DESERRY EVENING NEWS.

Thursday, - - June 17, 1807.

WEEKLY CROP BULLETIN.

Report of Climate and Crop Sary or. Weather Boreau.

Haperia From the Past Week, Reperia From the visit of the Candidan of crops.

Condition of crops.

CALY LANE CITY, U(ab).
Jone 14(a), 1207.
The wester during the week on ing Juse 14(b) was the warmed which has necessary for the measure. The temperature averaged considerably above the sorand, walls the prespitation was much less than the prespitation was much less than the mean than the manner of the best of the sorand properties of the blang was the properties of the blang was done to the first purchased with the southern portion of the first part and grain cope by the wind and rain. Upon the whose, the wester of the week has been generally (averable the all kinds of vegetation, though it has been rather day for the untiringed crops which are suffering from the majority of correspondent report, that the principal crops are duing well and milicans an average yield though they are also distinct where the face grain will be sinced a failure on account of Hiller interface of the control of Hiller in account of Hiller in general over the state, and in a guilder to account of the life guilder in general over the state, and in a guilder to the second of Hiller in the life.
