TELEGRAPHIC.

YESTERDAY'S PANIC.

Effects of the Large Gold Shipments on Wall Street.

STARTLING STORIES, WILD RUMORS

Quiet Restored Through the Efforts of City Banks and Members of the Syndicate.

NEW YORK, Sept. 12.—This day was an exciting one, and for a time bid fair to be a critical one in the financial world, so that many feared that it might pass into history as a small reproduction of the Black Friday of years ago. But bright the disturbing elements are better understood, and the outlook for the treasury and the maintenance of its gold reserve is comparatively clear.

Uncertainty as to the intention of the government fund syndicate to maintain the reserve at the sectary mark, late the secretary in addition to do so, has also tended to increase the uneasiness caused by the week. A crisis largely thrown into this morning, when announcement was made that the firm of Lazard Freres, which is a member of the bond syndicate, had exhausted its $2,250,000 of gold for shipment. This announcement naturally gave rise to the impression that the syndicate had withdrawn from its controlling position behind the throne, and it sent quotations tumbling in Wall street, beside starting stories that the syndicate had dissolved, that a bond issue was imminent, and that the treasury was that selling, back to its old position of the dark days of last winter.

Before the afternoon had passed, however, the city banks had come to the aid of the sub-treasury with deposits of gold, made in exchange for greenbacks, expressions had been made by members of the syndicate that the firm which started the panic, and the quiet had been restored when the moneyed institutions stood their doors on the day.

Tourist Rates to Utah.

CHICAGO, Sept. 12.—At a general meeting of all the lines in the Western Trans-Missouri Passenger association today, it was decided that a rate of 70 per cent of the double rates be granted for the Atlanta exposition, effective on September 25th.

It was decided that the summer tourist rates to Utah, Montana, Idaho and Western Washington shall be allowed to remain in force all the year round. This was to meet the action of the Great Northern and the Northern Pacific, which declared some time ago that they would make the rates effective all the year, no matter what action was taken by the other roads.

THE "REORGANIZED" CHURCH.

Conference at Council Bluffs With Three Thousand in Attendance.

COUNCIL BLUFFS, Ia., Sept. 12.—The conference of the Latter-day Saints opened today, with 3,000 people present. The meeting was called to order by Rev. Robert McKlaney, of Pottawattamie county. H. M. Hansen, of Rose Dell, was chairman of the temporary organization, and J. W. Rushton, of Shenandoah, secretary. These officers will occupy their places until Saturday afternoon at 3 o'clock, when a permanent organization will be effected. By that time the attendance will have been largely increased.

Delegates have already arrived from Holt county, Neb., and Independence, Mo., in addition to the delegates from Southwestern Iowa and vicinity, who, of course, will take up a large part of the meeting, and delegates from South Dakota and Illinois are expected.

The meeting will last until the 22nd. Commencing the 20th, the general conference will be held at Logan, and many of those in attendance here will go there.

JACKSON'S HOLE TROUBLE.

Report of Judge Jesse Knight to Governor Richards.

DENVER, Sept. 13.—A special to the News from Cheyenne, Wyo., says: Some days ago Governor Richards requested Judge Jesse Knight of Uinta county to make a personal inquiry into the causes leading to the recent Indian trouble at Jackson's Hole. The investigation was sought because of its report sent to Washington by United States District Attorney Carey, in which the settlers of that section were referred to as murderers and the killing of an Indian branded as premeditated murder.

Judge Knight filed his report with the governor today. It is very long and covers the ground completely. It says Mr. Clark's report is wholly untrue. The settlers at Jackson's Hole, he says, are peaceable, lawabiding citizens, and the killing of the Indians was done by a constable's posse carrying out the mandate of a court. The trouble could have been avoided if the Indians had not been allowed to violate the game laws of the state.

MORE TROUBLE FEARED.

CHEYENNE, Wyo., Sept. 13.—Frank Bonne, justice of the peace, and William Manning, constable at Jackson's Hole, have published a communication, stating that if the Indian agents continue issuing passes to Indians to leave Jackson's Hole, they fear trouble will result. They state that the commander of the National park allows non-resident whites to go through the park into Jackson's Hole and have all the trouble they wish in a party of Germans just passed through the park with thirty-seven elk heads and eight antelope heads.

