Condert, in taking the chair, made a brief speech. He said: "How different the outlook from what it was even with our sanguine hopes of 1884. Then we could only make promises; now we can stand upon facts, and we say to all our fellow citizens of the country to whom we made the pledges, point out a single one that we have broken." (Applause.) You were told that a democratic victory means financial distress and ruin! Look about you now. When has our name been more honored at home or abroad? When has our treasury been surfeed more intelligently or honestly? I dak, what promise have we broken or pledges have we left unfuifilled? I refer you to the history of the last three years. It is easy to draw platforms and prate to the history of the last three years. It is easy to draw platforms and prate about moral ideas."

The speaker spoke in terms of praise of the courage and honesty of President Cleveland as exemplified in his tariff message.

Modern science, which has illuminated so many dark corners of nature, has shed a new light op the ominous words of the Scriptures, "The sins of the fathers shall be visited upon the children unto the third and fourth generation." Instances of hereditary disease abound. Fifty per cent of cases of consumption, that fearful destroyer of families, of cancer and scretch, run in families through inheritance. Insanity is hereditary in a marked degree, but, fortunately, like many other hereditary diseases, tends to was itself out, the stock becoming effinct.
