OGDEN, UTAH, AUG. 30, 1904.

DEMISE OF MORGAN POWELL.

Huntsville Loses One of Her Oldest Citizens and Pioneers.

SESSION OF THE CITY COUNCIL.

Automobilists Accused of Reckless Driving in Ogden Canyon—County Teachers' Examination.

Morgan Powell of Huntsville, Utah, after an illness of about six weeks, died Sunday night, Aug. 28, at the home of Bishop David McKay. Elder Powell, who was 84 years old last March, was one of the early settlers in Ogden valley. He was a prosperous farmer, a kind neighbor, a devoted Latter-day Saint, and a much respected citizen in every way.

Morgan Powell was born in Cefn Cedydd-cymmer, near Merthyr Tydfil, Glamorganshire, South Wales, March 31, 1819. He was the sixth of seven children, all of whom have lived as he, to pass the four-score mark; and each of the six now gone, died in the order of his birth. The youngest sister, 82 years of age, still lives in Cefn Cedydd.

Elder Powell leaves no children to mourn his death, but he has many relatives in Ogden, Huntsville, Kanab, and other parts of the state, and a host of friends who love him for his intelligence, integrity and worth. He was a member of the Ogden Stake of the Church, and he was one of the most enterprising citizens, the poor, an ever ready benefactor, and his near friends and relatives, one whose absence makes a void that cannot be filled. No one could receive with more merit the lines of the poet:

"His life was gentle; and the elements so mixed in him, that nature might stand up."

And say to all the world, "This was a man."

The funeral will be held in the Huntsville meetinghouse Wednesday, Aug. 31, at 1 o'clock p. m.

TEACHERS' EXAMINATION.

The Weber county school teachers' examination for fall term is being held at the High school building. The examination will last three days, to-morrow being the last day. Supt. W. R. Wilson, Prof. William Peterson and John Wheeler are conducting the examinations. There are 41 taking the examination and in order to receive a renewal certificate they must receive an average percentage of 80 or over. There are 11 studies on which they are being examined.

CITY COUNCIL SESSION.

The Postal Telegraph-Cable company was not granted a franchise to do business in Ogden at last night's session of the city council. The franchise ordinance came up, was read the third time and the councilmen, amendments were added. Then the question of pay to the city by the company came up and was discussed a long time. Several of the councilmen were in favor of charging a regular monthly rental, but Mr. Nye and one or two others favored letting the company in to the city on the same basis as the Western Union, which pays no rental to the city. The ordinance was finally referred back to the committee on laws and another report, in which the committee will consider the question of remuneration.

The mayor was present and explained to the council that the Union Depot company had made complaint that the telegraph company refuses to establish a hydrant for the protection of the depot company's property. The company asked that the waterworks company be compelled to put a hydrant at that locality. The mayor explained the position of the waterworks company, which is that its contract does not require it to establish a hydrant or to be derelict in paying 5 per cent on the outlay. No action was taken on this matter.

A resolution was passed providing that all sewer connections as well as the establishment of a waterworks company and telegraph conduits on Grant and Wall avenues between Twenty-fifth and Twenty-sixth streets, shall be completed before the paving of those streets is started.

There was but one bid on the paving work of Grant avenue, from P. J. Moran, who asks 60 cents per cubic yard for excavating and \$2.50 per yard for asphalt paving, including the necessary concrete base. The bid was referred to the city engineer, who will report next week.

The regular payrolls were passed, and other routine work attended to.

MAY FENCE OGDEN CANYON.
At the regular meeting of the board of county commissioners a petition was received signed by John S. Lewis asking the board to fence Ogden canyon to the river from the mouth of the canyon to the Hermitage and at various places above the Hermitage where it is deemed necessary, for the protection of the lives of the hundreds of people who travel up the canyon for pleasure. The petition also sets forth that automobiles are driving at a rapid speed in the canyon, endangering the lives of travelers and that the board regulate the rate of speed they may drive automobiles in the canyon. The petition will be given due consideration and proper action taken. A number of minor routine matters were considered.

LEGER-TINGEN NUPTIALS.
John Tingen, 34, and Miss Camella Leger, 26, both of Ogden, were granted a license to wed yesterday.

