FAILED TO PROVIDE.

NEWHOUSE MINES.

What President of Company Says

About Cheap Copper Making.

esting information about the com-pany's properties. Referring to the mines Mr. Jackling says: "The mine has been developed by approximately 90,009 feet of under-ground workings. Very little under-ground development has been done since Jan. 1. 1997, as the ore bodies at that time were blocked out for many years in advance, and it was therefore thought best to confine expenditures to the removal of oxodized overbur-den.

6

den. The ore bodies of the property con-sist of an altered silicious porphyry, containing small grains of copper min-erals, very uniformly disseminated throughout the mass, both in fracture seams and in the body of the rock, and average about 2 per cent copper. erais. Very limits in the mass both in fracture seams and in the body of the rock, and average about 2 per cent copper, 0.15 of an ounce silver, and 0.015 of an ounce gold. The primary copper min-eral is chalcopyrite, but as a result of oxidization of this mineral and sec-ondary deposition of others, practic-ally all of the subhide minerals of copper are now present, the predom-finating one bing chalcocite. The de-veloped and partially developed area, as shown by accompanying map, covers 72 acres of ground. About 60 of the 72 acres contain mineralized porphyry of the average value above stated. The remaining 12 acres average somewhat lower, probably not much in excess of 1.5 per cent. The average thick-ness of the are body over this 72 acres of 1.5 per cent. The average thick-ness of the are body over this 72 acres has not yet been fully demonstrated by development, but existing develop-ments indicate an average depth of about 310 feet, which is equivalent to 1,000,000 tons of the better grade ore, and 12,000,000 tons of the lower grade ore in this body. Of the 60,000,000 tons are partially developed; or, in other words, blocked out, so that it can be accentately measured and its value definitely determined; 2,000,000 tons are partially developed, that is to say, developments have gone far enough to prove the existence of this additional quantity of material, but not sufficiently far to permit of its being measured and sampled on all sides. The remaining 20,000,000 of the 60,000,000 tone is classed as undevel-oped, for the reason that its existence of at 10 and 11 and Federal Elv at 1235 sides. The remaining 20,000,000 of the 60,000,000 tons is classed as undevel-oped, for the reason that its existence is only shown by a limited number of workings, most of which are Diamond drill holes. In the 72-acre area under discussion is a zone of lower grade ore, averaging about 1.5 per cent, and probably containing about 40,000,000 tons. This zone is entirely undevel-oped, save by the diamond drill holes Ontario Sacramento Swansea oped, save by the diamond drill holes that pierce it, but its existence has been proven wherever drilling has been done."

MINERAL AREA.

About Cheap Copper Making. Newhouse mines is producing its cop-per at a cost of 6 cents per pound, says George L. Walker in the Boston Com-mercial, all expenses paid, including freight to the Atlantic seaboard, refin-ing and selling. My authority for this is the company's president. Samuel Newhouse, While the company can in-crease its output to 2,000,000 pounds monthly whenever it is ready, it will continue to produce about 800,000 to 1,000,000 monthly until the price of the metal advances to 16 or 17 cents. With greater depth the company's concentrating ore is increasing in rich-ness. There is a considerable tomage on the fifth ad sixth levels which as-says 5 per cent to 6 per cent. ON MINING EXCHANGE.

Tintic Stocks Fared Well During the

The mining stock market was fairly

buoyant today, and while the volume

of business was not large, the trading

was well distributed. The Tintic is-

sues particularly, were stronger, nota-

bly Uncle' Sam Consolidated, which

sold as high as 54 cents, while Crown

Point was in active demand at 1616 and

1714 cents. On the open board, Ne-

vada Hills enjoyed an upward move-

ment, the stock selling at \$3.10 and

up to \$3.15. For Ohio Copper \$3.40 was

bid with no sales reported, but Thomp-

son went at 16: Uintah Treasure Hill

were:

Forenoon Calls.

on the fifth ad sixth levels which as-says 5 per cent to 6 per cent. Develop-ment work is now under way on both the seventh and eighth levels. Two carloads of sulphide smelting ore sent out a week ago averaged 18 per cent to 20 per cent copper. Mr. Newhouse thinks the mine has a great future, and is understood to be advising his friends is understood to be advising his friends to buy the stock. On a production of 10,000,000 pounds

On a production of 10,000,000 pounds of copper annually at a cost of 6 cents, the company will earn \$800,000 on a 14 cent coper market. This should enable the company to pay dividends of \$1 per share, or better than 10 per cent on the present selling price of its stock Operating to its maximum capacity of 24,000,000 pounds annually, the company could pay \$3 dividends on 15 cent cop-per. If the company can maintain its present low operating costs it will be able to establish an enviable record in the future as a dividend payer. The most valuable asset a big copper min-ing company can possibly have is the ability to put out its product at a very low cost.

