**CASHIERS' CHECKS**  
**PASS AS CURRENCY**

Issued in Denominations of \$1, \$2, \$5, \$10 and \$20 for Convenience of Public.

## HEARINGS IN DISTRICT COURT

Utah Construction Company Will Reduce Working Forces—Death of Mrs. Wadman in Los Angeles.

Ogden, Nov. 14.—The Ogden banks have now issued their first cashier's checks or bank currency in the following denominations, \$1, \$2, \$5, \$10 and \$20, which are being received by the business men and public in general without hesitancy. The bankers report that the money stringency has not affected their business to any great extent, that those who were doing business with them before the slump in the money market are still banking as usual, and while the rule still governs the banks that not more than \$50 shall be paid out at one time to any person, it has been complied with readily by the business men especially, and up to the present time it has not worked any hardship.

## DISTRICT COURT.

Asks for Guardian for Little John Leavitt—O. C. White Wins Suit.

Ogden, Nov. 14.—In the district court the case of O. C. White against Willard

Manager, E. A. Leavitt, 404 24th St. Telephone 124-k.  
Advertisements for the Daily, Saturday and Semi-Weekly News accepted on the basis of space as at the Salt Lake Office.  
Circulator, John J. McGregor, 104 Wash. Ave. Telephone Bell 594; Ind. 50.  
Payments for the Daily, Saturday and Semi-Weekly News should be made to the circulator. Delivery made in Ogden on the same terms as in Salt Lake.

Kay, was tried yesterday. The suit was brought to recover \$31 alleged to be due as part commission on a real estate deal transacted by the two real estate dealers. The allegation in the complaint was substantiated by testimony and a verdict was rendered in favor of the plaintiff for the amount prayed for together with interest.

Ogden, Nov. 14.—Attorney Agre appeared before Judge Howell in the district court, and asked for the appointment of a guardian of John Leavitt, the little 4-year-old son of J. W. Leavitt, the switchman who was killed Sunday morning in the local yards, leaving the child an orphan in the world. Mr. Leavitt left an insurance policy in the Woodmen of the World for \$2,000, which provides that the money at his death should be paid to the devisee, who was named as his wife, but she died about two months ago, and Mr. Leavitt failed to have the insurance policy changed naming the little son as the devisee, hence before the money can be paid over it will be necessary to have a decree of the court appointing a guardian to receive the money.

The Boyle Furniture company has commenced suit in the second district court against W. Pyper to recover \$275.50, alleged to be due for goods sold to him.  
Gillian M. Bancroft has filed petition in the district court for his appointment as administrator of the estate of De Witt Bancroft, which consists of \$1,020, to which petitioner sets forth he is the heir.

The \$50,000 damage suit brought by

W. M. Wolf against the Union Pacific has been continued for the term.

## WILL LAY OFF WORKMEN.

The Utah Construction company has decided to gradually cut down its working force at least for a time until the company employs a very large force of men on all its works in the west, and the method to be pursued in retrenching is that when a job of work is completed the men will be paid off and sent to any other job. By this method the cutting down of the force will be gradual and just as soon as the money market is settled the force may be increased again. The company has some very large contracts on the Western Pacific and Oregon roads, which will take a long time.

## DEATH OF MRS. R. H. WADMAN.

Ruben H. Wadman has received the sad announcement that his wife, Caroline Wadman, died yesterday at Los Angeles, aged 39 years. For a long time Mrs. Wadman has not been enjoying good health, but it was thought a change of climate might help her, so with her eldest daughter she went to California, but her physical condition did not improve and death came as a relief to her suffering. Besides her husband four children survive her. She was the daughter of Mr. and Mrs. William T. White. The body will arrive in Ogden tomorrow for burial.

## WANTS TO PLAY FOOTBALL.

The manager of the Chicago high school football team has written the local team requesting a game with them on their western tour during the next month.

## ALWAYS WAS SICK.

When a man says he always was sick-troubled with a cough that lasted all winter, what would you expect? Such a case is that of a man who is now in the hospital at the University of Colorado. For years he was troubled with a severe cough that would last all winter. He tried Hall's Honeycomb Syrup and had a great relief. He now feels better and is able to go to work.

