\$10, Brick House, 5 rooms, 6th Ward.

SAVED THEIR BACON. ROASTING A PIG UNDER AN EXTREME-Saturday. . November 5, 1857, THE TRAIN DISPATCHER. BY CHAS. NEWTON HOOD.

It was forty-eight minutes past midight by the regulator in the train disatchet's office.

I sat before the table on which was he instrument which operated wire No. 9, running up the single track division of the road, eating my lunch between train reports and orders.

The other assistants, of which there were three besides myself, were each busy with a division wire, and the chief was in his private office, from which he had not emerged for some ime; and as the old man had been un-well for a number of days, the koys and resolved not to disturb him uness it was positively necessary. There was a couch in his private of

ce, and it was tacitly understood out-kirts of town. among his assistants, with whom he was a general favorite, that he was uletly taking a little nap. Suddenly my instrument called ex-

citedly \$3350 Thirteen acres in city plot, No.1 high and dry.

\$8000 A fine farm of 80 acres, all fenced, good orchard, fine shade trees, on Cottonwood; splendid brick house of 8 rooms, closets, hal, etc. As good a farm as

\$1600 Fifty acres of No. 1 Land, in 27 Sordan Canal. Fine chance for investment elow the junction, and asked for No.

the west bound express. WE CAN FURNISH SO 0 ACRES OF The night operator at Verona, was the only and idolized son of the dis-outcher, a bright lad, only 17 years of gain, full water right, etc., etc., and imin the road at that lonely way station. A Good Farm of 160 acres, all fenced and p anted; good house, flowing well, very cheap, price only \$3,500.

\$2500 A splendid farm on Mill Creek of lucern hay, modern style house of 5 rooms, first class water right. The house is new. This is a bargain; should sell at onec; part down and part pay on time will do. boy. Big Joe and little Joe we used place to do our work. to call them in the office, and there vasn't a man there who didn't love hat light hearted, wide a wake lad, as WILL BE SOLD AT A BARGAIN, 16 bough he was their own. Little Joe answered my call, and

aid that he thought he could just see plendid fresh water lake on it with fres he express coming around the curve I wired him to swing her up for

> orders. Just then the old dispatcher called, "Brown, come in here quick." I ran into the little office. Mr. Drexel vas lying on the couch, and, by th

tim -light of the shaded lamp, I could see that his face was flushed, his yes had a feverisb, unnatural glare. "Brown," he said, "is there anything

white wall.

that wall? Look close." I examined the plain, while washed urface of the wall, wonderingly. "Nothing at all, sir," I answered. "No picture painted on it, or anyhe queried.

"Not a mark, sir. Only plain, white wall. Why do you ask?" "On, nothing. How are 9 and 74?" I told him, hurried back to my in

Galley's station, a point almost nidway between Vernon and Munroe unction, where there was no opera-, but abundant branch room. There was a luil in business on my

wire for a few minutes, when suddenly from the inside office ? "Brown! Oh! Brown; for God's sake come in here." I rushed in. The old man sat bolt

pright on the couch, his hair was ssed wildly about and he was gazing

excitedly at the wall with eyes almost shell on the front of the house where starting from their sockets. He did it came out, but as we opened the door not look around as I entered, but razed as if fascinated at the pure, white wall.

I saw in a moment that the dispatch-er was feverish and delirious. For a moment he did not speak, and then, barels warm but our nic was reacted srough and through. The stove was arely warm, but our pig was roasted with a canvass roof, near Oelrich's, iching out, he drew me close to him in splendid style—a rich brown, and as tender as could be asked for. It was quite dark before we finished up, but we saved our pig.—Wilber II. Webber, Lampasas, Texas, in National Tribuna with one hand, and pointing with the ther he said, rapidly: "Do you see there; No. 9 is coming. Littule Joe is trying to stop her. On God! His lantern has gone out. See it is trying to light it-he fails-the

THE BASEBALL CURVE. AN EXPLANATION OF HOW IT IS MADE.

LY LIVELY ARTILLERY FIRE.