CRUSHED UNDER THE WHEELS.
Heber Wright, former sheriff of Weber county, met with injuries at 7

o'clock this morning on the Lulu cut-off, which are expected to prove fatal. Wright has been employed on the cut-off for some time past as a switchman, and this morning, in helping to couple cars, he mislaid the coupling pin and was thrown under the wheels, which passed over his left arm, almost severing it from the body. The lower part of his left leg was also mangled and the toes were cut off, while several ribs were broken and the man rendered in a most critical condition. He was brought to Ogden on a special train and taken to the Ogden general hospital, where he is receiving every possible attention. The chances for his recovery, however, are very slight. Mr. Wright is about 77 years of age and has a wife and large family.

DIVORCE GRANTED.

Elizabeth Coleman was this morning granted a divorce from William Coleman on the grounds of desertion and failure to provide. The decree was granted by Judge Rollap, who awarded plaintiff the custody of a minor child and \$50 attorney's fees.

STACEY WAS ROBBED.

The police are now satisfied that John Stacey of Montana was robbed at the Union depot by the three men whom they suspected. This morning Officer Vance found the missing pocketbook at the rear of the Board of Trade saloon. It was Stacey's ticket and several checks, but the \$500 in currency was gone.

HOUSE BURGLARIZED.

The home of Jack Ford on Thirtieth street and Pacific avenue was entered by burglars last night and a purse containing \$6.50 in currency was stolen. Entrance was effected by the back door.

BRIEFS AND PERSONALS.

Miss Eva C. Erb, the popular stenographer in the county clerk's office, has gone to California on a pleasure trip.

Judges H. H. Rollap and Thomas D. Dee have returned home from a business trip.

Mrs. Fred Tolson and children have gone north to spend a short time pleasuring.

Miss N. O. Ogden has as her guest this week, Mrs. H. Ogden of Salt Lake City.

Miss Alice Brown has returned from a pleasant summer vacation.

G. B. Burhans testifies after four years.

G. B. Burhans, of Carleton Center, N. Y., who was arrested four years ago, while stating that he had been entirely cured of a severe kidney trouble by taking a course of Dr. Williams' Pink Pills, testified that he had never had a return of the disease. He stated that he had been entirely cured of the disease and that he had been able to do his work as usual. He also stated that he had been able to do his work as usual.

Round trip ticket to World's Fair to most popular lady at Salt Lake Wed. Aug. 31st.

LEGAL BLANKS, a full supply of the latest forms at the Deseret News Book store.

PROVO.

The Daily News is delivered by carrier in Provo early every evening (Sundays excepted) on terms as follows: In Salt Lake 75 cents per month; in Provo, requests for changes of address and payment of arrears should be made to R. F. Dugdale, 272 West 10th North, Provo, Utah. Advertisements and orders for church works also received.

FOR NON-PARTISAN SCHOOLS.

Convention Postponed—Divorces Granted—Republican Primaries Sept. 7.

Special Correspondence.

Provo, Utah County, Aug. 29.—County Superintendent J. L. Jenson has sent to the following letter to the several school boards in the county:

"The committee appointed to arrange for the non-partisan nomination of a county superintendent of schools has made the following recommendation:

"In view of the attitude of the county chairman of the Republican party in refusing to support a non-partisan nomination of a county superintendent of schools, and upon the suggestion of some of the leading trustees and teachers, that both parties should pass up on the question of non-partisan nomination of the county superintendent of schools, the committee is recommended by the non-partisan convention to postpone until after the parties hold their county conventions, and that efforts be made to get a favorable action from both parties."

"You will receive notice when they will be held. Would suggest that you write across the face of the notice you have posted, a note of postponement."

Respectfully, J. L. Jenson, County Supt.

FOURTH DISTRICT COURT.

In the case of Martha Adamson et al vs American Fork City, et al, which was before Judge Booth, yesterday, on an order to show cause, after hearing evidence the temporary restraining order, enjoining the defendants to interfere with the use of the water in the McArthur ditch by the plaintiffs, was continued in force till the final hearing of the case.

