THE LATE WILLIAM H. HOOPER.

PRELIMINARY AND RESOLUTIONS OF RESPECT TO HIS MEMORY.

We are enabled to publish the following:

DESERET NATIONAL BANK, Salt Lake City, January 12th, 1893.

At a meeting of the Board of Directors held this day, the Vice-President, H. S. Eldredge, announced the death of the President, the Hon. William H. Hooper.

On motion of Wm. Jennings the following preamble and resolutions were unanimously adopted:

Resolved, That we feel that in the death of William H. Hooper, the Board loses a wise and prudent leader, and the Bank loses a respected officer, whose integrity, exceptional ability, and devotion to duty, have won the love and esteem of his associates.

Resolved, That we place on record our appreciation of the valuable service he has rendered in promoting the welfare of this bank since its inception, and our sorrow at the loss all have sustained by his death.

Resolved, That our long and intimate association with him, officially and socially, will always be remembered by us with pleasure, mingled with regret for his departure from our midst.

Resolved, That we tender our heartfelt sympathy to the family of the late President, and with them lament the sad event, while we bow in submission to the decrees of Providence.

By Order of the Board.

More Appointments. — George Edgington has been appointed by the commission, presiding judge of the Coalville Municipal election, vice C. C. Rhoades, absent from that city. Mr. John H. Worthington has been appointed judge, in place of Mr. Edgington, designated presiding judge.

Petrified Forests in the United States.

Stone forests are in many parts of the world. A number of stony trees have been recently reported at the Smithsonian Institute from the west. In many cases they are hardened by the peculiar atmosphere where they stand, and in others they are buried, the parts being replaced by mineral matter. The little Colorado River in Arizona has long been a famous locality for such finds. At one place more than 1,500 cords of trunks and sections of logs were found by government surveyors. Most of them were silicified. Many are several feet in diameter, and from 20 to 70 feet in height. The greater part of them have probably been covered in mud that originally was 1,000 feet thick. Some of the trees are changed to Jasper, assuming numerous hues, while others resemble opal, and when broken open, the core is often found lined with crystals of the most beautiful kind. Louisiana and Ohio are noted localities for fossil trees. In the former State, several years ago, in turning up the ground in an ancient forest layer was unearthed, and in succession two others were found; and scientists judge, from the size of the trees, that from the time of the first layer to the last 80,000 years must have elapsed. In the remains of the glacial drift in Ohio old forests are often discovered. Some have been buried beneath the water by the sinking of the land. Some of the Ohio trees are not entirely changed into stone, being yet soft, while others are found in all stages from rock to porous spongy matter.

WHO ARE THE CRIMINALS?

A STATEMENT WHICH TELLS ITS OWN TALE.

A clique of villainous slanders mongers in Utah—particularly in this city—for the attainment of certain political and religious purposes, make a continuous business of vilifying the "Mormon" community, and whom whom more lies are published than on any people on the globe.

The heartless and conscienceless scoundrels who engage in the traffic of falsehood, mostly belong to two distinct classes—sectarian priests and political tricksters. Defamatory stories made out of whole cloth are told of the "Mormons," in the face of the fact that the overwhelming proportion of the crimes committed in Salt Lake City and throughout Utah, are the deeds of the class whom the slanders of the "Mormons" claim to represent and belong to.

In looking over the police record of this city for 1882, it is found that during that year, 1,840 arrests for all classes of crimes were made. Of the persons taken into custody 1,194 were non-"Mormons" and 446 "Mormons." These figures are exclusive of soldiers and destitute persons who have been provided with lodgings at the jail. Besides, many parties arrested during the year who are in reality not "Mormons" but belong to "Mormon" families, have been classed with the "Mormons" in this calculation.

Thus it will be seen that the non-"Mormon" population of this city, supply three-fourths of the criminal.

The population of this city now approximates to 25,000, and in case the relative numerical proportion of "Mormons" and non-"Mormons" may be doubted, a reference may be had to the voting population as exhibited at the last election, when the People's party almost exclusively "Mormon," cast 5,003 votes, and the non-"Mormons," or the "Liberals," 1,643, a trifle less than one-third, notwithstanding that the probabilities are larger in favor of the "Mormons" from this standpoint, as they, as a rule, have much larger families than the other class, and many of them are disfranchised under the Edmunds law, and the rulings of the Commissioners. This would make the relative non-"Mormon" population about one-fourth.

