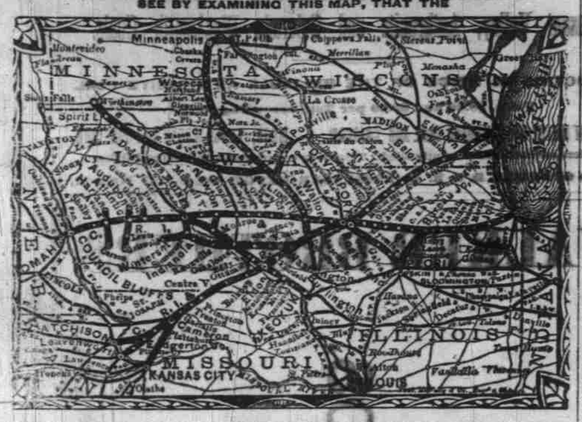
A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND AND PACIFIC R'Y

Being the Great Central Line, affords to travelers, by reason of its unrivalled geographical position, the shortest and best route between the East, Northeast and Southeast, and the West, Northwest and Southwest.

It is literally and strictly true, that its connections are all of the principal lines of road between the Atlantic and the Pacific.

By its main line and branches it reaches Chicago, Joliet, Peoria, Ottawa, La Salle, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Keokuk, Knoxville, Oskaloosa, Fairfield, Des Moines, West Liberty, Iowa City, Atlantic Avoca, Audubon, Harlan, Guthrie Center and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri, and Leavenworth and Atchison in Kansas, and the hundreds of cities, villages and towns intermediate. The

"GREAT ROCK ISLAND ROUTE,"

As it is familiarly called, offers to travelers all the advantages and comforts incident to a smooth track, safe bridges, Union Depots at all connecting points, Fast Express Trains, composed of COMMODIOUS, WELL VENTILATED, WELL HEATED, FINELY UPHOLSTERED and ELEGANT DAY COACHES; a line of the MOST MAGNIFICENT HORTON RECLINING CHAIR CARS ever built; PULLMAN'S latest designed and handsomest PALACE SLEEPING CARS, and DINING CARS, that are acknowledged by press and people to be the FINEST RUN UPON ANY ROAD IN THE COUNTRY, and in which superior meals are served to travelers at the low rate of SEVENTY-FIVE CENTS EACH.

THREE TRAINS each way between CHICAGO and the MISSOURI RIVER.

TWO TRAINS each way between CHICAGO and MINNEAPOLIS and ST. PAUL via the famous

ALBERT LEA ROUTE.

January 1882, a new line will be opened, via Seneca and Kankakee, between Newport News, Richmond, Cincinnati, Indianapolis and La Fayette, and Council Bluffs, St. Paul, Minneapolis and intermediate points.

All Through Passengers carried on Fast Express Trains.

☞ For more detailed information see Maps and Folders, which may be obtained, as well as Tickets, at all principal Ticket offices in the United States and Canada, or of

R. R. CABLE, *Vice-Pres't and General Manager.* E. ST. JOHN, *Gen'l Ticket and Pass'r Agent.*

Loss and Gain.

CHAPTER I.

"I was sick a year ago
With hideous fever."

"My doctor pronounced me cured, but I got sick again, with terrible pains in my back and sides, and I got so bad I
Could not move!
I shrunk!
From 208 lbs. to 130! I had been doctoring for my liver, but it did me no good. I did not expect to live more than three months. I began to use Hop Bitters. Directly my appetite returned, my pains left me, my entire system seemed renewed as if by magic, and after using several bottles I am not only as sound as a sovereign but weigh more than I did before. To Hop Bitters I owe my life."

Dublin, June 6, '81. R. FITZPATRICK

HOW TO GET SICK.—Expose yourself by day and night; eat too much or too little; exercise; work too hard without rest; doctor all the time; take all the vile nostrums advertised, and then you will want to know *how to get well*, which is answered in three words—Take Hop Bitters! (5)

HEALTH IS WEALTH.

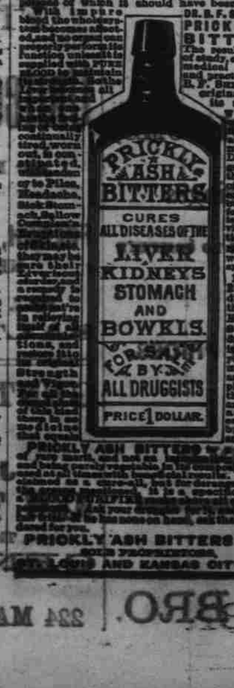
KENNEDY'S

SOLD BY DRUGGISTS, GROCERS AND WINE MERCHANTS.

