

STANDING TIMBER IN UNITED STATES

National Conservation Commission Has Started Work of Taking Census of It.

EXPERTS CANNOT AGREE.

Estimates Range All the Way from 822,862,000,000 to 2,000,000,000,000 Board Feet.

Washington, Oct. 6.—The national conservation commission caused the first comprehensive attempt at the census of the standing timber in the United States ever undertaken. The commission needs the information to help complete its inventory of the country's natural resources, which it will include in its report to the president and since that report is to be submitted on the first of next year, it needs the information at once. In consequence the work of the census has been started with a rush and is now well under way.

Estimates as to the amount of standing timber in the United States range all the way from 822,862,000,000 to 2,000,000,000,000 board feet, a difference of more than a trillion feet in the views of the best qualified authorities in the country.

In the opinion of the service the most carefully prepared estimates yet made are those by Henry Gannett published by the twelfth census in 1900, which placed the total stumpage at 1,390,000,000,000 board feet. Mr. Gannett was

Baby Laugh

It belongs to health for a baby to eat and sleep, to laugh and grow fat.

But fat comes first; don't ask a scrawny baby to laugh; why, even his smile is pitiful! Fat comes first.

The way to be fat is the way to be healthy.

Scott's Emulsion

is the proper food, but only a little at first.

SCOTT & BOWNE, 409 Pearl Street, New York

recently chosen by the president to compile all information gathered for the commission. The census is expected to give an accurate basis for computing how long our timber supplies will last.

The consensus of opinion is that of wood is about 200,000,000 board feet. Assuming that stumpage of 1,400,000,000,000 board feet and neglecting growth in the calculation, the exhaustion extent of our timber supply is indicated in 14 years and assuming the same use and stand with an annual growth of 40,000,000,000 feet, a supply for 23 years is indicated.

MAN AND WIFE SENTENCED.

Mr. and Mrs. John W. Scott Must Serve Twenty Years for Murder.

San Bernardino, Cal., Oct. 6.—Word has been received here that Mr. and Mrs. John W. Scott, keepers of the Salt Lake railroad's pumping plant at Dry Lake, have been sentenced by the

Your stomach is a faithful servant if you treat it right.

HUSLER'S FLOUR

district court at Pioche to serve 20 years each in the penitentiary for the brutal shooting of Joseph Webb, a workman. The crime was committed three months ago. Webb was walking the ties and stopped at the pumping station for water. He was ordered off by Scott and refused to obey. Scott went to his bunkhouse secured a shotgun and fired pointblank at Webb, fatally wounding him. Mrs. Scott then fled.

A VERY LARGE COIN.

A Swedish One, Minted in 1659, One Of Largest in World, in Jersey City.

New York, Oct. 6.—C. F. Engstrom, of Jersey City, coin collector and antiquarian, has in his possession one of the four largest coins in the world. Mr. Engstrom's coin was minted in 1659 and bears the imprint of Charles X, of Sweden. The coin is of bronze, oblong, 20 inches long by 13 inches wide, and weighs 21 pounds. It is the middle and at the four corners with the royal stamp of King Charles, but is otherwise as plain as a slab of slate. In the year 1659 Sweden had free circulation in Sweden. The ordinary citizen used to pay most of his bills in farm produce and labor and those who had money used to keep it in silver or gold. Enterprising burglars were unable to do a thriving business at the time. The average man's money was safe from all but the occasional strong men.

In 1661 Sweden was at war with Russia. The Russians scuttled a Swedish man-of-war in Riga harbor. In 1661 Riga harbor was captured by the Russian government and the ship raised. The four big bronze coins were aboard. Two are still in Russia and one in England. The fourth came here to Mr. Engstrom on the Adriatic last Thursday.

On its face the coin is worth eight Swedish taelers at the rate of 10 to the change in 1659. As an antique it is worth \$500.

PIECE OF GLASS PENETRATES GIRL'S SKULL

New York, Oct. 6.—Although the point of a large silver of glass pierced her skull and entered the brain it is believed that Blanche Goldstein, 16 years old, of Brooklyn will lose neither life nor reason as the result of an operation performed by surgeons at St. Mary's hospital.

A remarkable show of vitality by the child was taken advantage of, and a tumor-like gathering at the injured point of the brain was removed. The wound was cleaned antiseptically and the brain covering brought together. The puncture in the skull was small; it will be easily trepanned.

The child was lying in front of her home last Friday, when a large pane of glass was dislodged from a window on the third floor of the house. It crashed edgewise on her head, a sharp fragment entering the top of her head. The girl fell unconscious and cut her chin and face severely on fragments of the glass upon the sidewalk. Upon the removal of the gathering on the brain, the little girl, who had been semi-conscious since the accident, brightened up perceptibly and it was that her parents were brought to her. She recognized them at once. The doctors predict a complete recovery.

