LOCAL AND OTHER MATTERS.

NOTICE.—The members of the High Council are requested to meet at the Sevens Hall, on Thursday, at 10 o'clock a.m.

GOOD MACHINE.—Brother Charles Westover, of St. George, writes that he imported one of Harder's Threshers and Cleaners last year and worked it with success. He considers it the best machine that has been brought to this country, is run by two horse power and can be set to work in an ordinary barn. The machine can be obtained from R. and M. Harder, Cobleskill, Schoharie county, N. Y.

A NOVEL WAY TO DESTROY GRASSHOPPERS.—The grasshopper question is one of great moment at the present time in Utah and various other portions of the Rocky Mountains; and, looking at the matter superficially, a struggle for life and victory seems to be now waging between the people and the hoppers. Any method that would insure their destruction would be a great boon, for, that accomplished, bread and dinner are pretty sure, but by no means so sure if the hoppers are not exterminated. Various methods to accomplish this have been tried, but the best of them have been attended with only a small share of success.

A correspondent at Payson, signing himself "John Done," sends the following suggestions, which though we think impracticable, we publish in the News, as it may bring fame and fortune to some mechanical genius, but we do not think it at all possible:

PAYSON, May 8, 1870.

Editor Deseret News:—Sir—Having got a little excited by seeing our crops destroyed by these pesky grasshoppers, I have been getting an idea of a machine which, could it be made to operate, would pretty thoroughly destroy them. The idea is this: suppose an iron box, to hold wood or coal, say ten, twelve or fourteen feet wide, were fixed on wheels, the bottom of it to come within six inches or so of the ground, and the only outlet for a blaze to be at the lower end of it, could not power enough be got from the wheels of the carriage to run a fan to keep a constant flame on the ground, and so burn up every grasshopper that would be in the width of the machine, as it went along? Now I am no machinist, but I think I think of it, the more I am convinced that such a machine can be made to work successfully. I have spoken to several people about it, among them machinists, and every one seems to think that it can be made to work successfully. I take this method of writing to you, thinking that if the idea is worth anything, you would give it publicity in the News, and some person or persons would go to work and try it.

Your brother,
P. S. I don't know but hot air blown from a fire so close to the ground would destroy them; be that as it may, I am sure that a flame passing over the ground would do it.
J. D.

UNRELIABLE.—The Virginia Enterprise has been indulging in a little amusement lately by way of publishing ambiguous local items and then "letting out" on their cotemporaries, who have been so unfortunate as to copy them, by informing them that there was no truth in them. They first published a doleful account of a poor old horse getting his legs broken. After some of the local papers had copied it without giving the Enterprise the credit, that paper informed them that it happened to be a wooden saw-horse. Another item copied from that paper by several others concerning a startling highway robbery turns out to be a hoax. The papers republishing these items feel somewhat chagrined, and naturally think the Enterprise is not very reliable.

A CARD.—The proprietors of the College Lantern would announce to the public that, through disappointment in obtaining the necessary material for its publication, its issue for the present has been unavoidably delayed. As the present term of the University will be far spent before the required arrangements can be perfected, it has been thought advisable to postpone its publication until the opening of the next term of the institution, the beginning of the College Year.

DIED, May 31st, at the residence of his son-in-law, Thomas Allen, aged 83 years. The funeral will take place on Thursday at 1 p.m., at the residence of Mr. D. Grenig, 15th Ward. Friends are respectfully invited to attend.
Philadelphia papers please copy.

LECTURES IN SAN FRANCISCO.—Mr. Bayard Taylor, the celebrated lecturer and traveler, who passed through this city a short time since, recently lectured in San Francisco on Alexander Von Humboldt. John Savage, a lecturer of some celebrity, has been lecturing in the same place, having for a subject "The United Irishmen." If the Fenians represent the Irish element in this country, they are long way from being a unit; judging from the flying reports of them in the East; when it comes to the point of action they seem to be adopting the old adage that discretion is the better part of valor. What with Baum, the Rev. Mr. Milburn, and the above named celebrities we should think that the San Francisco people are being tolerably well lectured. From the reports contained in the papers, those gentlemen are meeting with tolerably good success as regards the extent of their audiences.

FROM DIXIE.—Bro. John Hawley, from Grass Valley, informs us that the crops in Pine Valley ward when he left, though rather late, looked well; no grasshoppers had made their appearance farther south than Cedar. The people of those southern settlements are adopting the co-operative principle of caring for their cattle, horses and sheep, which, under that system, are doing well. The people of Pine and other settlements intend to enter into co-operation in the manufacture of butter and cheese. This latter branch of manufacture is one that can be carried on successfully in those settlements. The range there is extensive and of a good quality, and they have a convenient market for their produce in Meadow Valley. The people of Pine Valley are taking steps to have their stock removed to Spring Valley. The health of the settlers in the South is generally good.

REVERE HOUSE SALOON!

Is acknowledged to be the coolest retreat these warm days in the city, where you find the best Lager Beer, Omaha Ale, Pilsener Beer, Cysters, Genuine Golden Crown Cigars, etc., etc. Also Free Nibble from 10 a.m. to 4 p.m.