THE LIVER AND ITS FUNCTIONS.

It has become a well established fact that the larger portion of diseases to which the human family is subject arise in the blood from some derangement of the Liver. This organ, if not only the largest, but as the name indicates, the most important in the system, through the agency of the blood, permeates through the organs, and every part of the human body, and unless they are necessary for digestion as well as for a cathartic to assist in this process, the Liver is liable to get out of order to a greater or less extent, and when this occurs it is impossible for it properly to fulfill its office of removing all objectionable matter from the blood, but allows it to pass through, carrying with it the poisons of which it should have been relieved.



PRICKLY ASH BITTERS CO., PROPRIETORS, ST. LOUIS AND KANSAS CITY, MO.

EVENING NEWS.

Thursday, - Jan. 17, 1884.

FROM THE FOUR WINDS.

Senator Anthony is rapidly regaining his health.

The wealth of C. P. Huntington, the railway magnate, is estimated at fully $50,000,000.

Ulysses S. Grant, Jr., has purchased a residence on Seventy-third Street, New York city, for $35,000.

John W. Garratt of Baltimore sent his check for $4,000 as a Christmas gift to the Poor association of that city.

Dom Pedro, Emperor of Brazil, who has been seriously ill, is reported to be recovering. He is able to go out driving.

Edward Willett, of the New York *Sun*, has thrown aside the shears and paste pot for good. His uncle in England has left him $150,000.

Peter Shinkle, 93 years of age, who eloped with a Cincinnati woman last winter, has deserted her. The old chap is old enough to know better.

Wilkie Collins's new story is called: "I say No." Somebody must have been trying to borrow a five-pound note from Wilkie.—*New York World.*

Three thousand tubs of imitation butter are sold and consumed in Philadelphia every day. 'Tis grease, but living grease—not to any great extent.

The one hundredth birthday of Thomas Sabin, a prosperous Belchertown, Mass., farmer, was celebrated there on Saturday by 70 of his friends.

Mr. Blaine is reported as being of the opinion that Representative Morrison, of Illinois, will be the democratic candidate for Ptesident.—*Boston Journal.*

Pope Leo XIII, daily dines, at a cost of 37 cents, on a simple soup, a little bread, a leg or wing of a chicken, six or seven grapes and one pear, with a big glass of best Marcia.

A deputation of farmers recently called on Attorney General Miller of Manitoba to explain their grievances and he turned his back on them and ordered a servant to show them out.

In the Scranton, Pa., district during the month of December, there were 26 mine accidents, of which five were fatal. During the year 1883 there were 418 accidents of which 66 were fatal.

Sir George Macpherson Grant gets $18,500 a year for the use of his hunting ground in the Scottish Highlands, which extends over 60,000 acres, and abounds in deer, grouse and other game.

Burke, of Atlanta, Ga., still buys Confederate notes. He pays half a cent each for all bills below $1,000, and for that denomination he pays 25 cents. He sells them to Northerners as curiosities.

A tower is to be erected to the memory of the late Lord Frederick Cavendish by the electors of the West Riding of Yorkshire, on an eminence known as the South Nab, near Bolton Abby.

Judge Ezra B. Taylor, who represents Garfield's old Congressional district, is a tall, slender man, with e long sandy beard, cold, grey eyes and intellectual features. He has the reputation of being a good story-teller.

One of the pretty sights on Pennsylvania Avenue in Washington is the promenade of four lovely little girls of the Russian minister, clad in their heavy furs, and accompanied by their little friend, the Japanese prince.

Von Moltke is described as old, dry and taciturn and rather "green" at the age of four-score. He is a cold, impassive man, incapable of doing good to any one, having never in the course of his long life either obliged any one or been under an obligation to anybody.

Mr. Richard Sherwood, Her Majesty's Northern Deemster, or second judge of the Isle of Man, committed suicide recently at his residence near Douglas. The unfortunate gentleman had for some time been suffering from insomnia, and had not been able to obtain any relief from medical skill.

According to the London *Morning Post*, a Troy society has just been formed in England with the title of "The Primrose League." The objects, rules, and other details connected with the operations of the society are secret, but its members will be animated by the principle and precepts of Lord Beaconsfield.

