Editor Deseret News:

Dear Sir—A meeting was held here last night by miners and citizens, twenty-one in number, regarding the actions of Judge J. B. McKean. After some preliminary remarks, they resolved to uphold him in all murder cases, regardless of party, sect, or creed.

Before closing the meeting they made a motion in favor of McKean's being held in his present position, fourteen of the number were opposed to it, leaving a minority of seven in favor.

Parties who were there inform me they came near breaking up in a general row.

Maxfield and Co. are trying to keep the road open during the storms, but if the snow keeps drifting as it has been doing since last night, the probabilities are that the road will be blocked up again.

A new mine has lately been found between here and the Davenport mine, which is said to be richer than anything yet discovered in the cañon. The crevice is four feet wide. They call it the "Matilda." This mine was partly developed last fall, but was thought worthless and abandoned until last week, when a rich vein was struck.

It is still storming, with no hopes of abating.

No more slides since Monday.

Editor Deseret News:

Dear Bro.—My son, Ezra Mower, left this Territory in an early day and went to California, after which I learned that he took several voyages upon the sea, and at last returned to Napa City, got married and amassed considerable property at the latter place. Sometime afterwards I heard he sold out and came over into Nevada, where he resided a considerable length of time. When last heard from he left Nevada for California again.

As I am very anxious to learn of his whereabouts, will you please publish this note with a request that your numerous exchanges in California will please copy, and that if any persons shall happen to see this notice, that are acquainted with my son Ezra, they will confer a favor upon an aged parent by writing to me in relation to his whereabouts, circumstances, etc.?

ST. GEORGE, Utah, Feb. 5, 1872.

Editor Deseret News:

Parties are just up from St. Thomas, on the Muddy, who report considerable excitement in that section on account of the discoveries of placer gold diggings on the Colorado, above the mouth of the Virgen. The precious metal is found in the fine or flour state and it is reported that half an ounce is made a day to the hand. Several parties, numbering in all near fifty men, have made an outfit here and at the Muddy and gone over with three months outfit to work. The spot they have selected is above the mouth of Grand Wash, near the mouth of Diamond river, probably from 75 to 100 miles either from St. Thomas, St. George or Kanab. Parties have visited and prospected various places along the river, as well as the spot described and say that there is fine gold in the sands all along the river. The parties seem satisfied that they have a good thing and that the Colorado will be lined with mining camps ere another winter sets in.

Recent discoveries of magnificent silver lodes have been made at Antelope Springs, near Iron City, Iron Co. One lode, named the Silver Belt, 100 feet thick and near three miles long, is said to have assayed in Ploche \$60 to the ton, average top rock, while the "Mann" lode from choice specimens went up to \$1700 from top of ledge. Several other very promising lodes have been discovered there, a district has been organized called "Silver Belt," and work has been commenced. These new discoveries are creating quite an excitement in Dixie, and promise us lively times ere long.

Yours,

CACTI.

Editor Deseret News:

I live nearly 400 miles from Salt Lake City. I know but little that is trans-

piring except through the columns of the DESERET NEWS and lately there has been nothing said about the "Christmas gift to Jesus." I was once deeply interested in Presbyterianism, and have sat under the droppings of its sanctuaries. I well remember the splendid oratory of Professor Finny, the Oberlin evangelist. But I could not pass the Presbyterian gate, for two years previous I had been baptized by a Baptist elder, when a Methodist minister taught me it was a sin against the Holy Ghost. The sign on the Presbyterian gate being sprinkling, I could not very well get through that gate, unless the going down into the water was done away with. Now will it not be an equally uphill business for "Mormons" to be converted into Presbyterians.

The Millerites were a very accommodating society and liberal in their principles regarding baptism—each one was allowed to interpret the Scriptures according to his own judgment.

Mr. Editor, would it not be quite interesting if the railroad would fetch along a few Millerites to get up an excitement about the coming of Jesus. The Presbyterians are "building in haste the house of our God where Jesus shall wait to be gracious, where glad news of rest to the heavy laden shall sound aloud, where many a straying sheep shall have got back to the fold, many a broken heart shall have found the balm of Gilead, and Christ in his glory shall indeed have entered into many a waiting spirit." Who can help being electrified by such glorious news of what is about to transpire? One who is not Deluded, Down-trodden, or Deceived.

HAVING failed most woefully in point of numbers at the election, as everybody knew would be the case, notwithstanding all the dodges employed, the opposition of course will resort to other opposing methods, and endeavor to show that it is altogether wrong for the majority to gain the day even where universal suffrage is the law, and that it is nothing more than right for a miserable minority to rule over the majority, contrary to every principle of republicanism. Doubtless about this time the wires are and the mails (if they were running) would be burdened with highly sensational and slanderous reports of things at Salt Lake, in which the old citizens and the majority of the people of course are made to appear as veritable monsters of vice—dishonest, disloyal, alien, anti-republican, haters of the Union and the country, and all that buncombe sort of thing, which is too common in political life in most places of this Union and is the regular thing with the opposition in this locality. Among late telegrams westward are the following—

The early part of the day Liberals worked hard challenging Mormons on the question of citizenship, and preventing hundreds upon hundreds of votes, but the Mormon system soon convinced them that the labor was useless. Even children voted, and the Liberals soon abandoned the election as a farce.

Much indignation is expressed tonight on the fraud and mockery of the election. Such disgraceful abuse of the ballot-box privilege disgusts every loyal citizen. A memorial on the subject is to be sent to Congress.

All which shows that as the election proceeded and the opposition saw the palpable demonstration of no earthly chance of success, the gentlemen of that party became more hugely disgusted than ever, and, to mitigate the report of their utter and signal failure, profess to regard the whole proceedings as a farce. A shallow pretence, at best, manifesting the pitiful straits to which the opposition finds itself driven to bolster up its pretensions to weight and numbers and influence.

There has been recently brought out in England a machine for crushing and grinding bones by hand, so that a cook can break, crush or grind bones to any desired size. As a quarter of a pound of bones contain as much gelatine as a pound of meat, it is evident that a machine that enables us to recover the whole of this, and at the same time reduce the bones to a condition ready for conversion into superphosphate, must prove most decidedly useful. The crusher is made of steel and cast iron, and can be screwed to a block or solid table. It costs only about eight dollars in London.

We ask every one to read the following Certificates from many of the most eminent physicians in the country:

ST. LOUIS, July, 1870.—JAMES A. JACKSON & CO.: Gentlemen—As you have communicated to the medical profession the recipe of the "Home Bitters," it cannot therefore be considered as a secret or patent medicine, no patent having been taken for it. We have examined the formula for making the "Home Bitters," and unhesitatingly say the combination is one of rare excellence, all the articles used in its composition are the best of the class to which they belong, being highly Tonic, Stimulant, Stomachic, Carminative and slightly Laxative. The mode of preparing them is strictly in accordance with the rules of pharmacy. Having used them, soon its effect on our private practice, we take pleasure in recommending them to all persons desirous of taking Bitters, as being the best Tonic and Stimulant now offered to the public.
