## PROSPECTS IN ALBERTA.

Interesting Letter from Settler in the Canadian Colony.

In a letter just received by Benjamin Hampton of this city from P. D. Grant, of Stettin, Alberta, Canada, the writer states that the Eldredges have been some in ranching upon a very large scale in that section of the country. Indicative of this is the fact that he has just completed a contract for them to put up 400 tons of hay.

In speaking in regard to the 10,000 acres of land recently purchased by the Eldredges the writer says: "You can judge that there is lots of feed here when I tell you that in putting up 400 tons of hay, we did not have to haul farther than half a mile, putting it down in the stacks, and up hill and down like a meadow and we will be hardly possible for them to overstock their ranch. The grass near us is not quite so thickly, as we get less rain than they do in the hills. We are getting along fairly well and are quite contented and encouraged as regards the future of this country. Our crops here were quite light this season, but I can judge that there is lots of feed here when I tell you that in putting up 400 tons of hay, we did not have to haul farther than half a mile, putting it down in the stacks, and up hill and down like a meadow and we will be hardly possible for them to overstock their ranch.
