THE EVENING NEWS.

Monday, - - August 17 1874.

Iron Ores in Utah.

Large deposits of iron ore are known to exist in various portions of Utah, and in some instances rival the celebrated silver mines of that territory in their importance and extent. The ores found are principally hematite and magnetic in character, and frequently are found to assay from fifty to sixty per cent. metallic iron.

The most prominent and extensive iron deposits that have been as yet discovered in Utah Territory are in Iron County, in the vicinity of Iron City, and Iron Springs, about 240 miles from Salt Lake City, in a south-westerly direction. These deposits are situated on the Iron Mountains, and are seen in the form of immense ledges, standing nearly vertical, along the lines of which solid ore is exposed in distances varying from 500 to 1,500 feet in length.

Iron ores of a fine quality of hematite have been discovered in Stockton, or Rush Valley mining district, situated in Tooele Valley, about fifty miles distant from Salt Lake City. This district, which contains a great many valuable mines producing argentiferous galena, is also destined to be successful in one branch of iron mining, and cannot fail to prove the best smelting locality in Utah, for several reasons. The iron ores are superior to the Wyoming hematite, which is imported at a cost of from $16 to $20 per ton in Salt Lake City, and can be delivered at the smelting works for less than $14 per ton. These ores exist in sufficient quantities to supply all the surrounding districts at a far less cost than the imported material.

Iron has been discovered in large quantities in the Castle Valley region, about 150 miles distant from Salt Lake City, in a southeasterly direction. The term Castle Valley Region is common to a certain portion of the Green River Basin, and comprises a large tract of country lying south of the Roan, or Little Mountains, a spur of the Wasatch Range, and is situated in Sanpete and Sevier counties. This section of the country is very little known, as it has been until lately an almost unexplored region.

Iron has been discovered in the Adams Mining District, situated in City Creek canon, in Salt Lake county, about ten miles northeast of Salt Lake City. The Adams was formerly embraced in the Hot Springs District, of which very little notice was taken until the discovery of very fine ore, in the spring of 1873, created quite an excitement, when the present district was organized. Argentiferous galena and some milling rock, carrying a per cent. of gold, were the discoveries that created the first sensation, but from all indications it can be rendered a very successful iron mining district. During last season a shipment of several tons of fine iron ores, were made from this district to Salt Lake for flux.

Iron has also been found in the Columbia mining district—a district that is almost unknown on account of its remote situation, being distant from the line of the Utah Southern railroad nearly forty miles. Several mines have been opened which contain almost inexhaustible quantities of fine hematite ores.

Iron exists in considerable quantities in Antelope mining district, situated on Church Island, in Great Salt Lake, about eighteen miles distant from Salt Lake.

In Box Elder district, opposite the city of Corinne, only two miles distant from the line of the Utah Northern railroad, an immense body of iron has been found in the Idaho mine, and it has also been discovered in more or less quantities in a large number of other mines.

Oxides of iron exist in Tooele Mining district, situated east of Tooele Valley, about forty miles from Salt Lake City. Iron has been discovered in large quantities in Ogden canyon, only six miles from Ogden City, the junction of the Union Pacific and Central Pacific railroads. There is no more favorable locality in Utah for the successful manufacture of iron than in Ogden City, and the Union Pacific railroad has decided, we believe, to locate its rolling mills here.

Blow Out Mountain is situated two miles north-east of Iron City, in Iron County. This mountain is 1,650 feet east and west, and 1,250 feet north and south, and 400 feet high, and is composed of solid iron ores. The western half is hematite, the eastern half magnetic, and the ores are of the best and purest quality. The formation on the eastern base is limestone, and on the north granite, indicating a true fissure vein. This is beyond question a remarkable and extensive iron deposit. The very best of fire clay exists in the vicinity, which has been tested and proved to be A No. 1, which can be used for constructing furnaces. Immediately south of Blow Out Mountain, about two miles distant, there exists a large coal bed, which contains a well defined vein of seven feet in width. Within the spaces of five miles are found six different classes of iron ores, fire rock, fire clay, lime, first class sand for mouldings and coal for fuel, which constitutes all the requisites for the cheap and successful manufacture of iron.

