

A TWENTY MILE EXHIBITION RACE

Emery and Gunn are Failures as Long Distance Riders.

BAKED IN THE FIFTH MILE

The Other Events at the Saucer Were Interesting—Smith and Samuelson Take a Tumble.

Through his ability to stick to his pace and the inability of O. E. Emery and J. P. Gunn to stick to their pace, Charlie Turville carried off the prize and some applause at the Salt Lake last evening. The event was practically a repetition of the twenty-five-mile affairs and did not stir up the people to the half-raising wild shouting stage. In the vernacular of the cyclists, Turville had a "couch" and he knew it long before the race began. It didn't take the crowd long to comprehend it, either. As previously stated, the result was made from ability and inability to hang on to the paces.

Both motor-cycles were in perfect condition, and on exactly the same footing, so it was not the fault of the riders.

Julius, the "Horrible," and "Me Brother," Clem, navigated Turville's machine, and John and Gus Lawson rode the "Terrible" motor. The start was made from opposite sides of the saucer, and was as fair as could be. During the course of the third mile Turville steamed up a bit and showed his heels to Emery, who started first, much to the delight of the spectators. When Emery's ten miles were covered Turville had two and a half laps the better of it.

Gunn came on then, riding a 112 geared wheel. As a colored man put it, "Gunn and his wheel are not 'zactly contemptible."

When Gunn did get started he took on a spurt and made up half a lap. Then slowly but surely he began to cool, and when half of his allotted distance was covered, he was baked a good brown. Emery came to his relief and finished the race. Following is the time made by Turville:
