FALLING OFF IN BUSINESS.

Prices on the Whole Show Signs of Improvement.

DALY-WEST WANTED TODAY

Daisy in Better Form—Grand Central Stationary—South Swansea Sells—Four Aces is Bought.

TODAY'S METALS:

SILVER 59

LEAD, $4.40

CASTING COPPER 15¾

Business on 'change today shows a falling off when compared with yesterday. A few of the heavier stocks were traded in today at better prices.

Grand Central sold at $6.10, while Daly West climbed to 12.80 and Mammoth responded at 2.80.

South Swansea sold at 1.20, while a future went as low as 1.18.

Joe Bowers hung around 14½. Valeo dropped 100 at 74½, and Four Aces let go 500 at 6.

Daisy participated up to 14¾, Northern Light sold at 16½ and Bunker Hill went at 4.

Quotations were posted as follows:

PRICES RAN OFF SHARPLY.

Trading in Stocks on Wall Street Was Mixed Considerably.

Call Money Keeps High—Live Stock Rates Strong—Produce Market Quiet.

New York, Dec. 6.—Prices moved up sharply at the opening. The recoveries were most marked in internationals, in sympathy with strength in the London market, the exceptions on the side of losses being among the specialities. Covering operations in sugar and leather raised them substantially, and there were important gains in other issues. Meanwhile liquidation in tin plate preferred forced it down four points, and the metal group eased off in sympathy. Prices in the main were inclined to work off before 11 o'clock. Stock trading became almost lifeless until midday when animation developed and prices ran off sharply. Tin plate common lost 3½, and Manhattan, sugar, Brooklyn Transit, the coalers and some of the iron and steel stocks 1 to 2. A sudden rally of 1¼ in sugar somewhat steadied the market. Bonds showed steadiness despite the light demand.

The covering movement became rather urgent and recoveries were made of 1½ to 3 points in industrials, which had suffered most. Tin plate rallied 5. The railroads became more active on the advance and one or two were marked up a point above last night's level. The closing was moderately active and irregular at mixed net changes.

MONEY AND BONDS.

Money on call firm, at 7 per cent. Prime mercantile paper 5½@6 per cent.

Sterling exchange firm, with actual business in bankers' bills at 4.86½@⅝ for demand and at 4.81½@¾ for 60 days; posted rates 4.82½ and 4.87½; commercial bills 4.80¾.

Hogs—Receipts, 500. Market steady. Light packers, 3.75@3.80; mixed and heavy, 3.80@3.85.

Sheep—Receipts, none.

SAN FRANCISCO MARKET.

San Francisco, Dec. 6.—Wheat, easy May, 1.06¼; Dec., 1.00, 1.10½; cash, 97½.

Barley, not quoted; cash, 82½.

FIGHT ON BUCKET SHOPS.

Chicago, Dec. 6.—The Board of Trade of Chicago has taken the first steps in what is intended to be a concerted movement of commercial exchanges all over the country against the bucket shop system. Resolutions adopted by the board of directors calling upon the exchanges to combine against the encroachments of this form of speculation have been circulated by Secretary Stone of the Board of Trade and a number of replies have already been received, all of which indicate a strong feeling in favor of such a movement.

The purpose of the anti-bucket shop crusaders is to strike at the bottom of the whole business by securing the aid of the New York Stock Exchange and the Cotton Exchange, which, in conjunction with the Chicago Board of Trade, form the basis of nearly all the bucket shop operations in the country. Among the exchanges which have been communicated with are those at St. Louis, Detroit, Buffalo, Indianapolis, Duluth, Philadelphia, New Orleans, Baltimore, Milwaukee, Peoria, and other large grain and stock centers. If the general sentiment is favorable to such a movement, it is the intention, according to Secretary Stone, to hold a convention to discuss the most practical manner in which to do away with bucket shops. If the replies are favorable a committee will at once be appointed to work out preliminary plans.

THE STRUGGLE BEGAN TODAY.

The Four Aces Mining Company Sues for $450,000.

A STRIKE IN THE CONGOR.

Daisy's Affairs More Promising—Centennial Eureka Company Ore From Galena, Nevada.

E. D. Lee went to Nephi today and filed the suit of the Four Aces Mining company against the South Swansea company. Judge Higgins has issued an injunction restraining the defendants from extracting any ore from the vein in dispute. The hearing of the case has been set for January 19, 1900, and a bond of $20,000 has been given by P. J. Conelly and others.

