

RICH PRESENTS.—The following is going the rounds of the newspapers:

"Princess Pia, the new Queen of Portugal, has received among her bridal gifts an album from the Pope, in which is set in brilliant a bit of the veil of the Virgin Mary and a thorn from the crown of the Savior. The municipality of Naples has given a set of rose colored coral, including bracelets, brooches, necklaces and other articles, valued at 30,000 francs. It has taken four years of coral-fishing on the African coast to obtain sufficient rose coral for this splendid present."

NATIONAL CHARACTERISTICS OF FEET.—The French foot is meagre, narrow and bony. The Spanish foot is small and elegantly curved, thanks to its Moorish blood, corresponding with the Castilian pride—"high in the instep." The Arab foot is proverbial for its high arch; "a stream can run under his foot," is a description of his form. The foot of the Scotch is large and thick. The foot of the Irish is flat and square. The English foot is short and fleshy. The American foot is apt to be disproportionately small.

--Cannon of large calibre are supposed by many to be an entirely new invention, and many persons evidently believe that the Rodman 15 inch guns are the largest ever made. This is far from being true. The great gun of all is at the Kremlin of Moscow. This is 36 in. calibre, 18 feet long, and weighs 97,500 lbs., almost 50 tons! It was made two hundred and seventy-six years ago.

—Vice is concealed by wealth, and virtue by poverty.

---At an inquest in London on the body of a child, who died from insufficient food, it was elicited from the testimony of the mother that she (the mother) had to support herself and five children by making flannel shirts for three pence apiece, she finding needles and thread.
