MINING, BUSINESS AND STOCKS.

MORE MILLS GOING UP AT GOLD CIRCLE

Rex Mines Company Putting in Mill. -Gold Circle Crown Has Two Shifts At Work on Its Lower Tunnel

Advices from Gold Circle are that Advices from Gold Circle are that Mr. Callow of the General Engineering company of Salt Lake City arrived last Thursday to put in the mill for the Rex Mines company, says the Touopah Bonanza. This property is proving to be a very valuable one. They are working three shifts and have a hoist on, so are making good headway. McCormack and expert were in the past week visiting with Rotchschild and Horton.

The Fayant and Charters Leasing

and Horton.

The Fayant and Charters Leasing company has leased the mill for the balance of their ore. They have just shipped to the inint 25 pounds of gold from their last run, and all the leasers on the Esmeraldas will put on more men for they have just five months more on the property.

The Hartley and Bradford mill has arrived and will be installed at the mouth of the canyon. They have taken no contracts, but will have for their first run 1,200 or 1,500 tons of the Boyle ore.

Boyle ore.

The Old Judge, adjoining the Elko Prince properties, has been leased and bonded to B. P. Howell and associates, and this property has already been opened up along the vein with a tunnel for 125 feet and shows good values, assays varying from \$40 to \$200.

TAKING OUT RICH ORE.

The owners of the Great Western and Queen properties have gone to Reno, and it is understood that the properties have a set of Mullers working and the first ton ran last week gave returns of seven pounds and three ounces of amalgam and leasers on the

gave returns of seven pounds and three ounces of amalgam and leasers on the property are taking out very rich cre. The Gold Crown has on two shifts on its lower tunnel and is drifting on the vein, and while the ore is not very rich they are not into where the large values were in the shaft by 400 feet. They are also drifting on the Banner and will open up the old workings that were done last fall by the Snowstorm Leasing company. Mining timbers are at a premium and this property is using quite a lot in their workings.

The Peters lease on the Hillside shows good values and is saving quite a lot of ore that will run \$40. Mr. Peters has a good long time on the property and expects to drift on the vein, which crops for something over 400 feet and has values all along.

SALES ARE LOWER THAN EVER.

Transactions for Week Not Equal to Sales of Several Days Last Year.

When the Sait Lake Stock and Mining exchange closed its session this morning the total sales of the week amounted to 412,136 shares and the amount represented by the transactions was \$244,474.33, which was not equal to the amount of business transacted on several days last year. June was the heavlest month last year and the records show that close to \$3,000,000 worth of stocks changed hands.

The market today was fairly strong

The market today was fairly strong in the majority of issues. Colorado, which has been moving downward sold as low as \$2.02 \(^1_2\). Dragon Iron continues to hold its own but selling has been slow. Iron Blossom was lower again this morning.

Grand Central has been jumping up for several days and this morning the new issue of the stock reached as high as \$1.9\(^1\). This is the first time the stock has reached this record since the capitalization was increased.

The number of shares of stock sold this morning was 48,200 and the amount represented was \$32,825.

On the curb market Boston-Sunshine made its appearence for the first time, A bid of 38 cents was made for this new producer of the Mecur district and it was offered at 45 cents.

HEAVY SHIPPING AT TINTIC.

Many New Properties Added to Shipping List from Famous Camp.

According to reports from Tintic, the number of cars of ore shipped out of the district for the week ending Friday right was 219 and the amount shipped was better than 7,400 tens. This has Goldfield and many of the other rich camps beaten on the amount shipped A number of new shippers are on the list this west. The Reatrice property, which is being worked by P. J. Daly, shipped another car of ore this week, while William Beck shipped three. The Lehi Tintic has become a regular shipper with one car a week and the Snow Flake is now sending a small car a week to the smelter.

At the smelter 158 cars were received during the week of which 12 cars were received from the Day mine at Ploche. The following is the list of shipments from the district during the week.

