

CLUB CHAT.

Costumes. Tableaux from a number of Dickens' books were successfully given and the entire evening proved very interesting. Cut flowers were used in decorating the rooms and a luncheon was served, the committee in charge were Mrs. G. W. Thatcher, Miss Wilkinson, Miss Huntman, Mrs. Ball, Mrs. Ennis, Mrs. W. S. Langton, Mrs. S. O. Stevens, Mrs. Guy Thatcher, Miss Smith.

Mrs. Oliver H. Dodge was the hostess at a most enjoyable afternoon party at her home on Saturday last. The rooms were tastefully decorated and a very dainty luncheon was served. Cards were played and Mrs. Seligman and Mrs. Alf Cole received the prizes. Mrs. Dodge's guests were Mesdames M. J. Ballard, Alf Cole, Moses Thatcher, Jr., Arthur Dodge, Hume, J. W. Naylor, A. H. Thompson, H. R. Peery, J. C. Smith, Guy Thatcher, L. LaFaut, Jos. Newbold, J. E. Shepherd, E. W. Robinson, Jos. Cardon, S. B. Thatcher, Wright, W. McLaughlin, David Eccles, Farmer, Lee Thatcher, N. W. Kimball, Ed Seligman.

On Friday evening of last week the following guests enjoyed a very pleasant evening at cards, at the home of Mr. and Mrs. Geo. Hayball. Messrs. and Mesdames Tolson, Murdoch, C. C. Johnson, Robert Murdoch, J. H. Hayball, G. W. Cole, A. L. Cole, P. C. Thatcher, C. Jones, Bartley Cardon, Joseph Newbold, Joseph Newbold, Jr., Ole Sonner, Mrs. Guy Thatcher, Misses Hazel Love, Nellie Edlin and Lucile Hayball, Essie Nelson, Laverne Murdoch, Messrs. O. A. Nelson, Peter Nelson, Harvey Johnson. The prizes were won by Mrs. Bartley Cardon, Mr. Peter Nelson and Mr. and Mrs. Geo. W. Cole.

Mrs. Geo. H. Champ was the hostess at the meeting of the U. C. A. Woman's club on Saturday afternoon last. The life of Charles Dickens and the story of his David Copperfield were presented by Mrs. A. H. Thompson. At the conclusion of the program refreshments were served.

The faculty of the B. Y. C. held a student's reception on Wednesday evening which proved to be most enjoyable to the many who were present.

A very pleasant affair of the week was the social given by the people of the eighth ward and held in the new meetinghouse. An entertaining program was given after which dancing and refreshments were enjoyed.

Mr. Joseph S. Larsen and Miss Sarah Merrill were married on Wednesday of this week, the ceremony having been performed in the Salt Lake temple. Mr. and Mrs. Larsen are both well and favorably known here and have a host of friends who extend hearty congratulations.

The Wobey society of the B. Y. C. gave prepared the following program to be given at the meeting to be held on Saturday. Early American literature—Marion Hendricks. Vocal solo, Miss Jackson. Life of Hawthorne and Poe by Mrs. Alice H. Wright.

The football boys of the U. A. C. left for their trip to the coast on Tuesday morning.

Mr. John Q. Critchlow, Mr. Sam Porter and Mr. W. H. Burrill spent part of the week in Logan.

Prof. E. D. Ball left on Monday for Washington, D. C., on business connected with the U. A. C.

The violin recital given by Prof. Spicker, assisted by Mr. H. G. Smurthwaite and Mr. S. H. Clark, was a pronounced success and a rare treat for all who attended.

Mrs. A. M. Flemming is at home after a stay of three months at Nashua, Iowa.

The Sorosis girls of the U. A. C. entertained the football boys at dinner on Saturday last.

Mrs. E. D. Ball gave a most interesting paper on the life and writings of Jans Austin before the members of the City Circuit on Wednesday afternoon. The meeting was held at the home of the president, Mrs. J. E. Shepherd.

Mrs. James H. Linford announces the engagement of her sister, Miss Ivy Blood to Mr. John E. Hill. The marriage to take place Nov. 25.

Mrs. Luther Howell entertained informally on Monday afternoon.

Miss Ray Campbell and Mr. Sergio Campbell left for Salt Lake on Thursday.

