

EVENING NEWS.

Monday, March 10, 1883.

FLOATING FRAGMENTS.

Guarding is in full swing on the upper and lower lands.

Mayor Jennings has arrived home from his trip to the Pacific Coast.

Mr. C. R. Savage will leave for another trip to California at the end of this week.

The entertainment, by Miss Thomas and the Unity Club, at the Theatre to-night.

The Walker Opera House Stock Company will play Pink Dominoes on Tuesday night.

S. E. Giggles, the boy who was run over by a trolley on the U. C. R. R. at Milford, on the 6th inst., died within a few hours after the accident.

On Friday night the Postoffice at Shoshone, on the Oregon Short Line, was burglarized and robbed of stamps, registered letters and other valuable property.

On Friday, at Evansville, E. Walton, who had his feet frozen while hunting, had the left foot amputated at the hospital and all the toes removed from the other one.

Thursday next, the 15th inst., is reserved, in competing for the premiums offered by the City Council for the improvement of Liberty Park and other public grounds.

The desire of power in excess caused the angels to fall; the desire of knowledge caused the serpent to fall; but in charity there is no excess, neither can angel or man come in danger by it.—Bacon.

Conductor E. Beesley desires to remind the members of the Tabernacle Choir of the special practice to be held in the Council House tomorrow (Tuesday) at seven o'clock. A full attendance is requested.

Although there has been no indication of a storm as terrible and general as that predicted by Prof. Wiggins, unusually severe weather has been experienced over a wide extent of country with in the past few days.

F. L. Hatch, of Silver Reef, while intoxicated, fell off his loaded wagon, the wheels passing over the small of his back and inflicting severe and possibly fatal injuries. He is, however, doing well under the care of Dr. Bailey.—Beaver Union.

It is a well known fact that trees along highways, trees in towns, trees in groves and agricultural regions, render the atmosphere purer. They, by their foliage, absorb harmful gases, would otherwise be breathed by inhabitants of densely populated cities, lessening the danger of epidemics, and in all ways improving the healthfulness of communities.

A number of new passenger cars, first-class are now en route for Shoshone, and as soon as the grade there is sufficiently settled the line in place and the ballasting of the road is completed, through tickets will be sold to West Ogden. Until then passengers must sign a release of their tickets at Pocatello, and take all risks and rough accommodations to Shoshone.—Halley Times.

A woman of about 40 years, a passenger on No. 4 this morning, developed serious symptoms of insanity just after leaving Ogden, and has to be closely guarded to prevent her leaving the train at each stopping place. She occupied a berth in the sleeping car and had a first-class ticket to Iowa City, Iowa. She made a series of attempts to get out of the car here, and was only prevented by locked doors.—Laramie Boomerang.

LOCAL AND OTHER MATTERS.

Will Address.—To-morrow evening, at 7 o'clock, President Willford Woodruff will address the Mutual Improvement Association of the 6th Ward, at the School House.

Wants to Settle.—Secretary Thomas desires of settling up all accounts connected with the elections, and consequently wishes to request, through the News, that all judges of election who have not already done so, forward to him their bills for services rendered.

Burglar Foiled.—Last night after the midnight hour, a burglar entered the boarding house of Mrs. Evans, opposite the Continental Hotel, intent on plunder. He succeeded in opening a desk in search of valuables, but was frightened away and escaped through a window of the room in which he was operating.

Opera House.—To-morrow night "Pink Dominoes" will be put on the boards of the Walker Opera House. Miss Annie Adams has been engaged to play the leading part in the piece, and will be ably supported by the stock company.

There will be a Saturday matinee at 2 p. m., when "Aladdin the Wonderful Scamp" will be presented.

The Utah Secretaryship.—Hon. Arthur L. Thomas, last night, received his commission for a second term of four years, commencing May 1st, 1883, as Secretary of Utah, and to the oath of office before Judge Hunter to day. Our personal relations with Mr. Thomas have always been of most agreeable character, and he is a very energetic and efficient Secretary.

A Surprise.—We are informed by Mrs. Mary Ann Smart, of Union, that the ladies of the Relief Society, accompanied by a number of brethren, made Bishop Ishmael Phillips the recipient of a surprise party, at his residence, on the 9th inst. The president of the society, Mrs. E. Richards, in behalf of her associates made the Bishop a present, as an expression of esteem. An excellent repast was partaken of, and according to the report the occasion must have been a pleasant affair.

