NEW PRESIDENT FOR ROCK ISLAND

Important Developments Pending in Community of Interest Line.

W, B. LEEDS SAID TO BE MAN

One of Chief Promoters of American Tin Plate Company Named as Head of Affairs

New York, Dec. 9 .- The Times says: Financial and railway circles are animated by reports that official an nouncements are about to be made of important developments along "community of interest" lines. One of these -foreshadowing at least one new and big combination-is that a new president is about to be selected by the Chicago, Rock Island and Pacific railroad, and W. B. Leeds is the selection. Mr. Leeds, who was one of the chief promoters of the American Tin Plate company, has affiliations in the rail-way world, being with the Pennsylania system-a fact which gives edge o the theory that his acceptance of the Rock Island presidency is preliminary to some close traffic alliance with the

Nothing seems to be known in the loal railroad offices of W. B. Leeds, who is slated as the coming president of the tock Island. Only it is stated here that Mr. Purdy, the present executive, 1 tired of his job, and being a wealthy man, desires to retire and enjoy a season of leisure. According to local in-formation, Robert Mather, vice presitent and chief counsel for the Islarnd, had been slated to succeed Mr

Representatives of Gould Roads

Given a Special Organ Recital. William E. Hoyt, general eastern massenger agent of the Gould roads in ow York, and Louis W. Eswald, New England passenger agent of the Gould lines at Boston, are in the city today, m a western tour. They were entertained by General Agent C. A. Tripp, of the Gould lines in this city, and a special recital was arranged for them last evening in the Tabernacle. The visitors stated they were on a western trip more to get away from the East than any thing else, and then they wanted to get a fair idea of what was going on in the West. They have not been out here for some years, and wish to familiarize themselves with the prog-ress of the West particularly as they are continually asked questions about the West by eastern people and they wish to keep themselves posted by ob-servation. The visitors report a grow-

Short Line auditor's office has gone to St. Louis to attend the auditors' meeting. Mr. Crutckshank is a relative of the famous English artist of the same name, and is as expert in accounting as his relative was in sketching. Work is reported as stopped by the Short Line at Callentes, and the men, teams and equipment have been shipped to Glenn's eFrry. Ida., where construction work is being done. For-ty miles of road are reported as having een constructed over in Nevada by the Short Line. W. J. Ridd, traveling passenger agent of the Rio Grande, leaves this evening for Grand Junction, where he will mee a squadron of the Eleventh United

States cavalry, numbering 400 men, en route to San Francisco for transporta-tion to the Philippines. The troops ought to be in this city by Wednesday afternoon. Freight rates are reported cut again

from the east to Denver, the disturbing element this time being the all water vs all rail question. The Galveston steamship companies are out for Den-ver business, and in connection with the Colorado Southern are in position to make things interesting for east of the Missouri river lines.

General Agent Hoyt Sherman of the Colorado Southern has returned from an extended trip east on matters con nected with the settlement of the Sher man estate in which he is a large bene-ficiary. Mr. Sherman says that the eastern railroads were doing all the business they could possible handle, and that in fact no railroad in the country ad any complaint to make except the shortage of car and motive power ulpment. He found the weather down east was raw and unpleasant.

The Union Pacific is introducing the lock system between Omaha and Og len and Denver and Kansas City, and the signals and lamps are being to conform to the new order of things. The block system allows only one train between block stations, and thus acts as a great preventive of accidents. Every train wil have a certain part o the track at all times upon which no other trains can enter until that particular block is clear. The change in volves also a change of the color of the safety lights from white to green and then the use of white lights has led to confusion and trouble so often

that their efficacy is greatly impaired.
