

Rumored in St. Petersburg that He Will be Superceded by Gen. Nicholaevitch.

RESPONSIBILITY FOR FAILURE.

Continues to be An All Absorbing Question Among Military Authorities,

St. Petersburg, Sept. 14 .- There are rumors afloat to the effect that den, Nicholaevitch, inspector of cavdry, may supercede Gen. Kuropatkin at the front. Nicholtevitch has a great fighting record, made during the Turkish war. The reports, however, may possibly be only idle gossip.

The question of the responsibility for the failure of Kuropatkin to crush Kuroki Sept. 2, north of the Taltae river, which lost the battle of Liao Yang, continues to excite all-absorbing interest in military circles. According to a Russian correspondent, she throws the blame upon Gen. Orleft, Gen. samsonoff, who commands a division of Siberian Cossacks, was ordered by Gen. Kuropatkin Aug. 31 to occupy the Yen Tai coal mines and hold the extreme left while be hunched his main army against Ku-

During the night Orloff, with the freshly arrived European reserve men, ame up, and, being Samsonoff's se-nior, took over the command at this point. The next morning, before the arrival of the daily orders, Orloff, on his own initiative, decided to attack Euroki's extreme right and directed samenoff to execute a flanking move-

ment with his Cossacks. The latter declined to do so until he had time to reconnoiter and also be-cause, as the correspondent declares, orioff's reserve men, who had not preseally been under fire, were already sealing signs of nervousness. Had samsenoff obeyed, the correspondent says, he would have been cut off and annihilated, as the Japanese were already advancing, having opened a terwhich Orloff's men flinched and fnally gave way

While in the thick of the retreat one of Kuropatkin's staff officers dashed up with orders for Orloff to hold at all amost in orders for Orion to hold at all basards the position he had just aban-doned. Orion's troops had then retired amost to Yen Tai station. There Sam-roon's Cossacks at has railled them semewhat, but all the burden of fighting the Japanese fell upon the Cos-secks. Samsonoff was informed that, den. Stakelberg was hurrying to his rescue, but the latter did not arrive unil the following day.

a the meantime, Kuropatkin, believby that his left had been turned, or-dered a retreat, Sept. 2, but Samsonof's Cossacks saved the line of retreat de Danieloff, who was temporarily command of the division while Samgood was conferring with Kuropatkin, they the Cossacks desperately at the laguese when the latter had almost suched the railroad north of Yen Tal. laughter which followed is de acibed as frightful, the Cossacks using dsir lances with terrible effect, but the Japanese managed to hold on until Stakelberg arrived and thus preserved the railroad as a line of retreat for the whole army. At one time during this figrting the Japanese were fighting The mobilization of troops ab Odessa affects the Fourteenth and Fifteenth divisions of the Eighth army corps. The Fourteenth is famous in the Russian army as Dragomiroff's division. With it he crossed the Danube in 1877 and held the Shipka pass against a Turkth army of 70,000 men. The Fifteenth division has for several years contributed the Russian detachment of troops stationed in the Island Lieut.-Gen. below 17,000, of which 4,500 were killed. In the opinion of officers who have read the report, it is favorable to Gen. Kuropatkin, practically disarming the previous disposition to criticise him. The report explains the successive withdrawal of his three lines south of Liao Yang, how the main army crossed the Taitse river: Gen. Kuropatkin's as-sumption of the offensive; Maj.-Gen. Orloff's reverse and the consequent order for the retreat of the whole army to Mukden Sept. 3.