GREAT PRODUCTION OF GOLDFIELD CAMP

Mines Have Produced \$27,000,000 In Past Five Years, Representing 48 Per Cent of Gold Output.

During recent years mining developments in Nevada have attracted widespread attention. The state has once more been through a boom and once more been through a boom and this time has weathered the storm. In the late spring of 1903 Goldfield was discovered, and by the end of that year had already begun to pro-duce precious metals. Since 1904 this one camp has far outdistanctd all the remainder of the state as a producer of gold

of gold.

It may be noted that Goldfield has produced \$27,000,000 in the last five years (1964-1908,) or 48 per cent of Nevada's total gold yield for that period. As a producer of silver, it is seen that Goldfield is inconsequential, contributing only 0.52 per cent of the total output of the state.

The growth of the mines of Goldfield has been vigorous and constant. Only in 1905 and again in 1908 did the production fail to increase over that

production fail to increase over that of former years. However, the cause for this is plainly apparent. In 1905 the year after the first wild rush into the district, people began to put in permanent equipment and to develop permanent equipment and to develop their properties; leasing was also less active, and companies began to store low grade ore to await completion of reduction works on the ground. In 1908 the setback was due to the financial de-pression. At the same time when we consider that the year's production from Goldfield represented only nine months' work, it is evident that even in hard times the camp continued to grow. During the first three months of 1908, Goldfield suffered from a bitter labor controversy, and it was at this labor controversy, and it was at this time that Gen. Funston took the regu-lars into Goldfield in order to maintain order. This dispute was at last satisfactorily arranged for both sides.

DOES NOT APPLY NOW. Visitors to southern Nevada for-merly came away with the impression that Goldfield was merely a temporary camp. Comparison was often made with Tonopah, bringing out the permanent and solid appearance of the older camps as compared with the makeshift conditions found in Goldfield. This was true at first, when most of the properties were being worked on leases, but it does not

apply at present.

The present population of Goldfield is estimated at 6,000 and is of a much more permanent character than it was during the rush days, when it was supposed to amount to about 10,000. The completion of the proposed railroad to connect Goldfield with Ely, will no doubt add materially to Goldfield's

doubt add materially to Goldheid sprosperity.

The Goldfield mills, when those under construction are completed, will be capable of treating 1,000 tons of ore per day. The Nevada Reduction has a capacity of 100 tons; the Combination, 80 tons; the new Goldfield Consolidated, 500 tons; and the Florence mills are of the letest type. the latest type.

AMOUNT OF DIVIDENDS.

The best indications, and to the public the only satisfactory one, of a mining camp's permanency, is its record as a dividend payer. Already this year one company, the Goldfield Consolidated, has paid a dividend of \$1,063,803,90, and has declared another of equal. ed, has paid a dividend of \$1,063,803.90, and has declared another of equal amount (3 per cent.) payable July 31. The dividends paid by Goldfield companies in 1908, a year in which many companies all over the world discontinued dividends, totaled \$1,578,500, made up as follows: Florence Goldfield, \$420,000; Engineer's Lease, \$570,000; Rogers' Syndicate, \$300,000; Mohawk Jumbo, \$78,000; Frances Mohawk, \$45,50; Florence Annex, \$50,000; Red Top Consolidated, \$20,000; Little Florence, \$30,000; Mohawk Combination, \$65,000. Other dividends, of which we have no record, may have been paid. This is a splendid record, when it is considered in that the two largest considered in that the two largest properties in the camp, the Goldfield Consolidated and the Florence compan-ies, were building new mills and did not pay dividends.

OTHER DIVIDENDS.

OTHER DIVIDENDS.

The dividends declared in 1907 amounted to nearly \$1,500,000. Previous to 1908 almost \$8,000,000 had been paid to the investing public by Goldfield companies. Thus, to date the mines have paid dividends amounting to approximately \$12,000,000.

