

LENTZ RAISES ROW IN HOUSE.

Started Over Attack on a Federal Judge Who Voted for Hanna.

CHARGES AGAINST SOLDIERS

Accused of Having Buried a Filipino Soldier and Then Cut His Head Off—A Sensational Story.

Washington, Feb. 20.—The House today passed the sundry civil appropriation bill and entered upon consideration of the general deficiency bill. The latter of the general appropriation bill, Mr. Lenz, an Ohio Democrat, who has been a member of the House since the previous Congress, attacked the administration, furnished the session of the day. He used a newspaper paragraph recounting the death of a federal judge in New Mexico who had been a member of the House who had been a member of the House who had been a member of the House.

This called for a rebuke from Mr. Cannon, who declared that brave men should not be treated in this manner. He said that the gentleman should be treated with respect and that the House should not be so easily misled.

Mr. Lenz made a second attempt to attack the administration, but was rebuffed by Mr. Cannon. He then turned to the subject of the general deficiency bill, which he attacked on the ground that it was a waste of money.

Mr. Cannon, Mr. Mahon of Pennsylvania, Mr. Grosvenor of Ohio, Mr. Moody of Massachusetts, and other members of the House, all took part in the discussion. Mr. Lenz's remarks were generally regarded as a display of ignorance and prejudice.

The House next took up the general deficiency appropriation bill. Speaking in support of the bill, Mr. Lenz made a series of charges against the administration, which were generally regarded as unfounded and malicious.

Mr. Steele of Indiana made the point of order that Mr. Lenz was not speaking in order. The speaker ruled against Mr. Lenz, and he withdrew from the floor. The House then passed the bill by a large majority.

Mr. Lenz's refusal to accept the ruling of the speaker was regarded as a display of insubordination. He was rebuffed by Mr. Cannon and other members of the House. The House then adjourned.

A very sensational episode occurred when the paragraph providing that not more than \$100,000 should be paid for the appropriation of the general deficiency bill was reached. This paragraph was attacked by Mr. Lenz, who charged that the administration was wasting money.

Mr. Lenz's remarks were generally regarded as a display of ignorance and prejudice. He was rebuffed by Mr. Cannon and other members of the House. The House then passed the bill by a large majority.

Mr. Lenz's refusal to accept the ruling of the speaker was regarded as a display of insubordination. He was rebuffed by Mr. Cannon and other members of the House. The House then adjourned.

JUST ESCAPED BEING LYNCHED.

Vigilance of Officers All That Saved "Slick" Slater.

ASSAULTED A YOUNG WOMAN

Captured by the Sheriff—Mob After Him—Man Was Removed from the County Jail.

Topeka, Kan., Feb. 20.—The vigilance of the officers was all that saved "Slick" Slater from being lynched by a mob of citizens. Slater, a white man, was captured by the sheriff and taken to the county jail. He was then removed from the jail by a mob of citizens.

Slater was then taken to the county jail. He was then removed from the jail by a mob of citizens. Slater was then taken to the county jail. He was then removed from the jail by a mob of citizens.

80 and Not Gray

"I have used Ayer's Hair Vigor for a great many years, and although I am past eighty years of age, yet I have not a gray hair in my head."—Geo. Yellott, Towson, Md., Aug. 3, 1899.

Ayer's Hair Vigor always restores color to gray hair. We know exactly what we are saying when we use that word "always."

It makes the hair grow heavy and long, too, and stops falling of the hair. Keep it on your dressing-table and use it as directed.

One dollar a bottle.

If your druggist cannot supply you, send us five cents and we will express a bottle to you, all charges prepaid. Be sure and give us your nearest express office.

J. C. AYER & CO., Lowell, Mass.

Send for our handsome book on The Hair.

arrangement by which the region of the canal and large areas of the sea at each terminus should be exempted from the operations of war. The larger these areas of neutrality the better. Should such an agreement be violated by any nation that is a party to it, the United States could destroy the canal if necessary, so as to render it impossible for the enemy to use it.

ARCTIC EXPEDITIONS. Dr. Cook Returns and Tells About What Belgians Have Done. New York, Feb. 21.—Dr. Frederick A. Cook, the Arctic explorer, returned to New York today after a visit to Belgium. In Brussels he attended a meeting of more than a hundred scientists interested in the recent Belgian expedition toward the South pole. All the time he was in Belgium, he reported of the venture being published by the Belgian government.