Judge O'Brien opened the Connaught Winter Assizes at Sligo and he congratulated the Grand Jury on the diminution of crime in all the counties of Connaught except Mayo. The cloud of evil was passing away in Ireland. Lovers of law and order might confidently look forward to an improved state of things.

Arthur Orton, alias Castro, the claimant of the Tichborne estates, now serving a fourteen-years' imprisonment, is about to be released, and many of his faithful followers, whose stupid faith in his cause makes a curious chapter in the history of impositions, purpose to buy a public inn and set him to earning a living.

The carriage of the ex-Lord Mayor of London was lighted by electricity whilst proceeding to and from the banquet at the Guildhall on the 9th of November. Mr. Alfred de Rothschild, who resides at Halton, his seat in Bucks, has also had his carriage lighted by electricity, in order that he may be able to read during his evening drives from Tring station.

Railroads have been the bane of villages along the Ohio. A writer in the Cleveland *Herald* says: "The river is no longer the great avenue of trade, and as the steamboats disappear before the railroad these once thriving towns fall into decay. They retain their status as towns and villages; they are marked on the maps; the old settlers remain from force of habit, but no new comers settle; they are good towns to move away from."

The expedition sent into the Florida Everglades by the New Orleans *Times-Democrat* has accomplished its work successfully. For the first time in the history of the continent this vast and mysterious swamp has been traversed from end to end. The expedition has accomplished what the United States failed to do with its soldiers during the Indian war, and what prominent civil engineers have pronounced impossible.

There are 11 ex-governors now members of the United States Senate: Henry B. Anthony, of Rhode Island, Joseph E. Brown and Alfred H. Colquit, of Georgia, Richard Coke, of Texas, Wm. Cullom, of Illinois, A. H. Garland, of Arkansas, Jas. B. Groome, of Maryland, Wade Hampton, of South Carolina, Isham G. Harris, of Tennessee, Joseph R. Hawley, of Connecticut, and Zebulon B. Vance, of North Carolina.

The Louisville exposition directors want $250,000 raised to buy the ground and building, stands on and repeat the show next year. There was $250,000 subscribed a year ago to put up the buildings with, and to drop the thing now would be to wipe this amount completely out. The public is now informed that the management was in great straits during August, when receipts were light and heavy bills came in, and that $25,000 had to be raised to avert a total collapse.

Never has there been in Scotland such an abundance of sprats as at present. The upper reaches of the Frith of Forth teem with them, whilst countless cartloads have been taken from the river Tay. Farther north, in the Beauly Firth, sprats are equally abundant. This abundance is, however of little value, as the heavy rates of freight exacted by the railways are such as to prevent the fish being sent to Manchester, London, or other large towns. They are consequently used for manure.

An editor in an Illinois town said in his paper that a rich citizen was going to give each poor family in the place a turkey at Thanksgiving. The editor meant this as a joke, wishing to sneer at the supposed parsimony of the rich citizen, and to show that he so meant it, he added that he (the editor) would give ten dollars to every family that got a turkey in the way specified. On Thanksgiving day he received from 200 families who had found him and asked him for ten dollars each. The rich citizen had sent the turkeys. The editor could not pay; indeed, one of the charity turkeys had been sent to him.

The hand of death has already been laid upon five members of the Forty-eighth Congress, as follows: Messrs. Cutts, of Iowa; Walter R. Pool, of North Carolina, and D. C. Haskell, of Kansas, republicans; and E. W. Robertson, of Louisiana, and J. H. Herndon, of Alabama, democrats. Cutts is succeeded by John G. Cook (dem.), and Pool by Thomas G. Skinner (dem.). The Louisiana and Alabama vacancies have been filled by democrats—E. T. Lewis and J. T. Jones, respectively there are now three vacancies in the House—the second district of Mississippi, the second of Kansas and the seventh of Virginia.

SCIENTIFIC AND USEFUL.

To wipe dust from papered walls take a clean soft piece of flannel. Of course, it must not be damp, but the dry flannel will remove the dust.

Precious stones that are non-transparent and are distinguished by play of color, like the opal, or peculiar effects of light, like the cat's-eye, are usually polished round or oval, like a loaf of bread or half of an egg.

The *Building News*, speaking of the results of the researches of Schliemann, says that the Greek story of Ilium accords with the discoveries at Hissarlik, and the conclusion is inevitable that the Homeric Troy could have been on no other site.

