at the Chinaman mill this week dem onstrated beyond a doubt that the present method of treatment is the one particularly adapted to the ore, the returns tallying with the assay value of the ore. The outlock for a boom in the mining industry in that county the current year is highly flattering.

Denver Mining Reporter: Big results of mining and ore treatment under the cyanide treatment are of daily record in Utah. On Tursday of last week, as the result of one day's work at the Con-solidated Kansas City Smelting and Refining company's works, cyanides were unloaded from the Lucky Boy, 200 pounds, the Sacramento company 700, and the Chinaman 100 pounds, the value of the day's receipts being \$25,000.

Rawlins (Wyo.) Journal: Mr. C. E. Knapp, president of the Kurtz Chat-terton Mining company, was in the city the first of the week. He was accompanied by Manager Adams of the com-pany and Mr. Best, a Chicago capi-talist, who is largely interested in the company, and together they paid a visit to the mines and made a thor-ough examination of the property. They put surveyors at work to lay out the most sultable location for the concentrator and matting plant, which will be in operation as soon as it can be transported to the mines.

Halley (Idaho) Times: It is reported, on what seems to be good authority that Hugh Bradford, who has had charge of the Minnie Moore property since operations there were discontinued, has received a letter from Thomas Carmichael of London and New York, ordering him to turn the property over, on demand, to the representatives of the new owners, the property having changed hands. The new company will, it is said, purchase the Pacific tunnel, which adjoins the Minnie Moore group, and begin work as soon as the tun-el is secured. It has \$25,000 in the treas-ury, to be used as working capital.

besides copper values, some striking ef-fects in native silver, and closely re-sembles, it is said, some of the ore at one time marketed from the Grand Central. ' A winze has been run down about 25 feet from the drift on the 600 level, and the ore chutes have been eached by a short drift from the winze, It is now proposed to stope on the vein and ascertain the extent of the chute. after which an incline may be run down on the vein. Some shipments are promised shortly and when developments warrants it the main shaft will be continued deeper and a drift run to the ore chute at a still greater depth.

THE LOWER MAMMOTH.

-Native Silver.

### BUNKER HILL ORE.

High Grade Galena in An Upraise from the 200 Level. Private assays obtained from samples of Bunker Hill galena ore show as high as 74.6 per cent lead, 34 ounces silver and \$2.40 in gold per ton. The carbon-ate ore assays 60.8 per cent lead, 19.3

ounces silver and \$1 in gold per ton. A. L. Jacobs, who visited the mine A. L. Jacobs, who visited the mine yesterday, says that there is some ore in the bins and a three-foot vein has been opened up in the west drift in a stope from the 200 level. There is every indication that the chute now being worked on is identical with the one on the 150 level, from which ore has been shipped.

#### THE GIPSY BLAIR.

Rock Showing Metallic Values Found gresses .- Rawlins, (Wyo.), Republican. at a Depth of 160 Feet. The contractors who are sinking the shaft 200 feet, deeper on the Gipsy Blair property at Alta came down from that camp yesterday afternoon. They brought to town some fine booking sam-ples of quartz and lime formation showing metallic values. It is stated that over two feet of the rock exists cars of ore today. The Horn Silver of Frisco had a car of ore on the market today. in the bottom of the shaft, besides a foot of loose vein matter which shows chloride of silver. The indications are of ore on the market today. said to be more favorable than ever that the property will make a mine. Ben D. Luce will go up to Alta in a Two cars of ore from the Mammoth of Tintic were on the market today. day or two to examine the new con-ditions at the property.

## COPPER GLANCE STRIKE.

# A Foot of Ore Which Assays Well in

Lead and Gold. Some very good ore is reported to have been uncovered in the Copper Glance property in Bingham a few days ago. Barlow Ferguson, when seen to-day, stated that a foot of ore has been opened up which assays as high as 52 per cent lead and \$6.40 in gold per ton, with some silver. The strike occurred in the tunnel about 300 feet from the entrance. The Copper Glance is neighbor to the Congor and contains about 70 acres of ground for which a patent is now being sought.

#### SOLD AT AUCTION.

#### Group of Nine Patented Claims Transferred for \$5,000.

Sheriff Haycock sold at auction last Sheriff Haycock sold at auction last Monday the group, consisting of nine patented mining claims, belonging to the American Antimony Mining com-pany to W. C. Staines for the sum of five thousand dollars, says the Pan-guitch Progress. These claims are situated in the Antimony mining dis. trict, Garfield county. For a long time they have been laying idle, but it la thought since the advance in the price of antimony that these fies can be made to pay. We understand that the purchaser will place on the property some improved mining machinery and make a thorough test is to whether or make a thorough test is to whether or not they can be worked with profit. Most of the ore is of a low grade, and must be concentrated before it can be