"This report," said the explorer, "is the official record of the expedition, the story of which has already been published. There will be eleven volumes. One of them contributed by me, contains a vocabulary of 3,000 words of the Yaghan language, the tongue of the inhabitants of Terra del Fuego. The other nine volumes are now being fitted out on the other side. The one from England will start in August, going south of Australia and the German explorers are to start at about the same time. The Swedish expedition will leave that country later."

Dr. Cook is not going with any of them. He has been exploring for years and now means to rest. Dr. Cook said that the Belgian government would present a bill to the Belgian parliament to establish a station in this country, among them Harvard and Yale.

NOVA SCOTIA GOLD. The Production for 1900 Was the Sum of Five Million Dollars. Halifax, N. S., Feb. 21.—The government returns for 1900 show that the production of gold in Nova Scotia was 10,000 ounces, valued at \$5,000,000. This is the second highest annual yield since gold was discovered in 1880. The yield of 1889 was \$5,000,000 on account of new findings.

WIRELESS TELEGRAPHY. Transmitted Messages for a Distance of Thirteen Miles. New York, Feb. 21.—The steamship Georgia, which arrived last night from Liverpool, has on board a passenger, Mr. Shorman, who had charge of the experiments with wireless telegraphy on the Georgia off Broadway. Mr. Shorman said that he sent messages to a distance of thirteen miles and received replies, but could not receive messages farther than that owing to the fact that the rolling of the ship somewhat disarranged his instruments. This was not the Marconi system, but was invented by Mr. Neli Markine, Pionodilly, London. The instrument on the vessel was attached to the metal of the ship and connected with wires which were attached to fore and aft stays of the steamer. The influence which conveys the message in wireless telegraph is able to pass readily through insulators, such as in a glass, but is absorbed to a very great extent by all conductive materials, especially by sheet metals.

DR. MAYO SMITH DEAD. Was Mark Twain's Inspiration for "Doctor" in Innocents Abroad. Colorado Springs, Col., Feb. 21.—Dr. Mayo G. Smith, the companion and friend of Mark Twain, and inspiration of the novel "Doctor" in "Innocents Abroad," is dead at his residence in this city. Dr. Smith was born in Newburyport, Mass., August 19, 1818. He was one of the first graduates of Oberlin college, and was an intimate friend of Horace Greeley, starting life as a preacher and later as the first reporter employed by Greeley on the Tribune. He went to California in 1849; joined the regular army; later became rich and traveled with Mark Twain. He was master and part owner of the first ship that sailed from San Francisco to Australia.

Dr. Smith was the author of two works on ether and chloroform from experiments he conducted. For several years he gave his attention to medicine and later was associated with Morse, in completing the telegraph and constructing the first line between Washington and Baltimore.

A FARMER'S WIFE. Finds a Food That the Children and Grown Folks Thrive Upon. Mrs. Sarah Lessinger, near Stuart, Neb., says: "My little girl, eight years old, has always been a delicate child, and has not been able to stay in school long at a time, for she often faints and was weak and puny, until last February she had a sick spell, and I began feeding her on Grape-Nuts food."

"I can truthfully say the result has far exceeded my expectations. She is now hearty, well, and can run and play as other children do. I am trying an experiment this summer on leaving out milk altogether for breakfast and using Grape-Nuts food instead. Thus far we have all been unusually well, and my men folks (we are farmers) say that they do not get hungry so quick when they use Grape-Nuts food as they used to when they had meat."

It is a profound fact that Grape-Nuts food will furnish more nourishment to the system, than bread or meat. Any one can prove the truth of this statement by trial.

"It is believed in consideration of the freedom of the canal extended by the United States to the ships of all nations, those nations would agree to an

arrangement by which the region of the canal and large areas of the sea at each terminus should be exempted from the operations of war. The larger these areas of neutrality the better. Should such an agreement be violated by any nation that is a party to it, the United States could destroy the canal if necessary, so as to render it impossible for the enemy to use it."

LANDS HELD BY FILIPINO FRIARS.

Secretary Root Answers Senate's Call for Information.

PRESIDENT'S INSTRUCTIONS

Titles of Religious Orders to be Investigated—American Government Has Entered Into No Obligations.

Washington, Feb. 21.—Secretary Root has made answer to the resolution of the Senate calling on him for information as to the extent of the holding of lands by religious orders in the Philippines, and as to any declaration made by him or obligation assumed respecting the disposition of these lands. The secretary by way of answer refers to the President's instructions of April 7, 1900, to the Philippine commission, directing the commission to endeavor to investigate the land titles of religious orders and to endeavor to afford justice and settle these in a manner to safeguard property rights and equities. It is added that no one in behalf of the United States government has entered into any obligation, other than that set out in the peace treaty in regard to these lands, nor has any policy been announced. The commission has stated the result of its inquiries, under this instruction, in its report, especially in the sub-divisions entitled "the friars," "public lands" and "land titles." The commission has especially investigated the San Jose college claim and referred it to the supreme court of the islands.

