

MINERAL SURVEYS ORDERED

And is Near Roosevelt-General Western Mining News.

6

The interest of the mining world is now centered at Portland, Or., where the seventh annual session of the Amerthe seventh annual session of the Amer-ican mining congress will convene on the 22nd of August. This meeting of the congress is of double interest, as the permanent home of the organiza-tion is there to be selected. To secure this honor, several large cities are wag-ing a vigorous campaign and the vic-tory will not be won without a hard struggle. Salt Lake has three formid-able rivals in Omaha. El Paso and Den-ver. Of the three, Denver seems to be able rivals in Omaha. El Paso and Den-ver. Of the three, Denver seems to be the most dangerous, but a feeling of confidence is pevalent among Sait 'Lakers and considerable outside sup-port is assured. Even from Denver come words of good cheer. Several prominent men from that city, who have recently visited Sait Lake and dis-cussed the matter, agree that this is cussed the matter, agree that this is the more suitable location. Several gen-tlemen from Portland have written that if their support will accomplish it, we will certainly win.

The Utah delegation leaves tonight in a private care for the scene of the struggle. John Dern is at the head, acstruggle. John Dern is at the head, ac-companied by a goodly number of prominent mining and business men. Prof. W. H. Tibbals, secretary of the Commercial club committee, left for Portland Thursday night to look over the ground and announce the coming of the delegation. This committee has been actively working for some time and has made a remarkable showing. Membership applications have been sent out by the hundreds by the secre-tary, and most encouraging returns retary, and most encouraging returns re-ceived daily. Each member is entitled ceived daily. Each member is entitled to a vote in selecting the permanent headquarters of the congress, and in this way Salt Lake expects to win out. It is almost assured that Utah will be represented by at least 500 members, which should win in itself. Another strong argument in favor of Salt Lake is its admirable location. It is in the center of the western mining world and can offer inducements such as no other city affords, San Francisco and Port-land are too far west, while Denver city affords. San Francisco and Port-land are too far west, while Denver and Omaha are too far east, and El Paso is way to the south. If the loca-tion would not win for Utah, there are other strong arguments in its favor. It is probably the only important mining state where the labor organizations have not seriously interfered with its business and hindered its progress. No successful strikes have ever occurred in Utah.

lars to construct.

ployed.

And Ogden People are Interested-Today's Exchange.

After all the advertising the oil industry of Salt Lake valley has received. it begins to look as if those operating on the Promontory will yet win out in the race in the production of both oil and its by-products. The Utah Oil & Liquid asphalt company, with a large body of choice hydrocarbon lands on the Promontory, west of Ogden and Brigham City, from which oll and liquid asphalt have been flowing for many years, began prospecting these deposits several months ago by digging wells in the seeps, with the result that the flow has been greatly increased. The product, as it comes from Mother Earth, consists of 54 per cent asphaltum, and 43 per cent illuminating and lubricating oils of the finest qual-ity, and is therefore a heavy product; too heavy, in fact, to flow freely, hence the operators conceived the plan of placing a steam boiler at the bottom of one of the wells, at a depth of 120 feet, connecting the same with a similar boiler on the surface. In the boiler on the surface steam was generated, which was carried to the boiler, in the bottom of the well, which warmed and liquified he asphaltum-oil so as greatly to in-rease the flow. The experiment, though

not perfect, produced between 400 and 500 gallons a day, and proved that the scheme would be all that was expected, when perfected. From 500 to 800 gallons from a single

well proves to the management of the company what can be done by placing boilers in the other three wells, now unused, and with a possible production of from 2,000 to 3,000 gallons from the wells already sunk, the company is so encouraged that it will doubtless in-crease the number of its wels, making the oil industry a reality in northern Utah.