He sold by Z. C. M. J. Drug Dept. 112-114 South Main St.

He, who was married yesterday by Justice William Bringham at the county courthouse.

It expels all poisons, stimulates the internal organs, cleanses the system and purifies the blood. Such is Hall's Rocky Mountain Tea, the most effective preventive of disease. 25 cents. Tea or Tablets, Z. C. M. J. Drug Dept. 112-114 South Main St.

## SPRINGVILLE.

### PIONEER LAD TO REST.

Mrs. Emma Watt Succumbs to Cancer—Close of Best Harvest.

Special Correspondence.

Springville, Nov. 13.—The funeral services over the remains of Mrs. Emma Watt were held here Monday, Nov. 11, at 10 o'clock, at the home of the deceased, Mrs. Watt, in charge. The speakers were: Elders J. S. Boyer, O. M. Mower, and Jas. E. Hall, all of whom spoke in the highest terms of the deceased. She died Nov. 9, of cancer.

Mrs. Watt was left a widow many years ago with a family of small children. She was the daughter of Abraham and Hannah Taylor, born July 3, 1842, at Belper, Derbyshire, England. She was baptized into the Church of Jesus Christ of Latter-day Saints by her father Sept. 3, 1855; came to Utah in 1862, and became the wife of Edwin Watt April 8, 1864.

The best harvest is nearly at an end. There are a number of fever chills in town.

The coal shortage has been relieved by the arrival of several carloads.

The official count for the city election shows that only about one-third of the voters cast their ballots for the Citizens' fusion ticket, as there was no opposition, with about 40 scratched ballots, which is evidence that the people were satisfied to let the choice at the primary be good enough.

An every night all your round medicine, pleasant to take, positive results. It's Hollister's Rocky Mountain Tea, the greatest family remedy. 25 cents. Tea or Tablets, Z. C. M. J. Drug Dept. 112-114 South Main Street.

## EXPERT KODAK FINISHING.

Harry Shipley, Commercial Photographer, 151 Main St.

## ROCK SPRINGS, WYO.

Lively Times in Old Camp—New Sewer System.

Special Correspondence.

Rock Springs, Wyo., Nov. 11.—This little ward has received a new impetus in its growth. Quite a number of families have lately moved here from Utah and other parts of the state. The Mutuals are having an increased attendance and attention. The prospects look bright for a good work being done.

Another elder has been called to the missionary field, which will make two from this small ward.

The mines are full of men and they are working nearly full time. Owing to the reduction of hours worked by the men, there has been a corresponding reduction of coal loaded, which amounts to a little over 2,000 tons per day to the Union Pacific Coal company.

The new sewer system being built by the city is going to prove a great benefit. It is being built of concrete, at a cost of \$12.50 per foot.

## CLEARINGHOUSE CHECKS.

The banks here promise that by December currency will be in circulation as usual. Clearinghouse checks have not worked any hardship here what-ever.

All the new coal mining properties opened are pushing work ahead as rapidly as possible.

## PROF. BELL HOPES TO SOLVE AIRSHIP PROBLEM.

Windsor, Nova Scotia, Nov. 12.—After many years of experimental work the machine with which Alexander Graham Bell hopes to solve the problem of aerial navigation, was successfully launched today. The machine of a large number of close triangles of the invention. The launching took place at Prof. Bell's workshop, Mrs. Bell, in breaking a bottle of champagne over the bow of the ship, declared its name to be the "Signal." The great dream of the workshop were thrown open and the kite was carried to the waters of Bras d'Or lake. Owing to adverse weather, however, a flight was not attempted. The ship, or kite, is a tetrahedron, 13 meters long on top, 19 meters along the bottom by three feet in the depth. It is composed of 3,212 units, or small tetrahedrons, two facets of which are

## IMMENSE OPPORTUNITIES

In All Kinds of Manufacturing in the West.