UNDERFERD SCHOOL CHILDREN

Chicago City Council Orders Investigation Made of Reports.

Chicago, Oct. 6.—An investigation of the reports that thousands of school children in Chicago are underferd was ordered last night by the city council, which resumed its work after the summer vacation. The committee on schools was instructed to inquire into situations.

The heads of the city government and of the school board made arrangements yesterday for a gathering of municipal officers to fix upon a definite, immediate plan of relief. The executive committee of the city federation also took action looking toward an elaborate investigation of conditions in the poorer homes of the city.

WHY COLDS ARE DANGEROUS.

Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germ that would not otherwise have found lodgment. It is the same with all infectious disease. Diphtheria, scarlet fever, measles and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade over a large part of the world. For sale by all druggists.

PEABODY FUND.

New York, Oct. 6.—When the trustees of the Peabody education fund assembled tomorrow for their fifty-first annual meeting it is more than likely that final distribution of the main fund, aggregating \$2,500,000 will be made. Furthermore, studies of the fund to educational institutions of the south with the Peabody normal college at Nashville as the chief beneficiary.

This institution will receive \$1,000,000 upon the provision that the state of Tennessee, the city of Nashville and the college raise a similar sum. As the terms of this gift have been reached, little doubt remains that the terms will be carried out.

The remainder of the fund will be apportioned throughout the south, the bulk of it in all probability going to Maryland, Missouri and Kentucky, since none of these states has benefited from the fund up to the present time.

DEAFNESS CANNOT BE CURED.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed, it swells and closes, and the sound cannot enter. It is not a permanent condition, and when it is cured, the hearing is restored. It is not a permanent condition, and when it is cured, the hearing is restored. It is not a permanent condition, and when it is cured, the hearing is restored.

AN Employer's Receipt FOR SALARY RAISING

The other night an employer heard that one of his fifty men was hesitating about enrolling in the Association Institute because the young man wanted to "make a little money on the side in the evenings."

The employer said:

"That man has asked me for a raise. But I can't give him more money till he raises his ability. Night study along the line of his daily work will make him worth more to us. He can't make as much 'on the side' as he will lose by not studying these nights. Tell him I said so, if you wish."

Watch this advertisement and see what the young man does.

TETON VALLEY AND ITS RESOURCES

The last of the fertile lands of the Teton Valley are now offered at \$12.50 to \$20.00 per acre, with good perpetual water rights. We have one piece that must be sold at once, and we offer the following 160 acres of heavy loam soil, first class water right, all fenced, 50 acres under cultivation, with the following personal property: one good two room house, a good barn and well, and other out buildings, sixteen head of cattle, four to six head of horses, two sets of harness, two wagons, one pair of bob sleds, one gang disc plow, one mower and rake, one derrick, one set blacksmith and carpenter tools, and numerous other things that cannot be mentioned here. The above machinery is new, having been used but one year. All the machinery that is needed on a ranch. Price, \$2500.00.

We have \$1500.00 worth of personal property aside from about one thousand bushels of grain. One of the greatest bargains that has ever been offered. If you are interested in this kind of a proposition, come and see me at once. Our Mr. Winger will be at the Windsor Hotel October 6th, 6th and 7th. Samples of grain and fruit from the Teton Valley may be seen on those dates.

WHO DOES NOT VALUE PERFECT HEALTH

There Is No Reasonable Excuse For Suffering While There Is a Way to be Cured

NEW HOPE IN THE DRUGLESS METHOD

The reason so many people suffer the effects of disease is because every prescribed remedy has failed to accomplish what was claimed for it, a fact that gives immediate rise to skepticism whenever a new cure is suggested.

Naturally when the science of Chiropractic was introduced here in Salt Lake sufferers were reluctant to accept the theories of the new system until demonstration had been made. At the outset the most complicated cases—those on which the skill of medical and surgical endeavor had been exhausted without avail—were the cases Dr. Farnsworth, the local doctor of Chiropractic, had to treat and his success in those first cases has established him firmly as a wonder worker among the sick, and today his methods are making scores of new men and women out of hopeless sufferers and cripples.

Dr. Farnsworth, however, does not claim to be superhuman in his power or to be one of the cure-all professions. His methods are simple and reasonable when understood and make truly wonderful cures without the employment of Drugs or Surgical Instruments of any sort.

To know for yourself if yours is a case that these drugless treatments will cure, go to Dr. Farnsworth at

once and be examined. He will tell you without question just what the nature of your ailment is and what can be done for it. Do not delay go to Dr. Farnsworth.

Consultation and examination free.
