Silver King, 49,008,170 pounds; Little Bell, 2,224,781 pounds; American Flag, 2,315,500 pounds; the Grassillie Chemical company, which is handling the Daly Judge tailings, 15,410,680 pounds; Charles Moore, 7,59,190 pounds; Guyman & Wilson, 376,500 pounds, and Sutton & Hausen, 40,000 pounds. Shipments from the Sliver King have been curtailed owing to the aerial tram-way being in bad condition. The out-put will be increased as soon as the new cable arrives. In addition to the above the Adirondack Mining company has shipped a small quantity of ore by has shipped a small quantity of ore by way of Hober. Some ore was also sent out by the lowa Copper company which went by way of Little Cottonwood to Sandy.

#### PANS OUT \$100 PER HOUR.

#### Gold Discovery in Inyo Mountains Nev., Causes Much Excitement.

At Burgees, a new gold camp lo cated in the Inyo mountains due cast of Lone Pine, there is a prospector who is panning out gold at the rate of \$100 per hour. With a mortar, a frying pan and some water this lucky individ-ual has Dame Fortune lashed to the mant, and is deliberately going through her golden pockets at his own sweet will, says the Owens Valley Herald. In will, says the Owens Valley Herald. In and about Keeler, Lone Pine and Bur-gess this man's had has caused the greatest excitement experienced there since the haloyon days of Cerro Gordo. for this man, Well's by name, seems to have found the hone nest of that heids fairy known as Gold Sprite, and his discovery is luring men from fair and wide to his side. News of Well's bonanza discovery reached Bishop this week through W. Gilletis Scott of the Inyo Mines Syndi-cate, who has been working a pros-

Glinette Scott of the Inyo Mines Syndi-cata, who has been working a pros-pecting gang at Hummer, many miles south of Burgess, and Scott's informa-tion was today corroborated by E. O. Activath, manager of the Four Metals Co. at Keeler, who is here on some im-portant mining deal. Scott states the following mots about the Well's strike; Wells worked alone for more than a portant mining deal. Scott states the following facts about the Wells strike: Wells worked alone for more than a year sinking a shaft 97 feet deep on a quarts velu which at this deep on a output velu which at this deep on a output strike in this velu there now lies exposed a stringer of gold, the pues stiff, almost, which when as-sayed runs from 54,000 to 54,800 to the ton. This pay streak is from out inch to six inches wide, and Wells has ex-passed his velu for 52 feet by drifting on it, thet rich stringer in its varying widths showing the outer length. Wells brought the news of his find to Keeler, and there stated that he could born out file an hour, for which reason he was toget to say much about his property and refuses all offers of sale. Investigation by Keeler and Lone Flop propile corrobursted the statement made by Wells, and the whole south-ern end of the county, as far as the news had reached, was running it offerning excitement. Everybody that

#### NEW FIND IN UNCLE SAM.

Reports from Tintic this morning stated that a new discovery of ora had been made in the Uncie Sam, in one of the old workings in the upper levels. The find, it was said, showed a body of high grade ore about a foot wide, and indications were said to be good for it to develop into a grod body of ore

#### ORE RICH IN GOLD.

Surveyor Hammond Says Oklahoma Co.'s Group Making of Big Mine.

Deputy Mineral Surveyor Hammond, who recently roturned to Yerington, Nev., after making an exhaustive ex-amination of the Okiahoma Mining company's group in Mount Grant dis-trict says the group is the making of one of the best mines in Nevada, according to the Yerington Times. On of one of the best mines in Nevada, according to the Yerington Times. On one dump there are 50 tons of ore which will average 50 a ton in gold, silver and copper, and near by a small dump which averages 4400 to the ton. Each claim has a network of venes, and wherever opened up, 12 places in all, a spiendid showing is exposed. The deepest working is only 70 rest, but at this depth the vein is very strong, well defined and uniformly mineralized. The ore is concentrating and milling. This group lies just south of the Wheeler Pass at the west base of the north end of Mount Grant. Several toats of the ore have been made, but on Monday a mill test of 20 tons will be run. The company is giving a base on the ground and will receive a spiendid roy-alty. A great deal of Oklahoma capi-tal is going into this district, and when the new wagon road is completed Mount Grant will be within 34 miles of Yer-ington, making it the closest supply point. The district strikes me as one of the best I have ever been in and Yerington should, indirectly, derive a great deal of benefit

#### NORTH COLORADO TO START.

NORTH COLORADO TO START. President Joseph Wirthlin says that the North Colorado Mining company will commence work about the first of next month. This company was organ-ized alcout eight months ago for the development of a group of 20 claims in the North Tintic mining dis irici. The ground is just north of the Yankee pumping plant in Homansville canyon and at the time the company was organized it was given out that the shaft would be sunk in an effort to open up the north extension of the Colorado vein of ore. The work which will start next month is for the pur-pose of holding the unpatented claims