Ore Tonight.

It was learned this afternoon that the copper smelter of the United States Smelting, Refining & Mining company at Bingham Junction would be blown Fronia Messersmith, who married Joseph Messersmith in Richfield in 1905, is suing for divorce in the dis-trict court. She alleges in her com-plaint that he has deserted her and falled to provide her with the neces-saries of life. out tonight, being the last of the three plants affected by the smoke litigation in the Sait Lake valley to go into idleness. The yards have been pretty well cleared up and there is very little ore of any kind about the works to be smelted. However, the lead plant can be kept going several days

> The Centennial Eureka mine in Tintic, which is one of the most valuable assets of the United States company, is supplying an output of 250 tons of ore day; 200 tons of which is being diverted to Kennett, California, for treatment, and 50 tons a day to the Yampa plant in Bingham canyon,

NEW MANAGER NAMED.

Richard S. McCaffrey Resigns to Go To Tintic Smelting Company.

To Tintic Smelting Company. Announcement has been made of the appointment of William B. Fisher to the position of manager of the Salt Lake City Copper company, which owns and operates the Copper Moun-tain mine in Boxelder county, succeed-ing Richard S. McCaffrey, resigned. The Salt Lake company is controll-ed by the Lewisohn brothers of New York and has been a quite regular shipper of ore to the Salt Lake smelt-ers during the past eary. Mr. Fisher comes from the Coeur d'Alene mining district in northern Idaho. Mr. McCaffrey, it was learned today retired from the active management of the Salt Lake company on the 20th inst., to accept the position of superin-tendent and metallurgisht of the Tintic Smelting company, one of the Jesse Knight corporations, which now has a smelting plant in course of construc-tion near Silver City in the Tintic min-ing district. Howard P. Saunders of this city is the constructing engineer of the Tintic company and W. Lester

ing district. Howard P. Sadnets of this city is the constructing engineer of the Tintic company and W. Lester Mangum of Provo is manager. Mr. McCaffrey is out at the site of the new smelter today.

TODAY'S MONEY MARKET.

New York, Jan. 28 .- Prices of stocks started upwards with the opening of business today. The volume of transactions was light and gains were generally small.

eraily small. Profit-taking sales made small im-pression on the market aside from Reading and Northern Pacific. There was quite a substantial demand for the well known stocks, especially Brook-lyn Transit and St. Paul. Delaware & Hudson improved 2%; Mexican Central, Amalgamated Copper and American Sugar, 1%; Union Pacific, 1%; Northern Pacific, Southern Pacific, United States Steel preferred and American Smelt-ing, 1. ing, 1

Cleveland, C. C. & St. Louis, after rising 2 points, relapsed 10 on the re-duction of the semi-annual dividend from 2 to 1 per cent. The rise m the general list was halted but was afterwards resumed. New York, Chi-cago & St. Louis second preferred rose 5 points on the increase on its annual cago & St. Louis second preferred rose 5 points on the increase on its annual dividend from 4 to 5 per cent. Ameri-can Smelling made an advance of 2, Pennsylvania and Virginia Iron 1½ and New York Central, Great Northern pre-ferred, the Ore Certificates, Anaconda, American Car and Distillers, 1. Prices re-acted a fraction before noon. Bonds were strong. Bonds were strong.

