

DEMONSTRATION IN ST. PETERSBURG

Was Against the Government, The Participants Including a Number of Students.

## CENSDARMES CHARCED CROWD.

Fifty Persons More or Less Injured-Nothing Like it Has Been Seen Since the Riots of 1901.

St. Petersburg, Dec. 11 .-- A popular anti-government demonstration, the participants in which included a large numbers of students of both sexes, began at midday in the Nevsky Prospect and lasted about two hours,

Hundreds of police and mounted gensdarmes were hidden in the court yard of the public building, emerged suddenly and charged the crowd at full gallop, driving the demonstrators in headlong confusion and screaming with for upon sidewalks and into adjacent streets.

This led to serious encounters, 50 persons being more or less severely injured. Large DUI Large numbers with a first state of 1901, when Cossacks stretch-ed across the Nevsky Prospect from building to building, charged down the boulevard from the Moscow station to the Neva, has the Russian capital lived in Neva, has the Russian capital lived rough such a day of excitement as The authorities last night got wind of the big anti-government demonstration planned for today by the social-Democratic Labor party to de-mand an immediate end of the war and the convocation of a national assembly, and in every leading paper this morning in black faced type was an explicit, warning to the people at their peril to desist from congregating in the Nevsky Prospect near the Kazan cathedral. At the same time extensive preparations were made to quell any disturbances. SWARMS OF POLICE.

The police on the Nevsky Prospect were sextupled, and the dvorniks, or house porters, were marshalled in front f their respective buildings. Half a ozen squadrons of mounted genjarmeric were massed in the rear of the Kazan cathedral and battallons of reserve police were stationed in several court yards out of sight. Minister of the Interior Sviatopolk-Mirsky gave strict orders, however, that no Cossacks should be used, and Fulion, chief of police, issued special orders to avoid harsh measures unless it should become absolutely necessary.

#### NEWSPAPER WARNINGS.

The newspapers' warnings, however, giving notice to those not apprised the prospect of a demonstration, defeated the very object for which they were designed, attracting seemingly the whole population of this vast city to the broad thoroughfare; and long re the hour fixed, despite the pleading of the police, who literally lined the sidewalks, the throngs on the pavewas almost impossible, while the snow boulevard was black with tangled mass of sleighs filled mostly ith the curious. In throngs on the sidewalk were practically the whole student body of the capital, including many young women, who have always been prominent in Russia in liberat olutionary movements, and also usands of workmen belonging to the Social Labor party.

**BAD BLOOD** Reveals itself in many ways. Some-times the impurities in the blood mark and mar the skin with blotches, pimples, tract from the mayor and city coun-cil for a water supply from Lake Michbolls or other eruptions. Sometimes the result of bad blood is rheumatism or a debili-

tated condition which is popularly described as "feeling played out, hardly able to drag myself around."

The impurities and poisons which corrupt the blood, clog the liver and cloud the skin are removed by the use of Doctor Pierce's Golden Medical Discovery. It does more than eliminate the poisons ; it increases the activity of the blood-making glands so that there is

an increased supply of pure, body-building blood. It brightens the eyes, cleanses the skin, and gives new, physical energy. Accept no substitute for Dr. Pierce's

I discontinued the use of my doctor's medicine and began with the 'Goldeu Medical Discovery' and Pellets.' DEMONSTRATIONS GENERAL.

That such demonstrations of the Social-Democratic Labor party are not confined to the capital is shown by a letter received here from a prominent zemstvoist in southern Russia in which

the writer says: 'The optimism with which we left St. Petersburg is beginning to vanish. The government is not showing a dis-position to meet us half way and enter frankly on the path of reform. On the contrary, there seems to be a hesitation as to whether it would not be better to return to the path of reaction. #### RED FLAGS WAVED.

Toward 1 o'clock the workmen and students seemed to swarm toward the conier of the Hotel Europe, opposite the Kazan cathedral. The police, recogaizing that the critical moment was apcroaching, tried in vain to keep back mounted policeman in sight, on the stroke of one from the heart of the thickly wedged crowd a Blood red flag, like a jet of flame, sudaly shot up. It was the signal. Other appeared in the crowd, waving mitcally overhead; and they were greeted with a hoarse roar "Down with autocracy." The students surged inte te street singing the "Marseillaise," while innocent spectators, seeking to extricate themselves, crowded into loorways and hugged the walls.

#### CHARGED BY SQUADRONS.

Dismounted police made a single at-mpt to force their way into the crowd wrest the flags from the demonstrators, but the students and workmen, armed with sticks, stood close and cracy eat back their assailants. Then, like flash, from behind the Kazan athedral, came a squadron of gendarmerie. The doors of adjoining court yards were thrown back, and battalione of police came out. A double squadron charged the flank of the demonstrators with drawn sabers. Five other squadsons circled the mob, cutting through fringe of spectators, who gladly tried to cover. The main wedge of curried to cover. the demonstrators stood fast only ment or two. There was a sharp ratile of cudgels and sabers, then the wounds showed that the police struck principally with the flat of their sabers. The women were especially fierce in their resistance. Many were struck and trampled, and blood streamed down their functions.

"The construction of such a cana would give experimental data about the necessary cross section of the canal about the slopes of the deep cut Culebra and about the sediments of t Chagres, all of which are essential fo

uilding a sea level passage sucessfully. "As to changing from the lock to the sea level form, I gave in 1887 a solu-tion which I communicated recently to Admiral Walker. It is an easy, practical and cheap method of gradu-ally transforming the lock canal into , sea level canal without stopping navigation five minutes. It utilizes for the sea level canal all the work done for the lock canal, except, naturally, dams and locks. This solution entirely protects the future.

'In one word, I think it would be a greater error to begin with the sea evel plan at once. It would cost \$100,-000,000 more and require twice as much time. I The lock plan will be amply sufficient until the traffic reaches 40,-000,000 tons-that is to say, seven times the probable traffic in the first year's operations-and will lead by experi-mental and secure way to an ideal may put forward it must be recognized that the commission is non-partisan and composed of men of great ability olution of a sea level passage.