In brief, the Four Aces company alleges in the complaint that the "Four Aces vein or lode dips in a westerly direction and in the downward course passes outside of the plane down vertically through the westerly side line of said Four Aces lode patented mining claim, and enters the land adjoining, and reaches, penetrates and extends into and underlies those certain mining claims known as and called the Monroe mining claim and South Swansea mining claim," etc.

It is also alleged that since the year 1896, the South Swansea company has trespassed on the Four Aces vein and extracted ore therefrom, the value of which is believed to be $450,000. For this amount the plaintiff sues and also prays that the title to the vein from which most of the South Swansea ore has been taken, be quieted and that the defendant company be restrained and enjoined forever from extracting ore from said vein or lode.

THE DAISY'S CONDITION.

The Required $10,000 Has Been Subscribed by a Few Men.

It was given out today by the Daisy Mining company that the required $10,000 had been collected. About eight of the stockholders put up the money which will relieve the present pressure and enable the company to meet all obligations except one of $15,000 due the bank. A small balance, it was stated, will remain in the treasury after the payment of present obligations. Word has been received from Mr. Deidrich that the new mill addition will be completed by the 15th inst.

PUMP FOR THE TESORA.

Big Snow Station Pump Ordered from Supply Company.

The Tesora Mining company have ordered a new 14 by 16 by 12 Snow station pump from the Mine & Smelter Supply company. The pump has a capacity of 350 gallons a minute and can be used, if necessary, at a depth of 1,000 feet. This will be more than is necessary to overcome the present flow of water on the 300 level, which amounts to about 100 gallons a minute. The management are congratulating themselves now on their foresight in installing in the first place, a six-inch water column and a three-inch steam line. It is needed now. They also feel that the present pumping capacity of the mine will be ample for all future needs.

LIVELY IN IRON COUNTY.

Diligent Search is Being Made for Coal and Iron Locations.

Everything is lively in the vicinity of Iron City. A number of new comers are on the ground taking everything in sight. Brose Thompson of Piute county and Attorney Frew of Richfield have taken up their headquarters at Page's ranch and are making daily excursions into the hills in quest of iron properties, and also have a force of men sinking for coal in the vicinity, where they believe they have discovered a body of anthracite coal.

Col. Milner of Salt Lake has a force of men developing a group of twenty-one iron claims, which he is also having surveyed for patent.

G. C. Goddard and brother are working the assessment on the old Blair silver and copper claims, which are now located under the names of the Silver King and Tom Cat. Several thousand dollars was spent by the old Blair company in developing these properties, and it is expected that with the advent of a railroad that they will become very valuable properties. Extensions have been taken on the ledges until the group now comprises some seven or eight claims.

A party of experts from Cripple Creek, Col., also looked over the situation a few days previous, but made no locations. Everybody seems to be looking forward to a great boom in the near future.—Iron County Record.

Park City Shipments.

Following are the shipments of ore from the Mackintosh sampler for the past week, says the Record:

Silver King	1,034,200
Daly-West	648,000
Anchor Consolidated	240,000
Apex	70,000
Valeo	50,000
Loring Consolidated	80,000
Cooney Consolidated	25,850
Total number of pounds	2,148,050

ONTARIO DIVIDEND.

One of 15 Cents a Share has been Ordered Payable on the 20th Inst.

Word has been received by Superintendent R. C. Chambers, from Secretary F. G. Dern at San Francisco, that the Ontario will hand out the sum of $15,000, or 15 cents a share, on the 20th inst.

The last dividend paid by this great mine was distributed in November, 1897, which brought the total paid in dividends to the munificent sum of 13½ millions. The present dividend is smaller than the regular dividend of previous years, but it is stated that the mine and the treasury is in a condition to continue the payment of dividends now begun after a two-years' lapse. The desire to continue regular payments and the fact that a $1,000,000 suit has been planted against the company by the Crown Point Mining company, has doubtless induced the management to begin with a moderate amount. Reports from the mine, however, lead to the belief that it will not be long before an increase will be made.

ORE FROM GALENA, NEVADA.

Good Ore in Nevada Company's Claims at a Depth of Ninety Feet.

An excellent grade of ore has just been opened up in the Nevada Mining company's property in Galena, Nevada. The samples assayed showed the presence of $11.90 in gold, 29.1 ounces silver and 27.45 per cent lead, and were obtained in the winze from the 60 foot level. Sinking on the shaft is going along satisfactorily. A depth of 140 feet has been attained, and within the next ten feet the work of drifting will begin. It is expected that the vein will be tapped within 25 feet from the shaft. A new gasoline hoist has just been ordered, and the management proposes to do its work thoroughly in opening up this promising property.

RED WING CONCENTRATES.

Last Shipment will Net the Company About $450.

