

OSES have their thorns-joys their sorrows. We read of an optimist who cries: "Instead of complaining that roses have I rejoice that thorns have Likewise, that sorrows have thorns,

A little girl of our town lay very ill in the hospital, one day. Following a surgical operation, she writhed in fearful agony for a time, but as she became quiet and easy, she smilled and said: "Mamma, I'm glad of the pain, now it's going-I'm so happy."

and it's going—I'm so happy."
"Every part of the earth has been given its glory of roses."
A young Salt Laker, now seeking bits fortune in the unfortunate coast city, once a wealth of vine and bloom, but now, like "ashes of roses." a mere memory of splendor, writes."
"There is not a single block in the burned district that is yet built up, notwithstanding the immense atructures going up like mushrooms. The streets are more or less obstructed by debits, building material, etc. Everywhere is the incessant noise of holating englies. hammers, and the pounding on steel beams, Everywhere is over shoe in dust and mud. Conditions here are most chaoue. Telephone operators, street car men, iron workers, and riots and disturbances make up the day. Yet it is worth working a full day, after all, if for nothing else but to feel that when evening comes, one can turn his back eley, quiet, elean, beautiful, now in all her glory of roses. San Francisco has the thorns, Berkeley, the roses."

There are some beautiful rose le-gends given in a high class magazine, for June. One of them, as to how roses received their thorns, is especi-

gends given in a star hear theory in a to how roses received their thorns, is especi-ally interesting: "The North American Indians of the western coast have a tradition that roses were created without thorns. So tall and fair they grew that all creatures were attracted by their beauty and grace. Animals that browse upon grass and green herbage soon discovered the tender sweetness of the rases' abundant foliage, and then every rose tree holding its flow-ers aloft but attracted attention and drew destruction to itself. Every part of the earth had been given its glory of roses, but in every place there were animals which sough the bushes to devour them, and the tribes of roses were in danger of becoming extinct. In their extremity, they held a coun-cil; for in that far-away morning of the world, plants as well as animals had power to speak. To the council, all the roses came, and each had a tale to tell of suffering and disaster. At length it was decided to send for help to the god-man of the tribes-were knosen from among those who were mained and torn and had suf-fered most. Others also were sent who were tall and fair and graceful. Wisely this council discerned that should justice be denied the tribes, beauty might prevail in their cause. The conference was long and grave. At its close an armory of thorms was given to every rose, and thus were the tribes of roses delivered from their enemies." We are told again, "in the begin-ning roses were created thornless.

we are told again, "in the begin-ming roses were created thomes, They were meant to delight with their beauty, to exhibit with their frag-rance, and to soothe with the soft-ness of their touch. But as man left his pure estats, the roses gradually developed thorns." Out of man's leaving his pure es-tate, as we know, came sorrow; and out of that sorrow, again joy, in the coming of the Master.

Once upon a time in this city, flour-ished a beautiful rose garden in the rear of a quaint old home. For all we know, it may flourish yet. We doubt it however a a new modern house how, it may notrish yet. We doubt it, however, as a new modern house new takes the place of the old home. But that is neihter here nor there, as it is a neat little love-story connected with the rose garden of which we wish to speak.

wish to speak. One morning, a young man, whom we as walking

day, you certainly encouraged me in believing that we were as good as...." "As what"" Resemond was the color of the reses, and had Ned not been blind with fury, he would have quickly seen there was no need for an explanation. "Ob nothing," sternly. "That was yesterday. Today, you are engaged to Ben."

Ben. "Engaged to Ben?" gasped Resemond, beginning to look serious herself. "No wonder you asked me to wait," sarcastically

"But how did you learn this?" in dignantly, "Oh, you do not deny it, then? Per-

haps you will explain." "I will explain nothing till you tell me how you learned this."

"I will explain nothing till you tell me how you learned this." "Oh, quite by accident, of course, I only overheard Ben's sister telling Cousin Kate, this morning, that he was with you last evening, and that soon she would hear of an interesting announcement. On my way here, I met Ben: no wonder he avoided me." "Yes, Ben was here last evening," said Rosemond beginning to look any-thing but serious." Now, you know what Ben and I have always been to each other, so therefore..." "There is nothing more to explain," Ned interrupted, rudely. But Rosemond, her face now, the deepest rose, continued quietly: "When he asked me to marry him last night, it was only natural that I should ""Accent him?" scorefully.