Mr. Leo Campbell and little son Bob, spent Thursday and Friday in Salt Lake.

EUREKA.

Miss Helen Shriver, daughter of M. and Mrs. W. F. Shriver, entertained a number of her friends Thursday afternoon, at a birthday party given in her honor. Games were played and refreshments were served, all of which went to make the affair of a most enjoyable nature.

Mr. and Mrs. L. S. Allcock and Mrs. William Ferguson left last Saturday for Orange, California, where they will spend the winter.

Mr. Fred Nyquist and Miss Hannah Lofund, both young people of Eureka, were granted a license to wed this week by the county clerk at Nophi.

Jackson McCrystal and his brother, John H. McCrystal, came out from Salt Lake on Tuesday for a few days.

Mrs. Fred Foulger left Tuesday afternoon for a visit with friends at Salt Lake.

Mrs. F. A. Shontz, accompanied by the mother of Mrs. Shontz, were here from Provo, during the week visiting friends.

Mrs. Frank Beesley and Mrs. C. E. Huish returned Thursday evening from a few days spent in Salt Lake City.

The members of the Ladies' Republican club held a very pleasant social session Monday evening at the home of Mrs. Hicks. The hostess served delicious refreshments and during the evening the male quartet called in and treated the ladies to several choice selections.

Father Keeley of Salt Lake held services at the Catholic church last Sunday, returning to his home the following day.

Mr. Herman Coleman and Marie Backman, both residents of this city, were joined in marriage last Sunday, the ceremony being performed by Rev. Allison of the M. E. Church.

Mrs. Dr. Laker left Monday for a visit with friends in Salt Lake.

Miss Eliza Bonner and Miss Kelly returned Sunday evening from Salt Lake, where they spent a few days with friends.

Mr. and Mrs. Phil Clark returned Tuesday after an absence of three weeks at Long Beach, California.

Mr. and Mrs. George Moulton were called to Payson Tuesday by the death of the latter's father, John H. Frank.

and each strand arranged over the crepe.

The whole coiffure this season must be wavy and loose and graceful. The general tendency of the fashionable coiffure is toward the Grecian style of hair dressing. Knots are well to the back of the head and in some instances are very like the old "Psyche" knot, so much in vogue two decades ago, but in all instances looseness and wavy lines are retained.

To make paper fireproof, whether written, printed, painted or stained for hangings, dip it in strong alum water—a saturated solution—and dry thoroughly. Test after the first dipping—if it burns, dip and dry again. Neither color nor quality will be in the least affected; on the contrary, rather improved. I protect my little deeds and insurance policies this way.

In making iron-holders slip a little piece of asbestos between the outside and the lining. This will absolutely prevent burning through the holder, and the holder will last twice as long.

As Thanksgiving is a national custom, it becomes us to treat it handsomely and make it not only a feast to the palate but to the eye. Nothing can do this so well as the adornment of the table with flowers and leaves and vine, making its appearance as charming to view as its aroma is to the appetite.

If you haven't a brilliant little scarlet poinsettia for the center of this table, now is the time and place for the dish of ferns you brought in, some time ago, from the wet places before the frost touched them to withered

Nearly everybody knows that Ivory Soap is the best of bath, nursery and fine laundry soaps.

But a great many people do not know that it is just as good for toilet use as for the bath and for fine laundry purposes.

It is, though, and for the same reason: It is pure soap and nothing else.

Ivory Soap
99 1/100 Per Cent. Pure.

cleanser equal portions of lemon juice and alcohol help to remove stains. It should be applied upon absorbent cotton wound about a sharpened orange stick. At night the hands should be liberally anointed with a toilet cream, and loose white cotton gloves worn to keep the bed clothing.

Lemon juice will cleanse other things besides the skin. Copper may be cleaned by rubbing with a lemon and salt. It should be wiped at once

with a cloth or chamols. Iron rust and ink stains may be removed from linen by rubbing with lemon juice and salt and then exposing the spot to the sun.

For feverishness and unnatural thirst soften a lemon by rolling it on some hard surface, cut off the top, add sugar, working it down into the lemon with a fork; then slowly suck the lemon.

