week and may last longer. It is impossible to make any predictions, but the President's condition is about as bad as it can be.

NEW YORK, 19.—The Post has the following: Agnew says there is no hope.

WASHINGTON, 19.—Private dispatches from Long Branch say that Mrs. Garfield has abandoned all hope.

Long Branch, 2 p.m.—Dr. Boynton says the President is perceptibly weaker than yesterday. There was considerable mental disturbance last night and there has been more or less delirium. Nothing encouraging to report so far. This afternoon he takes his nourishment and stimulants as usual.

WASHINGTON, N. J., 19.—The Star Parlor Organ Co's and Beatty's immense organ factories burned. Loss estimated \$200,000, partially insured; 400 men out of employment.

A large timber fire is raging in Marion County, New York, 68,000 acres are burned over, and flames still raging.

FOREIGN.

PARIS, 17.—The public are becoming alive to the nature of the situation in Tunis, a seriousness which is shown by the fact that the measure ordered in the circular of the Chief Staff, directing that the strength of all battalions sent to Africa be 600, is calculated to call for twenty to thirty million francs. The optimistic semi-official telegrams are distrusted, even the Republican journals are expressing distrust of General Logerot's ability to grasp the situation. It is stated that besides that he is hampered by instructions from home. The accounts of the operations are conflicting. Correspondents state that the selection of the route from the advance on Kairawan via Zaghawan has led the French into a rough and difficult country, where water is scarce, whereas they might have found a better route if they had advanced from the direction of Susa. Because of the difficulty concerning water, Gen. Subator, who is advancing to the aid of Zaghawan was unable to effect anything beyond a skirmish. The French loss was not heavy, and generally they have a nominal advantage but have done nothing which will have any tendency to arouse native resistance. Gen. Cornard, whose forces were intended to co-operate with Subator, was similarly unable to make any progress. The French papers express the fear that through general aimlessness the operations may become a serious disaster through the force being cut off in the interior. Meanwhile the State at Algeria is

threatened. It is said a conspiracy to massacre Europeans was only narrowly frustrated by recent arrests of Algerian Cadis.

KIEL, 17.—The Emperor, with a large and brilliant suite, arrived here at 6 o'clock from Itzehoe, where the Kaiser witnessed maneuvers. He was greeted with great acclamation by the populace, who thronged the streets along the route to the Schloss. A curious incident occurred in the harbor to-day. An old transport ship, the *Elbe*, which was to have been blown up to-morrow by the fish torpedoes, sank because it was too heavily ballasted. The *Elbe* has been replaced by another more costly vessel; thus the very interesting experiment will not be interrupted. At night, the harbor and suburbs of the town on the western shore were brilliantly illuminated with Chinese lanterns and electric lights.

LONDON, 17.—Previous to the closing of the Trades Union Congress to-day, a letter from the American Minister—Lowell—was read, thanking the friendly and sympathetic feelings it had expressed relative to President Garfield.

Thirteen cotton mills at Ashton-under-Lyne, representing 600,000 spindles, closed to-day for one week.

BERLIN, 17.—The *New Free Press* and *Völkische Zeitung* have been confiscated for adverse remarks on the appointment of Count Richard Bismarck, as president of the Administrative Court of Justice.

ST. CATERINES, 17.—The New Welland Canal was opened to-day, and an American stramer, *D. M. Dickerson*, towed through.

LIST OF PASSENGERS

Sailing from Liverpool per S. S. "Wyoming," Sept. 3, 1881.

Swiss and German.

FOR SALT LAKE CITY.

Louisa, Florentine, Maria, Agnes and Albert Pautsch; Rosina Losli; Maria Kupper; Rosa Niederer; Jacob; Maria, Bertha and Gottlieb Nageli.

SPECIAL ANNOUNCEMENT.

I wish to say to my customers, that all those that I hold orders unfilled for Bain Wagons, I will be able to fill them by the 10th inst., as I have now nine carloads in transit, and most of them will be received this week. I am pleased to announce that these will be followed by further shipments; therefore can say to my long neglected customers, that the present orders on my books will be filled immediately on the arrival of these cars, and can say pretty reliably, that I will be able to fill orders promptly hereafter. The great increasing demand for Bain Wagons has been the cause of me failing to supply my trade.

HOWARD SEBREE,
Dealer in Bain Wagon and Agricultural Implements, Salt Lake City and Ogden. dsw
