

EVERING NEWS.

Wednesday, Oct. 3, 1906.

FRAGMENTS.

There is a message at the Western Union Telegraph office for G. E. Ward. Everybody should visit the fair. It will be open day and night for the remainder of the week.

Salvador Roquemore, a tobacco merchant of this city, and Josephine Hansen, were arrested by the police early this morning for lewd conduct.

The case of Wm. Henderson, for assault with a deadly weapon, which was set for trial in the Third District Court has been postponed indefinitely.

Mrs. Lewis' house in the Twentieth Ward was burglarized on Sunday night. The thief entered by the window, and got two brooches and about one dollar in small change.

The regular bi-weekly meeting of the Teachers' Institute has been postponed on account of Conference until Saturday, the 10th inst. By order of the chairman.

Members of the Tabernacle choir will meet for practice tomorrow (Thursday) evening, at 7:30. A full and prompt attendance is desired.

E. BREXLEY, Leader.

FRANK STODDARD, the prisoner in the penitentiary who is afflicted with typhoid fever, is said to be in a dangerous condition. He is given all attention that can be at the present time.

The First Ward and Liberty Park street carlines both run close to the fair grounds. The former line goes along the street on the east side of the square; the latter is one block west of the entrance to the fair grounds.

Dr. W. W. WARRINGTON, of the First Ward, yesterday underwent an operation for hernia, which had fallen and could not be replaced. Doctors Benedict and Bowers performed the operation, which was successful. The patient is progressing favorably.

The children of Nicola Ramussen, of the First Ward, who were so terribly burned by a kerosene explosion a few days ago, are improving, as is their mother, whose injuries received at the time, were quite serious. All are progressing favorably.

Out of Prison.

Today Brother Henry W. Manning, of Hooper, Weber County, was released from the penitentiary. He has served a four month term, to production of which he was sentenced for living with his wife. He paid his fine, \$50.00.

First District Court.

Proceedings before Judge Judd at Provo yesterday:

United States vs. Soren C. Christensen; unlawful cohabitation; defendant would obey the law; sentenced to 60 days in the penitentiary; adultery; sentence suspended till next term of court.

United States vs. John Cox; unlawful cohabitation; promised to obey the law; sentence suspended.

United States vs. A. A. Day; unlawful cohabitation; given to October 3d to plead.

United States vs. E. A. Day; adultery; given to October 3d to plead.

People vs. Oscar Berglund; grand larceny; plea, not guilty.

United States vs. Wm. Brathwaite; unlawful cohabitation; November 17 set for sentence.

United States vs. Wm. Brathwaite; adultery; plea, not guilty.

Twenty-six indictments were reported by the grand jury in United States cases and one Territorial.

People vs. Henry Parish; defendant ordered brought from the penitentiary for arraignment.

The cases of the United States vs. Jas. S. Alfred, Elmer Johnson and Nels C. Jensen were ordered dismissed.

From Utah.

Brother Reuben S. Collett arrived from Ashley Valley, Uintah County, yesterday. He reports the people in that part of the Territory to be in a flourishing condition, notwithstanding the fact that they are comparatively isolated, being 200 miles from Salt Lake, and 100 miles from either the Union Pacific or D. & R. G. W. railroads.

Ashley Valley is located near the eastern line of the Territory, due east from Utah County. The climate about the same as that of the last named county, and good soil and water abundant. The country is a rich one for agricultural and stock interests. Summer range is plentiful. The crops this year have been above the average throughout the Territory. The hay crop has been very large.

It is anticipated that the Midland railway will pass through the southern end of the valley, which is twenty miles long, and this will give railway communication direct with commercial centers, though at present a good market is found for products at Fort Duchesne.

The country is not alone adapted for farming interests. On the range between Ashley and Uintah valleys a Wyoming company has located eight sections of land and is erecting oil works, as the indications are that there is an immense supply of petroleum in that district. Another Wyoming company is also developing silver and lead mines. A fine quality of asphalt is also found in abundance in this country. Continuous to the settlements in Ashley Valley there is plenty of coal of good quality, and the supply of timber is almost inexhaustible and is easy of access.

Last week there was a consolidation of the canal companies in and about Ashley, the object being to store water in natural reservoirs that exist. These are so arranged that with comparatively little difficulty an ample water supply can be obtained for the whole valley. This year these lakes were tapped, and the water has been more than sufficient for the needs of the settlers, without any effort having been made to store it.

School facilities have considerably improved the last few years, and the people now have district schools in regular session, and also Sunday schools and other organizations.

The greatest need of the country now seems to be good settlers. Land can be obtained at a low rate, and good crops can be obtained. Fruit of various kinds can be raised in abundance.

The Ashley Valley is bordered on two sides by Indian reservations—on the south by the Navajo and on the west by the Utah Indian reservations. The settlers, however, do not feel in the least degree harassed on the part of the Indians. In fact there was so much said about Indian troubles during the recent difficulties in Colorado, that those at hand, heard much less of trouble than they had before.

