

The World Mower &amp; Reaper.

IT HAS NO EQUAL.

It Mows—It Drops—It Self Rakes.

PRICES REDUCED TO A GOLD BASIS.

This Machine is the harvest gathering of twenty years experience in the manufacture of Agricultural Machinery, and takes rank with the printing press, engine-lathe and locomotive in the quality of precision, staunchness and durability.

Its foundation is a single piece of solid iron, of shape to resist all possible strains. Its gearing is shaped to standard gauge and each cut out of solid iron with Mathematical exactness.

The working parts are permanently fixed and fully protected from water, dust, grass, and all other external causes of disturbance.

By these means we reduce friction to the lowest point—stop the self-destruction common to all rough cast machines—avoid breakages in harvest—secure easy draft and the same durability which pertains to, cut gear in other kinds of machinery. The World has been tested four years, in the hands of the most intelligent and reliable farmers in the land, who unite in declaring that, comparatively,

"THERE IS NO OTHER HARVESTER."

FLORENCE

Sewing Machine!

In point of labor there is the same difference between thrashing with a flail, or using a Thrashing Machine, that there is between sewing by hand or using a good Sewing Machine.

We have just received a consignment of forty Machines and can now offer an assortment of all the various styles manufactured by the Florence Company.

PARTIES INTENDING TO PURCHASE SHOULD MAKE THEIR SELECTION EARLY.

CHAS. S. HAMMER, General Agent.

The Florence Sewing Machine has no fancy combinations or other complicated attachments; it has no uncertain wire coils or wire levers. Its manufacture is conducted by a thoroughly RESPONSIBLE COMPANY, and in purchasing a machine you need have no fear of ever being unable to purchase needles and other findings. The Florence is the ONLY COMPANY that keeps its machines in repair free of charge, no matter when sold or where. It is our ambition to have every Florence Machine give entire satisfaction.

The Florence lays no claim to cheapness, we aim at perfect finish; every machine goes through the company's adjusting room, and must then pass the Inspector's office, before going out to agents; the least inaccuracy will condemn it.

They are probably the highest priced Machine in the American market, and being built of HARDENED STEEL by SKILLED WORKMEN, aided by all the appliances that capital can bring to bear, it is offered at a price commensurate with the value of the article, and can be brought into about a half-cent comparison with its numerous CAST IRON competitors, as a watch from Jergenson or Jacat may be compared with the Nick 1 or Oroide offerings of a Chatham Street Mock Auctioneer.

It is a growing knowledge of these facts that has gained favor so steadily for the Florence Machines, and made them the Universal favorites, wherever prejudice is laid aside and honest comparison made.

That very excellent authority the American Institute, New York, awarded the FIRST PREMIUM to the FLORENCE over Thirteen Competitors, and in their report the committee very tersely remarked: "This is better than any of its class known to the Judges."

It may be proper to remark here that the Florence Machine of the present manufacture is vastly improved, and the first of the Improved Machines ever offered in Utah are those sold at the Branch Office at Salt Lake.

Among the recent purchasers from this office, we beg leave to refer to the following parties:

MASSILLON

AGRICULTURAL WORKS!

OHIO.

ESTABLISHED 1842,

For the Manufacture of

RUSSELL &amp; CO'S

IMPROVED

Double Fan Three-Hitch Gear

THRESHING MACHINES!

The success achieved by this machine during the past season is without a parallel.

Over Eleven Hundred Sold

During the season just closed, all of which have given entire satisfaction. Men that have made a business of threshing for twenty years, say that the IMPROVED RUSSELL will thrash and clean more grain of all kinds and do it better, with less power, than any Machine in the Country.

The Three-Hitch Gear and  
Pivot Cylinder

Has been found not only more convenient and durable than any other arrangement in use but to run much lighter and is less liable to get out of order.

The Adjustable Concave

Has greatly increased its capacity for clean and speedy threshing, and the

Separating Capacity

Has been vastly improved by the increased width of Straw Carrier and the extra Beater in the second carrier.

The Two Fans

Now used in this machine have more than doubled its capacity for cleaning—in fact it is the only machine that will clean grain fit for market and do it in such quantities as will justify a man in spending his time in threshing.

DOUBLE - PINION HORSE - POWER

With Russell's Patent Moveable Center.

Russell's Improved Double Pinion, eight and ten-horse Carry Power, with moveable center, has long been in use, during which time it has withstood the most severe tests; and for light draft, strength, and durability, it has no equal.

The moveable centre, as constructed by us, is of great value, for by its use the master wheel is allowed to adjust itself to the master pinions, so as to divide the labor equally, thus overcoming friction, and removing to a great extent the liability to break by sudden jerks or starts of the horses.

Russell's Patent Safety Coupling.

This inclosed safety tumbling-rod coupling is undoubtedly the best ever offered to the public.

Straw Stacker.

Straw Stackers, single length, sixteen feet, or to fold, twenty feet long, either with or without canvas sides.

Truck Wagons.

The truck for hauling the Separator is made of thoroughly seasoned timber, and ironed with the best of iron, and suitable for farm purposes.

H. B. CLAWSON, Agent,

SALT LAKE CITY.
