

VAIL DIVORCE SUIT HEARING.

Testimony in the Case Before
Judge Hall This Morning.

MRS. VAIL BLACKED HIS EYE

Plaintiff Handed Out Her Husband a
Colored Optic With a Promise
of More to Come.

The Vail divorce case occupied the whole of today before Judge Hall. After the closing of the "News" report yesterday afternoon, Mrs. Vail was cross-examined by the defendant's counsel, and she was subjected to a severe strain which came nearly resulting in her collapse.

In reply to her attorney's questions Mrs. Vail told the story of the taking away of little Gladys, whom the defendant afterwards placed in the Sacred Heart academy at Ogden. According to plaintiff's testimony the defendant a year ago today persuaded Mrs. Vail to go with him to the theater, accompanied by a lady friend, and during her absence from home he had the little girl spirited away. For three weeks after this, said Mrs. Vail, she did not hear a word from the defendant, until he sent her a letter stating that the child was well, with good people, but 2,000 miles away.

Plaintiff said that she sorrowed so much over the absence of her daughter that defendant suggested she take the child and thus end her grief. She then narrated how herself and mother, with a gun display, succeeded in rescuing the child from a party at Ogden, upon lines previously published.

Plaintiff was then cross-examined by Attorney Critchlow on behalf of defendant, and admitted that she knew William Wilson, the party mentioned in defendant's cross-complaint, and with whom it is alleged she committed adultery.

Mrs. Vail admitted having written letters to the man Wilson, and upon being shown a purported photograph of him identified it as being Wilson's picture. The man, it is said is now in Texas.

As to the charge of having been at the Bowley house, on West Temple street, Mrs. Vail admitted that she went there with a Mrs. Lund, a young widow, merely for the purpose of drinking a glass of beer, and on this occasion, she testified, that the defendant came in a little later, and joined them. Plaintiff denied that she resorted to this place for immoral purposes.

A young lady Maggie Olson, who had formerly been in the employ of Mr. and Mrs. Vail, and who now lives with the plaintiff, testified to cruel treatment at the hands of defendant. The witness said on one occasion Mrs. Vail blacked one of defendant's eyes for slapping her, and that she threatened to treat him in similar places. While the witness said Mrs. Vail was going to the brewery for some beer, defendant met them at the gate and objected to plaintiff doing this. They went, however, and brought back the beer, whereupon Mrs. Vail joined them in drinking the beer.

Mrs. McConnell, mother of Mrs. Vail, then took the stand and corroborated the plaintiff in her testimony regarding the face powder incident, and many other disputes which the parties had indulged in.

IN THE SUPREME COURT.

Carbis vs. Dale Election Case Argued and Submitted This Morning.

The following appeal cases were argued before the Supreme court today: Appellants vs. B. H. Quinn et al., Priscilla Wheatley Murphy, appellant vs. H. J. Ganey et al.

The foregoing completed the calendar as originally set by the justice, but cases, however, have been put upon the docket since the present session opened, and the first of these taken up was, the election contest appeal case of W. O. Carbis vs. William H. Dale for the Salt Lake city trusteeship. It will be remembered that Mr. Dale was elected, according to the canvass made, by about 24 votes. Mr. Carbis, however, claimed some irregularities occurred in the election, and later instituted his contest before Judge Hall. Mr. Dale demurred to the complaint, maintaining the contest was not begun within the period specified by the statute. The lower court sustained the demurrer, and the question involved in the appeal, before the Supreme court.

George L. Nye represented the contestant, and J. F. Erick made the argument for the contestee. The matter was taken under advisement.

Partnership Dissolved.

In the case of James C. Cord vs. Edward B. Parsons, which was referred to Benjamin F. Johnson as referee to take testimony, Judge Hall yesterday signed a decree dissolving the partnership, heretofore existing, between the parties to the action, and commanding the defendant to pay \$750, with interest and costs, to plaintiff.

Suit for Divorce.

Axel F. Danielson commenced a suit for divorce in the district court yesterday afternoon against Augusta C. Danielson.

The complaint states that the parties married at Soder, Kjolping, Sweden, October, 1897. In July, 1899, plaintiff left his native land and came to this country, but his wife refused to accompany him, though he was willing to pay her fare, and she still refuses to come and live with him, wherefore he prays judgment for a divorce.

Promissory Note Suits.

Max and S. Ideman, partners, commenced suit today in the district court against Fritz Rippen, to recover \$285.50, and interest at 12 per cent from August 27, 1894, alleged to be due on a promissory note.