Bonds were strong. The stock market grew more reac-tionary in the afternoon and much of the day's gains were lost. The reces-sions averaged about a point for the principal stocks. Camdian Pacific ex-tended its loss 2 points and Mackay Companies preferred, 1½.

tor in building up Salt Lake

proven wherever drilling has been don." MINERALAREA. "The total area of mineralized por-byty contained within the boundaries of the property is about 160 acres, leav-ing 85 acres which are not considered as in any way developed, although a portion of the area is known to contain ore of profitable grades. The ground to the south and east of the area shown as developed and partially developed and lying on the south side of the canyon also has some possibili-ties. This is shown by a number of more or less shallow workings on the ground and by work done in the im-mediate vicinity, on contiguous prop-erty. On the north side of the can-yon, and to the east of the developed ore body indicated, a working of con-siderable extent, known as Tunnel C.' has developed, for several hundred feet of its length, an average grade of ore, and although the main level workings. 200 feet vortically below, show a lower grade of material, still there is a chance of developing some ore at this point. "The character of the extreme north-eastern portion of the property is but withing furthest in that direction, on the north side of the canyon, are still in ore of a good grade, and there is rea-son to believe that a portion of the area will develop ore bodies of a commer-cial value. The mineralized porphyry area lying to the west of the devel-poed area, or down the canyon, is of lowed grade than the average of the property, and generally speaking, sim-itar to the 12 acres of ground hertofor-mentioned as averaging in excess of 1.5 per cent; in fact, it is entirely inprobable that this whole area will develop profitable ore bodies, but a portion of it will do so. Taken as portion of it will do so. Taken as portion do it will prove as high prade as the portion already devel-pond area will contain values that will show profits in oprating in the inture."

future." Mr. Jackling then went into detail regarding the methods of mining em-ployed at Bingham and closed with a description of the big Garfield mill. The financial statement made the following exhibit:

The account of assets is as follows;

EASY MONEY.

In New York means that good stocks will go up, and finally reach normal prices. We have advised holders of preferred stock in Utah-Idaho Sugar Co., not to sell. But if they need money and must sell to come to us. In three weeks the stock has risen sixty cents per share.

THERE 18 A REASON.

If you wish to buy the sooner you send us your order the better. The stock pays 17% cents per share every quarter. Prompt attention given to orders the day received. With your order send checks or postal money orders for amount you wish to buy.

YANKEE CONSOLIDATED. Retiring Officers Have Been Retained

For Another Year.

For Another Year. At the annual meeting of sharehold-ers of the Yankee Consolidated Mining company yesterday afternoon, the retir-ing board of directors was re-elected and organized with the following: John E. Dubois, president; Judge J. E. Frick, vice president; B. N., Lehman, treasur-er. Charles J. North and H. C. Ed-wards complete the board. A. E. Can-field was returned as secretary of the company. The stodkholders then ad-journed until next Wednesday after-noon, at which time the consolidation of the Yankee and other companies, and the increasing of the capitalization, will be taken up for disposition. There was a large number of stockholders at yesterday's meeting.

AMERICAN SMELTING. Officials of Corporation Looking After

Mexican Interests.

Mexican Interests. City of Mexico, Jan. 28.—A car con-taining promient officials of the American Smelting & Refining com-pany, is due here in a few days. The party includes S. W. Eccles, the vice president of the company, and other large stockholders and officials. Stops will be made at Velardence and Ar-guascalientes, where an inspection of the company's properties will be made. From Arguascalientes, the party will be accompanied by William C. Potter, chairman of the board for the southern district.

district. After leaving this city, stops will be made in Parral, and Chihuahua, where the company has large interests. It is planned to arrive in Chihuahua in time for the blowing in of the new 500-ton smelter of the American Smelting & Refining company at that place, which will take place about Feb. 1.

BACK FROM NEVADA.

Bradley, chief engineer of the Utah Copper company, returned last night from a trip to the properties of the Patsburg Silver Peak Mining com-pany at Blair, Nev. To a 'News' rep-resentative today, Mr. Bradley con-firmed the report circulated during his absence to the effect that overtures had been made to him to accept the main-agement of the mine, but he was un-willing to say that the proposition would be accepted. However, the mat-ter will have to be decided soon. A meeting of the board of directors is scheduled for the early part of next month.

month. Conditions at the Silver Peak mine are reported by Mr. Bradley to be in a very satisfactory way. Sixty stamps of the new mill are dropping on ore; the installation of the cyanide depart-ment is in progress and will be complet-ed about the middle of next montwh. Mr. Bradley says the people of Gold-field and Tonopah foel more encouraged over the outlook for the future and this is being evidenced by the late improvement in the price of stocks.