With the idea of still further promot-ing this enterprise, Mr. Jesse J. Driver of Ogden will run an excursion tomor-row to the Promontory oil fields, con-sisting of about 30 Salt Lake and Og-den people who are interested in the company, that they may see for them-selves the success of the new plan of oil production. That the company has the asphalt-oil in abundance and of su-perior quality, there is no doubt, and that it can be produced in the manner mentioned will be shown to the enthu-siastic excursionists when they arrive With the idea of still further promotsiastic excursionists when they arrive at the wells

From this time on it is the intention

DESERET EVENING NEWS: SATURDAY, AUGUST 20, 1904.

Sydney Evans of Salt Lake have been in Boise, Idaho, this week. Nels Youngberg, well known in Utah mining circles, is now with the Butter-field Mining company at Bingham. The Richfield Electric Light & Power company has finished its plant, and Richfield is now electrically lighted. R. W. Rodger, superintendent of the Dalton and Lark, who has been in Salt Lake, returned to the mine last night. Taylor Brunton ore receipts for to-day are one car from Idaho, one car from Nevada and one car from Tintic.

A new lot of Mammoth ore was on market today, showing values of ounces in gold and 4% ounces in

The West Quincy Mining company Park City (formerly the J. I. C.) making arrangements to resume operations.

J. C. Stilwell, Alta's postmaster and bloneer mining operator, who has been disiting in Sait Lake, returned home this morning.

J. P. McCarty, the well known oll magnate from Pittsburg, Pa., reached Salt Lake last night to confer with local talent concerning the oll outlook in Vice in Utah.

It is reported that the Guffey-Galey well, in the oil fields near Farmington, has attained a depth of 1,925 feet, with the drill still pounding away in sandstone formation

Frank Lee and his associates of Col-on have made a mineral location in of hair to shampoo their heads with my Witch Hazei sonp. It will posi-tively cure the worst cases of dandruff Spanish Fork canyon. The claim is called the August, and is believed to be valuable for its petroleum product.

and all scalp diseases. It gives new life and vigor to the scalp and has a ten-dency to produce a glossy and beauti-ful growth of hair. For the complex-ion it is the best scap made. 'The "News" is advised that the new England Mining company, operating at Bingham, is meeting with gratifying success in the operation of its new mill, mine is said to be looking well the company is taking out some The and first class ore.

A gentleman who visited the Guffey-Galey well yesterday, states that the heavy machinery at the derrick has been raised from 18 to 20 feet; that stop-cocks have been placed conven-icntly at hand, and that the driller informed him that he expected to "bring in" an oil well within the next few

days.

Suit has been filed in the district court by Attorney L. B. Rogers against the Highland Boy Consolidated Mining company to recover the sum of \$1000 the Highland Boy Consolidated Mining company to recover the sum of \$1,800 alleged to be due for legal services rendered for defendant. Of the above amount \$1,050 is alleged to be due for services rendered by plaintiff and \$750 is due for services rendered by Judge Ogden Hiles, who assigned his account to plaintiff. o plaintiff The West Mining company, of this

ce a producer, but now involved in igation. Two or three miles northlitigation. Two or three miles north-west is the Edgemont mill where a large force of men is constantly emcity, operating big iron properties near Palisade, Nev., is now shipping about 130 tons of iron ore daily to the Ameri-At old Columbia, the scene of the mining career of Ed Stokes, the slaycan smelter in Salt Lake valley, where it is used for fluxing purposes. Ralph Watson, of Salt Lake, is superintendent for the company. C. W. Watson, who is heavily interested in this enterprise, is at the mine with his family, but will return home about the first of pert er of Col. Jim. Fisk, who "was kind to the poor," according to the song so the pool, according to the song so popular twenty years ago, there is lit-tle doing, but Park City and Ogden operators are bonding likely-looking properties there and the next 60 days will probably see some sales made. It is reported that the owners of the Bull Run mill, an English company, are about to make some charges in return home about the first of next month

The American Asphalt association making a greater output now than at any time since beginning work on its Norville claim and 34 four and six horse teams are hauling the product to Fruita, over the Utah line in Colorado For moving this product to Fruita the freighters receive \$14 a ton, and more teams are constantly being employed. The general manager of the company will doubtless visit this proof the perty within the next week or 10 days coming from St. Louis for this purpose.

