#### Circular Issued in View of the Possible Recurrence of Smallpox.

The State board of health has sent out the following circular letter to all the health officers in the State:

In view of the recurrence of the epidemic of smallpox which is to be expected to prevail with the approach of cold weather, it is recommended that local boards of health take active mea-sures before the beginning of the school session, to secure the thorough clean-ing and disinfection of all school buildings within their jurisdiction. The county superintendent of schools in each district has been requested to con-fer with the local board of health and arrange for the performance of the work. It is suggested that the floors and wordwork of all school buildings

and woodwork of all school buildings be scrubbed with a solution of corrosive sublimate of a strength not less than 1 to 200, or chloride of lime six ounces

to one gallon, and that formaldehyde fumigation be also used. Where any doubt exists as to the efficiency of dis infection in any premises where th disease has existed during the past epi demic, it is suggested that these sam measures be adopted. Precautions at especially needful with respect to cloth ing worn last winter by persons inhal iting infected premises. Before bein again used they should undergo the ough formaldehyde disinfection.