While the defamers of the "Mormons" have been publishing the most infamous falsehoods about them, we have simply asserted that as a law-abiding people, on general principles, they have few if any equals on the globe. When the matter is looked into, our position is proved at once, for while the class to which their traducers belongs is comparatively groveling in the filth of iniquity, they occupy a moral plane far beyond the present reach of their contemptible defamers, who secret their abominations behind the refuge of lies. When this is swept away they shrink from the light of day. Those who are acquainted with the "Mormons" and yet designate them as an essentially criminal community, have not the light of truth dwelling in them.

His Jubilee.—A select party of friends met on Wednesday evening at the residence of A. N. Macfarlane, who recently returned from his mission to Scotland, the object being to celebrate the fifty-third anniversary of the day on which he put on an appearance in this probation. The festive gathering was gotten up by Mrs. Macfarlane, to take him by surprise at the close of his day's labors. The party sat down to a sumptuous and well-ordered repast, and altogether spent the evening in a most enjoyable way.

Mill Creek Relief Society.—To-day Sisters E. R. Snow Smith, Zina D. H. Young, and other leading ladies of this city have been attending a special gathering of the Mill Creek Relief Society, at the Ward meeting house. The first meeting was held at 10 a. m., and after the services an excellent dinner was discussed in the vestry. The afternoon session began at two o'clock.

University.—The first semester of the academic year 1892-3, of the University of Deseret closed to-day, after an exceptionally successful term. The second semester, as heretofore announced, will open next Monday.

A Change.—Bishop Fishers of Oxford, Idaho, has resigned and Robt. H. Lewis, of Richmond, has been ordained in his stead.

Bank Officers Elected.—This morning the Board of Directors of the Deseret National Bank held a meeting for the purpose of electing officers, the following being the result: Horace S. Eldredge, President; William Jennings, Vice President; Lewis S. Hills, Cashier; James T. Little, Assistant Cashier.

Accidentally Shot.—Last evening John Bearegard was brought in from Birmingham and placed in St. Mark's Hospital. During the forepart of the day, while riding on horseback, a pistol in his hip pocket was accidentally discharged. The bullet entered the hip and ranged downward, lodging in the lower part of the thigh, inflicting a serious wound.

A Large Product.—Mr. Williams, the local agent for the Pleasant Valley Coal Company, places a new advertisement before the public, announcing his ability to fill orders for any amount of that most excellent fuel. A few days ago we mentioned the fact that the Pleasant Valley mines had been the scene of great activity for some time, the product being largely increased, but did not give a defined idea of the quantity of coal taken out. We learn that the daily output ranges between 550 and 400 tons. The transportation having been greatly enlarged, the company are enabled to put this amount upon the market.

Volume Forty-four.—We have received the December 25th, 1892, number of the Millennium Star, the closing issue of volume Forty-four. It is the oldest paper with the exception of one now published in Liverpool. We reproduce here the preface to the completed volume, so characteristic of the writer who penned it—Brother O. F. Whitney, whose poetic nature gleams through all his literary productions:

For more than two and fifty years the Millennium Star, heralding the rising of the Sun of Righteousness, has shed forth its lustre upon a benighted world. Since first appearing upon the horizon in the year 1840, while passing through a long and arduous journey, it has suffered not a single eclipse, but steadily emitting its cheering rays and moving upward towards the zenith of prophetic fulfillment, has been the bright harbinger of hope to hundreds of thousands. It now beams forth at the close of this and the beginning of another year, its unchanged, its powers and influence unimpaired; still lighting up the path, still pointing out the way, still uttering those words of promise and blessing which have been the comfort and joy of so many a sorrowing heart. Mark that! Already in the east the morning bars of light proclaim the coming of the long expected morn. The long and weary week, the shades of the Saturday night of human history are around us, and the sun of dawn upon the Millennium Sabbath is in the world. Keep your eyes fixed upon the rising of the great light, the prompting of the Spirit which dwells in us, for when that "bright morn" is withdrawn, its dimming splendor will be before us, and we shall know that the night is past, the day-dawn has broken, and the inhabitants of Zion.
