

speech had not been reached up to three o'clock of Friday morning. He ought to publish it in the *Globe*.

MURDER.—We received this morning by Deseret Telegraph line the following:

Fairview, Utah, May 21st.
Early this morning a young Indian woman named Sally Woodward, was found dead under a shed near her residence in this place. She had her throat cut, and also a cut on her hand, supposed to have been received while resisting her murderer. The guilty party is not yet known. An Indian was seen around there yesterday, and a few think it was his work; but the general belief is that some white man committed the deed. She visited a friend last evening, and left for home soon after dark. This was the last seen of her alive. She was purchased from the Indians, when a child, by a lady resident of Fairview and brought up by her.

The affair is creating much excitement here and diligent investigations are being made to discover the murderer."

FOUND.—The bodies of Henry Langford and George Knighton, the two young men who were drowned in the Jordan last week, were recovered on Saturday, the 14th inst. A Coroner's inquest was held on the bodies the same day and a verdict returned in accordance with the circumstances. The remains of the unfortunate young men were buried last Sunday afternoon.

Bishop Stoker, of Bountiful, desires us to express, through the News, the gratitude of the relatives and friends of the deceased to Brothers Thomas Winegar and Ira Reed, and to Brother Van Natti of the 19th Ward; for the valuable aid which they rendered recovering the bodies.

A letter containing the above particulars was mailed to us from Bountiful on Monday the 16th inst., but, strange to say, and yet not very strange either in these days, it has not yet come to hand.

NEW PLAN.—Bishop A. Gardner, of West Jordan, called in this morning and gave us his plan for killing grasshoppers. It consists in driving a flock of sheep hurriedly over a field. He considers it more effectual than any other plan he has seen tried. It is necessary to keep the sheep in a compact herd; and when driven early in morning on a cool day, when the insects are sluggish and inclined to lie still, one, or, at most, two drivings over will completely clear the field of live grasshoppers. The plan, though new in this country, has been practiced extensively in Australia; and, we believe, it is the one generally adopted for annihilating these insects. Brother Gardner thinks that, with a flock of sixteen hundred sheep, they killed ten acres of grasshoppers this morning in about two hours.

POOR "MORMONS."—The following is from the *Cincinnati Chronicle*:

"The Methodists are actively at work in Utah, and have already swallowed up numerous Mormons."

Look out "Mormons," if there are Methodist cannibals loose around here, you had better take warning and keep your eyes "peeled." We do not know of their having taken any "Mormons" around here, yet, but the *Chronicle* says they have, and it must be so.

PAROWAN.—We had a visit this morning from Bishop Dame, of Parowan, who reports that the crops at that settlement are looking much better than usual at this season of the year; and, though the grasshoppers are very bad, the people are subduing them by digging trenches and driving them into them. The people feel well generally, and though their crops were a failure there last year, they still have plenty of breadstuffs to last them till harvest. There is a prospect of all the small grain sown at Beaver being eaten off by the "hoppers," but there is yet time for the late crops if the insects take their flight.

SAD NEWS.—A dispatch from Freeport Illinois, says, that the wife of Governor Shaffer died this morning, after a lingering illness. We sincerely condole with our Governor in his loss, and extend to him the sympathy of all our citizens who are acquainted with him.

FROM MONDAY'S DAILY.

OBITUARY.—We have to-day to record the demise of Bro. Wm. I. Appleby, long and favorably known to many of our readers. He died on Friday, at 3 o'clock p.m., after an illness of three weeks. He suffered from a combination of diseases and had been insensible for several days.

Wm. I. Appleby was the son of Jacob and Mary Appleby, and was born August 13th, 1811, near the village of New Egypt, Monmouth Co., New Jersey. He was a self-taught man, never having attended school after he was nine years of age; but by energy and perseverance he acquired a sound English education. He learned the carpenter and mill-wright business when a young man, and continued to work in that line until 1838, when he was appointed justice of the peace and associate Judge for the county of Burlington, N. J. He also kept a scrivener's office and taught school for some years. He held the office of clerk for the township of Chesterfield, N. J., six or seven years, when he voluntarily resigned it. In 1840 he first heard the gospel preached, and was baptized by Elder Eras-

tus Snow, in September of the same year. Immediately afterwards, he commenced preaching in the evenings, in the house in which he taught his day school, and with such success, that in a few weeks, as the result of his labors, he baptized twenty-six persons. In April, 1841, he visited Nauvoo for the first time to see the Prophet; and from that time until he came to this Territory, he traveled and preached in different parts of the Union with great success. He reached this valley in October, 1849, and was soon afterwards elected a member of the First Legislative Assembly of the State of Deseret, as also one of the Regents of the Deseret University. In the spring of 1856 he started on a mission to the Eastern States and labored there upwards of two years, part of the time assisting Elder John Taylor in editing the *Mormon*. He held the office of Clerk of the United States Supreme Court in this Territory, ever since its first session until quite recently; and was for some years also Clerk of the District Court. His death, though not entirely unlooked for, is a sad blow to his family, with whom we deeply sympathize. His funeral took place yesterday, at eleven o'clock a.m., from the Fourteenth Ward Assembly Rooms, and was largely attended, many of our most prominent citizens being present. The assembly was addressed by Elder Orson Pratt, who delivered a very excellent discourse upon the atonement and resurrection.

PARTICULARS OF THE RECENT MURDER AT FAIRVIEW.—We are under obligation to H. W. Sanderson, Esq., Coroner of Fairview, for the following particulars of the murder at that place on Friday evening last. The report was received by Deseret Telegraph Line:

FAIRVIEW, May 23.