"Accept him!" scornfully, "-tell him I am going to accept you."

Oh, Jacqueminot! love thee so-

J love thee so--My heart's unrest thou'rt hushing! Yet tell me why Thou art so shy; Confess thy tell-tale blushing, And Jacqueminot Breathed soft and low--The while my poor heart crushing--

The while my poor heart crushing-"Aurora, she Has just kissed me. And that is why I'm blushing." LADY BABBIE.

ANOTHER "UNWRITTEN LAW" TRIAL.

Judge W. G. Loving of Lovington, Va., when brought to trial for the murder of Theodore Estes, will make no plea save that of justification, Judge Loving, who is a member of one of the most respected families in his native state, charges that young Estes took Miss Lizzle Loving, the 18-year-old daughter of the judge, for a drive, and that he drugged and outraged her. 'ounsel for the defendant will be "Jack" Lee of Lynchburg, who successfuldefended the Strother brothers, tried for a similar crime,

Three Trolleys in Japan. It is stated in a report presented by the American consul at Nagasaki that the early construction of three electric tramways in the northern portion of the Japanese island of Kyushu is under contemplation. The first to be built, -Engineer.

Had these goods been purchased in a regular way at today's market prices, the cost would be just double, but we will let you into the secret of these phenomenal values.

Worth up to \$2.00.

Monday morning ushers in the greatest of all-the most startling sale of high grade muslin underwear ever seen in any city North, East, South or West. Five thousand dollars' worth of manufacturer's short lots left over after the summer orders were all filled, together with all broken lines and overstocks accumulated by him this season.

DESERET EVENING NEWS SATURDAY JUNE 8 1907

One morning, a young man, whom we will call Ned, was walking around the circular rose-hidden paths, with impa-tience in his step, and a frown upon his face. He was in a bit of a rage. "Only sesterday," he murmured, as he paused, "and this very seat-but, pshaw!--that was yesterday. Today will not be rose-colored." grimly, and he snapped off a rose with his cane. At this point, a young giv, whom we will call Rosemond, gowned in white, of course, entered upon the scene, and Ned colored slightly, seeing mild won-der in the eyes before him, but ho said nothing. Do my roses offend?" said Ned, coldly. "Good morning, Miss Rosemond," said Ned, coldly. "And why, 'Miss?" with mock grav-ity. "But, there, J did not mean to keep yon waiting. Please don't look so serious, Ned." "This is a serious moment, and not one for merriment, as you seem to take it. I demand an explanation." "And is what I said, isn't it? Yester-

ROBINSON'S PATENT BARLEY The Only Infant Food

This sale of Undermuslins will be presented on a greater and grander scale than any you've ever witnessed before and will eclipse any similar event ever aitempted here from point of beauty, style and value giving. It will be the greatest exposition of crisp snow-white undermuslins ever presented and each garment is of the thoroughly dependable kind.

The manufacturer of these undergarments bears the highest reputation in the Eastern market. He does not look farther than New York, Chicago, Boston, Philadelphia, Pittsburg, etc., for the outlet of his entire product, but having already sold his output for the season, it would have aroused jealousy and caused business unpleasantness to have shown favoritism to some particular one of his customers in the above mentioned cities, and as there was not enough to divide among them all, he decided to sell the entire lot out West away from his regular trade.

That is the story in a few short paragraphs and we secured the plums.

You'll say these are the greatest values you ever clapped your eyes on. We said the same thing. This is the best time of all to lay in a stock of dainty summer undermuslins, and at these prices you can't resist laying in a complete stock for present and future needs.

Every garment is made of the celebrated Masonville and Brichfield Mills Muslins universally known throughout the trade for their superior construction, uniformity of count, quality, weight, finish and wearing qualities, no better muslins put into undergarments at any price.

The laces, embroideries and ribbons used in the trimming of these garments are of the highest grades, and the styles represent only the very newest models used in underwear of the highest character.

The varieties baffle description, the quantities in this great sale being so vast and for the sake of facilitating business and making shopping during this sale easy and pleasant we have decided to divide this entire purchase into two prices only.
