

OUR POLICE BY AN INDIAN AGENT

A correspondent of the Phoenix Record, writing from St. Thomas, Nov. 25, thus gives his version of some things, as appears in that paper of Dec. 7—

"There are some few facts existing that should be made public, concerning our present Indian Agent, G. W. Ingalls. He has been in the States in this part of the country in a most unusual manner. Not about eighteen months ago he came here, bought all the grain and such goods as the Indians needed, and he was paid in ninety days. The time was short that they said all they could get for their money, and he was without any money. Last summer, in August, I think, he came here again, settled all up fully giving checks on the First National Bank of Utah. The checks were protested, as Mr. Ingalls had not a dollar in his credit. The most of the settlers entrusted their checks with a Captain Bishop, of Salt Lake, a gentleman well known here, and he wrote back here, after a few days, that he had no money. He has done this little job, but all through Utah have the people been gulled and humbugged in the same way. He also made the settlers believe that he was going to establish a reservation here, and authorized them to do anything they wanted, consequently the most of them are not putting in any crops. He has had them raise last year, for bonus checks. They are in pretty close quarters now, and whoever lives to see the coming Spring and Summer will most likely see distressing times with some of the poor settlers in this part of the country. The selling of bogus checks is not only of his line of business any more than the trading of Indian goods to the Indians for money, but he is applying to the building bridges, building of railroads, churches, turnpike roads and other public property in said State, destroyed by the federal army, and he is ordering during the late civil war.

General Howard was also present, but as the charges against him were postponed until to-morrow.
