New York, Dec. 15.—Stocks opened irregular, with moderate demand, trading confined principally to the industrials. Railways rather quiet. The Postage prepaid.

terday and a better feeling pre-ed. London markets were fractionlly higher. Keene was a heavy seller of St. Paul at opening. Sugar opened fraction under last night's close, sold lown to 1.29 during the first half hour and gradually moved up to 1.34%, with-out any decided reaction. Tobacco was weak at opening and sold down to 97%, from which point it rallied to 100, last

night's closing price. Manhattan was ex-dividend one per cent and strong, regaining the dividend and advanced three-quarters higher. There was some selling in Brooklyn but it strengthened up and advanced 2½ points from the low. The steel stocks were weak, while he internationals showed strength. The high level reached at 1 o'clock showed n opportunity for profit taking and there was a recession all along the line due to this movement. Offerings, however, were soon absorbed, and there were no decided declines. Wormser and Keene were buyers of stocks later in session and the million and a half gold engaged for export did not have any unfavorable effect. Support was good. Money 6 per cent. The closing was strong, with fractional recessions from

Chicago, Ill., Dec. 15.—Wheat opened teady and unchanged. Corn and oats unchanged. Provisions opened up 124 ents, receded to 10.10 and advanced to 0.35, at which price it closed. Wheat noved within a narrow limit, selling off to 69% for May and recovering to %. and did not hold at this price. Duliness the to government report, which is expected to make this year's crop 550,000,000 bushels. Corn fell off in symathy with wheat. The close was duli and at a quarter lower for wheat and

high points of the day.

Liverpool closed, unchanged to 14

### AN EXTRA DIVIDEND.

The Utah Sugar Company Pays 2 Per Cent Extra on December 30th,

Haking the Regular Twelve Per Cent Instead of Ten.

The board of directors of the Utah Sugar company held a protracted meeting this morning at the office of the president, Hon. Geo. Q. Cannon, he being called to Prove on important business, Vice President Cutler presided. The main business of the meeting was listened to, the reports of Manager Cutier, both on the operations at the factory, and of his trip to Omaha, where he met with the American Best Sugar Manufacturers' association. The board was gratified to hear from Manager Cutler that the 4,400 acres of beets planted had yielded 52,625 tons, all of which had been received by the company. Only about 12,000 tons recompany. Only about 12,000 tons remain to be worked up and it is expected that the factory will close down about Jan. 10th, after a run of over four months. After hearing the manager's report the board declared the regular dividend of 2½ per cent, making both payable on Dec. 30th, the 2 per cent being declared so as to make the regular dividend for the year 12 per cent instead of 10 per cent.

## DO CROWS TALK?

Driving one day on a road beside a narrow river, I saw, in a field ahead a darge gathering of crows. They were making so much noise that they could be heard long before they came in sight. I stopped to see what they would do. They had evidently talked matters over in the field. Each captain was to lead his flock.

Perhaps the food supply had given out, or they were going to select a new home for the winter. In a moment a company rose in the air, flying low. Its captain flew ahead, and behind came wo or three crows who noted as lieuhundred or more straggled behind in

They headed towards the east, which They headed towards the east, which brought them towards me. Suddenly the captain spied me. "Caw-caw-caw," cried he and turned to head the regiment across the riyer. Over there some men were repairing the roof of an icehouse. As the birds headed that way one of the men began hammering. Im-mediately Captain Crow shouted "cawmediately Captain Crow shouted "caw-caw." Down the line flew the lieutenants "caw-cawing," evidently repeating orders, and the captain began to circle slowly in the air, each time rising higher and higher. The whole flock circled, mounting high in air, passing at a safe distance over the lea-house.

The regiment was hardly over when a second appeared. This had its officers like the first one. They pursued the same course, headed towards the east, saw me, turned to cross the river and were alarmed by the carpenters. Then the captain gave his orders, the lieutenthe captain gave his orders, the lieuten-ants passed them down the line, and the flock rose in circles and flew along taking the same direction as the first This was repeated four times. In all nearly a thousand crows passed Each captain gave his orders, and they were as plain as if he had spoken. "These dangers must be passed by rising higher in the air." Yet to my ears it only sounded like caw-caw-caw:—Vick's Magazine.

## GOOD COPPER ORE DISCLOSED

Manager Jacobsen Brings Some Samples from the Ben Butler.

THE DALY-WEST DIVIDEND.

Work to be Resumed on the Alfred Reed Property - Work at Beaver Lake-Holland Copper Claims.

