The idea has been caught up of these to other persons than the and provisions of every kind are mothers, and to view maternity as tested daily. The report for May a curse and large families as a buris instructive. Of 281 samples of wine, 181 were ruthlessly condemned, only six being returned as "goo L" and of milk, 83 out of 105 accustomed to the latter condition, samples proved worthless.

President Garfield's condition remains very favorable. It is now thought that the liver is not injured. The exact whereabouts of the bullet is yet undetermined. Speculations as to the result are not to be relied upon. Hope tells a flattering tale, and the indications justify hope. It will be several days, however, before definite opinions can fairly be formed. Meanwhile, the desires poured out in favor of the wounded President.

have proved very beneficial. The temperature was sensibly diminished as the west breeze came into the room and struck against the stretch-

urfort J org L M ing the temperature is of the utmost importance, for the night was exarlow h ceedingly sultry and the patient would scarcely have rested as well as he did had not the atmosphere been hept down to a tolerable standard. The President has not suffered in the slightest degree from nausea during the night. His sleep was refreshing, and has had the effect of giving a fresh acquisition of strength. The result therefore was

amusing litter to the Lowell (Mass.) Mail by a visitor to this city, who speaks of what the "Mormon" far- ing to that institution wines and mers do on "supply day," and draws a highly colored caricature of life in this city. Our correspondent wants the drink. to know what "supply day" is, and whether Z. C. M. I. has a regular rum-drinking saloon or grog shop, as represented.

Perhaps before replying it will be well to quote a little from the letter in the Mail. The writer says:

"They bring their wives into town in dead axle wagons, and fill in the vacant room with children who look fully as bad as their mothers, if not worse. Many of them are lame and hump-backed, and all look sickly and ill-clad. Two out of every three women on the streets yesterday had nursing infants on their arms, and four out of five of the children are said to be girls. One of the saints has thirteen wives and ninety-four children; another has nine wives children; another has nine wives and five nursing babies, which he exhibits with all the pride I should take in a lot of line horses. I never realized the infernal na-ture of the institution, nor its effect upon society as I do now. The sconer our government crushes it out the better for humanity. It is a blot upon the face of the earth, particularly in this lovely valley, so green and beauti-ful, with apple, peach, pear and plum trees in full blossom-gras-waving in the wind, bees humming and birds singing, like our July wea-ther, while just beyond all this, in the background, are the mountain the background, are the mountain tops covered with snow. It is the prettiest sight I ever saw, and one which I never shall forget."

for sensations. We have as fine look-ory. He hadn't a single confederate. ing children in Utah as can be His only reason for holding them, he found anywhere on the face of the earth, and while we have not so many millionaires as live sumptu-ously in other places, wealth is more evenly distributed, and more people live in their own houses and ride in thair own vabiales to their own vehicles in proportion to the population, than in any other spot on the globe that we know anything about, and our travels in both hemispheres have been by no means unextensive.

The writer of the above extract probably saw the fine ploture of fruit and grain and grass and flowers, and either imagined the other part. The writer of the above extract

TO-DAY'S BULLETINS.

The President has passed a very comfortable night and is thought to be somewhat improved. Physicians are now with him and an official bulletin will shortly be published. An unofficial report since the last bulletin shows the President con-

Furiay J Fryer R C Foster R I Fletcher I tinues to improve. He suffered some inconvenience from being changed to a narrow bed, as the doctor would not allow him to move about st much. He continues cheer-

9:15.—The President has passed a most comfortable night and continues to improve. He is cheerful and usks for additional food; pulse, 94; temperature, 99-1; respiration, 23. No further bulletins will be issued until 10 o'clock.

The changes that might affect the former are most important, indicat-ing a shock of peritonitis, but the body heat has not been above 10] and a fraction. The most probable explanation of the wound is that the built took an upward and in ward course, and lodged in the dense tis-mins about the spinal column. This The President at 11 o'clock seems worried over but one thing-the impossibility of getting enough to eat. Every function except his appetite is normal, and that is enor mous. He turned his attention ues about the spinal column. This largely to it, and good humoredly asks if the doctors want to starve him to death now he is determined not to die of his wound.

Mirat Halstead telegraphs that children on the street confidently ask the news of the President.

The cabinet have gone ho Blaine spent an hour with the Vice-President to-day. Arthur receives regular bulletins. He dreads the idea of taking the Presidency and suffers from criticism and abuse. Attorney-General McVeagh says: The President's condition is very fa-vorable indeed. He does not conider that the President is out of danger, but says he appears to be ng out of it as steadily and rap-I p. m.—The condition of the Pre-sident continues favorable at this a.