Here is a recipe for a simple shampoo made of lemon. Pour the juice of three lemons upon two ounces of salt of tartar, add about two quarts of warm water and use as an ordinary shampoo. This will make the hair soft and fluffy, and is an excellent cleanser. If one has sufficient time at her disposal it is a good idea to boil the juice, boiling the skins with it. This makes a stronger solution of the lemon. A few drops of perfume, or attar of roses, added will leave a faint scent upon the hair. The mixtures of salts of tartar should never be allowed to stand. It should be mixed fresh for every shampoo.

To get rid of the taste and smell of fish, baked or fried, wash the vessel they were cooked in well with soap and water; dry it, then scald with boiling vinegar, or vinegar and water.

To clarify rain water that has turned dingy and greasy looking from standing in either a cistern or barrel, mix half a pound of powdered alum and half-pound of powdered alum, and add to the water. The pound mixture is sufficient for 50 barrels of water—it can be duly proportioned. In a few hours the water will be clear, and all sediment at the bottom.

To cure a burn, cut open and scrape a white potato, bind the scraping to the burn. Repeat if the burning sensation returns, which may occur if the burn is very deep. This is unfailing if done properly.

Defense Against Airships.

IN any naval war that may break out even in the near future between Western European powers, it is certain that the dirigible balloon will be put to a practical use, that theories of attack and defense against airships, and tables for the use of combatants, are actually being prepared.

The problem of the protection of vital parts of a ship exposed to attack from above is very complex. In the first place explosives from airships will be shells that explode on contact with any object, so that merely to provide a ship with sloping shields to divert the missiles into the sea will be insufficient. Designs have, however, been drawn up for attaching torpedo nets overhead, and experiments are being made in protecting vulnerable points from attack from above by plates.

In the ships now building, the matter has been considered and the writer has seen the designs of some new battleships in which provision is made to readjust the armament and armor at short notice. This would have to be done in dock, for it would be necessary to

feet up, and in a moving vessel, trying to hit a moving object!

But there has been no practical test of this form of warfare, and it is certain that many of the projectiles sent down would fall wide of the mark were it not that new light has been thrown on the subject, and the airship rendered far more efficient as a war vessel by a Frenchman's very simple discovery.

This can be described in a few words. The airship will carry one or more long strong wires wound on reels. The wires will be anything up to 3,000 feet in length. When it is desired to attack a ship, a torpedo or bomb is lowered by the wire to within a few feet of the object of attack, and when the explosive is directly over the mark it will be released by electricity operated by the artillerist on the airship half a mile overhead. This operator presses the button at the precise moment when looking down he can see the explosive in a direct line between him and the mark. To insure success the artillerist will be the officer who is steering the airship.

Maj. Moedebeck, in summing up the question of airship conflicts, adds that in the case of airship against airship attempts will be made to cut at each

ONE-SIDED EFFECTS THE FAD.

Directly traceable to classic influence is the frock which, commencing in one shoulder, crosses the figure and continues to the skirt hem. The striped effect of this skirt of hair-lined satin is carried out by the net bodice, which is braided in close rows with narrow soutache. A border pattern made with the soutache edges the bodice in very effective fashion.

will also be given on topics of importance to the league.

A most important affair to take place early in the new year is the International Exhibition of Popular Arts, J. M. Berlin, commencing Jan. 27, and ending on March 1. It is of special interest to Salt Lake, as Mrs. C. E. Allen of this city has been appointed chairman for the United States, and is busily engaged in collecting specimens of art for the exhibition. A number of local women have already contributed to the collection—Indian baskets, Navajo rugs, Kersey patchwork and a number of other things representing native art. Mrs. George Vanderbilt of North Carolina has also volunteered a number of beautiful articles, and a wide interest is manifested in the enterprise. Among the local women who will send articles are: Mrs. E. E. Holmes, Mrs. J. M. Durr, Mrs. A. T. Moon, Mrs. H. P. Myton, Mrs. David Keith, Mrs. Byron Cummings, Mrs. G. F. Holman, Mrs. Jacob Moritz, Mrs. C. S. Yoder, Mrs. E. X. Sloger, Mrs. W. W. Chisholm, Mrs. A. J. Hosmer, Mrs. S. W. Morrison, Mrs. A. S. Rowan of Fort Douglas, Mrs. P. A. Simpson, Mrs. J. A. Weeden of Paris, Mrs. Charles Watson, Mrs. Adrian Ellis, Miss Helen Boxrud and Emil Lehman.

gold, and for a wreath-like arrangement about it, on the snowy cloth, of the small leaves of the whortleberry pressed immediately after plucking, with all their rich tints of orange and carmine yet unfaded. If, however, you are so fortunate as to have an "akebia vine" anywhere on the premises, you can have the preferable living green. This is a Japanese hardy vine, acclimated over here for perhaps a century, whose curious flowers of a reddish-purple, male and female in one pendulous cluster, belong to the heats of summer but whose small leaves are green and delicate even in midwinter.