PEOPLE WHO ARE PASSING

Robert F. Harrison of Los Angeles, California, is a prominent mining man and has interests in all parts of California and the West. "Every one in southern California is rejoicing over the rains that have been falling in that section of the country. Persons who visit Los Angeles and the surrounding country can't realize that all that part of California now beautiful with orange groves and the most glorious flowers, was once a desert.

ROBINSON'S SEAMLESS SHOE
CAN'T RIP

The greatest trouble we ever had with shoes was that they would always rip. That's why we invented these seamless shoes for boys. They can't rip. \$1.25 per pair and up.

ROBINSON BROS. CO.,
SHOE BUILDERS, 124 Main St.

growing nothing but cactus plants. The rains mean millions of dollars to the country and insure good times for at least two years. Yes, I followed the train that was wrecked and I never saw such a smash up. It is a wonder that more were not killed.

City Treasurer Morris is ill with la grip, and confined to his home.

Judge A. G. Norrell left last evening for Mississippi. He will be gone some time and hopes to regain his health in the lower altitude of Mississippi.

D. S. McCurdy of the New York Life left Salt Lake last night for Washington, D. C., to be present at the Presidential inauguration on March 4th. Mr. McCurdy has the honor to be one of the aids appointed to assist E. B. of the aids appointed, who will act as chief marshal of the civic division of the inaugural parade.

The most noted Episcopal divines in the country will visit Salt Lake next fall, when on their way to San Francisco, to attend the triennial convocation of the church. Bishop Potter of New York will accompany them, and it is said, will preach in St. Mark's cathedral several times during the stay of the ministers in Salt Lake.

D. A. Amme of Charleston, S. C., is at the Kenyon. Mr. Amme is special commissioner of the Exposition to be held in Charleston from December 1st until June 1st, following. The exposition will be known as the West Indies and South Carolina exposition and appropriations aggregating \$350,000 have so far been made. Mr. Amme is on a transatlantic trip.

E. H. Dewey and wife of Idaho were registered at the Kenyon yesterday. Mr. Dewey is the son of Colonel Dewey, vice president and general manager of the Boise, Nampa and Owyhee railroad and of the Idaho Northern. "The Idaho Northern," said he, "is not yet in operation but we hope to have everything going by July 1st, and as it will open up a new route for the Idaho Northern, the development and growth of that camp will be enormously aided. My father's new hotel in Nampa will cost \$200,000, and will be one of the best in the West."

E. W. Robinson of Logan and C. W. Matthews of Marysville are guests at the White House.

Parley Christiansen of Mayfield, Sanpete county, is at the White House. When seen yesterday Mr. Christiansen said that a corporation is to be formed by citizens of Mayfield, Canyon, Escalante, Centerfield and Willow Creek for the purpose of buying 15,000 acres of government land situated in Twelve Mile canyon, Sanpete county. The capitalization of the corporation, it is expected, will be \$20,000.

WORN BY MONARCHS.

Some of the most powerful monarchs in the world are the possessors of talismans the loss of which would fill them with dire forebodings and dismay.

The autocratic czar of all the Russians constantly carries about with him a ring, without which nothing would induce him to move a step from his palace. Though this is really a fiction, it is believed to contain a tiny piece of the cross on which the Savior was crucified.

The ring is supposed to be endowed with some occult power of shielding its wearer from personal danger; hence the czar's anxiety to always have it with him. Belief in its magic influence was immensely strengthened by the fact of the present emperor's grandfather being without the ring at the moment of his assassination.

The Shah of Persia always wears a belt set with a superb gem, the value of which is attributed to his sacred ring. The belt is filled with onion-peeling, the object of which is said to be to move any would-be assassin to tears.

When the late assassin attacked this country he was seen in public without this protecting belt and gem. He thoroughly believed that if he traveled without the emerald disaster would overtake him, and by a strange coincidence it actually did.

It will be remembered that this Persian monarch was foully assassinated not many years ago, and it was a singular fact that he was not wearing the gem at the time.

King George of Greece possesses a talisman which is also a grim reminder of an attempt on his life. Just at the conclusion of the war with Turkey he was waylaid and shot at several times, one of the bullets imbedding itself in the box of his carriage.

His majesty's escape was so miraculous that he had this bullet extracted and made into a charm for his watch-chain. He died, but he thanks to it for a kingdom, firmly believing that, as it merely missed him when directed at him, it was designed to insure him immunity from assassination.

The Sultan of Turkey, who lives in constant dread of what has been described as the "happy dispatch," would die if a Oriental if he did not believe in the efficacy of charms. His own particular talisman is said to be a richly bejeweled miniature dagger, which he invariably carries about with him.

