

# BERLIN WELCOMES COUNT ZEPPELIN

## AFTER SUFFERING ONE YEAR

### Cured by Lydia E. Pinkham's Vegetable Compound

Milwaukee, Wis.—"Lydia E. Pinkham's Vegetable Compound has made me a well woman, and I would like to tell the whole world of it. I suffered from female trouble and fearful pain in my back. I had the best doctors and they all decided that I had a tumor in addition to my female trouble, and advised an operation. Lydia E.

Pinkham's Vegetable Compound made me a well woman and I have no more backache. I hope I can help others by telling them what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. EMILIA MSE, 833 First St., Milwaukee, Wis.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women after all other means have failed, and that every such suffering woman owes it to herself to at least give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery.

The United Wireless company has been asked to contribute as well as Thomas Edison and Carnegie, who are old time operators.

### In The Woman's World One of the essentials is always

### HUSLER'S FLOUR

Roofs of Houses and Steeples of Churches of German Cities Covered With People.

### CRY WAS, "ZEPPELIN IS HERE"

Emperor William Presented Him to Orville Wright and They Exchanged Congratulations.

Berlin, Aug. 29.—The airship Zeppelin III, with Count Zeppelin at the helm, arrived safely at Berlin shortly after noon today. The voyage from Friedrichshafen, where the start was made Friday, was marked by an accident to the airship, which caused a considerable delay at Bitterfeld. At that point Count Zeppelin left the craft and was greeted by the crown prince representing the emperor. The emperor witnessed the arrival.

Two monarchs of the air, Count Zeppelin and Orville Wright met at Berlin this afternoon. They were introduced by the monarch of the German empire. Mr. Wright was surprised at the emperor's technical knowledge of flying machines.

In a talk with Count Zeppelin, Mr. Wright expressed admiration for the wonderful airship the count had constructed. He said he would like to see experiments with small craft on the same system, however, as vessels such as those used by the count were too expensive.

### ZEPPELIN IS HERE.

From one end of Berlin to the other, the shout, "Zeppelin is here!" rang out.

Zeppelin was happy, as the count had announced that at 12:30 he would appear over the Templehof parade grounds.

The airship left Bitterfeld early in the morning with the count, his nephew, Engineer Duer, who had navigated her from Friedrichshafen, worked perfectly and the trip to Berlin was made without mishap. Wittenberg and Jüterbog were passed amid the cheering of thousands. Potsdam was thronged with crowds.

The roofs of houses, church towers and the open spaces swarmed with people who cheered and waved to the airship. The airship field was reached just after church services. The emperor and empress had motored from the dedication service of the newly built garrison church.

They arrived at the special tribune constructed in the center of the immense field as the bows of the airship appeared over the heads of the multitude of thousands who had gathered there. sighted the craft at the same moment and a roar of cheering went up.

### CHURCH BELLS RANG.

The church bells rang out and the military band played the national anthem. Zeppelin meanwhile had descended to a low altitude and carried out a series of intricate evolutions gracefully in full view of the people. Then the balloon's nose was turned toward the city over which it circled for two hours in all directions, executing evasive manœuvres and ascending and descending sometimes coming so close to the earth that the spectators could see the faces of the occupants.

The royal party proceeded to Tegel, where a small company gathered around the imperial group on the shooting range, which was destined to the landing place of the first courtiers, ministers, officials, and the foreign attaches, including Capt. S. G. Frerichs, the attaché of the American embassy, assembled there to await the court's arrival.

The emperor who had especially sent Prof. Pergessell, government commissioner on airships to invite Orville Wright and his brother to the party, made the most hearty welcome.

The balloon came slowly over the field, the motors stopped and the vessel glided to the ground. The band played and the emperor saluted as Count Zeppelin stepped forward. The emperor then advanced and

Washington, Aug. 30.—Director of the Census Durand, aided by a score or more of experts in economics, agriculture, manufactures and statistics, is now at work on one of the most important questions in connection with the next census—the framing schedules to be used by enumerators in entering the information they secure next April.

Mr. Durand and the corps of experts are working out the form of schedules to be used in the sub-division of inquiries to be asked in gathering the information ordered by Congress. The agriculture, manufacturing and population schedules are the principal ones under current discussion.

The experts aiding the director in this great task were appointed special agents to serve until the formulation of the schedules is complete. In the preparation of the agriculture schedule four of the experts are acting as conferees.

On the manufactures schedule the attention of the following experts is being directed:

BURGEON Bell, formerly assistant editor of the English Economic Review; Arthur J. Boynton, assistant professor of economics, University of Kansas; C. W. Doten, assistant professor of economists, in the Massachusetts Institute of Technology; E. D. Howard, assistant professor of economics, Northwestern University; Emil P. Stumpf, professor of economics at Dartmouth College; Horace Ecost, instructor of economics in University of Wisconsin; A. H. Willat, professor of economics, in the Carnegie Technical School, and Alvin S. Johnson, a statistician of Chicago.

The population schedule is in charge of Prof. E. Bailey of Springfield, Mass., who has charge of the statistical economy in Yale University. A large number of special agents have been appointed in other divisions, the appointees having been named by the director because of special fitness along particular lines.

### A WEAKLING

Is the only way to describe the poor child that is afflicted with worms? If eaten, how many times often? If eaten, the worms get all the nourishment from the food, the child gets practically none. White Cream Vermifuge will do no bad after effects. Price, 25 cents a bottle. Sold by Z. C. M. I. Drug Dept. 112 and 114 South Main St., Salt Lake City.

Floating at Saltair—Nothing finer.

### MONUMENT TO WIRELESS OPERATOR GEO. ECCLES

St. Paul, Minn., Aug. 30.—A fund has been started by Telegrapher Robert B. Carr for the erection of a monument for Wireless Operator George Eccles, who lost his life in saving the passengers on the steamer Ohio, which was sunk by striking a rock on the coast of Alaska. The fund is being collected by operators throughout the United States and Canada.

The population schedule is in charge of Prof. E. Bailey of Springfield, Mass., who has charge of the statistical economy in Yale University. A large number of special agents have been appointed in other divisions, the appointees having been named by the director because of special fitness along particular lines.