What is believed to be an important strike was reported from the Ben Butler property a couple of days ago. Manager J. A. Jacobson went out to verify the report which was sent in by Foreman R. J. Jarvis. Mr. Jacobson returned last evening with a number of samples of ore which apparently contained very high copper values. The fire test, however, showed that while it was not as high as some expected it would be, values were nevertheless re-corded as high as 7.7 per cent copper. The assay figures on one sample are 7 per cent lead, 20.8 ounces silver, \$4.90 gold and 7.7 per cent copper. The other sample showed 2.1 per cent lead, 11.2 ounces silver, \$1.60 in gold and 3.6 per cent copper. This streak from the samples were taken is about four or five ples were taken is about four or five inches wide in the bottom of the drift, off the tunnel. The face of the drift, however, is said to be all in ore of a good milling quality. At present the management are working to get under the ore body disclosed in the upper workings. It is expected that this will be done within the next hundred feet. Work will shortly be started in a winze which will be run down on the vein of copper ore just encountered. In the Montezuma adjoining some very rich ore was at one time taken out from about fifty feet below the Butler tun-nel, and it is thought that a winze run own on the copper streak may lead to similar results.

#### MR. LEITER'S MOVEMENTS. Has Under Consideration the Purchase of Arizona Property.

Joseph Leiter of Chicago arrived in the city yesterday afternoon from Ari-zona, where he had been for several weeks inspecting some mining prop-erty, the purchase of which he has under consideration.

Lefter said last night that no deals had as yet been closed for the properties under consideration, and he did not know how soon they would be.
"I cannot tell you where the properties are located," said Mr. Leiter, "for the reason that some other fellow might make the present owners a better offer and get them from me. I don't intend to take any definite steps regarding the purchases proposed until I receive further reports from the inectors and assayers who are now at

Mr. Leiter expects to leave the city this evening for Salt Lake City, where will remain two weeks .- Denver News, 14th.

#### DALY-WEST AGAIN TO FRONT. A Christmas Dividend of \$30,000 Declared Yesterday Afternoon.

The Daly-West Mining company will pay an extra dividend of 20 cents a share or \$30,000 on the 20th inst. This was decided upon at a meeting of the directors held yesterday afternoon. The total dividends declared by Park ity mines this month now amount to

The Silver King's extra of \$50,000 with Swansea's Christmas gift of \$5,000 and the extra posted by the Daly-West make up the sum of \$85,000, which is distributed as holiday money by three of Utah's mines.

#### VERY VALUABLE ORE. A Car from the Isabella Mine is Valued at 8200,000.

A Denver dispatch says that the Oma. ha & Grant smelter has received one carload of ore from the Isabella mine at Cripple Creek that carries values in gold of \$8,000 a ton, or a total of \$200,000. A second car gave returns in excess of \$5,000 a ton. The total value of the ore in the two cars will range somewhere between \$300,000 and \$359,000. Previous to this the Mollie Gibson held the record for the richest car of ore ever loaded at the mine in Colorado. A carload of bonanza ore from the Mollie Gibson in the palmy days of silver, gave returns at the smeller of \$118,600.

#### TIPTOP MILL WILL CLOSE. Owing to Cold Weather Available Water Supply Gets Less.

The Tiptop mill has not been run to Its full capacity for two weeks. Only fifteen stamps of the twenty have been run in the day time, and ten at night. This is due to cold weather, and a shortage of water. The water in reservoir at the pump station freezes every night, and that in the tanks above the mill also freezes sometimes, and the available supply is getting less. It is evident that in a short time it will be impossible to run even ten stamps, and that the mill will have to be shut down for economical reasons. But operations at the mill will not be discontinued. Rather will they be pushed with greater

The new hoisting works will be built. The new holsting works will be built, the new shaft sunk to a connection with the 400 level, and the various levels opened and prospected. On the 400, or deepest level of the mine, there is a body of pyrrholite ore that miners say is the best yet seen on the Belt, and that assay up to \$400 a ton.

### THE FOUR ACES SUIT. Court Will Hear Motion to Make Under-

ground Surveys. December 20 has been fixed by the court at Nephl as the date on which it will hear a motion from the Four Aces Mining Company to be allowed the privilege of entering the territory in dispute for the making of underground surveys.

BEAVER LAKE COMPANY Will Shortly Put Men to Work on its Claims.

It is stated that a force of several men will go down to the property of the Beaver Lake Copper Company within the next few days to begin work in the old incline shaft from which, is is the intention to drift on what ap-pears to be a good lead. Supplies will be taken out to the claims and prepara-tions made to do a great deal of work there this winter. The shaft on the property is down over 160 feet, from the bottom of which a 90-foot incline has been run. It is said that several small veins have been cut in sinking the shaft and the company new proposes to drift on the most promising of these, which it is thought will lead to shipping ore in the near future.

Application for Patent. 3007-Joseph R. Morris, Edith N. Morris, Charles F. Loufbourow and John F.

Delaney yesterday applied for patent for the Great Eastern mine lode in Dugway mining district, Tooele county.

WILL BEGIN DEVELOPMENT. A Force of Men with Supplies Go to the Alfred Reed Claims.

Five men with a sufficiency of supplies left town today for Alta, where they will do some development work on the Alfred Reed/Mining company's claims near the Flagstaff property. It is expected that the men will remain at work until the season for snowslides comes round, when work will be stopcomes round, when work will be stopped for a short season. Work is to be resumed in the shaft which is now about 140 feet deep. This will be pushed down 200 feet further as soon as posisble. There is said to be nearly a foot of galena in the shaft which has assayed as high as 500 ounces in silver with between 40 and 50 per cent lead. A good body of concentrating ore has also been opened up, and in the new development work now being inaugurated this vein will be followed. this vein will be followed.

