BUNKER HILL **MOVES FORWARD**

Report from the Northern Light Property Affects Stock.

DALY-WEST SAGS A LITTLE.

Mammoth Advances-Daisy and Bow ers Extension are Stronger Today-Hercules Lower.

·····

TODAY'S METALS:

SILVER 59 LEAD, \$4.40 CASTING COPPER 15%

Today's call on the exchange was marked by a strengthening up of several of the lower priced stocks, among which was Bunker Hill, which participated quite heavily up to 4%.

Northern Light was stronger today, probably on account of the news that some high grade ore is now being obtained at the property.

Bowers Extension advanced to 64 and Mammoth made transfers up to \$2.32. Daisy was in demand up to 12 cents. Grand Central sold at \$5.57 and Daly-West receded to \$11.971/2. Ajax sold at \$1.00, while Sunbeam changed hands at 66% and Valeo at 74.

Boston, Nov. 22.-The American Wool and Cotton Reporter will say tomor-row: "The wool market continues ac-Prices are steadily advancing toward a higher level, and as quotations rise the more intense seems to be the eagerness of many to buy. A tremendous business has been transacted, the sales of the week aggregating over 13,-000,000 pounds, which has been pretty well distributed among consumers, speculators and members of the trade, many of whom are compelled to buy in the open market in order to attend to the needs of their customers. "The markets abroad continue to dis-

play a hardening tendency and late advices state that in Melbourne some of the very best stock has been disposed of at prices which mean \$1 per pound. clean, landed in Boston. The active de-mand for wool has depleted stocks so that it is estimated that we will report a shortage of from 75,000,000 to 100,000,-000 pounds by next May, in which case it is quite probable importations will

'During the past week carpet wools have apparently begun to share in the activity noted in other grades. Car-pets have opened at advanced prices and large purchases have been made. "The sales of the week in Boston amounted to 12,973,000 pounds domestic,

and 770,000 pounds foreign, making a total of 13,743,000, against a total of 16,317,776 for the previous week, and a total of 3,879,000 for the corresponding week last year.
"Sales since January 1, 1839, amount to 314,067,576 pounds, against 118,610,010 pounds last year at this time." IS IN TROUBLE.

A Crowd of Miners Demand Their

Wages Today.

THE MILL IS CLOSED DOWN

Cave Encountered in the R. G. W. Group-Work to be Started on Sharp Group-Good Ore in the Ely Mine.

The New Mammoth mine of Bingham is just now experiencing the truth of the old saying that "woes love a train," and "tread each other's heels." For some time past its difficulties have been growing thick and fast. A recent endeavor to sell the mine was evidently frustrated by the alleged salting of the test samples. Then it transpired that the mill capacity was altogether inadequate to work the ores to advantage. Added to this has been the increased expense in getting the ore to the mill by way of the shaft. It is true a big tunnel has been run into the hill to intercept the shaft. This will provide a more economical way of getting the ore to the mill, but in the midst of its difficulties the company has still about 60 feet of this tunnel to complete before the shaft is reached. In view of its being so handlcapped the best thing to do. it was thought, was to close down the mill. The edict was issued, and resulted in the miners coming to town er masse to assert their rights. They beselged the offices of the company yes-terday demanding the pay which was due them on the 20th inst. Little was done yesterday in the way of granting the men their desires and another con-ference between the men and the management was booked for this afternoon at which it was stated something would "pop." Either the demands of the men will be satisfied, as seems likely, or liens will be entered against the com-

The settling of the difficulty with the men still leaves the management in a very unenviable position. This will be realized when it is understood that an indebtedness of nearly \$24,000 hangs over the mine. If the ore could be profitably worked with present appliances the outlook would be brighter, but with this indebtedness, and a further mill enlargement seemingly necessity, its prespects look a tr gloomy. However, the New Maramoth is considered a meritorious proposition, and there is no doubt that the struggles of its infancy will not prevent its grow-

ing to maturity. WANT UTAH GILSONITE.

R. G. W. Rallway will Reach Deposits Near Sunnyside.

The branch road of the Rio Grande Western, says a special to the Denver-News, has now reached the new coal camp of Sunnyside. It will not stop there, but will be extended on up into the mountains, seven miles beyond the original proposed destination, where some rich deposits of glisonite, elaterite and wurtzelite are to be opened up, and if present plans go through there will be extensive works for the treatment of the hydro-carboneous ores established there. The grade of the road reached Sunnyside the first of the week, the iron was iald and now the contract has been let for the extension to the mineral beds which have been heretoore owned by outside parties, but recently were acquired by those interested in the coal properties which the raff-

road was built to develop.

In addition to the seven or eight "mineral wax" claims alread; located, and which have been proven of good and which have been proven of good value, parties interested in the coal, propositions have taken up some seven hundred acres of additional ground and they will develop these on a big scale. Among the mes interested and who have run out Joe Leiter in the deal are Royal C. Peabody, treasurer of the Rio Grande Western railway, and also treasurer of the Pieasant Valley Coal company; Superintendent Sharp of the latter company, and several Sait Lake latter company, and several Salt Lake and Denver capitalists, among them parties closely identified with the flurlington rallway. Their plans include the establishment of reduction works from which many of the mineral dyes used in the manufacture of calicoes. wall paper and similar manufactures are obtained. Such industries are in peration in Scotland and these will be

fashioned along the same lines.
All of the gilsonite now taken out in this section of Utah is shipped out of the country for refinement, but this will not be the case above Sunnyside station, for here will be built, if the plans do not miscarry, a separate came, and everything that can be done on ground will be carried on here. road will be completed inside of the next sixt; days and when this is done, so that materials can be gotten in cheaply, then operations will commence on the big scale that is mapped out.