But if you have foregathered none of these things, you can purchase a little pot of maiden hair fern and can lay the sprays around the centerpiece, and up and down the table, just before the guests are seated, as they shrivel so soon. You can hardly have a prettier effect than this in its pure green and white contrast, unless there is added to it a tiny boutonniere at every place, made only of a single bud, together with a leaf of the rose-geranium—on-verbena flched from those provided for the finger bowls. As such a table one dines without feeling as if "were satisfied" only the material taste.

A delicious dish may be made by peeling and baking potatoes in a hot, quick oven. They may be placed directly in the oven if clean, or on a tin plate; when brown on one side turn over and the potatoes will be the most tempting dark brown. A moderate oven will make them unsightly gray, hence the hot oven.

There is no excuse for rough or stained hands nowadays, no matter how much time you spend in the kitchen. A slice of lemon, or a skin from which the juice has been squeezed, rubbed on the hands will remove stains of all kinds; as a nail

sary to reduce the heavier armament and provide high-angle fire gun carriages and protect parts of the deck.

German artillerists have laid down the general law that against airships and balloons shrapnel is the most effective. Shrapnel is a shell that explodes at a regulated distance, and then spreads fanwise, its crowd of small bullets carrying destruction over a large area.

For the use of German artillerists, military and naval, a range finder for aerial assaults has been devised, although at present the various arms are not provided with it.

To artillerists, as problem involves the range and accuracy attainable in dealing with objects in the air are mere matter of arithmetic, and there can be no doubt at all that in the very near future the British navy will be familiar with the practice of these theories. As long ago as 1870, by the Krupp invented a balloon cannon for use against airships.

On the question of attack from airships we can turn to the German army manuals for instruction. Shells exploding at contact or containing poisonous fumes will, according to Maj. Hermann Moedebeck, of the German balloon division, be the missiles generally used. The question of discharging them accurately has been solved, but in a manner that does not even yet enter the drill books. It is, indeed, the discovery of a Frenchman, Krupp, that the airship artillerist will have to consider the height of his vessel and its speed. For certain special projectiles the rate of falling has been estimated and tabulated. How important this is will be appreciated by any one who has attempted to let a stone fall from a cliff 50 or 100 feet onto a given object. This is a task that requires great skill even on a perfectly still day. How much more so, then, when you are 2,000

SILK COATS WORN WITH WOOL SKIRTS.

A pronounced fad this year is the little coat of silk or velvet which adds a particularly dressy air to the afternoon gown of soft wool fabric. This attractive example of the silk coat yogue is of fine-ribbed Bengaline. The decided cutaway outline is followed by a well-designed pattern in appliqued silk cord. The coat opens over a waistcoat fastened with big buttons.

other with suitable apparatus, a somewhat appalling development of the running that used to be a part of naval warfare. But according to this authority, so far from increasing the horrors of war, the result of the use of airships in war, he says, will be that much of the effect of artillery fire will be more accurately directed toward the destruction of the enemy's artillery and other machinery of defense rather than at human lives, and there will be less accidental destruction.

There is much greater accuracy and economy in the use of destructive agents.

But what about war at sea? Here, again, so far as the future can be pierced, there is no reason to imagine that airships will send great ships to the bottom. At the utmost they will be able to put a ship's guns out of action, or to render the crew helpless, and they will be used to observe the effect of the fire of the sea ships of their own side.—Cassell's Saturday Journal.

ANYTHING FOR THE "COME-BACK?" Little Boy (in a shop)—How much are the plums?

Father.—Twelve cents the pound. Little Boy.—Do you allow anything on the stones if they are brought back?—Bon Vivant.
