Majority of Them Were Rather

Higher.

PURCHASES WERE MODERATE

Better General Inquiry on Absence of

Realizing Orders-Souds Were

Quite Irregular.

New York, April 27 .- Opening prices of

stocks today were rather mixed and were

not wide either way. Amaigamated Cop-

per dropped a sharp fraction and Pennsyl-

vania and Southern Pacific showed open-

ing declines. The majority of stocks,

nowever, epened higher and the tone im-

proved after the opening. Purchases

were moderate, but the absence of real-

better general inquiry. The strong ad-

vance in sterling exchange gave rise to

calculations over possible gold exports

and checked the advance in spots. The

reaction averaged only a fraction. Amal-

gamated fell a point on account of the

weakness of the London copper market.

International Power dropped 5%, Canada

LA PLATA MINES ARE ACTIVE

Progress in That Camp.

ONE SHAFT DOWN 700 FEET

This on Ground of the La Plata Mining Co. - To be Continued to 1,000 Feet Depth.

Special Correspondence. Logan, April 26.—Edwin D. Miles was in town from Paradise Saturday and reports that beautiful town in a most Prosperous condition.
It is the supply point and nearest

town to the La Plata mining region and gets much of the benefit of the extensive operations going on there. Mr Miles is an enthusiastic believer in the future of the La Plata country and says the day is surely coming when the mines there will be developed into reat bonanzas. The gentleman has had wide experience in mining affairs and thoroughly understands the for-mation of the La Plata mineral belt so that his judgment is well worthy of weight on the subject.

Seven men have been working for some time past on one of the properties of the La Plata Mining company, and four more will start on another tunnel in the near future. It is expected that not less than 20 men will be employed by this company alone during the summer. The shaft at one point is down 700 feet and will be continued to the 1,000 level. The company anticipates striking some very high grade ore by

DALY-WEST SOARS. Stock Was in Strong Demand on

'Change Today. Daly-West still soars. On the stock exchange this morning the stock of this great Park City bonanza touched at \$47.55 per share in the sales and was in strong demand at the close when bids of \$47.40 were freely made for it. It seems that the prediction made last week that it will reach \$50 per share before the close of the present week may come true. This statement was made with the one proviso-that the price of silver does not go lower. Indications today are that it will not, inasmuch as it is quoton higher than it was on Saturday. The first sale of Daly-West was made at \$47 even this morning, Nearly all other stocks exhibited more vitality and strength today and trading was brisk all the way through call. Consolidated Mercur was again lower, closing with \$1.36 bid, ex-dividend. Sacramento, ex-dividend, sold up to 281/2 cents, while Lower Mammoth, Sunshine, Martha Washington, Yankee Consolidated, Uncle Sam, Wabash and California all commanded more re-spect than had been accorded them

On the open board Montana-Tonopah brought \$1.05 and a 100 share lot Utah Sugar, preferred, was purchased The value of the sales on 'change forenoon averaged not quite \$1

per share. The quotations were as fol-lows:

MAJESTIC PARTY ARRIVES TONICHT

Extensive Development Work in Vice President Alexander and Judge W. A. Sherman Has Re-Treasurer Mucklow Coming.

SENATOR LEWIS IS HOME.

Arrived Yesterday-General Farish Came in This Morning-Goes to Mine Tonight.

The Majestic tourists will reach Salt Lake tonight and will proceed at once to the scene of the extensive operations of that great corporation in the copper belt of Beaver county.

Senator A. B. Lewis, president of the Majestic company, reached home yesterday and General Manager William A Farish, who came over another route, landed in the city this morning and will depart on this evening's train for the mines, where he will be in readiness to receive the easterners.

Senator Lewis said today that the party was composed of at least 25 Majestic shareholders. Among them are two of the present officers of the company, Vice President W. H. Alexander and Treasurer W. B. Mucklow The party will spend a few days in-specting the properties of the company after which the special car in which the travelers are coming will be whizzed over to Denver with its passengers

in time for the annual meeting, on May 4. Senator Lewis will accompany the party to the mines, also to Denver. The forthcoming meeting will pass off harmoniously and as previously stated in the "News," the possibility of any friction coming up has been averted. It would certainly be dis-astrous to the interests of the company if Senator Lewis should not con-

tinue at the head of the big Majestic eterprise.