There was not an indication of any intent on the part of the Indians to disturb them. In fact the red men are not there in sufficient numbers, and if there was any animosity, there is hardly a possibility, the troops at Fort D. C. are more than able to protect the settlers.

UTAH'S INDUSTRIES.

The Magnificent Showing Made at the Exposition.

OPENING EXERCISES AT THE FAIR.

AN EXCELLENT EXHIBITION OF UTAH'S PRODUCTIONS AND RESOURCES.

Since Saturday last the scene at the Fair building on the Tenth Ward square has been beyond description for the bustle and stir that have been going on preparatory to the opening of the great exposition at 12 o'clock today. For seven years no scene of a similar nature has been seen, and never before in the history of the Territory has an exhibition of such magnitude been witnessed.

President J. R. Winder, Secretary H. M. Wells, directors W. H. Jones, N. A. Emery, Chas. Reed, Francis Armstrong, E. M. Welger, and Francis E. Smith, have borne the burden of the executive labor that has been necessary in the accomplishment of the great result. Under the most favorable circumstances the management of a fair is no easy task, but with the conditions that have existed, connected with the erection of the building, scarcity of funds, and the limited time afforded, it can be said that the success wrought from such a state of things is simply wonderful, and will stand as an enduring evidence of the energy, enterprise and good judgment of those who have brought it about.

For three days exhibits have been pouring in from various parts of the Territory, and those to whom was assigned the duty of arranging them have had no time to rest. But out of the disorder that was unavoidable, a beautiful scene was evolved by the time of the fair opening today. Of course everything was not in its place, and some of the exhibits had not been as fast as received, and without inconvenience.

Of the display we have not the space to give a detailed description. On the lower floor were assigned the field crops, vegetables, and fruits. The upper floor was given to the products of the soil, minerals, furniture, oils, paints, hardware, glassware, etc. On the second floor, the exhibits were arranged in a series of departments, and the exhibits were arranged in a series of departments, and the exhibits were arranged in a series of departments.

A striking feature of the vegetable division was Sandy's contribution. There were cabbages, potatoes, and other vegetables, and a number of American squashes; one of the latter, raised by A. C. Clifton, was 18 inches in circumference and weighed 184 pounds. A gentleman on viewing this magnificent specimen, remarked that it would be a good campaign document to forward to the National Democratic Committee.

An article that attracted attention was a home-made cooking stove, in P. W. Madison & Co.'s exhibit; the stove was made by J. T. Lovett & Son, of this city.

The exhibit of butter and cheese also attracted much attention. The finest of the class ever made in Utah, was exhibited by the Utah Dairy Association, and was arranged in the south end of the upper portion of the building. There can be seen fancy work of almost every variety, and a class of cheese that can be expel anywhere.

The fine of the exhibition is under the personal supervision of Geo. M. Ottlinger, Esq., who, though not a member of the board of directors, has given them valuable assistance in this line. The entire north end of the building, up stairs is occupied with this department, and there is scarcely room to hold it. All of Utah's best artists are here, and their combined works are a marvel of beauty.

Owing to the cold, drizzling rain that prevailed all forenoon, and other circumstances that could not be controlled, the opening exercises were postponed until 1 o'clock. Contrary to general anticipation, in consequence of the storm, there was a very large attendance, the building being thronged both in the gallery and the main hall.

On a platform were seated the Rev. Theodore Prof. W. E. Welch, and a chorus from Stephens' Opera Company.

At precisely 1 p. m. the concert of the Utah Agricultural and Manufacturing Society, was called to order by Hon. John R. Winder, President of the Deseret Agricultural and Manufacturing Society.

The theatre orchestra then rendered Offenbach's overture, "Orpheus."

The opening prayer was offered by Apostle Franklin D. Richards.

"The American Song" by "H. Trovatore," was then rendered by the Stephens Opera Company and the Theatre Orchestra.

Gov. Caleb W. West was introduced and was received with applause. He said in substance:

"I am happy to be here on this important day, and to see so many of our people here. For several years the society has not held annual exhibitions, but this year the Legislature made an appropriation for a building, and this square was generally donated by Salt Lake City, the use of the society."

By indefatigable efforts the directors of the Utah Agricultural and Manufacturing Society have succeeded in passing what you now see. The spirit of enterprise and industry is here. We are a young community, but here are the evidences of our energies, of which any community may well be proud. We cannot be surpassed by the other communities. We have a thrifty, industrious and prosperous people, and before us we behold their handiwork. It is the duty of an institution such as has managed this world-famous exhibition, to exhibit their ingenuity, energy and resources, and result in a more abundant supply of goods for the people. It will exhibit their ingenuity, energy and resources, and result in a more abundant supply of goods for the people. It will exhibit their ingenuity, energy and resources, and result in a more abundant supply of goods for the people.