DIVORCES GRANTED.

A divorce has been granted Lucila A. Wilson, of Provo, from James F. Wilson, on the grounds of failure to provide. The parties were married at Nelson, Nebraska, Oct. 28. Plaintiff was awarded her former name, Lucila A. Taylor.

Hettie Crandall of Springville, was granted a divorce from J. Lewis Crandall on the grounds of desertion.

REPUBLICAN PRIMARIES.

Republican primaries to elect delegates to the county convention to be held in Pleasant Grove, Sept. 19, will be held in this city on the evening of Sept. 7 at 8 o'clock, in the following places:

First ward, Maeser school; Second ward, Court house; Third ward, Franklin school; Fourth ward, Parker school; Fifth ward, Parker school.

GARDEN CITY NOTES.

Mrs. Frank Rozelle has arrived from Missouri, with her family, to join Mr. Rozelle, who came some weeks ago. They will reside here permanently, which is a source of gratification to their many friends. The family moved to Missouri, where Mr. Rozelle has been doing excellent work.

TEA

Did you ever hear of a nervous Englishman?

They drink more tea than we do, six to one.

properly, some years ago, but the climate was not favorable to his health, and he decided to return to the mountains.

The Proctor academy opens on Sept. 6.

Miss Ruby Wall, daughter of I. O. Wall, of Wallbury, is at the Provo general hospital, where she has had a piece of a broken needle removed from her knee.

A daughter has been born to the following parties: Mr. and Mrs. J. E. Rott, and Mrs. Mosher T. Pack, Mr. and Mrs. John C. Leach, a son to Mr. and Mrs. Don C. Snow.

Hon. Abel Evans of Lehi, was in Provo yesterday on legal business. Judge Evans was over from Spanish Fork yesterday, and was before the Fourth district court.

Mayor Clark, George Cunningham and many other American Fork men were over yesterday as witnesses in the case of Martha Adamson, et al, vs American Fork et al.

Revolution Imminent.

A sure sign of approaching revolt and serious trouble in your system is nervousness, sleeplessness, depression, Electric Bitter will quickly drive the nervousness away, and restore the system to its normal state. It never fails to tone the stomach, regulate the bowels and bowels, stimulate the liver, and clear the blood. Run down systems benefit particularly and all the usual attending aches vanish under its searching and thorough effect. It is a sure cure for all nervousness, and it is a sure cure for all nervousness, and it is a sure cure for all nervousness.

WASTEFUL FARMING METHODS.

That the average farmer is wasteful and negligent in improving his opportunities must be conceded. His failure to exercise ordinary common sense and to observe the most elementary farming methods often renders his labors unremunerative and his occupation unattractive. If calling attention to some of the palpable delinquencies will tend to correct the errors and secure to him a greater measure of success, this letter will have served its purpose.

SUGAR CITY, IDAHO.

THE SUGAR BEET INDUSTRY.

Most Favorable Showing Made in Idaho Beet Fields.

Sugar City, Ida., Aug. 25.—I have been making observations and studying the conditions of the sugar beet industry in and around this place for the past four or five years, and I am now in a position to give you a report on the progress of the industry here, and the prospects for the future.

There are under cultivation from four to five thousand acres of beets that will be harvested in the Fremont sugar factory here this year. The planting was begun on April 12, and on May 15 was completed. The beets came up in the field as a shape as could possibly be desired and were doing well at the time of the frost.

When the frost came it was in many places over the tops to the ground leaving the fields looking like a black scourge had passed over the land. This frost affected all other crops in a similar manner.

I have talked with numerous people who have lived in the country for periods ranging from 12 to 21 years, and their unanimous testimony is that no such a frost as that of "fall" has ever visited this section before—that it is unprecedented in the history of the country.

When this set back was discouraging at the time, it by no means disheartened the people here, who are made of the genuine pioneer stuff, and are therefore, unable to understand the pessimism of the theorist.

When it was not a question as to whether or not their crop was a failure, but what was the thing to do, under the circumstances, it was estimated that they estimated that no less than 25 per cent to 30 per cent of the crop in the entire district was a total loss. In this time has proven they were well off in their estimate.