## PERMANENT PROSPERITY.

Result of Equilibrium of Industrial Efforts. "Produce What We Use and Speculate Less," is Watchword.

We have repeatedly called attention to the necessity of western people looking well to the development and maintenance of industries which supply the necessities and comforts of life, so that our prosperity may have a sure foundation, not attainable when most of our attention and energies are devoted to the speculative enterprises, such as mining. Dependence on a few large measures, on the coast for our various articles of consumption, coupled with the uncertainty of mining operations generally, it is certainly times that western people bend every effort to supply their own needs in all lines, and we should not then be subject to the fluctuations of financial and economic conditions, to such an extent as some sections are.

Some argue that the west cannot successfully compete with eastern enterprises, but we think this sentiment is a result of lethargy or lack of observation.

Our recent state fair answered this objection with such force that all should be convinced of the necessity and duty of striving vigorously to establish permanent wealth and comfort for ourselves.

One of the principal manufacturing exhibitors at the last state fair was a firm who started in business in 1895, with less than \$100 of capital. The founders were mere boys under the legal age, with not even the advantage of previous business training. They, of course, were endowed with the proper qualities of success, viz: courage, intelligent pursuit of their chosen line, and above all willingness to work! None need expect success without these qualities and a keen enjoyment of realizing that while they themselves prosper in legitimate enterprises they are building up the country and blessing their fellows.

At the last fair this concern exhibited not only its principal line of manufacture, on which it received the highest cash prizes and gold medals in competition with many others, but also exhibited many other products of their own manufacture, which embraced all of these packages, containers, labels, advertising matter, special notices, and also many peculiarly rare and difficult articles of manufacture heretofore imported from Europe, or possibly from two or three American concerns. Not only has this Utah enterprise succeeded in producing all the goods in its regular line and developed half a dozen auxiliary enterprises besides, but has met all competition and even invaded the eastern and coast markets with many of its special products. To the astonishment of many visitors to the fair (thousands of whom little realized the possibilities of Utah) this Utah born and bred concern exhibited mail orders from nearly every state in the union, and that too from competing concerns in the very same line of business as our Utah firm, and many times its size, financially and otherwise.

Cases like the above prove conclusively that if our citizens will only give the proper encouragement, and then place a little of their own capital will put it into channels which would assist in producing permanent wealth and income, we would soon be practically freed from the Atlantic coast conditions which result when too many of our citizens get the spirit of speculation to the exclusion of loyal support of more stable industries.

The institution mentioned above, the Startup Candy company, of Provo and Salt Lake, is only one of many that have gradually come to the front in Utah. This Utah born and bred concern is a great credit to the state. They have the largest payroll of any institution in Provo, over \$40,000 being paid annually to over 100 employees, and their buildings cover one-quarter of a city block near the depot.

What the Startup boys have done in the candy business can be done in many other lines of manufacture, and those who can will try, or better others when they do try, many more Utah products may become as famous and profitable as have Startups' candies, chewing gums and fancy boxes. Let us have more manufacturers in the west, as well as our great mining industries, and thus keep an equilibrium.

As used with silk, thus forming a two-winged sail. The sails are arranged to rise, as the result of many tests, the maximum stability with the lightest weight. A hole has been cut through the center of the contrivance to furnish accommodation for the motor and navigator. The ship is also provided with a bow for flying purposes. Three floats are used as a part of the construction to support it while on the lake. A motor with four cylinders of 20 horse power will drive two

screw propellers on the same shaft, but in opposite direction. With the motor in position, the airship weighs 220 pounds.

Prof. Bell says he does not assert that the "Signal" has solved the problem for which it was constructed. He says the threshold has been reached in the development of the machine, and the experiments now to be made will be mainly productive of the furnishing of data for future experiments.

## LOVER COMMITTS SUICIDE.

Victoria, Nov. 13.—David Burnett of East Sooke, shot himself with a rifle at Parsons bridge in front of Miss Lockey, aged 18, because the girl refused to marry him, and died in the hospital.

## RUSSIAN DOUMA.

Predicted it Will Be Dissolved Within Three Weeks.