President John R. Winder said, in substance: "The Utah Agricultural and Manufacturing Society, organized in 1880, and in 1886 the first exhibition was held in the old Fair building. Since then our efforts have been to improve the exhibition, and to make it a more permanent institution. We have now a new building, and a new square, and we are proud to have this exhibition here."

Mr. Winder then introduced the Rev. Theodore Prof. W. E. Welch, who said in substance: "The Utah Agricultural and Manufacturing Society, organized in 1880, and in 1886 the first exhibition was held in the old Fair building. Since then our efforts have been to improve the exhibition, and to make it a more permanent institution. We have now a new building, and a new square, and we are proud to have this exhibition here."

CITY COUNCIL.

Peculiar Proceedings Regarding Sewerage and Uniforming the Police.

The City Council met in regular session at 7 o'clock last evening, Mayor Armstrong presiding.

Wm. T. Walker asked that the Council reconsider its action in recommending him to move his peanut stand from Walker Bros' corner. He was now able to make a living for his family, he said, and if he were to move on, he would also be compelled to go to the poor house. This, he thought, was a pity, and he hoped he would not be pushed to that extent. Referred to the city marshal.

Lee C. Sheddaker and others, residents of Fourth South Street, asked that the water mains be extended on that street for one block. He referred to the committee on waterworks.

Peter Van Hooten, on petition, was granted permission to pile building material on Eighth Street, between Second and Third Streets, for a period of sixty days.

E. L. Daniel, who lives at No. 111 Second Street, requested that the water mains be put a short distance from his residence, and asked that they be put in the street. Referred to the committee on waterworks.

C. C. Amussen's protest against the sewerage proposition, which only one day received, was read. He stated that he thought the expense to be incurred was wholly wrong, and that he was in accord with Dr. Richards on the subject. Laid on the table to come up in its order.

Two retail liquor licenses were granted.

The petition from R. N. Baikin and others, asking that street lamps be placed at different points near the head of Main Street and on Centre Street, was referred to the committee on improvements.

Elizabeth Fuina represented that she was a widow without means; that she had been taxed \$40 for water, and was unable to pay, and she asked that the amount be remitted. Referred to the committee on waterworks.

The committee to whom had been referred the petition of Ward E. Pack, Jr., and others, asking for an extension of the water mains, and settling forth their conditions so far as the City Creek water was concerned, owing to the large number of private pipes in their vicinity, reported recommending that the water mains be extended along the several streets named.

The committee to whom was referred the petition of James H. Jones and others, asking that Sixth Street, between West Temple and West Center, be graded, reported that the street was already graded, and recommended that it have the attention of the city engineer as early as practicable.

Owing to the large expense involved, the committee to whom was referred the petition of H. M. Winter, asking that the canal be filled up at certain points, recommended that the request be not granted at the present time.

The committee on waterworks reported favorably on the petition of Mark Lindsey and others, asking an extension of the water mains, and settling forth their conditions so far as the City Creek water was concerned, owing to the large number of private pipes in their vicinity, reported recommending that the water mains be extended along the several streets named.

force, and thought the members could do better work in citizen's clothes; that they were much more liable to drop on to offenders when dressed in such manner. If a patrolman were adopted, five policemen would be required where there was one employed at the present time, and he did not believe the service would be any better. The record of the Salt Lake police was a sad one, and he did not believe the patrolman would be any better. Mr. Ritter—How many men have you?

Marshal Solomon—Fifteen in all and this includes depot police, nuisance inspectors, etc. We have eight patrolmen—two being on duty at the same hours.

Mr. Roberts ridiculed the statement that the toughs did not know a Salt Lake policeman because he was not uniformed. There was not a tough or scoundrel in the town but who knew every member of the police force within three days after he came here.

Marshal Solomon—If the police are uniformed we shall need equally large number of detectives.

Mr. Dooley—Mr. Marshal, do you suppose that Omaha and San Francisco are in error when they uniform their police? Or even Sacramento?

The marshal replied that while the police might be a good one in a large city, he did not deem it applicable to a place like Salt Lake. There were also large detective forces.

There was considerable more discussion like nature, and the bill was finally deferred for one week, or to come up whenever called.

Adjourned.

Admission Visitors Invited.

An invitation is given to Conference visitors by John C. Cutler & Bro., agents of the Provo Woolen Mills, in their advertisement, call on them and purchase their full supplies of woolen goods, which they dispose of at wholesale and retail. People who want goods of that kind cannot do better, as the lines of fabrics they keep have reputation for quality and facts, that is not surpassed. Their establishment is 30 Main Street.

A Vicious Colt.

A little two-year-old child of Mr. Wm. Gardner, of this city, was yesterday at noon severely hurt by a colt. The little one was playing around the corral when, settling too near the colt, the animal launched out with one of its forefeet, striking the child on the left side of the head a little above the temple. The child fell to the ground, receiving an ugly scalp wound and a bruised cheek bone where the hoof scraped.

First west, be graded, reported that the street was already graded, and recommended that it have the attention of the city engineer as early as practicable.