How poor all others are compared to Dr. Price's Baking Powder.

Fifty-Seconds Recounts Honey.

NEW YORK, Sept. 13.—Bob Fitzsimmons, in an interview in a morning paper, declares he will not step into the ring at Dallas unless he is assured of $25,000 interest in the oil-cloisonne scheme. He says Joe Vendig, William A. Brady and Charles Dawe sold the right to operate the machine out of the ring, and that he is entitled to a share of the profits.

At Ease on the Gallows.

TAHLEQUAH, I. T., Sept. 13.—"Frog" Davis, who slew Sheriff James Muncrave of the Cookson district last summer, was executed at the national prison-yard at this place today. He protested his innocence up to the last moment, in the hope that something might be done to stay the execution. Only a few minutes before climbing the scaffold, however, Davis confessed. On the gallows he made a long talk, saying he was the bravest man that ever died on the scaffold. Not a tremor passed his lips, and he seemed perfectly at ease. He did not regret the crime. He said he would have killed Muncrave's entire posse had they not been hidden behind trees. Within twelve minutes after the drop fell Davis was dead, having died of strangulation.

To the President of the United States.

QUEBEC, Sept. 13.—The fourth annual meeting of the Canadian Manufacturers' association was brought to a close by a banquet at Frontenac. Mr. W. C. Cornwell, who was present, as representing the American Bankers' association, replied to the toast to the President of the United States. Mr. Cornwell paid a warm tribute to Mr. Cleveland, whose staunch adherence to sound principles of finance, he said, evoked the admiration of every Republican like himself.

RAILROAD RATES.

The Southern Pacific Preparing for a Legal Contest.

SAN FRANCISCO, Sept. 14.—Now that the railroad commission has made a reduction of 5 per cent in grain rates and has passed a resolution producing for an average reduction of 25 per cent in all other freight rates, the Southern Pacific company is ready to go into court the legality of the commission's action as soon as it attempts to enforce the rates so reduced. It may be some weeks before the railroad commissioners can figure out the new rates on all the various items of merchandise between the different stations within the state, or it may be several months. It is a colossal undertaking, and tariff experts declare that if the matter is taken up systematically and every rate considered it will be many months before the entire tariff is ready to be put into effect. Long before that time arrives the law department of the Southern Pacific will be prepared to throw the whole matter into court and to fight for a judicial declaration that the whole proceeding is illegal.

THE WITNESS FOUND.

Last Link in the Evidence Against Theodore Durrant.

SAN FRANCISCO, Sept. 14.—A few weeks ago Captain of Detectives Lees said that if a witness could be found who would identify the woman in gray that any or all of Blanche Lamont's rides were in the possession of Theodore Durrant before they were returned to Mrs. Noble in so mysterious a manner, the last and strongest link in the chain of evidence against the young medical student would have been forged.

This witness has been found.

He is a business man, a man of unquestionable integrity, and he comes forward with his statement at this late day because he believes it to be his duty to make known the fact within his knowledge before it is too late to have any effect on the trial now in progress. So far as his knowledge goes, he is positive as to his facts.

The witness who has come to the front so opportunely and will prove such an important factor in the presentation of the case for the people, is W. J. Phillips. His testimony will be corroborative of that of Adolph Oppenheim, the pawn broker who testified at the preliminary hearing that Durrant entered his place of business a few days after the murder of Blanche Lamont and tried to pawn one of her rings. Phillips says he was near the pawnshop at the time and saw Durrant when he entered the place.

Highest award at World's Fair went to Dr. Price's Baking Powder.

NO WOMAN WILL "OBEY."

The Objectionable Word Stricken from the Marriage Ceremony.

CHICAGO, Sept. 14.—Mrs. Blanche Smith of No. 4267 Ellis Park, was married last night to William Allan Hartt, of Tucson, Arizona. The ceremony was performed by the Rev. W. F. Merritt.

The word "obey" was stricken from the ceremony, which was private, only the relatives being present.

"I am not a 'new woman,'" said Mrs. Smith last night an hour previous to the ceremony, "but I do not think any woman will 'obey,' and therefore, I think that part of the ceremony should be omitted."

Mr. Hartt is a wealthy miner of Arizona. He owns the Ore Blanco mine, besides having a 1,000 acre fruit farm in the vicinity of Tucson. Mr. and Mrs. Hartt, after the ceremony, left for their future home in the West.