Suicide on the Train.—The Pilot states that E. E. Engstrom, of the firm of Engstrom & Briggs, cigar merchants of Market Street, San Francisco, committed suicide, by leaping from the C. P. train on Friday night. Dr. Condon of Ogden did all that professional science could suggest to resuscitate him, but the man died at one o'clock. It appears that the deceased, who was about 25 years old, had started from San Francisco for Europe, and his motive for committing the rash act was unknown. The body was placed in the care of S. M. Prashaw, of Ogden, to prepare for shipment to San Francisco.

The Incandescent Electric Light.—On Saturday night an exhibition was given of the incandescent light. The system is a combination of the Brush and Swan inventions, the former having produced the incandescent apparatus for storing electricity while Mr. Swan's prolific mind brought out the light. As the system was described in detail in the News some time since, it is not necessary to give a repetition of it. Besides the interest does not centre near so much in the apparatus and modus operandi as in the result achieved, which apparently leaves nothing to be desired in the matter of artificial illumination. The light is 'exceedingly beautiful, is subject to modification or intensification at will, and is capable of being used in the way between two candle to five hundred candle power. In addition to clearness it burns with a steady glow, there being no appreciable fluctuation or flickering. It can be used for lighting public buildings of any dimensions as well as for the office and household, either by bracket arms or articles having the form and appearance of ordinary oil lamps. Besides the electrical current can be utilized in propelling any piece of household machinery requiring limited power, such as a washing machine, churn or sewing machine. An article of the latter description was running, by a simple wire attachment, on Saturday evening, at the place where the light was exhibited. The incandescent electric light is a marked achievement in scientific invention and appears bound to grow into adoption. It is proposed to establish a branch of the system here. Mr. Rathbun, general manager of the Pacific Coast Swan Co., is in the city, and expects to remain for a few days.

Assembly Hall Services.—The congregation was addressed by Elder Theo. B. Lewis yesterday afternoon. He delineated the various objects for which people assembled in a place of worship, and held that whatever might be the incentive for attending, all were susceptible of receiving benefit from the exercises. Some people were liable to criticize the remarks made by the preacher, on the ground that the same ideas were frequently repeated. He expressed himself to the effect, however, that if a person was not spiritually dyspeptic, he would accept of the food presented, which would build up his spiritual nature. In this respect the spiritual was typical of the physical condition. To those who dwelt in the position of the Latter-day Saints in reference to the Gospel having been restored by the ministrations of angels, he would say that this was no greater miracle to man than the operations of nature, the origin of life being to him an unsolved problem. The Gospel has been revealed for the improvement of every faculty and attribute that constituted man's individuality, inherited from his personal Father and God. The avenues of scientific knowledge were a legitimate and specially proper field of research for the Latter-day Saints, who acknowledged the power of God in all things and should delight in investigating the laws governing his handiwork. The concluding part of the discourse was devoted to a powerful exhortation to the people to practice righteousness.

Returned from a Mission.—This morning we received a visit from Elders Robert Smith and Joseph S. Bills, who returned last evening from a mission to the Northwestern States. They left here last November and traveled in Wisconsin, Illinois and Michigan, and paid a brief visit to Canada. They spent most of the time of their mission visiting relatives and explaining the Gospel to them, of which quite a number were convinced. Four families believed in the truth of the message conveyed to them by those brethren, and purpose emigrating to Utah at an early day. Elder Smith's health was affected detrimentally by the intense cold, but that of Elder Bills continued excellent the whole of the time.

In the town of Raymond, Wis., a family were converted and advertised their farm for sale, with a view to emigrating. This caused a feeling of intense excitement in the place, and threats were made of mobbing the brethren. This sentiment was not on account of any personal animosity, as both Elders were well and favorably known, Elder Bills being a native of the town, while Elder Smith had resided in it for a period of fifteen years. It was simply the antipathy toward the Latter-day Saints and what the people supposed to be their doctrines that caused the feelings of opposition.

Preventive Precautions.—We learn from Brother C. Halvorsen, of Pocatello, that the County, that the four cases of smallpox in that town were all progressing favorably up to the 6th inst. The county court met in the afternoon of the date named, appointed M. M. Steele quarantine physician, and he and Dr. King removed all the affected parties to one place, and no person was permitted to approach the block where they were located. Fences had been erected across the streets all around it. Dr. King had expressed the opinion that the disease was curable.

