Whatever right good start as quickly as possible, for they are only in the way here. Why, I know women in the little town of Bozeman that spend enough every year for jewelry and superfluous articles of dress to procure another wife for their husband, and set her up in business. I don't suppose they have ever thought of that.

There are more ways under our present marriage system for the devil to make men's lives miserable than by any other machine he ever invented. Getting married is a good deal like Christendom. It would give us a more going a fishing; a man don't know what kind of a fish he has got until he gets him on the table. I have known quite a number of good men who were tied up with women who had neither taste, refinement nor anything else attractive about them; who could not cook a meal to save their lives: whose homes look more like a to be woodpecker's nest than anything else that they could be compared with. Yet they have got to stand it until grim death comes to their relief. A man has not only to revel in filth himself, but has to bring up his children in filth and nastiness, when, if he were allowed a second wife, it would be better for him, for her and for the whole family.

God has promised to feed us with the fruit of the wheat and with honey, to satisfy us, therefore, every man has a right to pray "From slatterns, from slouches, from bad cooks and poor chuck, good Lord deliver us."

I once heard old Dr. Cartwright relate a little incident that happened at a camp meeting on one of his early circuits. There were present on the camp ground two finely dressed, fashionable, young ladies from Baltimore. They were stopping with a very pious sister, who lived near the camp ground It so happened that they were a little late in coming into the congregation one evening, and on finding the seats all occupied except the seat in the large pulpit, they went to Cartwright and very politely lasked the privilege of being seated in the pulpit. "Yes," said he, "if you will promise to pray to God for religion, you can take seats in the pulpit." So he led them up and enough in it to let them try it on me, of ecclesiastical dignitaries, the like of s ated thein. There being a deep relig ous interest in the congregation it was not long before they began to reel an interest in their soul's salvation, so they both knelt down and began to seek God with all their hearts, who true to his promise was soon found by them. When they had found the pearl of great price, they both arose before that great congregation and very deliberately took off their chains, bracelets and jewelry, to the amount of several hundred dollars and handed them to Cartwright, saying, "We now have no further use for these idols."

Fifty years ago such little incidents were as plenty as June bugs in harvest time. It don't seem to me that a man would be unhappy with

If I were a woman l would rather have a one-tenth interest in a good man who could provide for me and my children, than to have a warrantee deed to all the scrubs in perfect race of beings and instead of depreciating, the race would continue to improve with every succeeding generation. I know it seems like a desperate experiment to a great many.

The Council everyone. had discussed freely and fully he said, and with a view to the perpetuation great and dissemination of the interests of the Church in the United States, matters which the average Christian consider wholly and absolutely outside the right of priestly interference. They considered that the highest type of education was consistent, and only consistent, with the highest religious and moral training, and for that reason the Council had formulated plans for the more general founding and maintenance of parochial schools and for the establishment of a university that would evoke the admiration of all for the exalted character of the instruction it would impart and for the degree of scholastic erudition it would produce among the clergy. They had also considered the necessity of home work and the duty of the clergy to see that the purity and permanence of conjugal relations were maintained. The next Congress will show some material changes, and in the retirement of one or two of the Congressmen the lightning has been doing some very judicious striking, though it was also promiscuous in its character. Jos. D. Taylor, of Ohio, made his fight for election to the coming Congress as

These four were Jos. D. Taylor, of Ohio; Thos. Hardeman, of Georgia; Wm. P. Kellogg, of Louisiana,—the notorious Kellogg and Geo. V. Lawrence, of Pennsylvania. The other two members, F. A. Johnson, of New York, and Isaac S. Struble, of Iowa, who also favored the bill, were returned. Every man who opposed the bill and who ran, was reelected. Mr. A. M. Alexander, of Missouri, was not a candidate; the others were all returned. There was not a little excitement in the committee on Territories at the time, and Thomas Hardeman, of Georgia, a Democrat, who favored the bill, ple to stand aghast at the possibility of Brown, of Georgia, to the Hoar bill, an exercise of political power as a made a public declaration to the effect church organization!