It is early to form an idea of what the 1909 production of Goldfield will be; judging from the returns to date, however, this year will be a record breaker. The output for four weeks selected at random is as follows: Weeg ending March 13, \$220,000: March 20, \$332,009; April 13, \$507,850: April 27, \$609,550. These figures, which are possibly a little high, show a steadily increasing output; even taking \$369,000 as an average week's production, the year's total will amount to \$15,600,000, or over 200 per cent of the total for 1908. At 200 per cent of the total for 1908. At present the Goldfield Consolidated and Florence are the largest producers in the camp.

EXPECTS MORE THAN EVER.

John Hayes Hammond Declares Production Will Exceed Last Year. John Hays Hammond, in an interview at Gloucester, Mass., is quoted as say-

at Gloucester, Mass, is quoted as saying:

"In regard to the outlook in mining industries the world over there is every reason to look for a largely increased gold production, not only in the United States, Canada and Alaska, but in nearly all gold-producing countries. Therre is great activity at present in mining—especially gold and copper mining—everywhere: The Transvaal will contribute an impotant part of the increased gold output. There will also be a large increase in the production of silver, notwithstanding the present prevailing low price of that metal. There is a strong probability of international co-operation in the near future to prevent further depreciation in silver. This movement would not be in ver. This movement would not be in the interests of silver miners alone, but also of the merchants of the various countries interested in oriental trade. The fact is being widely recognized that under the present low rates of exchange it is almost impossible for orien-

change it is almost impossible for oriental countries to make purchases in markets of gold countries."

Concerning copper mining, Mr. Hammond said: "While every important mine is now producing, many others are on the eve of production. I believe

the production of copper this year will be far in excess of that of 1908. Last year the copper production increase fell year the copper production increase fell below the expected or normal 10 per cent. This year it will be more than as much above 10 per cent increase on last year's production. The contemplated industrial revival, which seems to be already well under way, will during the time of prosperity more than absorb the increased production of copper for the next few years at least."

CONCENTRATES.

James Breen has gone to Butte cn mining business.

Duncan MacVichie has returned from a trip of inspection to the Nevada Douglas property at Yerington.

Willard F. Snyder, who recently returned from a visit to the Pioche camp is now an enthusiastic booster of that section of the country. E. P. Mathewson, general superintendent of the erecting of the new International smelter at Tooele was in the city yesterday, but left later in the day for Los Angeles.

The New Red Wing Mining company has filed a petition in the district court for disincorporation. The company has sold its property in Bingham and gone out of business. The application is made by the secretary, C. B. ciliver.

Reports from Park City have it that in the Daly West company in making the raise from the Ontario drain tunnel level has encountered some good stringers of ore. From this many are led to believe that the mine will again over the blurger are hedges than ever open up bigger ore bodies than ever.

All the eastern and western markets adjourned yesterday until Tuesday morning. Sessions were held this morn-ing by the Utah Stock & Mining ex-change and the Salt Lake Stock & Mining exchange, and an adjournment was taken until Tuesday morning.

Notice of appeal has been filed in Notice of appear has been met in the United States court in Butte of the sult filed by Bliss and other farmers in the Deer Lodge valley to close up the Washoe company smelter on the ground that it is injurious to vegitation. Judge Hunt decided against the complainants. complainants.

BANK CLEARINGS.

New York, July 3.-Bradstreet's bank clearings report for the week ending July 2, shows an aggregate of \$2,972,411,-000, as against \$3,101,555,000 last week and \$2.484,377,000 in the corresponding week last year. The following is a list of

NEW INCORPORATIONS.

The Richmond Drug company of Salt ake, organized to take over the business of the Vermillion pharmacy of J S. Richmond and Joy H. Johnson, at 311 west Second South street, filed articles of incorporation Friday, Capital is \$5,000 in dollar shares. J. S. Richmond is president; Joy H. Johnson, vice president; C. J. Harvey, secretary.

