Mr. Deeming has the reputation of being conservative when it comes to making statements about mining prop- erty; so when he says the Jenny is al- ready a mine of quite generous propor- tions, it can be put down as a fact. He usually investigates before he	Carisa, 500 at 61; 4,100 at 60.	to \$20.50 and remained firm at this quotation until Feb. 1, 1906, when it jumped to \$25 an ounce, where it re- mained until Sept. 1, or about six weeks ago, when it leaped to the unprece- dented value of \$34 an ounce, Mr. Hor- ton's report also shows that the pro-	company; others have claimed that the ground is to form the basis for another Bingham company. But the fact is, no one except a few on the inside know just exactly what is going on. How- ever, it can be said definitely that the Ohio Copper company holds no option on the Copper Glance, nor any other	Bonds were irregular. The intermittent clipping off of a frac- tion now and then in Union Pacific re- sulted in its eventually selling a point below last week's closing. Elsewhere the s movement was too narrow to attract no- tice until 7 o'clock, when the market hardened noticenbly. The market held its own fairly well	Beets, two bunches for .5 Potatoes, per bushel \$1.00 Cucumbers, three for .5 Beets in cans, each .20 Dates, per Ib. 10@20 Canned pumpkins .20 Walnuts, per Ib. .20 Almonds, per pound .20	Salt Lake City, Utah, Capital
expresses an opinion. Mr. Deming is very optimistic about the Jenny mine and can figure out where the company has \$600,000 worth of ore practically blocked out. He estimates that there are at least 12,000 mons of it and that it will average up to \$50 per ton.	Victoria, 100 at 2.30. Beck Tunnel, 306 at 1.05. Century, 500 at 18. Little Chief, 1,000 at 161/2: 500 at 18.	duction of plathnum in the United States increased from 200 ounces in 1904 to 318 ounces in 1905. The rise in the price of plathnum and its increased production in this country may be ascribed to two causes: the growing demand for the metal and the reduced yield of the Russian plathnum	company for that matter. It is known that some strong interests have been buying the stock. An official of the Copper Glance com- pany declared today that there was nothing in recent mine development to cause a rise in the stock, yet he thought the stock is worth every cent it is sell-	at the rally, although the demand was small. MINING IN IDAHO.

Copper Has Been Found in Mountains Near Franklin.

Special Correspondence,

Logan, Oct. 14.—Mr. Gayman of Franklin was in town Saturday and exhibited some very fine specimens taken from his prospect located at the head of Maple Greek canyon east for Franklin. He has uncovered a four-foot vein of ore rich in copper and carrying small values in gold and sil-ver. He has taken out 40 tons of ore unprior as black as foo in the second running as high as \$90 in value, which he will ship to the smelters in

The crown Mining company which owns several prospects adjoining the Lucky Star property in Blacksmith's Fork canyon have put a force of men to work developing its claims. The The bonding of the Lucky star for \$100,-990, has stimulated activity on all of the claims in the mountains east of this valley.

Manager Hansen is down from the Amazon mine and reports that the ore-values continue to improve as the shaft goes down and they expect to incounter the ore body in the course a few days. Work on the Mineral Point claims

is being pushed as fast as possible,

MINING CONGRESS.

Many World-Famous Engineers Gath-

ering in Denver for Convention.

ering in Denver for Convention. Denver, Oct. 15.—Many men known in the mining industry throughout the world are gathering in Denver to attend the convention of the American Mining con-gress, which opens tomorrow morning. Extensive reservations have been made in all the hotels, and it is expected that nearly 1590 delegates will be present. J. H. Richards of Boise. Ida. president of the congress, was in conference today with other leading men in the congress. "This meeting," he said, "Is to be one of the most important held in recent cars, and if some of the measures we hope to put through receive the approval of the congress as a whole, there is like. by to be some initional legislation at Washington which will vically affect the mining industry in the United States."

************************* COPPER ABOVE TWENTY CENTS. Copper selling above 20 cents

per pound, silver hugging close to 70 cents per ounce and lead worth \$5.75 per 100 pounds, sizes 🛉 up the metal market in a nutshell today. There has never been anything like such favorable conditions for the ore producers of the west. Sliver has sold much higher, of course, But copper! This metal never drive sell at such prices. The copper quotations have had a decidedly stiffening effect to copper stocks today and the day opened with a strong eastern market for them. Of the local stocks Newhouse was again the center of greatest interest, and sales were reported \$2 a share above the

and Clark exposition, and actively carried on at Portland. Or., by the United States geological survey, have done much toward placing plathnum mining in this country upon a stable footing and developing it into a per-manent and profitable industry. Not only have many discoveries of platin-um in new localities been made, but the tests have revealed the fact that there are in this country districts which contain surprising quantities of plathnum, and they have also given much valuable data as to the best method of obtaining it. The platinum metals are usually found in working gold placers, especi-ally where the gravels are derived from peridotites. Many managers of placer mines have been convinced for

from peridotites. Many managers of placer mines have been convinced for a long time that it would pay to save the platinum in the gravels, if it could be done by some inexpensive method. The experiments of the Geological Survey which were conducted under the supervision of Dr. David T. Day, have shown conclusively that 95 to 98 per cent of the precious metals, both gold and platinum, contained in the per cent of the precious metals, both gold and plathum, contained in the sluice box sands can be saved on con-centrating tables of the Pinder or Wildey type, such as are used in every-day practise; and that in most cases the concentrates thus obtained will rep-ment less than 1 per cent of the total

the concentrates thus obtained will rep-resent less than 1 per cent of the total weight of sand fed to the table. Eesides discussing the experiments made in the recovery of platinum in this country, Mr. Horton describes the methods of extraction in vogue in Rus-sia. He also reviews the localities in which platinum-bearing gravels have been noted in Russia, Columbia, British Columbia, and other countries, det been noted in Russia, Columbia, British Columbia, and other countxies, de-scribes the physical properties of plat-inum and its associated metals, and sets forth their uses. A brief bibliog-raphy of platinum, with which the re-port closes, is not its least valuable art closes, is not its least valuable