Despite its virtue, however, he takes the precaution of insisting on one of his ministers tasting every dish prepared for him before partaking of it himself.

When the late German emperor was lying desperately ill at San Remo a remarkable amulet was sent him by the sultan. It consisted of a string of nine stones of the size of hazel nuts, each of which bore an inscription from the Koran and had been prayed over by a Moslem priest.

Accompanying this royal talisman was a letter assuring the emperor that if he only wore it his health would be at once restored.

A beautiful girl of Afghanistan wears a beautiful gold ring, to which he ascribes the fact of his having survived so long the machinations of his enemies. He has been a good many times reported to be entirely eliminated this year. An effort is being made to include in the team only men who can be relied upon to "play ball" to win at all

"DANNY" MAHER GOES TO ENGLAND

Has Been Engaged to Ride for
Pierre Lorillard.

SALARY WILL BE \$10,000.

He Will Also Ride for Mr. J. Miller,
Who Owns Marconi Jockey.
Loates Goes Too.

New York, Feb. 21.—"Danny" Maher, the jockey, has sailed for England, where he will ride this season for Pierre Lorillard, at a salary of \$10,000. Maher will also ride for Mr. J. Miller, who owns Marconi, favorite for the Lincoln handicap.

Sam Loates, the English jockey, who arrived here two years ago, sailed with Maher. Loates said that he had enjoyed his trip here. Sir Blundell Maple will have first call on his services, and R. Servier second. William Duke, who owns a number of American thoroughbreds in England and Charles Mills, the English betting commission agent, completed the party.

Henry Spencer has arrived here from California. If he receives a license to ride in the "Green, white ash, of Edw. Corrihan, J. Rixby, Eddie Jones, H. Vintatoe and Joe Scherer will sail for Europe on March 3. Scherer and Vintatoe will ride in Austria, where Fred Tarrat now is.

Albert A. Bostack, on behalf of Baron Springer, signed Vintatoe at a big salary.

DIDN'T WANT ADVICE.

A Case in Which the Umpire Gets the Worst of It.

"About the worst accident I ever saw on the ball field happened in Toronto, Canada, in 1886. I was pitching on the Toronto team that year and Dell Darling was catching me," writes Peek-a-Boo Veach. "We were playing the Buffalo team and a fellow by the name of Corcoran was umpiring. He would never put on a mask, and as it came up close, and during this particular game I walked up to the plate and told him to put on a mask, as it was a sin to be so reckless with his face. He intimated that that face grew on his head and had never yet given him pain or caused him regret. Of course, it being his face (afterwards I was glad it was not mine), I had to let him use it where and how he wanted to.

"A few innings after this Darling came up and Corcoran put his face over Darling's shoulder. Darling gave me a sign for a straight, fast ball, and I let it go, and the batter just fouled it enough to raise it over Darling's shoulder into the roof face of Corcoran's. The result was a fright. It seemed to me that a big soap bubble had burst. He straightened up as stiff as a board and could not fall. I ran to him and asked him if he was hurt. He said, 'Yes, I am hurt, but I don't care. I am paralyzed.' Afterwards he made signs to me and said he wished he had taken my advice. They fed him with a spoon for three weeks."

PIGEON SHOOTING.

Amateur Championship Tournament Will Begin Today at New York.

New York, Feb. 21.—The pigeon shooting tournament in the Amateur pigeon shooting championship of the United States will begin today at the Garden City of the Carteret Gun Club, near Garden City, L. I. The conditions of the contest call for 100 birds per man, \$100 entrance fee, 20 yards and 30 yards boundary. The winner in addition to 40 per cent of the sweep will receive a \$600 cup offered by W. P. Thompson.

The entry list does not close until the completion of the first round today. The list of competitors includes Charles A. Painter, of the Hecox Hill Gun Club; John L. Bradley, Carteret Gun Club; Captain A. W. Money, Carteret Gun Club; R. A. Welch, Carteret Gun Club; George E. Painter, Pittsburg, Pa.; C. H. Stanley, Cleveland, W. P. Thompson, H. S. Edey, George Hoyt, L. T. Duryea, W. W. Watrous, of Carteret Gun Club; Dallas Elliott, Cleveland, Ohio.

Yale Baseball Nine.

New Haven, Conn., Feb. 21.—Captain Frederick Robinson of the Yale baseball team, who has been the services of W. W. Murry, Yale 99, former a league player and present coach of Leland Stanford University. Mr. Murry will come east and assist in rounding the nine of the nine the previous season in California cities.

LOCAL EVENTS.

NO LOAFING THIS YEAR.

Riders on the Sugarbowl Will Do No Team Work.