Hon E I Raddatz of Stockto superintendent of the Honerine mine and mill, arrived in the city last night. Mr. Raddatz informs the "News" that good progress is being made in operation at both mine and mill. In the way of mine development the shaft, in the old workings, is being sunk from the 800 to the 1,000-foot level, making in-termediate works between the old workings of the mine and the long drain tunnel. In the drain tunnel the water is two feet, five inches deep at its face, and the flow is 8,000 gallons a minute. The mill is treating from 250 to 300 tons of ore daily. On Thursday of this week a remarkable run was made, and the plant turned out 90 tons of concentrates, which is a record-

New York, Aug. 20 .- The opening level of prices in the stock market today was lower than last night, declines in the general list ranging from 1% to %, the latter in St. Paul. Ontario & Western fell a point. The Smelting stocks, Sugar, Atchison and Eric showed some resistance to the decline.

SOME ENCOURACING SIGNS. The market was irregular after the opening. The leading Grangers declined 1/2 to 3/4. United States Steel pfd, met study support, and the opening price was the lowest at 381/2. A six

price was the lowest at 38½. A six price was the lowest at 38½. A 6,000 share block changed hands. Penn-sylvania also was held above last night. Brooklyn Transit. In Some Manufacturing Lines There Is Much Less Idle Machinery. New York, Aug. 19 .- R. G. Dun's

Lack of Harmony Between Labor

And Capital Also Had

Bad Effect.

weekly Review of Trade tomorrow will Trade has been somewhat unsettled

by sensational events in the wheat market and the lack of harmony between labor and capital. It is becoming evident that estimates of the wheat crop must be reduced, although other agricultural news is much better. In so far as the purchasing power of the farmer is concerned prices have risen so sharply that any loss in quantity promises to be made up. Some disappointment is felt by those who counted on an early resumption in building operations, and other industries which have occurred by labor controversies. Otherwise news of the week has contained much of an encouraging nature. In several manufacturing lines there is less idle machin and visiting retail buyers have stimulated jobbing trade, especially in dry goods and kindred lines. Railway earnings thus far reported for the first week of August show a small gain of 1.4 per cent as compared with last

year's figures, whereas recent preceding weeks showed more or less loss in comparison with 1903. Fallings for the week numbered 226 in the United States, against 238 last year, and 24 in Canada, compared with

eight a year ago.

London Wheat Market.

May \$1.18.

London, Aug. 20.—The wheat market continues to be little affected by the ex-itement in America. The price of Ameri-lay, and remains substantially below the puotations in America. The Indian var-ety has gone up slightly. Russian wheat has not been affected.

MINNEAPOLIS WHEAT. Minneapolis, Aug. 20.-Wheat was greatly excited today over reports of rain and hall in the northwest. Sep-tember touched \$1.23 shortly after the

ppening; December reached \$1.17, and

NEW YORK WHEAT.

Utab. While the mining men have been in-dustriously working, the city itself has not been idle. The "Mormon" Church has tendered the use of the Assembly Hall as temporary quarters, and the city council has under advisement the donating of a building site opposite the Federal building. Sait Lake is making a determined effort and is offering the best inducements to be desired. The delegation is composed of some of Utab's ablest men and with Judge Pow-ers to present our case, we should come ers to present our case, we should come out with colors flying.

BUSINESS ON THE EXCHANGE.

Week Closes With a Sluggish Market And With But Little Doing.

Business on the exchange was very light today, and the market was gen-erally sluggish. Prices ruled about the same as yesterday, but the sales were lighter. Daly-West picked up considerably, selling as high as \$12.85. Tetro was weaker, at 30 cents, and Goldfield Bonanza was active at five cents. Very little business was transacted on the open board, which helped materially to decrease the sales. The week start-ed out very lively, but ended in a gen-Following are the quota. eral slump. tions and sales:

BINGHAM MINING NOTES.

Items of Interest Concerning the Mines Taken from the Bulletin.