A baseball pitcher causes the ball he It was some little time after the bat-the of Baton Rouge. We had concen-trated our forces upon the Govern ment grounds and thrown up a line of the transmission of the same principle is that a billiard player gives a ball "Eng-lish." This principle is that they both cause the greatest friction on the ball to be on the side they desire repelled. carthworks for better protection. We For instance, if a billiard player is were in continual expectation of being attacked by the enemy—in fact our cavairy pickets were generally skir-mishing: Our infantry pickets were stationed about a mile from the river, forming a circle around the town, and

had orders to retire if attacked, so that strike the ball so that it will rotate tothe gdnboats could shell the enemy. On the day in which the events nar-is first to strike. This rotation will rated happened, a squad of Company greatly increase the friction of the H, Sixth Michigan, was posted on the ball against the rail and cause it, when last street parallel with the river, in leaving the rail, to take a direction the street leading back from the river much nearer the player' than if he single pickets or videttes were well advanced, while the relief of reserve remained some distance in the rear, were immediately thereupon to be

near some rough, new houses on the transfixed by an immovable perpendicular axie, its tendency would be to The whole town had beer, deserted roll the side of the table along in the by it inhabitants during and after the direction of the rotation; but as the battle, fleaving their bouses just as table is immovable instead of the ball, they had been living in them, already the ball tends to move in a direction furnished. Going on picket was al-

citedly. I ind my piece of pie carefully down on a clean message blank and re-sponded. It was the operator at Monroe Junc-tion, and he reported freight 47 as in sight. I ind my piece of pie carefully down avays our opportunity of supplying ourselves with meat, and for that rea-son we were always ready to go. We had gone out early in the morning, and while two were on post the remaining four were industriously foraging. By will be the greatest on the side from while the greatest on the side from I was a lit le surprised that the train twelve or one o'clock we had beef and which he wishes it to curve. For inshould have gotten there so soon, but a good, nice pig, just large enough to stance, if he desires to make it curve to the right (with reference to him-Up to this time we had not thought self), he will cause it to rotate from of entering any of the houses, but the right to left, so that the point of the necessity of roasting our hard earnings greatest friction will be on the left led us to look around. Sure enough, side. The rationale of this is that th

archer, a bright lad, only 17 years of in the first house of three snug little left side of the ball is moving against rooms we found everything we wanted. The air in front of and on this side of A clean little kitchen, well fitted up, it, while the right side is moving as His mother had died sometime before, and I never knew a father and son on the wall, and in a safe close by, salt, tendency of the first described motio rapidly in the coutrary frection. Th nore devotedly attached to each other pepper and any other condiments like- is to compact the air in front of the than were the old dispatcher and his is to be called for, seemed just the left side and force the ball over to the right, while the tendency of the motion

Corporal Joe Snaw and myself were of the left side is to reduce the atmos-fire started and the pig well under way rections of his curves is only limited cooking, when we were startled by a by his ability to vary the direction of vely suboting on our left, and ci ect- the axis of rotation of the ball. It the gun boats commenced throwing may not be known to all the readers of hells over our heads. Joe and I con- the Star that the phenomenon of curves sulted as to the best course, conclud- and spheres rotatory in a direction ing that it was best to get out of the across their line of flight led to the inhouse, as we were in direct line of vention of rifling in freafms. The shell throwing. We started to take fight of smoothbore spherical shot, our pig, but it was so hot, and not especially in cannon, where the differ done by an hour, that we left it, hopeace in the size of the ball and that of g to return. We put one more stick the bore of the gun was material, was wood in the fire, grabbed our guns sufficiently eccentric to make artillerists

mill. And the farm was not only well supplied with improved machines and implements, but these were well without a minute to lose. The engipainted and kept under cover. seer reported that he had noticed nosignal man at Verona, but on the pilot and fore part of the engine were found blood and brains. He fears the operstor may have keen killed. Orders telivered O. K."

Just tang, the doctor came, and went with film into Mr. Drexel's pri-vate office. But there was no need, of iss services; the old man isy just as just leinim, his gray hair diskeveled one hand raise before his face as if to shut out some horrible isjkit-dead The doctor said that his death must have been caused by heart disease.