Vaseline is obtained by distilling off the lighter and more volatile portions from American petroleum, and purifying and discolorising the residue by treatment with sulphuris and potassium bi-chromate, and subsequent digestion with animal charcoal.

Professor Young, of Princeton College, says:—"Take a railroad from the earth to the sun, with a train running forty miles an hour, without stops, and it would take about two hundred and sixty-five years to make the journey." He estimates the fare, at a penny a mile, to be £372,000.

A writer of mathematical bent finds from the census returns that there are about 17,000 dentists in the United States, who, he estimates, pack into the teeth of the American people a ton of pure gold annually. Continuing his speculations, he predicts that in the 21st century all the gold now in the country will be buried in the graveyards.

It is a good plan to go through a young orchard and fasten to stakes all trees which are getting into a leaning position, which will destroy their symmetry. This is particularly necessary to trees just set, which are not firmly rooted. Wind a bit of cloth about the tree to prevent chafing the bark where it is tied to the stake.

When fowls are kept for eggs it is essential to success that every autumn the stock be replaced with pullets hatched early in the spring. By no other means can eggs be relied on. The only exception to this rule is in the case of Cochins, Brahmas or Hamburgs which will lay through winter up to their second and sometimes third year.

The Mississippi carries annually to the sea 812,500,000 pounds of mud. All the habitable land of the globe is being continually ground and washed away. The deposit of foraminiferal shells alone—not including other remains—is sufficient, as Huxley has calculated, to create a bed of limestone in the bottom of the Atlantic and Pacific oceans 800 feet thick, supposing the oceans to have existed for only 100,000 years.

The entire fishing fleet of Broughty Ferry in Scotland, was recently provided with cans of oil for use in troubled waters, and several fishermen have already reported that the oil has been of great service. Meanwhile, at Dundee, a large steamer is being fitted with a tank to contain 120 gallons of oil to be used when passing through heavy seas, lowering a life boat, or at other times when convenient or necessary.

A gentleman in Brussels claims to have contrived a perpetual clock. It was started in the latter city about one year ago, and up to a recent date is said to have been running perfectly. An up draught is obtained in a tube or shaft by exposing it to the sun. This draught turns a fan, which winds up the weight of the clock until it reaches the top, when it actuates a brake that stops the fan, but leaves it free to start again after the weight has gone down a little, and thus the power is stored for keeping the clock in motion.

Forest and Stream last week gave an illustration of a Japanese gold fish, exhibited at the late New York Aquarium. This specimen was imported by a Baltimore tea dealer, who is said to have been offered $500 for it, but refused to sell it. The species is known by the name "king-hi-o." Its body is short and of deep red with large projecting eyes; its chief peculiarity is its three tails, which are semi-transparent and present a lace-like appearance; they hang in a graceful manner and give the fish an unusually singular appearance. Some of this odd species arrived a few weeks ago in New York together with some "telescope fish" and other Japanese curiosities which were exhibited for a short time in Fulton Street market.

The influence of food upon the quality of milk has called forth, first and last, much discussion, and in this country it is conceded that food has very much to do with it. The contrary opinion, however, has some advocates who base their conclusions mostly upon the experiments made by Dr. Kuhn, at the Moeckern Agricultural Station in Saxony. It is claimed that he demonstrates that the feeding of a cow has nothing to do with the quality of milk, and the necessary consequence is that we can not increase the ratio or proportion of cream or butter in the cow's milk by any change of food, however rich it may be. This is so much at variance with the experience of dairymen on this side of the ocean that most dairy people are skeptical about these experiments.

In a communication to the *American Field* in regard to the growth of trout, Seth Green says; "The brook trout raised by hand at our hatchery grow the first year to be about four inches long, and they grow about two inches per year for the next four years, making them about twelve inches long at five years old. And they, as a rule, do not grow much in length after they are five years old. Yet they continue growing until they are twelve years old, but their growth goes into breadth of beam and depth of hold. They do not often in our water grow to weigh over two pounds, but I saw one that weighed four pounds and two ounces. She was eighteen inches long. There is a difference in the growth of trout. There are giants and Lilliputians. I have seen in our ponds giant trout one year old that weighed as much as ten of the Lilliputians. They were both of the same age. Many of the giant trout are 'cannibals,' and live on their smaller brothers and sisters when they do not get their stomachs full of their regular food.