The last car of Red Wing concentrates was settled for today on a basis of 40.6 per cent lead, 6.2 ounces silver and 60 cents in gold per ton. The shipment amounting to 26 tons will net the company about 450. Another car of similar ore is expected in today.

STRIKE IN THE CONGOR.

Some Excellent Copper Ore Found in a Drift off the 300 Level.

A strike was made a few days ago in the Congor property, which has opened up a large body of ore on which assays returns from the face of the drift show to contain $2.60 in gold, 21.73 per cent copper and 4.2 ounces in silver per ton. The vein, which was opened up in a drift from the 300 foot level and from which the samples were tested, is said to be between 6 and 7 feet wide. Some choice specimens have been received at the office which, it is believed, will assay nearly 60 per cent copper. Recent developments have assured the management that the big vein on which they are working is widening with depth.

HIGHLAND BOY COPPER.

Shipment of Two Cars Went East Yesterday Afternoon.

Two cars of pig copper were shipped to the New Jersey refinery from the Highland Boy smelter yesterday afternoon. The weight of the shipment approximated 120,000 pounds.

CENTENNIAL-EUREKA COMPANY.

Balance of $504,000 Paid and a Meeting Called for This Afternoon.

Word was received yesterday at the office of the old Centennial Eureka company that the balance of $504,000 due on 8,000 shares of the old company's stock was deposited in New York to the credit of McCornick & Co. of this city. The announcement that the eastern purchasers had come forward with the balance before the expiration of the option has resulted in a meeting being called for this afternoon at which it is likely that the affairs of the old company will be wound up, and the title to the property transferred to the new owners. When the option was secured in August a sum of money was in the treasury, and this, it is said, will be disposed of by paying off a few debts and distributing a dividend of somethink like 55 cents a share among the old stockholders.

HOIST FOR THE NEW STATE.

A Forty Horse Power Boiler and Hoisting Machine Ordered.

Preparations were being made today by the Mine and Smelter Supply company to ship a new hoisting plant to the New State Mining company's property at Silver City. A 40-horse power boiler and a 25-horse power hoister has been ordered.

Shipment from Louise S.

A carload of ore was received at the Taylor-Brunton sampler today from the Louise S. mine at Bingham. This is the first shipment since incorporation and the owners are well pleased with the outlook. This morning it was stated by Messrs. W. F. Snyder and John W. Foote, officers in the company, that another car was expected by the end of the week and that shipments would continue until the deep snows prevent them. Even then, however, the mine will be worked and developed and the ore shipped out in the spring, when a larger force will be put to work and the property brought out among the foremost of Bingham's mines.

BROMIDE SMELTER.

A Five Days Run Turns Out Bullion Valued at $12,000.

The good word brought in by Mr. R. S. Collett from the Bromide was received with delight by all who heard it. After all the ups and downs—principally downs—that Colton & Co. have experienced in the Bromide, there is a general expression of satisfaction that the present trial run of the smelter has proved so successful.

The smelter worked as smoothly as a well regulated clock under the able directions of Messrs. McArthur and Kinnon, the experts who had the matter in charge.

There is no more fear of freezing, for the whole furnace is as hot as the seven-times-heated furnace of olden times.

A run of five days was made when the supply of coke was exhausted. During that time there was about 10,000 pounds of bullion run out, the value of which is about $12,000, sufficient to pay all the expenses of the last run.—Vernal Express.

GOOD NEWS FROM THE DYER.

Large Ore Body of Blanket Formation Found to Possess Depth.

The news from the Dyer is very gratifying, says the Vernal Express. It is a well known fact that up to the present there has been no well defined vein of ore, but that the large body of ore in sight was of a blanket formation. Now comes the news that in drift A at a distance of one hundred and five feet they have struck the vein and were sinking straight down on it. The prospects are better than ever before in the history of this great property.

AT THE STAR, PINE CANYON.

Values are Obtained in the Tunnel Beyond the First Ore Chute.

After striking the vein on the lower tunnel of the Star mine at Pine canyon, the management did some stoping and as they at first imagined, struck the hanging wall of the vein. It was demonstrated a short time ago that ore existed beyond the supposed hanging wall, and a large body of ore has since been opened up which assays from $8.10 a ton to a little over $12. Three men, it is said, can break down enough ore to run the mill. At the same time work is being pushed on the tunnel which is being run further into the mountain, beyond the first chute, with rapidly increasing values. Values running up to $3.50 have been obtained in the face of the tunnel, and indications are said to point to the near approach of another ore chute.

ENORMOUS ASSAY FIGURES.

A Salt Lake Man Makes a Very Rich Gold Discovery.