STAR CON. MEETING.

Important Matters to be Considered This Afternoon

A meeting of the directors of the Star Con. Mining company was scheduled for this afternoon, Although nothing could be learned of the matters likely to engage the attention of the directors, it was stated that a number of important things would come up for consideration. It appears that the return of Hon. David Keith from the East was waited, and that gentleman's return last evening resulted in meeting being called for this afterne The sinking of the winze on the 600. foot level is still in progress.

SHARP MINING COMPANY. Work to be Commenced on the Old Producer at Once.

The directors of the Sharp Mining mpany met a few days ago and authorized the secretary to employ a surveyor to make the preliminary survey of the company's four claims adjoining the Honorine mine in Rush Valley. L. T. Brockbank of Stockton was in structed to commence work on the property at once. These claims have shipped ore years ago, and that it is likely to produce some very good ship-ping ore again is amply testified to by recent assays which show as high as 65 per cent lead and 19 ounces in silver with a trace of gold.

GOOD ORE IN THE ELY MINE. Ore Uncovered in the Shaft which Runs

Up to Sixty Dollars a Ton-

News has just been received of the uncovering of some ore in the Ely Mining company's shaft which runs between \$50 and \$60 in gold per ton. A small shipment of cyanides was sent in

shut down until spring, at which time its capacity will be enlarged to 60 tons a day. The work of straightening the shaft has been completed, and it is the intention to push work on the drifts from the 140-foot level during the win-

The annual meeting of the company The annual meeting of the company has just been held at which the following officers were elected for the ensuing years: As president, William M. Bradley; vice president, O. J. Salisbury; treasurer, W. P. Lynn, and as secretary, William B. Sprague. The above named gentlemen with E. D. R. Thomson and J. B. Thomson constitute the board of directors. the board of directors.

Assays from Hen Butler.

The reported shipment from the Ben of the company, is reduced to a small sack of samples which some one carried to town. The samples were obtained from the lower tunnel at a distance of 475 feet from its entrance and under the furnace test show 17.9 per cent lead, 6 ounces silver, 60 cents gold and 2.8 copper. The main vein, it is believed, has not been reached, but the assays given seems to show that a better grade of ore will be obtained in the lower tunnel than is secured in the upper one. the upper one.

The Placer to be Equipped.

Major Fred R. Reed states that he will equip the great Pine Grove placer property as soon as the work can be done to advantage. Ditches and flumes will be put in and the piping necessary to operate the mine on a arge scale. The tests made during the past season proved entirely satisfac-tory, and during his trip east it was ar-

inged to start the enterprise. The major says he found the mining the halor says a form the saturation in the east very satisfactory. There is money to invest in good property and Idaho will get its share. This State stands far better in the eyes of mining investors than ever before.

The manly action of Governor Stouenenberg," said Major Reed, "in the matter of suppressing lawlessness in the Coeur d'Alenes has done more to re-establish confidence in Idaho than one can well imagine,"—Boise Statesman.

Cave in R. G. W. Groupe.

Word reached town today that a big cave had been encountered in the workings of the R. G. W. group in Tintic. No particulars could be given further than that it appeared that the most intense heat must have prevailed in its formation and this fact is con-sidered presumptive evidence of the presence of minerals. R. G. Wilson will leave for the mine on Saturday.

A New Incorporation. A New Incorporation.

Articles of incorporation of the Park City and Midnight Sun Mining company were to be filed yesterday in Coalville. The capital stock is piaced at \$35,000 and is divided into 350,000 shares of the par value of 10 cents each. The officers are Julius Krankel, president; H. R. Lindwall, vice president; W. P. Mortensen, secretary and treasurer. These, with John L. Lindstrom and Morris Sommer, comprise the board of directors. The company owns the Evening Star, Lucky Boy, Merrimac, Monitor, Iron Horse, Buckeye, North Star and Minnesota claims, located in Iron canyon, Uintah mining district.

The property described was located

The property described was located in 1888 by H. R. Lindwall, who has since done considerable development work on the claims. company proposes to engage, if advisable, in mining, milling, electric lighting, water supply and smelting business with offices at Park City.

Charm Mining Company.

The Charm Mining and Milling Company, with a empitalization of \$250.00 and shares at \$1., incorporated The company's property consists of five claims situated in the Detroit mining district, Millard County, Clarence K, McCornick is president; M. S. Browning, vice president; W. S. Crismon, secretary and treasurer, John F. Cowan and George Bushy directors. and George Busby directors.

Work on the Du Quesne Mine. Marshall Todd, manager of the Du Quesne Mining and Milling compartived in the Vale from Salt yesterday. It is his intention to put a force of men to work on the property right away, and vigorous develop-ment work will be prosecuted throughout the winter. The main tunnel on the property is now in about 400 feet. and it is said that there is already a very fine showing of ore in the face of the tunnel. This property joins the Dalton mine on the north and west and the ore bears strong resemblance to the Dalton's high grade gold ore .-Piuto Pioneer.

MINING NOTES.

The Conklin sampler reported 11 cars from lintle today. Ten cars of ore were on the market today from the Bullion-Beck.

The Sunbeam reported with a car of The Taylor-Brupton sampler reported 3 cars from Tintic and 3 from Frisco.

The Showers Con, had a car of ore on the market today, Two cars of ore were marketed today

from the Ida May mine of Tintle. Three care of ore were at the sampler today from the Horn Silver,

David Keith has returned from the A shipment from the Red Wing is