Important discoveries of iron have also been made in Mineral Point Mining district, which is situated in Cache county, in the northern part of the Territory, about seventy-five miles distant from Salt Lake.

Iron has been discovered in large quantities in Skull Valley, situated in Tooele county, east of Tooele and Rush Valleys, and lying between the Oquirrh and Cedar ranges of mountains, about fifty miles distant from Salt Lake City. Black Mountain, situated about two miles east of Hooper's Ranch, contains large deposits of mineral, apparently of a superior quality. In all probability, future developments will prove this locality to be one of the principal iron producing districts in that portion of the Territory.

From all the knowledge we have before us, Utah seems destined to rank among the important iron producing districts of the Union, and only awaits sufficient means of transportation.—*St. Louis Railway Register.*

THE TRIBUNAL AT VIENNA.

BEFORE WHICH THE CABINET ORGANS OF THE MOST CELEBRATED EUROPEAN and AMERICAN makers were tried, was composed of the most learned judges that ever sat in judgment upon Musical Instruments.

The Verdict of the Jury was that the

Mason & Hamlin Organs

WERE THE BEST!

AND

THE HIGHEST PRIZE AWARDED THEM.

MASON & HAMLIN ORGANS also took the FIRST PRIZE at the PARIS EXPOSITION in 1867, and in America wherever exhibited. Send to us for *fac-simile* of Medals, and other numerous proofs, that these Organs are unequalled in America or Europe.

We have just received another shipment of the **Grand New Styles**, patented Jan., 1874, with their MAGNIFICENT CASES of SOLID WALNUT—no *papier-mache* nor *saw-dust* ornamentations to be found in them. We will sell on Monthly Instalments, running from **One to Four years, for $5.50** Monthly Payments.

Comparative prices with those of leading makers, offered for sale here:

	M. & H. Price.	Others. Price.
Style P.—Five Octave Double-Reed Organ, in plain case, unequalled in power, musical excellence and durability, by any double-reed organs made outside the Mason & Hamlin Factories,	$110.	165.
Style E.—Five Octave Double-Reed Organ, in Upright, Resonant Case, Five Stops, with Tremulant, Knee-Swell, etc, Case of beautiful design, graceful proportions, highly finished, and much more beautiful than it would be if covered with sawdust and glue mouldings,	$125.	175.
Style T.—The same, with Vox Humana and Automatic Swell,	$130.	185.
Style S.—Five Octave Organ, Three Sets of Reeds, in Upright Resonant Case, having Octave Coupler and Manual Sub-bass, Nine Stops, including the new Full Organ,	$190.	275.

☞ The above will serve to illustrate the difference between our prices and others as well, or better, than a larger list.

IMMENSE BARGAINS!!

Reliable Testimony.

CARL C. ASMUSSEN,

BEING truly desirous to dispose of all his fine Jewelry, Watches, Clocks, Field and Opera Glasses, Spectacles, etc., etc., offers a rare chance to the public for investment.

The **JEWELRY** is selected with the utmost care, both for beauty and excellence. The **WATCHES** are unsurpassable both for strength and good going.

All goods are warranted.

Appended are testimonials from most reliable gentlemen well known in the Territory:

"The Watch I bought of you in 1872 goes most accurately, never varies a minute; has never had any repairs to it since I got it, although it has been exposed to very hard usage.

A. C. BROWN,
Brakesman U. S. R. R."

"The Watch I bought of you last year has proved to be the best article I ever had, having lost it twice in the water, once at the depth of six feet, besides a great many other hardships, and stands all with perfect ease, being always right to time.

JOHN SANDS, Camp Douglas."

"The Watch I bought from you is all that can be desired. As a timekeeper it beats anything I ever had, and stands the jolting and rough usage without the least variation.

DANIEL G. BRIAN,
Paper Mill, Salt Lake Co."

And the like high recommends from Messrs. H. B. W. Cheales, Salt Lake City; C. J. Lambert, Paper Mill, Salt Lake Co.; G. C. Lambert, *Juvenile Instructor* Office; T. O. Angell, Church Architect, Salt Lake City; Cyrus Bates, Tooele City; Bishop E. F. Sheets, City; Bishop E. A. Woolley, City, Archibald Gardner, West Jordan; L. M. Stewart, South Willow Creek, and many hundred others.