A carload of Butler-Liberal first-class went out Tuesday.

The Old Galena wagon road, which was in fine condition, sustained considerable damage during the late storm. Tom Mayne hauled a new set of rolls Tom Mayne hauled a new set of rolls to the New England concentrator on Tuesday. Manager Adkinson will ul-timately double the mill's capacity. In the Red Wing Extension shaft a

large body of milling ore and the best in quality yet encountered in the com-pany's property has just been cut Barring unlooked-for delays, the

practically new Queen mill will be ready for a trial run by Monday. No doubt is entertained that it will be entirely successful.

Last Sunday and Monday the ore shipments on the Bingham branch amounted to over 4,500 tons-lading 91 'battleships" carrying an average of 0 tons each.

Since Johnny Stephens began work Since Johnny Stephens began work in the lower tunnel of the Julia S. the vein matter has rapidly softened and changed to white lime, with indica-tions of ore coming in. Shipments from the Bingham & New Haven, suspended last Friday on ac-count of damage to its wagon road by the late storm have here resumed and the late storm, have been resumed and Manager Malloy says he can keep five ams busy from now on. Manager A. L. Jacobs of the Butler-

Liberal, accompanied by Mr. Atter-bach, a student of the Colorado school of mines, and Mr. Topliff, agent for the Rand Drill company, was sizing up new developments at the mine Mon-

The Dewey mill was this week hooked up by telephone and will soon re-ceive new machinery. Prof. A. F. Holden permitting, it will ultimately be kept busy on Kepton second-class, of which the mine has an immense tonnage ready for stoping.

Myron Davis has bonded to the Bing-ham & New Haven company his dozen or more claims embracing the south-erly portion of the Davis-Gebhardt group, at a round figure. They consti-tute what is believed to be a very val-uable addition to the Bingham & New Haven holdings, and will now be con-siderably developed.

The winze from the Cunningham tun-nel of the Ohio having been sunk 300 feet, a station for a new level is being out. Ore is full width of shaft, largely black oxide and of as good grade as iny passed through. No mine in Binghum holds out more promise than he Ohio, for the amount of development work that has been done.

Tintic Ore Shipments.

Eureka, Aug. 19 .- The ore shipments from Tintic Mining district for the week ending Aug. 19, amounted to 96 arloads, distributed among the folwing properties: Bullion-Beck Carisa Mammoth Irand Central Victor Eagle & Blue Bell Uncle Sam Consolidated Godiva Yankee Consolidated Yankee Consolidated Total

Three cars of concentrates were ship-ped from the Uncle Sam mill.

ling of its product, which will most likely be by reducing it by the oil-still refinery method and, to that end, Dr. Salathe, the oil chemist and expert, its product, which will most balance, the oil chemist and expert, who came from Switzerland, and who brought success out of failure for the Pennsylvania Oil & Gas company, at its refinery at Casper, Wyo., may be secured to solve the problem of re-ducing and refining the product.

GOLD MOUNTAIN HAUNTS. Bank of England Mining Company Moves

Its Offices to Provo.

The Reaper, of Richfield, in commenting on the mining industry of Gold Mountain district, says: Homer McCarty of Monroe attend-ed the directors' meeting of the Bank of England Mining company at Salt Lake last week, returning home Sat-urday. He reports that they changed the place of business from Salt Lake to Provo, and they decided to put a force of men at work on the property and do some extensive development work in the near future.

Capt. H. C. Lawrence, Seymour W. Tulloch and son Thos. H. Tulloch went up to the Sevier mine last Sunday to look over the property. They say everything is progressing very nicely, and the mine is looking better than it ever has before. Thos, H. Tulloch remained at the mine and will spend the rest of the summer there, before returning to his mining school

in Michigan. P. W. Madsen and son Vi Madsen of P. W. Madsen and son Vi Madsen of West Salt Lake, Julius Sultan, of West Jordan, J. B. Scott of San Francisco, Louis Blattler and Res Phillips of Scofield were on the train Saturday bound for the Trapper's Pride mine on Gold Mountain, to look over the situation and examine the mine with the intention of putting a larger force of men to work, and probably erect a mill on the ground, to treat the ores in the near future. Mr. Blattler and Mr.