It should be noted that the imports It should be noted that the imports of platinum during 1965 were valued at \$2,173,263, as against \$1,879,465 in 1904, an increase in value of \$294,108. Consid-ering the increased demand for plati-num, the gain in importation is slight, but if the high price and scarcity of the metal be taken into account the wonder is that there was not a large decrease in the quantify imported.

is that there was not a large decrease in the quantity imported. This report of Mr. Horton's is pub-lished as an advance chapter of the annual volume. "Mineral Resources of nnual volume, the United States, 1965," and is dis-tributed, free of charge, on application. Platinum ore is found in one county in Link, Gardield in Utah-Garfield.

FREIGHT RATES REDUCED.

Tintic Producers Have Received No-fice From Rio Grande Western. The producers of the Tiatic mining district have won a victory in the fight for a reduction in the freight rates on ore shipped to the Sait Lake valley smelters. The chairman of the transportation committee on the Tintic Mine Operators' association, Harry S. Joseph, on Saturday afternoon, received notice that the Rio Grande Western has granted a reduction of 25 cents per ton on all classes of ore, excepting that on ore of \$25 per ton values, which hemains the same, the new schedule al-ready having taken effect. The rates as they now stand are: On ores valued at \$15 or less, per ton, gross, \$1.25

More than \$15 and less than \$25 per ton, \$2.25.

More than \$25 per ton, \$2.50. All iron ores will be carried for \$1 per

ton, flat rate. The Salt Lake ROoute, of course, will The sait lane. While the reduction is not a great deal, at the same time it will help towards bringing about such re-lief as will enable the marketings of the vast deposits of low grade ores of the camp at a profit.

GOLDEN BELL COMPANY.

reported 12 a share above the the closing quotations of Saturday. The Golden Bell Mining company of Park City today filed a copy of its articles of meorporation with the secretary of state. Its capital stock is

has three feet of the rich lead ore, as well as three feet of high grade cop-per ore, and that it is going down and widening out as work on it progresses. Conditions are certainly most flatter-

The Jupiter mine is in a most encour-The Jupiter mine is in a most encour-aging condition, with the work of ex-pioration going steadily ahead. The Jupiter has exposed in its workings ore bodies from which precious metal enough is extracted to pay all running expenses and to provide for some ex-pioratory work. The work, however, her consisted ingraph of granhering and has consisted largely of gophering, and what is needed to make the property a big producer is the introduction of capital, so expended as to better equip it for systematic work. With the levels opened up in such a manner as to allow easy extraction of ore from the big bodies in sight, the company would soon be rich. A mill is also needed to handle the mine's vast deposits of second class, and in fact Mr. Lawrence now has ne-

gotiations pending which may provide for such a plant. Mr. Lawrence's knowledge of geology and mineral formations, together with his experience gained in the 20 years of mining in this section of the country, has enabled him to work systematically, and he has his campaign of work figured down to a science. He is confident of "winning out," and it is the hope of all that he

may do so. Work is to be resumed soon at the Work is to be resumed soon at the Silver Bell property in Thaynes can-yon, which has lain idle for a long time past. W. W. Sonnedecker and Anton Pederson, of Salt Lake, are those most heavily interested in the concern, and are anxious to get devel

concern, and are anxious to get devel-opment under way again. Mr. Peder-son visited the property Tuesday. At the King Con. no particular changes are to be noted. The bottom of the shaft is in a highly mineralized formation, which has characterized the ground for some time past, and it is expected that in the near future a body of high-grade ore will be dropped into. This property being equipped as it is This property being equipped as it is with a thoroughly first-class plant in every respect, is well prepared to carry on the proper campaign of develop-ment to bring the mine to the front. The Creole leasers marketed a ship-

ment to bring the mine to the front. The Creole leasers marketed a ship-ment of ore Wednesday, the controls showing 40 per cent lead. Though this is a low-grade proposition, for which reason it has never been extensively developed, the present leasers are making better than wages for their work, and while taking out enough ore for an occasional shipment, the ground is being opened up more fully at the eame time.

Louis D. Gordon, founder of the Round Mountain. Nev., mining district, is expected to arrive from Nevada this afternoon.

It is reported that the owners of the Gold Mountain Consolidated Mining company are figuring on the erection of a mill early next year.

Work is progressing favorably in the development of the Golden Reef mining property in Beaver county. The main tunnel is in 1,400 feet.

It is reported that the owners of the Basin mill, in the La Sal mining dis-trict, have taken a lease on the Tornamine, the same to run until next

July.