As it is a certainty today that the loss by the frost will not exceed five per cent, taking the entire 5,000 acres into consideration. In some places the damage was greater, but in others much less.

This is the experimental year here in raising beets upon an extended scale, and in the application of the new system. The average yield of beets was about 300 acres of the beets injured by the frost, plowed up and replanted between the dates of June 15 and 25.

On May 1 the water was turned into the main canals and the lateral ditches in all the fields, and within 60 days the subterranean water was raised 10 feet high, and when the frost came on June 11 the water had reached so near the surface of the ground that the beets injured by the frost were in a condition to be replanted.

If such a thing was possible. The crop revived far beyond anything the factory management and the farmers had dared to hope for. This also produced a condition of the judgment, that if such a thing was possible, the crop revived far beyond anything the factory management and the farmers had dared to hope for.

This also produced a condition of the judgment, that if such a thing was possible, the crop revived far beyond anything the factory management and the farmers had dared to hope for.

development has mostly taken place during the last three weeks. I have closely watched the development of the beet in this district, and I am free to confess that the results I find here are a revelation to me. I have not personally examined the beets in any of the Idaho Falls plant, but I am fully convinced that practically the same conditions obtain there as here.

With the wonderfully productive nature of the soil in this district, with the complete success of the subirrigation system; with the excellent climate and the unlimited water supply, and in view of the fact that the beets are of ordinary seasons, such as people of years of residence here testify to, there is no reason why this should not become one of the great sugar beet producing countries in the United States.

A. O. SMOOT.

WAS WASTING AWAY.

"I had been troubled with kidney disease for the last five years," writes Robert E. Watts, of Salem, Mo. "I lost flesh and strength, and I was unable to do my work. I had tried many remedies, but nothing seemed to help. Finally I tried Foley's Kidney Cure, and I am now sound and well." During the summer I had been drinking and being overheated. Attend to the kidneys at once by using Foley's Kidney Cure. E. J. Hill Drug Co.

WASTEFUL FARMING METHODS.

That the average farmer is wasteful and negligent in improving his opportunities must be conceded. His failure to exercise ordinary common sense and to observe the most elementary farming methods often renders his labors unremunerative and his occupation unattractive. If calling attention to some of the palpable delinquencies will tend to correct the errors and secure to him a greater measure of success, this letter will have served its purpose.

Many farmers throughout the state are forcing the milk at about 15 degrees, and the milk is being sold at a price of 15 cents per gallon. The milk is being sold at a price of 15 cents per gallon.

The process of homogenizing milk—perfecting by Gaulin of Paris—consists in forcing the milk at about 15 degrees, and the milk is being sold at a price of 15 cents per gallon. The milk is being sold at a price of 15 cents per gallon.

The cost of concentrating the force of sea waves must ever prevent the utilization of wave power in the opinion of V. Martini, a French engineer. The elevation of floats is about 100 feet, and it takes a long time, so that the apparatus is very expensive for work of small power.

A new branch of science, called "psychomechanics," has received special attention in France from Dr. Charles Fere. His results show that a man has a greater capacity for average work than he is capable of doing.

In order to raise a profitable crop it is essential that the land should be thoroughly tilled. There must be a properly prepared seed-bed in order to justify the hope of an abundant harvest. How many farmers upon backs or hard ground and imperfectly covered cannot take root and grow. It is much more economical and profitable to till well a small acreage than to only half cultivate a large one.

One of the most attractive occupations of the present time is fruit raising. Upon almost every farm in the state are many valuable fruit trees ready to yield abundantly if only trimmed, sprayed and properly cared for.

Raising good stock has always been a profitable business. An animal well bred and well reared will bring a good price when needed. Why then do so many farmers give no attention to the selection of their stock, give no care to the breeding, and no attention to the selection of their stock, give no care to the breeding, and no attention to the selection of their stock.

Water is often thought to be almost absolutely incompressible, but Prof. Tait has now calculated that the ocean would rise 116 feet higher than at present if it were not compressed by its own weight. We are indebted to this compression, therefore, for 2,000,000 square miles of our dry land.