The Senator had nothing to divulge at this time concerning the progres being made with the formation of new Beaver county company, in which the Imperial, Comet and Montreal groups are likely to figure.

WHITE ROCK PLACERS. Work Will Commence Again on Them May 1st.

A private letter from W. D. Higginbotham, who is at Elko, Nev., received this morning, stated that work will commence on the White Rock placers on May 1. The snow, he snys, is still quite deep but is disappearing quite

J. I. C. TO SINK. Down to 700 Feet.

The management of the J. I. C. mine at Park City, has concluded to send the shaft at that property down an additional 200 feet. This means that a depth of 700 feet will be attained. In will assume the shape of rosy bouquets. preparation for this undertaking Mgr. Turner was interviewing the machinery houses this forenoon for the purpos of buying a large pump and such other equipment as will be needed.

Mr. Turner says that the drift being run to the vein on the 500 foot level has penetrated some interesting ground, and that important developments are anticipated almost any day. He expeets to encounter an extension to the Daly-West vein which has made that property famous.

THE MAJESTIC PLANT. Progress Made in Beaver Mines During Last Week.

No Important developments have been reported from the Majestic properties during the week. At the Gld Hickory the electric drill plant is being in-stailed, the 20-horsepower gasoline engine and 22-horsepower dynamo being on the ground. The shaft and tunnel are now being wired for the current that will supply the drills and light the mine. The working shaft is now down nearly 200 feet, and the tunnel is in over 200 feet and will soon reach the shaft. More rapid progress will be made when the electric drills get to

At the O. K, the new gasoline hoist on within a few days. The work of block-ing out the ore bodies on the 200 and 00 levels steadily continues.

Yesterday the gallows frame for the new holst at the Vicksburg was put in place. The shaft is now down 210 feet. Down at the smelter the work of the Colorado Iron works is practically com-pleted. A number of men have been laid off and those remaining are en-gaged in putting on a few fin shing uches. All of the machinery in the power house and sampling works has been given thorough tests and found to work smoothly. The Majestic company vill now put on a large force of workmen for the construction of the dust flues and smokestack and the long piece of trestle, as well as the other work that must be completed before the plant is ready for operation. The company would have started this work long ago had it not been for the delay of the iron works in completing its contract, Owing to this delay the work is three months behind. Milford Times.

AT THE COPPER MOUNTAIN. Sinking of Shaft Will Be Resumed This Week.

By the end of the week the work of sinking the shaft at the Copper Moun-tain mine in Beaver county, an additional 200 feet, will commence in earn-

Manager Ben T. Lloyd spent last Saturday at the mine and returned home yesterday morning, Mr. Lloyd saw the new gasoline hoist in opera-tion for the first time and says it is

working perfectly. Supt. Charles H. Smith will complete the work of timbering the shaft to the bottom this week. On Saturday night

six sets were to be installed and the men are making progress at the rate of one set per day.

Manager Lloyd states that Supt.

Smith is in high spirits over the condition of things at the mine. In straighting the shaft last week in preparation for the timbers he encountered a fine showing or ore which had been missed by the old workings.

Some very high grade ore was en-countered in an old incline in the Cop-per Mountain mine several months ago. Supt. Smith declares that this body will be connected with the shaft before very long and anticipates some sensationel developments before it is 200 feet

RICH ORE FROM THE PACTOLUS

turned from Nevada.

DISPLAYED RICH SAMPLES

Containing Free Gold and Ruby 811 ver-Work Going on Vigorously -Shaft is Being Sunk.

Judge W. A. Sherman, who is directing the development of the Pactolus mining property in Nevada, in which a formidable syndicate of Utah mining men is interested, reached home or Saturday evening.

The judge said this morning that the campaign inaugurated at this promising property sometime ago, is being pushed along vigorously, and that the results being obtained are of a nature entirely satisfactory. The main working shaft has reached the depth of about 100 feet and in it has been disclosed some very high grade ore. The judge brought back with him some very rich sampl of them fairly spattered with ruby silver; while others belonging to ollection, presented a beautiful showing of free gold. Some of the ore is sensa. tionally, rich, and was taken right of the surface. But this is only a Nevada characteristic.