New York, Nov. 14.—Kelllogg Durland, the author, who was arrested last month in company with William English Wallbridge by Peterburg police, prophesied, in a lecture here, that the third Russian Douma, about to convene in Russia, will be dissolved before three weeks have elapsed.

Mr. Durland charged that the czar is determined not to tolerate the Russian parliament, and that he remarked in the presence of one of Durland's friends:

"I'm going to bring Russia back to where she was 20 years ago when she had no thought for such things as Doumas."

## RUSHING TO OLD HOMES.

Italians, Hungarians and Slavs Fear Hard Winter in the West.

Chicago, Nov. 14.—Italians, Hungarians and Slavs are in a rush to return to their old homes. Prospects of a hard winter in the west and northwest and the pending industrial depression have increased the regular autumnal return to spend the cold months in the old homes.

Several grainloads have left this general region for New York to take passage today on the Canadian liner Pannonia for Italy and Adriatic ports. About 600 passengers were booked through the Chicago agency of the line and 5,000 will be on board.

The Erie railroad recently had a notice before the interstate commerce commission that second class fare from Chicago to New York would be 40 cents and \$10 a month. The railroad said this to meet the expected demand of workmen bound for their native lands.

## FURNISHED BONDS.

Mason and Vanderweide, Charged With Killing Walker, Released.

Durango, Colo., Nov. 12.—William Mason and Joseph Vanderweide who have confessed to the shooting and killing of Joseph A. Walker, the Denver United States secret service operative at the Hepleras coal mine 10 days ago, while he was securing information regarding coal land frauds, were released from the county jail here this afternoon, having furnished satisfactory bonds in the sum of \$2,000 each.

Vanderweide fired the fatal shot which killed Walker, to save Mason's life, he claims. The government official said the shot was fired for the purpose and hope to prove that there was another motive back of the killing.

## SLEEPING SICKNESS.

Prof. Koch Makes Report on His Investigation Into It.

Berlin, Nov. 11.—Prof. Robert Koch, upon whom Emperor William today conferred the title of excellency, in recognition of his services in discovering the cause of the sleeping sickness, the African disease known as "sleeping sickness," has set forth in an official report the details of his prolonged investigation into the disease in the Nyamias region. He supplements the general results previously published by giving a statistical comparison showing that only about 8 per cent of the sleeping sickness cases treated with an autolytic injection died, whereas the great majority of the untreated sleepers who arrived at the mission stations died.

Prof. Koch's investigations showed that the fly which carries the "sleeping sickness" bacteria on the blood of reptiles and animals and even live without it for more than three or four days. The microscope showed that the blood sucked by the flies was chiefly of reptiles. The professor therefore recommends a bounty on crocodile eggs in order to enable the natives to exterminate them. It would be comparatively easy since the crocodiles have certain well marked breeding grounds in the Nyamias district, where the eggs can easily be collected.

Prof. Koch also suggests clearing away the timber around the watering places near the forts and villages where the natives gather, because the flies cannot endure the sunlight and seek the dark, damp underground.

## DANCER FALLS DEAD.

Oakland, Cal., Nov. 12.—Elvira Graedone, a ballet dancer with the Milan Opera company, dropped dead tonight on the stage at "L'Alceste" the opera during the ballet in "Mignon." She was a native of Milan, Italy, 45 years old, and weighed 130 pounds. It is supposed that the exertion of dancing caused her heart to fail.

## FRANCE'S TARIFF REPLY.

Washington, Nov. 12.—Ambassador Jusserand today presented to Secretary Root a formal reply to a proposition outlined by this government for an amendment to the tariff provision stipulated with France which will expire on Dec. 1. Secretary Root has not yet read the reply, but it will be communicated immediately to the bureau of trade relations and also to the departments of the treasury and commerce and labor.

**BIND YOUR MAGAZINES.**  
Old Books, Music and Magazines. Put them in strong new covers for preservation. Many records of value can be saved by having them bound. The "News" bindery can do the work in any form at any price.