Manager Max A. Peters of the Salt Palace states that he is already taking measures to prevent the riders from loafing and doing team work on the track this year. He has been negotiating with a Paris firm for a twelve horse-power motor to be used by the management, or rather under its direction, for pacing all the professional races. It is said that the machine can be relied upon to do its work right at all times and the speed can be regulated before it goes on the track. It is claimed that it will run at a rate of speed from a mile in fifty-five seconds up, and will travel at a steady clip.

The riders have nothing to do but to guide the motor as the foot work has been entirely done away with. If the machine is secured, the riders will all be classified, and if they do not keep the pace they will be ruled off the track.

Flies and Grounders.

The Pocatello baseball team is forming these days, and judging by the amount of enterprise manifest so early in the season we can safely predict that Pocatello will be ready good and early with a line team this year. "Ducky" Pace the catcher, is already here and Marry Lockhead, the shortstop, has been on the ground some little time already. Two men are coming from St. Louis in a few days and the old timers are anxiously awaiting the time when they will have a chance to do the grey.

"Peanuts" Harmon, the pitcher, will be here in less than two weeks to play another season with the Pocatellos. The "sporty" element so detrimental to the success of the nine the previous season is to be entirely eliminated this year. An effort is being made to include in the team only men who can be relied upon to "play ball" to win at all

FIGHTERS HAVE RETURNED.

"Dummy" and "Silent" Have Returned and Are Ready for Another Fight.

Last evening "Dummy" and "Silent" Kovan, the brother prize-fighters, returned from Pocatello City, where "Dummy" met and defeated Houston Rolly on the 18th.

As usual, "Dummy" is looking for a match, and has signified his willingness to meet any man in the State regardless of weight or condition. The big brute says that he is matched to meet Rolly again on the 18th of March, but is anxious to be doing something in the meantime. "Silent" is also anxious to make a match with someone, but it seems that he is having hard time to find anyone who is willing to go against him.

QUESTION SETTLED TODAY.

Basket Ball Protest to be Considered by League Officials.

The protest of Capt. Hugh Rippetto of the Y. M. C. A. basketball team, for the game played last week between their team and the L. D. S. team, came up for consideration yesterday afternoon, but the matter went over until this evening.

The trouble is over Rippetto's Smith playing with the L. D. S. when they are said to be non-members of the college. Capt. Rippetto insists that he is right in the matter, but Capt. Bassett of the L. D. S. team says that no agreement covering the present trouble was ever made, and he holds that the men have a right to play.

The Y. M. C. A. people have gone so far, however, as to say that if Romney and Smith play, they will refuse to enter any more games.

SCIENTIFIC MISCELLANY.

A fossil tree-trunk of solid basalt is a unique specimen to which Mr. H. W. Watson, the Royal society of Victoria, has called attention. Ordinary fossils have resulted from a slow replacing of the wood by mineral matter, but it seems that in this case the wood was so solid that it withstood about the heat shutting out the air, and the mold formed on cooling must have been filled by a subsequent flow.

Experiment has shown the curious fact that oil on the surface of mica reduces the insulating power of the latter for alternating currents one-half, but water has no effect. All kinds of oil gave the same results, as did also immersion of the mica in oil.

Cement made from blast-furnace slag is stated to have remarkable tensile strength and resistance to compression. In a process for making it described by the Scientific American, the slag is ground into sand and mixed with limestone and slacked lime, and the mixture is reduced to powder and made into bricks with water. After drying in the air, these bricks are made into a concrete by a special furnace, the clinker being then stored for six weeks before being finally ground.

The Ousunufy, for which the botanical name of *Plectranthus Coptini* has been proposed, is an edible tuber of the Soudan 60 which M. Maxime Cornu has just drawn attention. It resembles the potato with the advantage that it can be grown in a truly tropical climate.

Probably the greatest diurnal temperature range on record is that reported by M. Zichy, a late traveler in Mongolia. The temperature at Urga was 30.2 at 5 a. m., and at noon it had risen to 105.5 degrees.

The microbes of dental caries are stated by M. Choquet to number five species, and they cause decay on being experimentally introduced into a sheep's tooth.

The elephant seals of Kerguelen Island are reported by Mr. R. Lal to reach a length of 20 feet, and an estimated weight of 10 tons. These remarkable animals are being rapidly exterminated.