Floral Depletion.—The horticulturists of this city lament that the low temperature has killed all of their half hardy rose trees, and nearly all of their budding varieties. Quite a serious loss, as some nurserymen have been benefitted of several hundred of rose trees each, and among them their most beautiful varieties of flowers, which had withstood the more moderate prior winters. Many of them might have been saved, had such an extremely rigorous cold winter been anticipated.

Amateur Entertainment.—H. K. North informs us that last Thursday night "The Streets of New York," and "As Like as Two Pins" were played in Mill Creek Ward, by an amateur company. Prof. Rowden's orchestra furnished the music.

Epidemic.—A large number of children at Fillmore, Millard County, are afflicted with measles and whooping cough, which have appeared in the form of epidemics.

Conference Rates.—We learn from Mr. Francis Cope, freight and passenger agent of the U. C. R. R. that arrangements have been made for regular Conference rates from all points on that line, the U. P. and Utah and Northern Railroads.

Home Again.—The many friends of his honor Mayor Jennings will be glad to see him around town again. The trip to the Coast gave him the rest and recuperation he so much needed, being a brief respite from very active and incessant business labors.

Back from the Coast.—To-day Mr. Henry C. Tryon and Mr. W. C. Morris, returned from their trip to California. They took in all the sights anywhere near San Francisco, and had a very enjoyable time. They received marked courtesy everywhere, and had the freedom of all the theatres at all hours.

Seed Potatoes.—The following correspondence to an exchange is of interest: "I usually select tubers for seed about the size of a common hen's egg, putting one whole one in a hill. I could cite, had I space, from my own experience during fifty years, numerous examples to corroborate the fact that large crops of potatoes are grown when very small tubers are used for seed."

Theatre To-night.—To-night the people of this city will have an opportunity of enjoying a treat not often afforded. Miss Thomas and the Unity Club will give an entertainment, in the Theatre that has never been equalled in its line. It will be a genuine night with the poets. The recitations, readings, tableaux, music, and everything else connected with the affair will be of the most finished artistic and ingenious order. Go and witness the performances.

Granite Front.—Messrs Walker Bros. will soon erect an imposing building on the old Elephant corner, at the intersection of East Temple and Second South Street. They are now considering whether or not they will adorn it with a granite front, with pillars of the same material in place of the usual front supports. It is to be hoped the decision will fall in favor of granite, which would make a beautiful finish, preferable to any other material to be found in this region.

The Plays.—The plays which the Home Dramatic Club will render on the Conference dates will be the great sensational drama of "The Long Strike," now enjoying a revival in the East, and their new manuscript from Wallace's Theatre, "The Money Spinner," said to be the equal in dramatic interest and as a literary production to either "Daniel Boone" or "The Banker's Daughter." The company selected to interpret these great plays, the Club announce as the strongest they have ever brought together. Miss Adams and Miss Dwyer are the leading ladies and will make their first appearance in conjunction. Besides these, all such well known favorites as Mr. Wells, Mr. Spencer, Mr. Cummings, Mr. Taylor, Mr. Felt, Mr. and Miss Whitney and numerous others are engaged to appear. Rehearsals on both places are now being actively prosecuted.

SPECIAL BUSINESS NOTICES.

500 pieces of Hamburg Edges and Irish Point Embroideries, also real lace in Spanish hand-crochet, and Escural. Our stock of White Laces, in Torron, Oriental, Brabant, Almon, &c., is always the best in the city.

ROBERTSON'S COD LIVER OIL.

Dr. G. W. Collins, Tipton, Ind., says: "I used it in nervous debility brought on by overwork, in warm weather, with good results."

deed & w.

PURE BLOOD.

Many families prize themselves on their noble ancestry; but here, in this democratic country we do not care so much about our pedigree as our health; or, at least, that ought to be the principal object of our solicitude. We cannot have good health without pure, rich blood.

When the blood is out of order, disease manifests itself in the skin and flesh, and in fact, in all parts of the body. To be restored to health, take Scott's Emulsion or Blood Purifier.

Physicians speak in the highest terms of this medicine.

Dr. Everett, Cooper Plains, Shoshone Co., N. Y., mentions two cases of Scrofula and Erysipelas in which Scott's Emulsion or Blood Purifier effected a cure, and says, "I think it one of the best purifiers of the day. It has met with perfect success in every case where I have used it."

deed & w.

A Slight Cold, if neglected, often attacks the lungs. Brown's Scotch Tonic gives sure and almost immediate relief. Sold only in bottles. Price 25 cents.