Being so remotely situated, without facilities for transportation, the or must necessarily contain large values in order to make it pay. There seems to be no doubt about the Pactolus rank ing equal to some of the Tonopah bonanazs.

KEITH-KEARNS MINES. A New Mill May Be Erected in Park City Soon.

The Park Record is authority for the statement that plans have been drawn, perfected and accepted for the immediate construction of a new mill at the mouth of the Alliance tunnel for the Keith-Kearns company. It then adds:

This, of course, mean nothing less than another large shipper of concentrates and ores to the gradually growing list of Park City producers. It means the opening up of much more mineral ground and an increase in the business and industry of the great camp. That it is to be a large modern and extensive plant the men behind it are sufficient guarantee. And this is all good music to the ears of the residents of this camp. With this new plant, with every

prospect of the old Ontario mill being transformed into a modern reduction plant, with the prospects of still an-Managment Decides to Send Shaft other zinc plant by the Daly-Judge, and the many properties now giving strong evidence of demanding mills to handle their product, with silver at 52%c and still strengthening, how rosy

> THE YAMPA PLANT. Contracts for Construction Will be Awarded This Week.

It was learned today from Manager Robinson of the Tintic Mining and Development Co., that the bids for the construction of the new matting plant for the Yampa mine of Bingham are nearly all in the hands of Chief Engineer James W. Neill. The contracts will be awarded within the next few days.

HORSESHOE TO START.

Property at Fay, Nev., Will Be in Operation May 15th.

The officials of the Horseshoe mine at ay have let a contract for the putting in of the necessary machinery, says the Stateline Oracle, and work will be commenced immediately. Manager Lane expects to see the mine in operation y the 15th of May and the mill soon

The Horseshoe mine has already re-plenished the coffers of its original owner to the extent of \$600,000 and it is well known that the ore is there in immense quantities. The Horseshoe is destined to become one of the greatest producers in southern Nevada and the people are looking forward to a new era of prosperity when that property agains resumes operations.

There are a number of valuable properties at Fay, Deer Lodge and Pike's Diggings that are going to make a great showing this season and capialists are beginning to see the point, too,

HANNAPAH DEVELOPMENT. Supt. Work is Demonstrating Its Value Satisfactorily.

Supt. Frank B. Work continues to send cheerful news to his associates from the Hannapah mine, near Tonopah. In a letter to A. J. Bettles, chief of the metallurgical department of the Newhouse mines, he states that he has demonstrated that the vein disclosed on the unner levels continues below the the upper levels continues below the 250-foot tovel. He has encountered it on the latter level with a drift, and Supt. Work observed that its values are no less important. The shaft will be continued an additional 100 feet, when a drift will again be run to intercept the vein. Some very high values have been obtained from this vein.

MINING CONCENTRATES.

An important strike of high grade ore is reported to have been made in the Kitty Clough property adjoining the Vicksburg mine, near Milford. The property will soon begin shipping. Charles Brown has resigned the su-

Word has been received from C .K. Roland, who recently acquired options on oil lands along the shores of the Great Salt Lake, that his company will suon be ready to commence operations. He is backed by a Texas syndicate.

The Sampson property at Bingham, which has been held under option by the Bingham Con. for some time, has been formally taken over by the latter. Sinking is to be resumed at once at

the New State mine in the Cottonwood districts. An order has been placed for a steam hoisting plant which will be used in letting a winze down from the tunnel level to a depth of 300 feet. F. H. Buhl, of the Kimberly-Buhl

syndicate, is is the city. We is giving attention to the big Twin Palls, Ida., irrigation enterprise. W. J. Lawrence and H. A. Smith departed Saturday night for the properduil, 1.3591.334.

Lots of People

Who are exceedingly careful about most things, give but a passing thought to the selection of a route East. Safety, speed, comfort and cost-should all be considered. We can give you the happiest possible com-bination of these elements. No matter where you are going-to California, Mexico, Florida or the East-let us talk it over with you