OLD COLUMBIA DISTRICT.

Scofield stockholders.

Nevada Camp in Which Salt Lake and Ogden People Are Interested.

Utah people are getting good reports from their investments in northern Elko county, Nevada. Not all the bonanza chasers seek Tonopah and Goldfields.

Already a goodly number of Salt Lake investors are interested in Tuscarora and Mountain City, and there a promise of great activity in all the mineral belt which extends across the country between the two famous old

camps. V. P. Strange recently visited Moun-tain City, where he looked over some property for home people and on his return, via Tuscarora and Elke, paid a visit to the old camp at Columbia in the Centennial district, which, in the old silver days, divided honors with Mountain City as a producer of the white metal white metal,

He found a number of prospectors in the district and several properties of merit where work was being done. Among those especially attracting his attention was the Aura King, a proper-ty which, in the old days, was operated as a silver producer, but which has lately revealed a fine ledge of pure

Most families have one too.

Ben Francis and his son Roy arrived last evening from Roosevelt, making the journey in four days, says the Statesman, of Boise, Idaho. M. Francis, who is proprietor of the Roosevelt Mercantile company's store in Roosevelt, reports that the camp was never in more promising condition. The big mining properties are developing splendidly and the outlook is very bright.

The state wagon road is now with-in 15 milies of Roosevelt, and, Mr. Francis said, will be completed in 39 days. The construction work from now on will not be very difficult. Mr. Francis said the road had been splen-didly built and was a fine theory. didly built and was a fine thorough-

The machinery for the Sunnyside mine is being moved along with the wagon road and will reach the mine directly the road is completed. The Sunnyside people are building a wa-gon road from their property to Roosevelt. Their first intention was to build over a route which did not touch at the camp but the Roosevelt citizens quickly subscribed a bonus of \$1,000

which they gave the company in order to secure the road for the camp. Mr. Francis reports that a splendid strike has been made in the "H. Y." mine. A vein of excellent ore was struck a few days ago and assays running as high as \$160 to the ton have been obtained.

The machinery for the saw mill which C. J. Perkins is to build at the "H. Y." is now at Trapper Flat and will be taken in as soon as possible. The mill will have a large capacity and will be right up to date. The saw mill on the South Dewey

has resumed operations after a shut-down rendered necessary by the en-largement of the plant. The power ditch was enlarged and will now fur-nish an abundance of energy. Thus far, said Mr. Francis, it has been impossible to get vegetables in

Roosevelt but a supply was expected from the Lemhi county side. Large quantities of supplies are being taken into the camp and the demnad for them is active.

Mr. Farneis stated that men who wanted work had no difficult in find-ing something to do. The South Dewey is giving employment to 30 men and the Sunnyside has 40 names on the payroll. Other properties have a large number of hands.

Mr. Farnels is conducting a large general merchandise business and is well stocked with goods. He intends to take in liberal supplies when the wag-on road is finished and declares there ill be no shortage hereafter.

Mails are coming into Roosevelt with onsistent regularity and the citizens there are noly about a week behind on news,

unnel, above Maryavale, has been inreased.

86 and 88 cents in order to keep going. There is much speculation as to why all this is so, and explanations as a P. J. Donohue, the mining expert, has returned from a visit to Nevada all this is so, and explanations as a general rule do not appear to be very satisfactory. But Utah growers are able to hold for high prices as there is always a demand for Utah wheat to mix with Colorado wheat, as the com-bination gives a very superior article of baking flour. Utah wheat is selling on the Pacific coast at \$1.62 and \$1.65 as against \$1 for the California grown article. and California, W. C. Alexander, for himself and associates, has purchased the Don Pe-dro mine at Stockton.

P. L. Williams, Jr., superintendent of the Highland Boy at Bingham, is taking in the world's fair.
