

ON MINING EXCHANGE.

Ohio Copper Closed in Good Demand -Today's Quotations and Sales.

-Today's Quotations and Sales. A good volume of business was trans-acted on the floor of the mining ex-change during the week, which has ended with a marked improvement in the copper list. There is an increasing demand for Ohlo Copper and a sole of that stock was recorded today at \$7.5. Lower Mainmoth has recov-ered some of the losses sustalhold early in the week, while old Mammoth has held its own. May Day and Uncle Bam are weaker; so is Beck Tunnel and Colorado. Seven Troughe has closed strong on the strength of the continued good reports coming from he mine, while Sloux Consolidated has held its own.

ation. At the Giroux properties all nar-rew gage rail connections with the concentrator have been made, mines connected with trackage and every-thing made raidy on the surface for business. Surface forces were laid off something over a month ago, their work having then been completed. In the mines of the company develop-ment goes ahead steadily without re-auction of operating forces, though the ore blocked out in the properties and the excellent shape in which the mines of the company have been put would enable them to shut off de-velopment at any time desired, were curtailment of excenses under consid-eration. However, every ion of ore opened is just that much of an asset against the future, while continuing with development holds a well organ-heed and accellent force of miners to-gether to turn on to regular produc-tion scenever it may be wanted. As sinced above, it now looks as if that would be also. With the excitient work which as been done on the conwould be soon. With the excellent work which as been done on the con-centrator, a few weeks of test oper-ation will probably be all sufficient to determine the rendiness of the plant

New Concentrator Will Be Given Try-

ing Out Next Week.

ing Out Next Week. It was learned yesterday from an authoritative source, says the White pine News, that the Giroux concen-trator will according to present plans, get up deam next week and com-mence preliminary operations which may be expected to work into per-manent production within a short time. The preliminary work is but partially experimental, inasmuch as it will have only to do with the trying out of equipment for the purpose of ascertaining whether everything in connection with the extensive and complicated erection work, requiring prefect adjustment, to the hairs breadth, is ready for continuous oper-ation.

At the Giroux properties all nar-

small army of workmen has taken the place of the force that was engaged in commercializing the product of the mines only a few weeks no. Great quantities of brick and lumber are on the ground, and some of the big smoke stacks are beginning to bear the uspect of huge monuments on the mountain aldes. The tramway along the line of the copper belt is nearing completion, and to all appearance the smelting plant soon will have in-stalled a sufficient amount of ma-chinery to make the plant almost a new one.

chinery to make the plant almost a new one. Two great properties at the Bing-ham camp are continuing operations in a manner that would give sufficient employment to satisfy almost any min-ing camp, ordinarily. These two are the Utah Copper company and the Utah Consolidated. The Utah Cop-per company has cars, engines, steam shovels and blasting outfits at work from the cabyon to the summit of the mountain, which have made head-way in the tearing down of the ores and appar crest. The Utah Consolidated is also fol-lowing in the pace, set by the Utah Copper and with the reduction of the cutput at other mines both of these companies have gone into the mining business more extensively that ever for the reason that more laborers are to be had and botter facilities are to be had smallers as well as

to be had and better radiations are to be had for transporting the ores to the mills and smelters, as well as good fuel supply being afforded by the railroad company, which is now in a position to give better service where the demands on it have been reduced.

NEVADA CONSOLIDATED.

Boston Reports Mine Operating at Full Blast.

(Pollock Special Wire.) Boston, Nov. 2.—The Boston News bureau says: The report that the levada Cons. copper mine has closed own is officially denied. It is still in ull operation. The development work, weaver, has been so far advanced it lown is afficially denied. It is such as full operation. The development work, he wever, has been so far advanced it is stared officially that there is now \$5,000,000 tons of ore in sight ready to be mined. The shaft is completed and the mine is residy to ship ore to its con-centrating plant as soon as the plants are ready. One concentrating unit will be ready before Jan. I, and the two oth-ers will be completed shortly after.

State of the second sec

CONCENTRATES.

Edward R. Zalinski, the mining engineer, has returned from a trip east, where he has been on mining business.

Col. J. L. Hackett, one of the big stockholders in the Ohio Kentucky mine at Ploche, left last night on an inspection trip to the property of that ompany.

The ore and buillon sottlements re-ported late yesterday by McCornick & Company were: Crude ore and con-centrate, \$32,000; base buillon, \$60,-

The Goldfield Consolidated Mines company is negotiating for a mill at Wardsworth, Nev., and if successful the plant will be overhauled and placed in commission again.

The eastern office of the Horn Sil-ver Mining company has ordered its mine at Frisco, Beaver county, closed and Manager P. T. Farasworth has carried out the instructions.

The seventh section of the Utah Cop-per company's Garfield mill is now in commission. With six sections oper-ating, the company turned out approx-imately 4,000 ions of concentrate aver-aging 30 per cent copper. James J. Burke, the contractor has

James J. Burke, the contractor, has returned from California where he has just finished up the construction of the aerial transway for the Balak-iala Copper company. The system was placed in commission and turned over to the company before Mr. Burke pulled out for home.

WEEKLY VITAL STATISTICS.

The weekly report of the city board

The weekly report of the city board of health for the week ending Nov. 1, 1907, shows the following: Fifty-three births were reported dur-ing the week; 28 malas and 20 females. Twenty-two desiths core reported dur-ing the week; 13 males and 9 females; four bodies were shipped here for burial.

four bodies were shipped here for burial. There were reported during the week its cases of contagious and infectious diseases, consisting of 1 case of small-pox: 6 cases of scarlet fever; 5 cases of diphtheria, 57 cases of measles, 18 cases of typhoid fever, 1 case of pheu-monia, 3 cases of chickenpox and 1 case of mumbs. There were remaining in quarantine at the end of the week. One case of smalloox, 11 cases of scarlet fever and 16 cases of diphtheria, quarantined in 10 houses.
