Angora Goat Industry-E. K. Pugh

Special Correspondence.

Kanab, Kane Co., Sept. 25.—Delightful weather prevails; no frost yet. This has been a prosperous season for the farmers as well as the stock, goat and sheep industries. Prospects are fair for the fourth crop of alfalfa, which is out of the ordinary in this locality. Quite a number of Angora goats have been bought and taken out from here by the farmers in the north to put on their farms. Aside from the profit in raising kids and hair which this season sold as high as 30c a pound, it has been discovered that the goats are the only exterminators of what is called wild sunflowers, which it is reported are taking the farms in the north, in fact no weeds will exist where the goats have an opportunity to eat them out.