#### HIGHLAND COFFER CO.

Work on the Claim secured by Bond is Not Satisfactory.

For some time past the Highland Copper company has been working three or four men on a claim adjoining its property which was secured under and hond several months ago. With all the prospecting that has been done on the claim, it is learned no re-sults worth spenking of have followed. The company now has decided to aban-don work on the claim on the first of the year, unless some disclosures are made, and work its own cialms, where there is said to be a good showing. A 50-foot shaft has been run through the upper wash and after doing about 250 feet of tunneling the contact has been reached. This will now be followed in the endeavor to find the ore chute. UNITED VERDE COPPER CO.

### Motion to Make Permanent Injunction Re. straining Sale

In the Supreme court at New York today Judge Glidersleeve heard argu-ments on the motion to make perma-nent an injunction to restrain the sale of the United Verde Copper company

the mines and smelters of which corporation are at Jerome, Ariz.

The action was instituted by George A. Treadwell, who owns 40,000 out of the 200,000 shares, William A. C. Clark, the 200,000 shares, William A. C. Clark, United States senator-elect from Montana, and his family holding 244,000 shares. The purpose of the proposed sale is to-abandon the company's New Jersey charter and effect a reorganization under West Virginia charter. Judge Gildersleeve took the papers and received his decision. reserved his decision

IN BOISE BASIN. Rich Claims Being Opened Up in Baboon Gulch.

In speaking of the 200-foot ledge recently cut in the "Gem of the Moun-tains," in Baboon guich, whilch is being operated by J. B. Emery and J. N. Hall, the Idaho City World has the fol-

lowing:
This twenty-foot ledge carries gold throughout its entire width, and the owners and those at work in the mine, who have carefully sampled it, say it will mill at least \$10 a ton. The vein will mill at least \$10 a ton. The vein matter is very much like that of the Lucky Boy. This ledge at the surface is from six to eight feet wide. At the is from six to eight feet wide. At the depth it was cut, about 100 feet, the ledge is not only much larger than at the surface, but the ore is of a higher grade. The best surface prospects obtained are from the ledge running northwest and southeast, which connects with the 20-foot ledge tapped the cross-cut. A cross-cut has been started from the station to tap this ledge, and it is estimated that a distance of 30 feet will reach it.

This ledge crosses the extreme head the main feeder of the rich placers of this famous gulch, which has probathis famous guich, which has probably produced more gold than any other gulch in the Basin containing the same era of placer ground. It is a small gunch, yet it yielded somewhere between \$150.000, and \$200.000.

Emery and Hall own two other quartz claims north of the Gem of the Mountains, the first, the Harrison and the next the Cold Bait and also

the next the Cold Beit, and also o southwest extension of the Gem of the Mountains, named the Summit. This claim extends to Willow Creek.

#### MINING NOTES. The Tesora marketed a car of ore today,

Nine cars of ore were on the market today from the Centennial-Eureka. A report from the Aetna at Halley says that the gold values are increas-

It was expected that Col. S. B. Milner would reach town today from Iron

After visiting Mercur for the past two days John Dern is expected home this evening. Another car of copper pigs weighing 60,000 pounds has gone east from the Highland Boy smelter.

A car of ore was marketed today from the Glasgow and Western prop-erties in Nevada.

The Taylor-Brunton sampler reported ten cars of ore from Tintic and one from Nevada today. R. G. Legg will leave for the Dexter mine as soon as Col. Milner is ready

to accompany him. The management at the Lion Consolidated, of Stockton, is securing figures on its proposed gasoline hoist.

Col. O. P. Posey's smelter man is ex-pected here from Leadville during the next yew days to look over the smelter

An improvement is being made in the

Conklin sampler which has slightly retarded operations at the mill during the past day or two. Work is being pushed at the Vespas ian-Hoogley tunnel. A very hard quartizite has been encountered which

makes progress slow. J. A. Cunningham arrived from Tintle last evening where he has been giving his attention to the grade of the East Tintie railway.

A dance will be given this evening in the Sixth ward hall. A general invita-tion is extended, and a good time is assured all those who attend.

It is reported that the Wasatch group of 12 claims has been bonded to Park lity men for \$60,000. The lease and bond expires in two years. A royalty of 15 per cent is required by the Hoyt on all ores sold before the bone is taken up.

## A WELL-KNOWN **NEW YORKER**

pays this tribute to the Burlington's dining-car service; "The dining-car service of the Buri-

ington route is about the best there is. On every table in the dining car is a fresh bunch of American Beauty ross, one of which the waiter affixes to your coat when you have finished your meal. The cloth is changed with each guest, no matter how little soiled. The menu, though not long, is wonderfully well selected and admirably served." Go east on the Chicago Special, which

Vestibule Flyer, which leaves at 16:39 p. m., and you can see for yourself how good, how clean, how reasonable in price, our dining-car service is. Tickets at offices of connecting lines.
