GETTING LARGER ORE BODY. (Special to the "News,")

(Special to the "News.") Provo, June 22.-Word was received here today that the East Tintle Devel-opment company of East Tintle is now in a larger body of lead ore than ever before. The drift on the 230 foot level has now broadened out into 10 feet of ore and the drift has gone through it for 20 feet. At present the ore is being stoped out for shipment. The shaft is now at the 350 foot level and a drift is being sent in to the east to catch the same ore body as was en-countered in the level above.

GOOD ORE IN IDAHO.

Provo Man Receives Fine Specimens From Paris Canyon. (Special Correspondence.)

PROVO, June 22 .- Andrew Madsen as received some specimens from the Paris Boulder mine in Paris (Idaho) canyon, which goes 62 per cent lead, and the owners claim that there is a large body of it. He also has a speci-men of copper ore from a claim near the Boulder which assays 55 per cent copper. These properties have lately been opened up and an encouraging feature to prospectors is that mining and prospecting has been going on in Paris canyon for many years higher up than where this ore came from, and these apparently valuable deposits have been overlooked.

MILLIONS IN GILSONITE.

General Asphalt Company Makes Enormous Sum from its Holdings.

The General Asphalt company, better known as the asphalt trust, took \$500.-000 worth of gilsonite out of Colorado and Utah during the year ending April 30, 1909. The entire amount was hauled over the Uintah railroad to Mack, Colo., to be acquired if desired. in this county, where it was transferred "The Red Stocking and Manhattan groups of the company's claims, one to two miles northeast of the Indigo Biue claim have not yet been much to the Denver & Rio Grande, says the Grand Junction Sentinel. This amount of raw material was worked into its finished state and yielded the company Blue claim have not yet been much developed, although a lease is now being worked on one of the Manhattan claims. A copper and silver ore vein, carrying at some points at least con-siderable gold as hown by assay, can be clearly followed for a distance of 5,700 feet between the north and south limits of the claims, on the company's property. The ore vein is intersected by six quartz veins, also running across the entire property. These indications a gross incort of \$11.818.529 for the company at the end of the year were \$40,266,000. The General Asphalt company ob-tained almost its entire supply during the past year from the properties owned on the border of Utah and Colorado. It owns immense beds of asphaltum in Venezuela which have been tied up in litigation for a number of years, the entire property.
