

## Makes Vladivostok Port of Entry To Offset Loss of Dainy and Port Arthur.

## JAPAN'S INTENTIONS UNKNOWN

If Optomists Are Not Mistaken War With Japan Has Done Little

Damage.

Washington, March 4 .-- Russia's renewed attempt to establish a permanent foothold in Northern Manchuria by making Vladivostok the port of entry, thereby offsetting the loss of Dalny and Port Arthur, is described in an ofscial report made public at the state department today, which report re-cently reached Washington from one of the department's agents in China. The report expressed the belief that

this will redound to the development of American trade and will result in a great curtailment of the importance of Shanghai as a distributing point. The extract made public at the department says:

says: "Since the conclusion of peace be-tween Russia and Japan there has been much speculation in the foreign community of Shanghai as to the future opportunity for trade and development of Mainchuria, and therefore negotia-tions between Japan and China on the one hand and the diplomatic moves of Russia at Pakin have been watched with Russia at Pekin have been watched with

"As soon as the way to Vladivostok, "As soon as the way to Vladivostok, was open there ensued a rush of steam-ers from Shanghai, Tsinetao, Chefoo, Tinetsin, Nagasaki, Kobe and Yoko-hama, and as a consequence the imme-tate demand for marchandise was soon dlate demand for merchandise was soon diate demand for merchanalise was solution satisfied. Then came the riots both at Vladivostok and Harbin, followed by the ice closing the port of entry. "These discourning factors drove

many of the traders away and left a market, which while well supplied with such luxuries as are indicated for the Russians, is still demanding staples for the natives and is offering a great chance for development.

"Such is practically the situation to-day and a period of three months from this date will see Northern Manchu-ria eager for that which is now be-lieved to be the beginning of a new era,

which will last a few years at the least. "No one knows what Japan intends to do in Southern Manchuria either in the way of trade or in development in connection with her portion of the Chi-nese Eastern railway and the new line that is to be built thereto to connect with Korea.

with Korea. "Russia, for the benefit of her por-tion of the Chinese Eastern railway, for her own political affairs in the east and perhaps for the sake of affording a contrast, is letting everybody know what her aim and ambition is. It may be well to point out what is the field for the development now being adver-tiond by Puseing agents

"The Chinese Eastern rallway, which The Chinese Eastern railway, which leaves the old and original survey of the Trans-Siberian railway at Nort-chinsk, crosses the Manchurian bor-der at the station since called Man-churia, and then, by a southeastern course, runs through one of the most cardie area on the continent to Markin fertile areas on the continent to Harbin, and from thence on to Poyrantznaia (border.) thus reaching Siberia again and joining the Ousuri railway, a part of the original Trans-Siberian route and

DEATH BY INDIGESTION. A Long Train of Fatal Ills is The Direct Result of Undigested Food.

Undigested food, by fermenting forms a poison in the stomach and this is ab-sorbed in the blood. If this goes on very long, and your heart happens to be weak, you'll be found some morning dead in bed, or you may fall back down the stairs about an hour and a haif after dinner, and the doctor will call it heart disease. Yes, that may be th result, but not the cause. The cause is indigestion. Indigestion is a simple common word, but it has a terrible im-port.

common word, but it has a terrible import. And so you may get apoplexy, and die suddenly while you're standing. If you have a weak liver, the polson of undigested food will attack it and you will get jaundice. If you have weak kidneys, you will get Bright's Disease or dinbetes, from which there is no rescue for any man. It was a learned physician who said that the progress of a race depended upon the stomachs of its members. And you have at some time in your life eaten a heavy meal, or eaten in a hurry, and feit that "lump of lead" im-mediately afterward. That lump of lead is a hard ball of undigested food. The stomach can't digest it, and finds it hard to throw it out. And so it sours, and it makes you sour and everybody your who talks with you. It gives you a bad breath and is building for, you the road to dyspepsia and death, unless you stop it.

French officials have claimed for some time that if a vote were possible it would give France a sweeping ma-jority. It appears that yesterday's di-vision did not produce a recorded vote, yet the powers aligned themselves with sufficient precision in the form of a vote, the eight voting in the affirma-tive being France, Great Britain, Rus-sia, Spain, Portugal, the United States, Italy and Holland, and the negative three being Germany, Austria an Mo-rocco. They will invigorate the stomach, re lieve the stomach of two-thirds of its work and give it a chance to rest. They work and give it a chance to rest. They will increase the flow of gastric juice, and if you will ever "live" in your life-time, it will be after you have eaten a good, hearty meal, and taken one of these little tablets immediately after-ward. The indications are that if Germany refuses to give way on the police. France will not yield on the bank, thus accentuating the former deadlock by carrying it into the open conference.

"The vote, though referring to a question of procedure, is valuable to us from more than one viewpoint. Not only have Great Britain, Spain, Russia and the United States clearly adhered to our ideas, which was foreseen, but Italy, Belgium, Portugal and Holland unhesitatingly recognized the loyalty of our proposition." The Temps' correspondent at Algeci-as, however, points out that "the vote ras, nowever, points out that 'The vote refers merely to procedure, signifying the desire of the conference to attain a result. "Even while Vladivostok and Harbin were burning, plans were hastening for the coming campaign of development. The scheme advertised contemplated the establishment of a steamship ser-vice which would make Vladivostok the home port, the welcoming and the protection of invested capital, the in-vitation to use the railway as the means of trasportation to Europe for the products of China, and especially of tea.

These in a general way are said to be the plans, and the foreign agent has been given a free hand to put them into effect as far as the outside world is concerned. It is thus evident that the government and the Russian owners of this railway property are preparing to this railway property are preparing to do a great deal toward making Vladi-vostok the port of entry, and thereby making up for the loss of Dalny and Port Arthur. The Japanese merchant marine we apparently recognized this, and have apparently recognized this, and while Japan's affairs are being adjust-ed in the former war zone, their steam-ers are getting ready to enter the Vladivostok trade also. If, therefore, the ports of southern Manchuria should be forsaken and there should be a reversion to Vladivostok it would seem that there should be a much bet-ter forture for a practically discarded future for a practically discarded

port, "It is also argued by those who are interested in Vladivostok that it is maturally the port for American Man-churian commerce, being closer and easier of access in every way.
