GEORGE Q. CANNON, EDITOR AND PUBLISHER. August 5, 1878. Monday.

A FEW days ago Presidents Brigham Young, Geo. A. Smith and D. H. Wells, accompanied by a number of leading citizens, made a trip to Logan, ing extract from the New York Star Cache Valley, by way of the Utah Central, the Central Pacific and the Utah Northern Railroads. The party left here at 5 o'clock in the morning and reached the end of the track of the Utah Northern, a short distance from Mormon and anti-Utah classes. It is day. Mr. Ben, Hampton's place, on Bear River, a little before noon. Here they were met with carriages from Logan, and before 2 p.m. were safely landed in the latter place-a distance of about fifteen miles. The major portion of the party remained at Logan through the night; but Messrs. Wm. Jennings, H. B. Clawson and T. G. Webber had business in the city which required their speedy return, and, in the evening, they went from Logan to the end of the track. At four o'clock the next morning the train started, and they reached this city at 10 a.m.

A meeting was held at Logan by those who remained. The next morning they visited the dairy and stock farm of President Young, where they examined his patent cheese factory, which turns out about one hundred pounds of cheese each day. The farm is in charge of Mr. Samuel Holt, who milks about fifty cows. The feeding of the calves reduces, he estimates, the milk from which he manufactures the cheese, to the product of about twenty-five cows. President Young has had for years an excellent strain of Devon the calves reduces, he estimates, the milk from which he manufactures the five cows, President Young has had stock. For work oxen and milking he has proved the steers and cows of this stock to be excellent, and he values them highly. He also has some very fine animals of the Durham variety. From this farm the party returned to the end of the track via Mendon. The improvements in this town, since we last visited it, are very noticeable. Rock mitigation of the evils communiprincipally built of rock, and were

principally built of rock, and were commodious and substantial. The end of track was reached some little time after the hour fixed for the departure of the train. This afforded an opportunity of testing the speed of the locomo-tive on the marrow track. John W. Young, Fix. Devident to the locomo-tive on the marrow track. John tive on the narrow track. John W. Young, Esq., President and Superintendent of the U. N. R. R., was with the party, and under his direction the train was put through. The twenty-five miles from the end of the track to the Junction was made in a few min-utes over an hour. In making this run we were impressed with the smooth-ness of the road, and the case with Gen. J. A. Battle and M. W. Wetmore, prominent citizens, died this money and much valuable time to sewhich this speed was maintained on a cure public places, they calculate to be LINUK BU ITCOLLETY MALLET TTY compound interest. This is about all no wide gauge in the country, east or west, on which there would be less cs- the morality there is in politics. That cillation or joiting than was felt on the true purposes of government; that it makes a huckster's market of places and preferments, and prostitutes states-manship out of all decency, none can narrow-gauged Utah Northern. A speed was easily reached which we thought could not be made on a narrow deny. track. The people of this Territory de not We were not prepared to see such believe in any such political morality heavy grading as we found on this route. as that, and whenever they are per-The cut across the mountain has required a great amount of labor. There are two points of this trary notwithstanding. We might assert, with perfect assurance, that in no heavy work which are not quite comaffair. State or Territory in the Union have pleted; when they are finished, the track will soon be laid to Logan and less votes been given to political thence to Franklin. When this latter pretenders than in Utab. Such characters obtain the support of certain place is reached, the traffic on the road parties, for certain purposes, to which will be greatly increased, as the freight the welfare of the community or the for the Territories of Idaho and Moncountry has not the remotest relation. tana can be sent there at a great saying of expense and time. Already the road is a great benefit to Cache Valley. It is SPECIAL TO THE DESERET NEWS.] a great improvement on the old method By Telegraph. of travelling between that county and this City when the journey can be made PER WESTERN UNION TELEGRAPH LINE in less than seven hours, and with little or no fatigue. We saw a gentleman a WESTERN DISPATCHES. day or two since who had reached here SAN FRANCISCO, 4. Cratty, who was shot on Friday night, is still living. No hope of his recovery is entertained. Jas. Langley, brother of Chas. Langfrom that county with a load of butter and cheese by ten o'clock in the morning. To do this requires, of course, early rising; but products can by this means be placed in our market when they are fresh and saleable—an advant-age to both producers and consum-ers. Valuable improvements have been made in Logan since we last visited there. A number of finestone and frame houses have been created, which are ornaments to the town. There is a dark limestone which they use for building there that, when properly pointed, makes an attractive appear-ance. When the cost of prepar-ing it is considered, we have seen no stone that we have ad-mired for building purposes more than this. The construction of the Utah Northern will have the effect to greatly ing. To do this requires, of course, Northern will have the effect to greatly enhance the value of property contigu-ous to it. Owners of city lots who have no wish to sell their places, may not care about their land being made more valuable; because its increase in value will not increase its productive-ness, nor its desirableness as a place of residence; but it may increase taxes. It is a great advantage, how-ever, for a man, who has products which he wishes to send to market to

The writer could hardly have described the character, practices, and purposes, and that the Spanish government had sent Rome, 4 — There is every indication that the Liberals will carry the election voted to the purpose of overthrowing have occasioned great destruction o the tendencies of the same, of several prominent persons of the rabid anti-

almost impossible to imagine anything more false, slanderous, abusive, vile, brutal and filthy than the atrains in more false, slanderous, abusive, vile, brutat and filthy than the strains in which such creatures sometimes indulge when they get excited against the people who settled and developed this Territory. Truth, civility, fairness, every honorable feeling and sentiment appear to be forgotten when certain bist bist back besided beside characters get their high-heeled boots pardon. on and open their mouths pertaining to anything connected with the views and policy of the people of this community. But read this extract;

POLITICAL MORALITY.

The personal eriminations and recriminations, attack, defense and retal-istions of our annual and quadrennial electors speak illy for the civiliza-tion of an age which tolerates, and less for those who indulge in such means of for the perpetuation of power, rather than for the general good. The idea of public justice, public economy, public integrity and morality is only incidentally thought of on the eve of an im-important election, when each party's stock in virtue appears to consist in showing up the vices of the other. Meantime the science of government; its practical application to the is convenient, and the citizens are using it extensively as a building material. Having no time to spare, we drove through hastily; but, as we passed, it seemed to us that the residences were principally built of rock, and were