PALPITATION OF THE HEART.

Shortness of Breath, Swelling of Legs and Feet.

"For about four years I was troubled with palpitation of the heart, shortness of breath and swelling of the legs and feet. At times I would faint. I was treated by the best physicians in Savannah, Ga., with no relief. I then tried various Springs, without benefit. Finally I tried

Dr. Miles' Heart Cure

also his Nerve and Liver Pills. After beginning to take them I felt better. I continued taking them and I am now in better health than I ever hoped to be. I will cheerfully answer all letters of inquiry. I owe my recovery I have gained fifty pounds in weight. I hope this statement may be of value to some poor sufferer."

E. B. BUTTON, Ways Station, Ga.

Dr. Miles' Heart Cure is sold on a positive guarantee that the first bottle will benefit. If it fails, druggist will return your money. It will benefit nearly all. Sold by druggists, or sent by mail or express by the Dr. Miles Medical Co., Elkhart, Ind.

For sale by all druggists.

BRIGHAM YOUNG COLLEGE

The Academic Year Begins on September 16th.

ITS COURSES, BUILDINGS AND FACILITIES.

The Opera House and Preston Block Used as Adjuncts to the College Buildings Proper — Department Descriptions—Location.

The next academic year of the Brigham Young College will begin Monday, September 16. The following courses are offered:

Course in General Science, four years.
Course in Letters, four years.
Academic Course, three years.
Normal Course, three years.
Advanced Normal Course, two years.
Business Course, three years.

The first two of these courses lead to degrees; the others, to certificates of graduation.

The Academic, Normal and Business courses are open to all qualified students over fifteen years of age. Graduates of these courses are admitted without examination to the course in General Science, or in letters. The advanced Normal Course is open to those who have completed the Normal Course.

There is also offered a special Mutual Improvement Course, which extends through twenty weeks, beginning November 4. The object of this course is to prepare young men for conducting the work of Improvement Associations. In connection with the regular work a Model Association is conducted under the direction of the College professors, thereby giving students the opportunity of putting into practice the principles given in the class-room.

COURSES OF INSTRUCTION.

In addition to the work of the M. I. A. Course, the College offers: Nine courses in biological science, including botany, physiology and zoology; six business courses, including bookkeeping, phonography, typewriting, commercial arithmetic and commercial law; five courses in chemistry; eight courses in the science and art of teaching; ten courses in English language and literature, including members of three years each in Latin, French and German; four courses in geology and mineralogy; fourteen courses in history and political science; seventeen courses in mathematics and astronomy, including surveying; three courses in physics, extending through three years; eleven courses in theology and philosophy; and courses in drawing, geography, vocal and instrumental music, voice culture, and physical culture.

BUILDINGS.

The College buildings comprise the Main Building, the Laboratory, the President's Residence, and the Dormitory. The Main Building contains the assembly room, library and reading room, general museum, and recitation rooms for History, Modern Languages and Pedagogy. The Laboratory contains chemical, physical and biological laboratories and recitation rooms. These buildings are well lighted and ventilated, and are provided with steam heat, water and electric lights.

In addition to these buildings, the second floor of the Preston Block, heretofore known as the Tithing Office Building, has recently been placed at the service of the College; and the Theatre or Opera House has been secured for the College Lecture Hall. The Preston Block, which is provided with steam heat and electric lights, contains the recitation rooms for the classes in English and Mathematics. The Lecture Hall has a seating capacity of eight hundred; it is provided with opera chairs, steam heat, water and electric lights.

Through the co-operation of the Logan City Board of Education the Woodruff school has been placed at the service of the College for a Normal Training School, to be used in connection with the work of the Normal Department. This commodious structure is situated opposite the College campus, at the corner of First and College streets.

LABORATORIES AND MUSEUMS.

The chemical, physical and biological laboratories are furnished with cases, desks and necessary apparatus for practical experimental work in the natural and physical sciences. The museum has been greatly enlarged during the past year by contributions from the friends of the College, including many missionaries who are laboring in different countries. It is supplied with specimens illustrative of general geology, mineralogy, filiating, paleontology, metallurgy, botany, zoology, and archæology. For practical work in surveying there is an engineer's transit, with solar attachment and all necessaries. Kindergarten and other material is also provided for practical work in the department of pedagogy.

