the building of reasonably good road-ways can be provided for by legisla-tion. One highway, especially from Valdes to Eagle City, a distance of about 500 miles, would open a rich coun-try, and its construction, be believed, would develop that section in a re-markable way. The people believed, he added, that the immense copper depos-lits poth of Valdes would be exploited if this road were built, and would be naturally followed by private capital constructing a railroad along pratient-ly the same routes. At present there are no palloads in this territory. The sub-committee considered the whole Alaskan situation carefully, and gathered a vast amount of information

By Firm Attitude of Czar Towards Turkey.

Wards Furkey. London, Oct. 2, —With the exception of the revolutionary report of the mas-sacres at Mchomia, which is identical with the town of Razlog, there is little news from the Balkans. The semi-official Journal de St. Pe-tersburg, commenting on the visit of the caar to Emperor Francis Joseph, de-clares that the firm language employed by the representatives of the Russian and Austrian governments at Constan-tinople and Sofia has averted war for the present. Vigilence of Railway Company Stops Their Operations.

Stops Their Operations. Helena, Mont., Oct. 2.—The vigilance of the men employed by the Northern Pacific to patrol its right of way in Montana has had the effect of stopping at least for a time the work of those who are trying to blackmail the company. Special men are patrolling the track, all section men are on the watch, and night and day every foot of the line is guarded. A few days ago a section man who was going over the line ahead of the Marysville train, found on the track who was going over the line ahead of the Marysville train, found on the track near a bridge a stick of dynamite with a small fuse attached. Special Correspondence. London, Sept. 19.-If London firstnights keep on being as lively as they have been recently, play-goers here will be likely to hesitate about attending one of them without previously taking out an accident policy. At the first performance of "The Admirable Crichton"

a strike of stage carpenters took place.

When R. C. Carton's comedy "A Clean Slate," was introduced at the Criterion,

And though Oscar Asche had the sympathy of the brilliant first-night audience at His Majesty's the other night, when, clad in full armout as Bolingbroke in "Richard II," the ac-tor was thrown full length on the stage at one "buck" of the restive horse he was riding, it is doubtfol if the society folk seated near the stage were not more concerned test the frightened sized's next pluge might carry it over

Asche was uo soner in the saddle than his horse made a leap forward, breaking away entirely from the supers, and for a moment it looked as if he might plunge straight looked as if he might plunge straight to the audience. But instead, the brute backed yoward the rear of the stage, and there began to plunge so viciously that the audience forgot any fear for its own skin in anxiety for that of Asche. And sure enough, an instant later, both the actor and his steed went down, the former with his mailed foot in the stirrup—and there was a tense moment when the chances were that Asche would be either rolled or tram-pled upon in full view of the audience. He was pulled out of harm's way, how. ever, just in time. The curtain had the was putted but on harm s way, now-ever, just in time. The curtain had been rung half down, but, at a sign from Asche, now on his feet, the cloth was raised again, and "Bolingbroke," in a rather shaky voice, delivered his speech of farewell to England. At the close of the net he rol a whole-hearted speech of the act, he got a whote-hearted cheer for his pluck, but playgoers are beginning to feel that the ordinary di-version furnished by a first production is ample, and that "thrills" not fore-shadowed by the program are apt to make unwelcome.