Editor Evening News.—The particulars of the recent murder of the Indian girl, as developed by the inquiry and the diligent search of the best detectives, are as follows: An Indian girl, 16 or 17 years old, who has been living in the family of Mrs. Woodard, of this place, the last five or six years, did her milking, and having brought in the milk just about dark, she went out into the corral, and is supposed to have met some person there who murdered her, as she was found in the corral with her throat cut apparently with a keen pocket knife, done at two slashes, going to the bone each time. Every exertion, up to the present, has failed in discovering anything that would be sufficient evidence to lead to the discovery of the perpetrator of the deed, or the cause for committing the same. An Indian had been seen in the vicinity that day, but he went away towards Thistle Valley about 3 p.m., but as the Indians have been known to threaten her heretofore, because she would not go with them, it is supposed they have committed the deed. Her person had not been violated. This report is as rendered and developed at the inquest.

H. W. SANDERSON,
Coroner.

A dispatch from President O. Hyde, dated Spring City, 23d, in addition to the above particulars, says, the murdered girl was sister to Indian "Joe's" first wife. "Joe" will be at Fairview in four or five days. I know of no white desperado in Fairview who would be at all likely to commit such an act, though they arrested one white man, but had to let him go for want of evidence. If done by Indians, of which I entertain no doubts, jealousy might have been the cause, or they may wish to have a pretext for war. The Indians who came in from the reservation to Gunnison and Twelve Mile Creek, appear to be very friendly. I met them in Manti. How far their friendship may be relied upon, time will tell.

DISTRICT COURT.—THOMAS KNAPP CONDEMNED TO DEATH.—Last Friday and Saturday the Court was wholly occupied with the trials of Thomas Knapp and Morgan Day, indicted by the Grand Jury for the murder of Susan Jones, a colored woman living at Ogden, on the 29th of April last, of the particulars of which our readers have been already informed. At the request of counsel the prisoners received a special trial, Knapp, the younger, being tried first. He made a partial confession of the deed.

As the prisoner had no friends nor means to procure counsel, His Honor Judge Wilson appointed Messrs. Robertson and Maxwell to conduct their defense, and the jury, after an impartial trial, returned a verdict of murder in the first degree.

On Saturday Morgan Day who, by the confession of Knapp, made at Ogden, was the one who actually did the deed, was tried, but the evidence given was not strong enough to satisfy the jurors that he was guilty, and after retiring to deliberate they returned a verdict of "Not Guilty," and the prisoner was released.

This morning the prisoner Knapp was arraigned before the Court, and after a few well-timed remarks by his Honor, he was granted his choice of one of three deaths, which the statute provides for condemned criminals. After choosing to be shot, the Court pronounced the following verdict:

"It is ordered and adjudged by the Court that you, Thomas Knapp, having been convicted by a jury of your country of the crime of murder, in the first degree, be taken hence by the Marshal of the Territory to some safe and secure place, and there kept in solitary confinement until

Friday, the 17th day of June next; and on that day, between the hours of nine a.m. and four p.m., you be taken by the Marshal to some suitable place, and there executed by being shot until you are dead; and may God have mercy on your soul.

More than ordinary interest was manifested during the trials from the fact that nearly all the evidence was circumstantial.

SURGICAL.—Miss Betsy Hancock, daughter of Bro. G. W. Hancock, of Payson, aged nineteen years, took a violent cold two years ago from attending a party, and was given such medicine as to drive the cold from her body into her foot, from pain in which she has suffered severely ever since. From ignorance of the nature of her disease she has doctored for erysipelas and various other complaints. Last week she was brought to this city, when it was found necessary to have the limb amputated above the ankle joint. The operation was performed on Friday by Dr. Anderson, assisted by Drs. Richards and Bernhisel. She is at present doing well.

SANPETE.—Bishop Amasa Tucker, of Fairview, just in from Sanpete informs us that the grasshoppers have taken the growing crops almost entirely in Sanpete, but the people mean to sow again and feed them awhile longer if they do not succeed in raising anything for themselves.

Died:

At Payson, of dropsy, May 16th, 1870, Alma Beckstead, eldest child of Sister Ann Beckstead, aged 8 years, 6 months and 23 days.

In the 11th Ward of this city, of inflammation of the lungs, on the 19th of May, 1870, Wm. Thomas White, son of James and Jane White, aged 3 years, 4 months and 16 days.

"Not lost but gone before."

The funeral will take place at the 11th Ward School-house, at 10 a.m. to-morrow, Saturday.

Special Notices.

WE wish all persons holding Orders or Due Bills on Z. C. M. I., to present the same at this office immediately, so that they may be re-checked, as there are Counterfeits in circulation.

Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs,
such as Coughs, Colds, Whooping
Cough, Bronchitis, Asthma,
and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound health by the *Cherry Pectoral*. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the *Cherry Pectoral* they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly cured by it.

Bronchitis is generally cured by taking the *Cherry Pectoral* in small and frequent doses.

For a Cough and Cold, no better remedy can be had. Take small doses three times a day and put the feet in warm water at night, until the disease is broken up.

For Influenza, when it affects the throat or lungs, take the same course.

For Whooping Cough, give small doses three or four times a day.

For Croup, give large and frequent doses until the disease is overcome.

No family should be without the *Cherry Pectoral* on hand to protect them, in case of attack, from the above complaints. Its timely use often spares the patient a great amount of suffering and risk, which he would incur by waiting until he could get other aid. Parents, keep it in your houses for the exigencies that arise. Lives dear to you may be saved by it.

So generally are its virtues known, that we need not publish certificates of them here, or do more than assure the public that the best qualities it ever possessed are strictly maintained.

Prepared by DR. J. C. AYER & CO., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.