The circumstances of Maj.-Gen. Or-loff's reverse, which Gen. Kuropatkin onsiders responsible for the necessity of his retirement were explained in these dispatches today, substantially agree with Gen. Kuropatkin's version. The latest reports of the war office, coupled with Gen. Kuropatkin's detailed report, give a distinctly more cheerful view of the situation. The army is "rested and reinforced by the whole of the first European corps. The bulk of it is encamped and entrenched around Mukden, with the rear guard fifteen miles south." On the other hand, the way office's

information indicates that the Japanese forces, which have not yet recovered from their terrible exertions and losses at the batle of Liao Yang, are concen-trated at Yen Tai, not venturing north, Small columns of a few ti susand men each occupy positions along the roads leading to Mukden, east and west of the railroad. The war office has no in-formation to show that the Japanese columns are north of Mukden.

# CEN. KURDPATKIN'S REPORT.

#### Creates a Better Feeling Towards Him -Pays High Tribute to Every Arm of the Service.

St. Petersburg, Sept. 15,-Thactivity of the opposing armies of Russia, and Japan continues and no fighting of a general character is reported. Information coming from an authoritative source in St. Petersburg is that the Russians will winter at Harbio, but the fact that there probably will be two months of good weather for military operations before extreme cold weather sets in leaves room for a re-

ision of this purpose, in the light of events that may transpire. The Jap- F. McDonald of Lake; treasurer, J. A. anese are reported to be collecting taxes and otherwise administering affairs in Manchuria as though that country were conquered territory

The publication of Gen, Kuropatkin's report of the fighting from Aug. 26 until the retreat on Mukden has created a better feeling in St. Petersburg, The report distinctly places upon Gen. Or-loff the responsibility for the failure to hold the heights in the vicinity of Syk-wantum and so to check the Japanese advance. The manner in which the retreat was carried out in the face of the terrible conditions of the country and the determined pressure of the Japanese armies, does much to restore Gen. Kuropatkin's prestige in military

The report dwells on the terrible difficulties encountered during the retreat at Liao Yang from positions on the southern front, when 24 horses and a whole company of infantry harnessed to a single gun were not able to re-neve the gun from a quagmire. It is shown that the retirement from Liao Yang to the north bank of the Talise river was carried in good order and with celerity under cover of night on Aug. 31, when it had become evident that Gen. Kuroki was making a determined drive at the Russian communi-cations north of Liao Yang.

Gen. Kuropatkin pays tribute to the courage and devotion of every arm of the service under his command, and especially to the bravery of the troops to whom was set the task of recapturng the Sykwantun hills, on the north bank of the Taitse river. The engagement of the night of Sept.

2 was productive of the most severe fighting of the whole battle. It was practically a company commanders fight, commands becoming separated in the darkness and independent units cting on their initiative with the one object of carrying out the commander's orders to retake the heights. This acount puts the Russian soldier in a very different light from the generally ac-cepted belief that he is a mere military automaton, capable only of acting in a mass under specified instructions.

Small detachments of Japanese moved northward from the Taltse river, preparations for an ad-vance evidently still continuing, although the second stage of the Japanese movement has not yet been com-pleted by any means. Japs Running Mukden.

Mukden, Sept. 14 .- The Japanese are causing a sensation among the natives of Manchuria as they advance by es-

ablishing their own system of taxation and administration as though the coun-try were actual Japanese territory. They are paying for supplies with promissory notes on the war fund, a blanket note being given for the payment of each village on the basis of population, leaving the residents to diide pro rata.

Few of these notes have yet been collected in cash, but Japanese officials are collecting a cash tax levied "for war expenses." They have even notifed the governor of Mukden to disconlinue the salt tax, as it will be readjusted upon a Japanese basis. They have almost doubled the customs duties at Yinkow, and have placed such a heavy tax upon the thousands of

boats sailing thence as practically to paralyze trade. Much bushwhacking is going on upon the road south of Mukden and many Russian soldiers have been killed from the fields of Chinese corn. However

the corn harvest will soon begin and when the fields are cleared the country will be much more suitable for military operations. The weather continues unsettled.

The conduct of the Japanese since their occupation of Liao Yang indicates a laxity of discipline. One of the first incidents after the occupation was the opening of a number of music halls.

#### Alexieff at Mukden.