THE LIBRARY.

The library occupies the north room on the second floor of the main building. This room, which has recently been furnished with new shelving, reading slopes for current papers and magazines, and with reading tables, contains ample accommodations for one hundred and twenty readers. It is well lighted and ventilated, is supplied with steam heat and electric lights, and, during the school year, is open to the public as a reading room. The reading room is supplied with all the current periodicals of Utah, and with the most important newspapers and magazines of the United States. The principal dictionaries and encyclopedias, including the Encyclopedia Britannica, Chambers' Encyclopedia, Appleton's American Encyclopedia, Century Dictionary, and other works of reference, occupy shelves in the reading room, within free access of the readers.

The College library has been greatly augmented during the last academic year by contributions from the trustees, faculty and friends of the institution. The library at present contains upwards of 2,500 bound volumes and many pamphlets, and additions will be made during the year to meet the requirements of students in the several departments. Professor Miller's valuable collection on history and political science will be placed in the library, and students will also have the use of the president's private library of about eight hundred volumes, mostly on [illegible], philosophy and general science.

LOCATION.

The College is situated in one of the most desirable parts of Logan City, at the corner of First and College streets, on the north fork of Logan river. Being only one block from Main street it is in a central yet quiet location, within easy reach from all parts of the city.

SCHOLARSHIPS.

As an encouragement to the earnest who have maintained a high standard in the College, and as an assistance to worthy young men and women who are desirous of obtaining normal training, thirty scholarships have been established by the College, each of which entitles one student to free tuition in the Normal Course for one year. Applications for scholarships should be made to the President, not later than the second week preceding the opening of the College.

EXPENSES.

Tuition is free to students with scholarships and to students in the M. I. A. Course. To all others the tuition is $5 for the Fall term, $7 for the Winter term and $4 for the Spring term.

Good rooms and board can be established in private families at from $2 to $3 per week. By renting rooms and boarding themselves students can reduce their expenses to from $1.50 to $2 a week for board and room. Rooms can be rented at from seventy-five to fifty cents per week. A number of rooms in the College dormitory are rented at these rates.

For catalogue and other information, address,

WM. J. KERR, B. S.,
President.

FALL GOODS COMING NOW.

Woolen Goods a Trifle Higher Than Last Fall, Cotton Fabrics and Sewing Silks have Also Advanced in Price.

We have ordered cloth this fall with the idea that we are to have an improvement in trade. And that we expect we will want better suits than they have been buying for the past three years. Therefore we purchased from the most reliable manufacturers, as we always do the very latest patterns, which ensured us the very latest cut over goods of last year's designs. We have also made some desirable changes in our manufacturing department. Besides adding three to engaging the services of one of the most reliable and best known cutters in the west, we have customers also testing our experiment by placing orders with us.

With regard to prices we still adhere to our motto of giving our customers a little better goods for their money. Being satisfied with very small profits.

We have also looked after the interests of our less fortunate customers, who do not feel that they can afford to invest $25.00 or more in a suit, but still like to dress in well fitting, well made, tasteful appearing clothes, and for this trade we have placed a very carefully selected line of Amazeon Made goods. These goods are equal in neatness of pat ern and general appearance to those of higher priced manufacture, and are of excellent wearing qualities and are represented by many conservative dressers as imported, and offered for sale by them at such a price much more than one-third the same goods to cost from them now we are ready to fill orders at from $12.50 to $22.50 and give the customers the benefit of having them cut and made by the best skilled workmen in the city, a privilege we trust will be appreciated.

Horses Kick

This is what happens. One part comes out where it should be closing, the other runs into the tender foot. Both sides are the result of the Cold-Rolled and

Shearing Process

by which the fibres of metal are separated as if one after the other with the fingers of a hand. Putnam Nails are therefore distinguished by the tough edge along the entire inner toe point.

Putnam Nails

are exclusively Hot-Forged and Hammer-Pointed, precisely like the old-fashioned hand-made nails. This process leaves all particles of iron's tough edge, in form a compact, firm and that cannot split, shiver or break and is

Absolutely Safe.

Putnam nails never pinch, mutilate or crowd out of the quick, in shoeing. Insist on them.