The Co-operative Furniture company of Salt Lake filed amendment to its articles of incorporation Friday, reducing the number of directors from nine to five. The New Red Wing Mining company is applying to the district court for distincorporation. It was incorporated in February, 1902, with headquarters in Salt Lake, and a capital of 500,000 shares, of which 396,850 shares were issued. The directors are Ben L. Corum, W. C. Orem and L. D. Lee.

THRILLING COURT RECITAL.

Judge Bowman Introduced to the Real Thing in Newsboy Verbs.

"The Invader, or What a Bunch of Newsboys Can Do to One They Don't Like," was the thrilling drama told in story in the police court room this morning. Judge Bowman was an attentive critic, but as he had never really been on the Bowery much of the effect of the stories told him in the development of the plot was lost-all he knew, was that newsboys talk in a language of their own, that if both sides are to be believed, they are all villains, and that one fellow sat in the court room with a lip the surgeon's stitches in which corroborated his statement

Dat guy over dere slugged me twice on de mug when me blinks were turned de oder wye."

It was the case of "Charlie" Mce Gillus, better nown to fame as a "scrapper" of some ability, but who fills in time as manager of the street newsboys of the Tribune and Telegram, and who was charged with having assaulted Sol Baum, "The Frisco News Kild," who recently came to Salt Lake to break into the game. With "Charlie," and Kid Bernstein dominating the close corporation of street sales, Sol had little chance, and the chance grew smaller until the culmination when he was "slugged. The opinion Baum holds of the opposition and what the opposition thinks of Baum, as told in the courtroom as having been expressed on the street, is forbidden to be printed, but the fact was brought out that the actual as-

sault had been committed as charged. E. A. Rogers, asst. City Atiy, in presenting the case to the court after the conclusion of the testimony as prosecutor admitted, but informed the court that a prominent representative of the Tribune had called him up by telephone before court and had spoken a good word for the defendant, McGillus. Mr. Rogers then thought that while McGillus had undoubtedly assaulted Baum, yet he should not be punished, if only for the reason that he was working for a living. The defendant was found guilty, but sentence was suspended.

HOT SPELL BROKEN.

Cool Breeze from Northwest Helps Out in a Time of Need.

The superheated spell has ended, though the mercury rosa to 98 degrees yesterday, with "hopes" of going higher. A cool breeze began blowing in from the northwest this morning, which by afternoon became quite comfortable, and an assurance of much more endurable weather. There was thunder and lightning before daybreak, which was a substantial suggestion of a much needed change. The meteorological prediction is local showers for tonight and the morrow

The low barometric pressure over the plateau has caused showers or thunderstorms over portions of Arizona, Nevada, Utah, Idaho, Montana and South Dakota. Showers are also reported over portions of the lake region, Gulf and Atlantic states. Another stown for passive off the north Atlantic gion, Gulf and Atlantic states. Another storm is passing off the north Atlantic coast. Over the north Pacific states and middle Canada the air pressure is high. The temperatur has fallen 10 degrees or more over portions of Utah, lake region and Missouri valley, with a corresponding rise over portions of Idaho.

MRS. GILMAN'S LECTURE.

Arrangements are being made for a ecture by the noted author and lecturer, Mrs. Charlotte P. Stetson Gilman who will probably be included in the party of distinguished women who will stop in Salt Lake about July 16, on their way from the National Council of Women at Seattle, Mrs. Gilman has won eminence in the world both of letters and science by her books upon social economics, her first work along these lines "Woman and Economics" created something of a furore at the time of its appearance. Another book "Works" a volume of poems and various contributions to prominent magazines have evinced the ability of this clever little woman both in the way of a clever and deep comprehension of the principles she exploits and their handling in literary form. Mrs. Gilman is expected to arrive on Friday the 16th, and it is hoped to have the lecture given on the 17th, at Unity hall. Mrs. Joseph Cohen is in charge of the details, and will be assisted by a number of prominent women. won eminence in the world both of