Charles Crane has discovered a ledge of phenomenal character in Custer in the vicinity of the Bull Dog mine, says the Idaho Daily Statesman. The ledge, he says, which is in a very inaccessible place, is eleven feet in width and has a remarkably rich streak from six to fourteen inches wide. The gravels found in the gulch below the ledge carry splendid values in placer gold.

Mr. Crane brought three samples of the rich streak to Manning's assay office here to have their value determined. The certificate shows enormous figures. One sample, described as black quartz, carried 1,035 ounces per ton in gold and 5,780 ounces in silver, the total value being $28,842.45 per ton.

A sample of oxidized quartz returned 450 ounces gold and 2,500 ounces silver, its total value being $10,981.50 per ton. Another sample of the same character gave returns of 627 ounces gold and 3,400 ounces silver, the value being $15,000.09 per ton.

Fine Samples of Ore.

Mr. Peter Weimer reached the city today with a wagon load of sample ores from Deep Creek. Beyond question it is the finest collection ever displayed in the city from that district. Among them are samples that run very high in gold, silver, lead and copper. For the present they will be on exhibition at No. 55 and 56 Commercial building.

MINING NOTES.

The Mammoth marketed 12 cars of ore today.

Grand Central marketed six cars of ore today.

Five cars of Swansea ore were on today's market.

Supt. D. C. Jackling of the Golden Gate mill is in town.

The Conklin sampler reported 17 cars of ore from Tintic today.

The Montezuma of Bingham had two cars of ore on the market today.

Two cars of ore were on the market today from the Galena King of Stockton.

Recent assays of samples of ore from the Excelsior property at Bingham shows $10 in gold.

A strike is reported in the Morning Star claims in the Jesse Ewing Canyon, says the Vernal Express.

A new gasoline hoist and a car of lumber has been ordered for use at the Nevada Mining company's claims near Battle Mountain.

The last 40 feet of tunneling at the Bingham Copper and Gold property is said to have occupied three months and to have cost $50 a foot.

At the delinquent sale yesterday 10,000 shares of Blue Bell Extension stock was sold, being bid in for the price of the assessment.

Today's receipts at the Taylor-Brunton sampler were two cars of ore from Stockton, two from Bingham, and six from Tintic.

Room 310 in the McCornick block is being renovated preparatory to its being occupied by C. H. Post of the Rabbit's Foot and John T. Hodson of the Tesora.

T. H. Oxnam, who is in charge of Capt. De La Mar's California properties, arrived in town yesterday, and left last evening for De La Mar, Nevada, in company with H. A. Cohen.

Anaconda Standard: Alex H. Tarbet is in the city from Salt Lake. Mr. Tarbet used to live in Butte, and he is spending a few days with friends and relatives.

The recently elected officers of the White Rock Gold Mining company are W. F. Colton, president; W. D. Higginbotham, vice president and general manager; L. P. Merricks, secretary, and Wells, Fargo & Co., treasurers. The company is operating some claims near Tuscarora, Nevada.

Hailey Times: Edward Dickinson, general manager of the Union Pacific system, and W. R. Kelly, general counsel of the same, arrived about 11 o'clock Friday night in their special train of two private cars. They slept on their cars last night, and this morning were driven out to the Croesus group of mines, while their train was run to Ketchum to turn it around. Messrs. Dickinson and Kelly are expected to stay here two or three days, and they expect to be met here tomorrow by other gentlemen who are coming in special trains.

PROPERTY TRANSFERS.

Abstract of file, recorder's office, Salt Lake county, Utah, December 5, 1899:

Charles Van Alstine to J. C. Lynch et al, warranty deed, 10x5 rods northeast from 10 rods east of southwest corner lot 2, block 54, plat B	$ 3,200

Have you ADDED UPON in your list of books for WINTER READING?

MANY PEOPLE who will not read a tract

WILL READ A STORY.

To such send ADDED UPON. For sale by all news dealers or at DESERET NEWS OFFICE.

Advertisers who desire to reach the country population of the Western States and Territories should patronize the "Semi-Weekly News;" its circulation books are open to all advertisers.

MUNYON'S INHALER CURES CATARRH

Coids, Coughs, Hay Fever, Bronchitis, Asthma and all Diseases of the Throat and Lungs.

Clouds of Medicated Vapor are inhaled through the mouth and emitted from the nostrils, cleansing and vaporizing all the inflamed and diseased parts which cannot be reached by medicine taken into the stomach.

It reaches the sore spots—It heals the raw places—It goes to the seat of disease—It acts as a balm and tonic to the whole system—$1.00 at druggists or sent by mail. 1505 Arch St., Phila.