Investigating a reported discovery, Dr. Greff, of Berlin, has proven that radium offers no hope whatever of aiding the blind to see.

To us the world's strangest arena of life is the deep sea, whose animals have well marked distinctive conditions. The life forms, viz: the great water pressure, the low temperature, the chemical condition of the water, the lack of light, and the lack of air.

Because of the low temperature, Arctic animals appear in deep waters of the tropics. The deep water is deficient in oxygen, rich in carbonic acid, and lacks calcium—the last-named peculiarity giving soft shells to the crustacea and cartilaginous skeletons to the fish. The existence of plant-estige animals is made possible by the material falling from above. Lack of sunlight causes absence of eyes or very prominent eyes—the purpose of the latter being to recognize the phosphorescent color of some of the animals. Red and black are the common colors of the animals.

The so-called canals of Mars are regarded as an illusion by many astronomers, but by others are supposed to represent vegetation—possibly cultivated by inhabitants. A new theory is offered by A. Baermann, an engineer of Zurich. He supposes that Mars has a solid, brittle crust overlying a more elastic nucleus, and that as the crust contracts, it cracks. Experiment has proven that points of greatest pressure would show double cracks. The right-angled canals indicate a homogeneous crust, and the absence of mountain ranges.

Now there was no SMITH found throughout the land of Israel.—1 Sam. xiii, 9.

But

SMITH'S FLOUR

is now found in every home where good baking is done.

QUEEN OF THE VALLEY ROLLER MILLS.

Highest price paid for good wheat.

SCIENTIFIC MISCELLANY.

The ordinary Whitehead or automobile torpedo consists of a cigar-shaped steel cylinder about 18 inches in diameter and 18 feet long, which carries in its forward end about 200 pounds of high explosive with a percussion fuse, while the central portion is only moderately compressed air at a pressure of 1,000 pounds per square inch, and the rear end contains the compressed air motor, driving the propellers. A gyroscopic rudder keeps the torpedo on a straight course. The air supply lasts about a minute, driving the torpedo half a mile, and as this speed is exceeded by some cruisers and other vessels, there is risk that a vessel may overtake a torpedo before the compressed air is exhausted.

The stellar universe has a background of pearly-white, which always fills the field of a telescope with a faint luminosity, and astronomers are guessing as to whether this shimmering shroud is made up of quadrillions of suns, or whether the universe is immersed in nebulous matter. The pearly veil is torn in places, at least 100 jet-black wells or dark spaces being shown in the constellations Sagittarius and Scorpion by the 16-inch telescope of the Lick Observatory. In one of these dark fields is Antares, which is composed of about one hundred and fifty million suns, and has 8,000 times the mass of our sun, and it is suggested that space over a certain area may have been cleared of matter by the action of a star, or that a star or other stars are near black wells or supposed openings into outer space.

The gripe and excessive meat-eating are the curses to which Lunatics (Champanier) attributes apoplexia. He has found that cases not preceded by an attack of gripe are very rare, and that the cure is practically unknown to the vegetarians of France and other countries. The very few cases he has known among vegetarians have been insignificant, recovery taking place in a few days without operation.

The case of a healthy man of 61 whose heart beats only 30 times a minute, the normal rate being from 72 to 80, has been recorded by Dr. Seifert of Berlin. In another case reported the beats numbered only 22, but the patient was suffering from heart disease.

An entirely new mammal in the British Isles is the astonishing discovery of J. G. Miller. It is a very curious creature, and it is totally distinct from the common short-tailed field-mouse and all other known forms.

These who will persist in closing their ears against the continual recommendation of Dr. King's New Discovery for Coughs, Colds, and Bronchitis, will have long and bitter fight with their troubles, if not ended earlier by fatal termination. Read what T. R. Beal of Beal, Miss., has to say: "I have been suffering from a severe attack of cough, cold, and bronchitis for several months, and I have tried many remedies, but nothing seemed to help. Finally I tried Dr. King's New Discovery, and I am now sound and well." During the summer I had been drinking and being overheated. Attend to the kidneys at once by using Foley's Kidney Cure. E. J. Hill Drug Co.