SUPPLIES FOR ISLANDS. San Francisco, Feb. 21.—A cargo of 5,000 tons of general supplies for the army in the Philippines was taken by the steamer Wyandell, which sailed yesterday for Manila direct. The freight transport Samon, which carried horses from this port for the German army in China and was later purchased by the United States government for the transport service, left Nagasaki on February 19. The transport ship, the Buford, with returning volunteers on board, left Nagasaki for San Francisco on the 19th. The Indiana, Meade and Pennsylvania, also bringing volunteers, are due here within the next few days.

G. A. R. Complaints. New York, Feb. 21.—A meeting of "The War Veterans' Association" was held last night in Brooklyn at which Gen. Geo. B. Lord, department inspector of the State spoke on "Washington." In introducing Gen.

Lord, Jas. W. Kay, chairman of the committee on legislation of the Grand Army, took occasion to speak on the question of the preference of the members in G. A. R. for minor positions in the employ of the government. Mr. Kay said that it was a sad commentary on the name of Washington—himself the synonym of justice—that Congress should, during thirty-five years following the civil war, have been appealed to ever in vain to give a reasonable preference in the minor positions in the public service to the veterans of the greatest war of history.

"This rank injustice," emphasized by the speaker of the House of Representatives, too, in the exercise of his discretion, permits the House to give one hour consideration of this subject before the final adjournment of the Fifty-sixth Congress, is almost beyond belief."

Pres. Hadley Coming West. New York, Feb. 21.—President Arthur T. Hadley of Yale will leave tomorrow for another western tour, says a World special from New Haven, Conn. He will go to St. Louis to the Yale Alumni meeting, where he will speak on "College Education of the Business Man." He will next visit Chicago to attend the convention of college presidents going from there to Cleveland, Buffalo and other places. On his return he will confer with Yale alumni in New York concerning Yale bi-centennial funds.

HERALD SQUARE MONUMENT. Piccirilli, Sculptor, Gets the First Prize for It. New York, Feb. 21.—The jury to decide which of three models for the monument to be erected in Herald square should take the prize has decided that the first prize, carrying the monument itself, should go to Apollino Piccirilli, the sculptor, and Magenta, the architect. The second prize is awarded to George Julian Zolna, the sculptor, and Freedlander, the architect. The third prize goes to Austin Hayes, the sculptor, and Barber the architect.

To Establish Coaling Stations. New York, Feb. 21.—According to a Washington special to the Herald, Rear Admiral Bradford, chief of the bureau of equipment, has prepared plans for the establishment of new coaling stations immediately after the appropriation authorized in the pending naval appropriation act become available. Seven hundred thousand dollars will be appropriated. A part of this likely will be applied to the improvement of American coaling facilities in Cuba, mind the location of station in Chile, Iquique lagoon, Colombia. He has approved plans for stations at Narragansett bay and at Manila. He also desires to establish stations at San Diego, Cal., Sitka, Alaska, Unalaska and one in Porto Rican waters, or at St. Thomas in case of its acquisition. The department seems to have given up all intention of establishing a station on the coast of Liberia, because of the absence of a convenient harbor in those waters.

Rear Admiral Bradford recently called attention to the necessity of the navy establishing more coaling stations.

Why Mrs. Pinkham Is Able to Help Sick Women When Doctors Fail. How gladly would men fly to woman's aid did they but understand a woman's feelings, trials, sensibilities, and peculiar organic disturbances. Those things are known only to women, and the aid a man would give is not at his command. To treat a case properly it is necessary to know all about it, and full information, many times, cannot be given by a woman to her family physician.

She cannot bring herself to tell everything, and the physician is at a constant disadvantage. This is why, for the past twenty-five years, thousands of women have been confiding their troubles to Mrs. Pinkham, and whose advice has brought happiness and health to countless women in the United States.

Mrs. Chappell, of Grant Park, Ill., whose portrait we publish, advises all suffering women to seek Mrs. Pinkham's advice and use Lydia E. Pinkham's Vegetable Compound, as they cured her inflammation of the ovaries and womb, and she, therefore, speaks from knowledge, and her experience ought to give others confidence. Mrs. Pinkham's address is Lynn, Mass., and her advice is absolutely free.
