Combination Coming.

The roads throughout the West are actually in a matter that soon after will approach consummation. Action taken in New York or Chicago, according to the Denver Post, Denver, has received advance statements that have been made from the Chicago roads that for a considerable time Eastern and Western have been principals in a gigantic pooling arrangement. It is stated that the main object is to prevent railroad wars and keep up rates. It is also to be the intention to bring about a large saving of operating expense by establishing joint freight and passenger offices, abolishing all minor office associations, consolidating fast freight lines and dispensing with large number of traveling agents and clerks, officials and employees, whose duty it is to solicit business.

Every important road in America, Canada and Mexico, with the exception of the Canadian Pacific, has consented to become a party to the agreement. The report goes further with the statement that the Interstate Commerce commission is said to encourage the movement and its members to have reached the conclusion that if the interstate commerce act must be broken, it would be better to accomplish it in the way that will occasion the least evil.

This means, following the announcement of the control of the big Eastern properties by the Vanderbilt interests, that the scheme is ripe to be put in operation on the lines west of Chicago. The presidents have reached an agreement that has been religiously kept in the payment of ticket commissions and the executives in New York last January harmony has prevailed among all lines, and especially among those roads naturally antagonistic to one another. The Vanderbilt and Harrington interests are strong in the West on the Union Pacific, the reorganized Kansas City, Pittsburg & Omaha, and the Alton and other properties. That has been accomplished in the West can be engineered in the East.

GETTING READY.

Feeding Ahead of Hot Weather.

"No, quite so much meat in springtime; use the cereals, as they heat the blood less." Seasonable advice from an old practitioner.

If one uses some care as to food, the coming hot weather will be passed as comfortably as any season. In fact, a person possessed of a perfectly balanced set of nerves can be happy and comfortable under most any conditions.

The truest food for building up the nervous system to a perfect condition is Grape-Nuts. The makers are skilled in their art, and knowing that nature fills the brain and nerve centers with a soft gray matter which is used up more or less each day and must be replaced (or nervous prostration sets in), and also knowing that this gray matter is made by the combination of albumen and phosphate of potash, they select the parts of the field grain that contain these ingredients, manufacture them in needed materials, ready cooked, predigested, and of a fascinating flavor.

The use of Grape-Nuts quickly proves that it really does rebuild and strengthen the nervous system in a most certain manner. It is sold by all grocers and is in daily use in hundreds of thousands of the best families in America.

mucus membranes it preserves the vital forces.

A constant drain of mucus from the system is known as systematic catarrh. This may occur from any organ of the body. Systematic catarrh is more common in spring and summer than in the winter.

Dr. Rachel A. Magaw, 67 West Jefferson Street, Springfield, Ohio: "Your Pe-ru-na is worth its weight in gold. I feel like a new woman. I can't praise it enough. I spent a great deal of money on doctors, but nothing ever did me any good until I sent to you and tried your Pe-ru-na. I now feel well of the catarrh."

Ralph W. Chulip, of La Porte, Ind., says the following as regards Pe-ru-na for catarrh: "I had been troubled with catarrh for the past eight years. I became so bad a year and a half ago that I took treatment from two different specialists on catarrh. The discharge from my head was dreadful. Finally my stomach became affected, and eight months ago I had to quit work. I lost in weight from 165 pounds to 140. I was completely discouraged. I procured a bottle of Pe-ru-na and had not taken half the bottle, when to my joy and surprise, I began feeling better. My head began to get better; the discharge began to dry up. I kept on, and have now taken two bottles. I have resumed my work, have a good appetite, and have not felt better in ten years. I am now 30, and I thank Pe-ru-na for the way I feel today."

THE BICYCLE NUISANCE.

To the Editor:

Please accept the thanks of the writer and thousands of others for your splendid article in last evening's issue on the bicycle evil that exists in this city.

The article is to the point and fully covers the ground. The nuisance would be too strong.

Something must be done and done quick if for nothing else than the protection of the bicycle riders themselves, for if they continue to override the rights of the people much longer in the manner they have in the past there will be only one alternative for a person who will insist on his rights and that is, if one of these bicycle devils scorchers by him and either knocks him over or else startles him almost out of his wits, to have a gun handy and use it, too. Not a jury in the State could be secured who would convict a person for bringing to the ground one of these scorching devils for one of their almost hourly acts.

On Second South, between First and Fifth West streets, especially on the south side of the street, these scorchers are supreme. This particular walk is one of the most used in the city; hundreds of tourists, besides as many poor people, coming in on the Rio Grande Western, walk up town on this side of the street. What must they think of a city that allows such carrying-ons as this bicycle coasting on a narrow ten-foot sidewalk? And some of these scorchers will insult a man, woman or child who raises a voice in defense of one's rights no matter how great the provocation.

Another thing, the ordinance against teams crossing the walks at the principal street intersections is generally enforced. Why should a fellow on a bicycle be allowed to round a corner faster than if he were driving a team? In other words, why is a bicyclist allowed to ride at a speed of from ten to twenty miles an hour on a sidewalk when a person driving a team or a single rig is not allowed on a sidewalk at all notwithstanding the person with a team could not go at a speed to exceed eight miles an hour?

Some of these fellows go so far as to tell one that any city councilman who would vote to make a bicycle ride in the streets would never be elected to office again. "Think of that," say they, "and then go to bed."

One more matter and I am through. These scorchers make a regular pole out of our city hall park. They fly over the principal thoroughfares as though a life was depending on their making the run through the park in fifteen seconds. If a poor unfortunate pedestrian happens to be scraped or knocked off his pins he can arise and thank his stars that he "isn't killed entirely."

In conclusion I will state that in no other city in the Union, the size of our city, are bicyclists allowed to ride on any sidewalk.

CAMP PONCA'S DEAD.

Their Names to be Engraved on a Monument at That Place.

Any one who died during the winter of 1864-67 at the camp of Ponca, where Neale Knight died, may have their names inscribed on a monument at that place, if the relatives will send the name of the deceased to Newell or Jesse Knight, of Provo, before September, 1900.