Led by the high price of gum arabic to look for substitutes, and finding dextrine a poor adhesive agent, a German chemist has experimented with ordinary ivory's glue as a source of mucilage. The disgusting odor and ready putrefaction of this glue are due to the presence of numerous impurities, such as alkaline phosphates and earths, acetic acid, ammoniacal salts, albumen, meat extract, fat and iron salts. Purification was attempted by means of hydrogen peroxide, sulphuric acid, etc. Very successful results were obtained at last through the simple process of dissolving 250 grammes of glue in boiling water, and heating the solution over the steam bath for 30 minutes. The water bath for 30 minutes. The water bath for 30 minutes. The water bath for 30 minutes.

The rivers of limestone regions, we are told, are gradually becoming subterranean. In 1719 it has been known that the Danube loses some of its water through underground fissures in the limestone, and in 1877 water in the river colored with fluorescent appeared sixty hours later in the springs of Amst near Lake Constance. Part of the drainage of this great river is thus shown to be passing into the valley of the Rhine. Prof. Penck now predicts a steady increase of this underground drainage, with the final result of a dry valley below Mönningen and the plunging into the earth of the river from above. The Poiba in Istria and the Recca near Trieste have been already cut off in this way.

In the Prussian inquiry into cancer, it is hoped to learn whether the disease is hereditary, or contagious, or connected with indulgence in alcohol or tobacco, or with any other habit. Every physician is asked to record his experience.

An albatross, supposed to have been choked dead and with the string still around its neck, has been found after keeping fourteen days in an ice box at 6 to 18 degrees F.

It is not easy to say what one would expect to find in a coal mine fifteen months after it had been tightly closed to stifle a fire. The conditions in such a mine have been lately told by Mr. F. G. Meacham, a British engineer, who reports that analysis showed the air to consist of 34 per cent of nitrogen, 12 per cent of carbon dioxide, and 4 per cent of carbon monoxide, and that these gases were so compressed that about 1,500,000 cubic feet escaped from the first bore-hole in twenty-four hours. The gases seemed to have exerted a preservative rather than injurious effect. Bread had become somewhat dried, cooked bacon remained fresh, water in tubes had not evaporated, ropes and rails had not rusted, clothing had remained dry, and time unchanged. Decay in the whole time was less than in the three months following re-opening.

The whale's food capacity is startling. In his new work on whales, Mr. F. E. Beardsall states that the stomach of a "bottle-nose" contained 10,000 beaks of squid, and a grampus had 13 porpoises and 14 seals, all whole and intact. The stones in the stomachs of some whales are supposed to serve the same purpose as those of birds' gizzards.

The first locomotive with a super-heater was built at Stettin two years ago, and at once proved a success.

SYRUP OF FIGS

NEVER IMITATED

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, **Syrup of Figs**, manufactured by the **CALIFORNIA FIG SYRUP CO.**, illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, bronchitis and fever, gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing Figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the **CALIFORNIA FIG SYRUP CO.** only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

CALIFORNIA FIG SYRUP CO.

SAN FRANCISCO, CAL. LOUISVILLE, KY. NEW YORK, N. Y.

ago, and at once proved so successful that a second of the same kind was built. In his third machine, the engineer, A. Borsig, has been able to make considerable improvement. Steam at 150 pounds pressure is heated to 625 degrees F., and it is claimed that, with out any increase in the size of the boiler, there will be an increase of 33 per cent in horse-power, with a saving in coal of 25 per cent, and a reduction of 25 per cent in the water required. The superheating chamber is entirely within the smoke-box. It is filled with a nest of 60 tubes of 14 inches outside diameter, and these are heated by furnace gases led through a 10-inch tube.

Pure diphenylcarbazide dissolved in benzene is a new test for metals, of great delicacy. With solutions of copper salts it gives a fine violet color, which is not changed by ferrocyanide of potassium; salts of mercury give a pinkish tint; and salts of iron yield a blue color, which is turned brown by ferrocyanide. Even 1 part of

A substitute for asbestos, suitable for steam-packing, is made by precipitating magnesium salts with water-glass.

BIRTH NOTICE.

Constant. To Mrs. Schyler C. Constant. New York, February 20, 1901, 10 a. m., formerly Miss Bessie Gallagher, of Salt Lake, a boy. Mother and child doing well.

CHRISTENSEN'S.

TOOTH BRUSH EXCELLENCE.

There isn't anyone who can quite come up to the French in Brush making. And even the French manufacturers have quite outdone themselves in these Ladies' brushes we're selling at 25c each. We have never seen brushes as good as these for the money, and we can assure you we've seen a few tooth brushes in our twenty years of Tooth Brush selling.

They are of a nice size, of fine polished bristles, and polished handle. Hard, soft or medium bristles. Talking about tooth brushes put us in mind of the dozen of preparations we have for keeping the teeth clean.

Soaps, powders, creams, waxes, and our own Tooth Powder 25c
