NEWS FROM THE FAR NORTH.

Republican Clubs are Being Organized in Sweden.

THE CHANGING IN NORWAY.

Endeavor to Conquer Denmark by Buying out the Danish Farmers.

REOPENING.

Republican clubs are being organized all over the country.

The law forbidding the Roman Catholic clergy to make converts is to be strictly enforced.

The ten million of Norwegians are the richest in the world and would suffer for the whole world for a period of over 100 years.

The law, Finn, of Christiania, has caused a general surprise by telling us that the "mother of democracy" is in the midst of a change.

No reports have been received from the six Blue Islands societies during the last six months.

A great number of land-made colonies, which are taken apart and sent to Brazil, Australia and other foreign countries, are formed out of the Blue Islands Manufacturing Company of Stockholm.

John Anderson, of Cleveland, has suffered from cold, dirt and charcoal for a number of years. The cause, however, was not poverty, but avarice which hindered his success.

He was equipped to his sufferings a short time ago, having lost his property to the value of \$500.

Three hundred and ninety-three people, among them fifty Finns, emigrated to America July 24 by way of Copenhagen.

Carl Anderson, a farmer of Vester Kjøben, has disappeared mysteriously. It is believed that he has made his way to America.

Eleven-year-old Alfred Peterson of Copenhagen, let 14 cents that he could tell himself in a struggle of life, which he actually did, but finding that the stuff was too much for him to handle, he was rescued by a policeman.

Two years ago the daughter of a farmer of Kjøben was in love with a young man, but her father was not permitted to marry him. A number of years ago she married another man, with whom she had two children.

Her first love went to America, but visited the old home again two years ago. The neighborhood was shocked a few days ago by the news that the woman had left her husband, children and everything, and as some money was missing, it is supposed that she had joined her old love in America.

The Archbishop of Sweden has warned the clergy against the dangers of the socialist agitation.

This protest is received with a very pitiful reply from a well-known liberal member of the Swedish Parliament, who twisted him with the socialist claims that Christ was the first and the greatest socialist.

He said that the Archbishop, "has nothing to do with each other, for while the modern socialist teaches that all things are mine, Christ said, 'I follow my enemy kind, good-fellow.' Her old and down away a couple of days later."

The wife of a Swedish railroad superintendent, once a magnificent but spoiled beauty, recently lost out her brains with a pistol. Her cause for suicide she set down thus briefly in a letter to her husband before she shot herself: "I follow my enemy kind, good-fellow." Her old and down away a couple of days later."

ROSWAY.  
Horn, the minister of state, was 82 years of age July 22.

The New railroad gave a surplus of \$10,000 during the past fiscal year.

The Salvation Army of Christiania has opened a printing office of the own where a Norwegian edition of the War Cry will be printed.

A young Englishman arrived at Trondheim the other day who had made a large tour through Sweden and Norway. He had performed the journey in three weeks, and made the distance from Stockholm to Trondheim, which is 100 English miles, in seven and a half days.

Norway possesses nine light-houses of the first-class, seven of the second class, eleven of the third class, twenty-one of the fourth class, twenty-seven of the fifth class, thirty-nine of the sixth class, nine of the seventh class. All these lights are in charge of permanent keepers. But, in addition to these, there are also 110 small lights not in charge of permanent keepers. The expense of providing the light-houses of Norway has, up to the present, been \$1,000,000, and the annual cost of the maintenance is \$1,000,000.

Attempts have been made to extinguish the change in Norway. A couple of the animals have been placed out at sea in the care of a farmer of the neighborhood.

On March 3, 1891, the Northing with his aged 24, received to petition the King to give assistance for the construction of international railroads between Sweden and Norway and foreign powers. The conservative ministry then at the helm, though opposed to the resolution, accepted the situation, and promised to refer the matter to the matter. Subsequently Norway and Sweden received an invitation from the United States to enter into a treaty of amity and commerce with the United States. The Swedish government refused the invitation and it now also appears that Mr. Blang's cabinet, though inclined to a different course, refused to accept the invitation. The American position as to Norway, the fact is that we have not recently looked out carefully at such new attention as Mr. Blang and his colleagues purposely have
